Item 9.1 – Motion by Councillor Jim Campbell – Later Living Housing

That Council:

1) Accepts points “1)” to “3)”

Deletes all from “4)” and adds

4) Recognises that the SHIP report to Housing and Economy Committee in November 2018, included the following information:

- Around 9% of the homes approved in the first two years of the SHIP are specifically designed for older people and those with complex needs.
- That the majority of new build properties funded through the AHSP are designed to meet the Housing for Varying Needs Standard.
- The SHIP includes grant funding of £500,000 annually for RSLs to carry out adaptations to homes to enable people to remain in their own homes and to live independently.

Item 9.3 – Motion by Councillor Jim Campbell – Modelling Externalities

Delete all and replace with:

“Council

1. Notes that road closures can improve the safety, health and well-being of pedestrians and cyclists and create improved city living spaces.
2. Notes that road closures may generate positive or negative changes in the road network. In some cases there may be modal shift and/or vehicle displacement: these patterns can be complex and traffic flows should be looked at as a whole, with opportunities taken to reduce overall traffic volumes and to improve conditions for those travelling by sustainable modes;
3. Notes that there are times when roads are closed temporarily: sometimes for very short periods such as Playing Out schemes, sometimes to allow for vital development or infrastructure work;
4. Agrees that for permanent road closures, council officers will consider possible implications for the transport mode hierarchy (prioritising pedestrians, followed by cyclists and then public transport users), and for traffic displacement, at the same time as opportunities for traffic reduction. Where displacement is identified as an issue, officers shall identify and implement measures to mitigate the effects of that displacement, taking into account the transport mode hierarchy.
