Notice of meeting and agenda

Pensions Audit Sub-Committee of the Pensions Committee

10.00am, Friday 20 September 2013

Dunedin Room, City Chambers, High Street, Edinburgh

This is a public meeting and members of the public are welcome to attend

Contact

Gavin King

Committee Manager

E-mail: Gavin.king@edinburgh.gov.uk

Tel: 0131 529 4239

1. Order of business

1.1 Including any notices of motion and any other items of business submitted as urgent for consideration at the meeting.

2. Declaration of interests

2.1 Members of the Committee and members of the Consultative Panel should declare any financial and non-financial interests they have in the items of business for consideration, identifying the relevant agenda item and the nature of their interest.

3. Deputations

3.1 None

4. Minute

4.1 Pensions Audit Sub-Committee of the Pensions Committee 17 June 2013 (circulated) – submitted for approval as a correct record

5. Reports

- 5.1 Lothian Pension Funds Annual Report 2013 Audited report by the Director of Corporate Governance (circulated)
- 5.2 Investment Income Review Cross Border Withholding Tax report by the Director of Corporate Governance (circulated)
- 5.3 Irrecoverable Overpayments of Pensions report by the Director of Corporate Governance (circulated)
- 5.4 Prevention of Fraudulent Pension Payments report by the Director of Corporate Governance (circulated)
- 5.5 Pensions Administration Data Quality report by the Director of Corporate Governance (circulated)
- 5.6 Risk Management report by the Director of Corporate Governance (circulated)

6. Motions

6.1 If any

Carol Campbell

Committee Members

Councillors Rose (Convener), Bill Cook and Orr.

Information about the Pensions Audit Sub-Committee

The Pensions Audit Sub-Committee consists of 3 Councillors and its membership is appointed by the Pensions Committee. Two members of the Consultative Panel also attend although in a non-voting capacity.

The Pensions Audit Sub-Committee usually meets in the City Chambers on the High Street in Edinburgh. The meeting is open to all members of the public.

Further information

If you have any questions about the agenda or meeting arrangements, please contact Gavin King, Committee Services, City of Edinburgh Council, City Chambers, High Street, Edinburgh EH1 1YJ, Tel 0131 529 4239, e-mail gavin.king@edinburgh.gov.uk.

A copy of the agenda and papers for this meeting will be available for inspection prior to the meeting at the main reception office, City Chambers, High Street, Edinburgh.

The agenda, minutes and public reports for this meeting and all the main Council committees can be viewed online by going to www.edinburgh.gov.uk/cpol.

Item 4.1 - Minutes

Pensions Audit Sub-Committee

10.00am, Monday 17 June 2013

Present

Councillors Rose (Convener), Bill Cook and Orr

Consultative Panel Members Present:

Eric Adair and Eric MacLennan.

1. Lothian Pension Funds Annual Report 2013 Unaudited

Details were provided of the unaudited Annual Report for the year ending March 2013 for the Lothian Pension Fund, The Lothian Buses Pension Fund and the Scottish Homes Pension Fund.

Decision

To recommend to the Pensions Committee that it should approve the unaudited Lothian Pension Funds' Annual Report for the year ended 31 March 2013.

(Reference –report by the Director of Corporate Governance, submitted.)

2. Risk Management

Details were provided of steps taken to develop the Council's approach to risk management regarding pensions. These included refining the current risk register to include more operational detail and a summary report which would be produced to future Committee and Sub-Committee meetings highlighting the significant risks and the progress.

Decision

 To note that the officers in the Investment and Pensions service would continue to refine and implement the Operational Risk Register and provide the Committee and Sub-Committee with the Corporate Risk Summary.

- 2) To agree the format of the Corporate Risk Summary as set out in the template outlined in the Director of Corporate Governance's report, subject to the following changes to the approach in reporting risk:
 - a) To ensure that all risks were included in the impact and likelihood overview.
 - b) That the reporting was not limited to the top 5 risks and further risks could be reported if appropriate.

(Reference – report by the Director of Corporate Governance, submitted.)

3. Internal Audit Bi-Annual Activity Report – June 2013

Internal Audit had continued delivery of the 2012/13 audit plan and had completed a follow-up report from the 2011/12 plan.

Decision

- 1) To note the progress of Internal Audit in respect of the 2012/13 internal audit plan and the areas of higher priority findings.
- 2) To request that copies of the full audit reports were provided to future meetings.

(Reference – report by the Chief Internal Auditor, submitted.)

Executive summary

Lothian Pension Funds Annual Report 2013 Audited

Summary

The purposes of this report are to note:

- The External Auditor's report on the audit of the Annual Report for the year ended 31 March 2013 for the Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund:
- The Lothian Pension Funds Annual Report 2013 Audited.

External Auditor's Report

Under statutory accounting guidance issued by the Scottish Government, Administering Authorities are required to issue a separate Annual Report covering the Local Government Pension Scheme (LGPS) funds that they are responsible for. These Annual Reports are subject to a separate external audit. The external audit is required to comply with the International Auditing Standard (ISA) 260. As part of the standard, the External Auditor is required to communicate to those charged with governance his view of the following:

- Any significant qualitative aspects within the Funds' accounting practice;
- Any significant difficulties encountered during the audit;
- Any material weakness in the design, implementation or operating effectiveness of the system of internal control;
- Any significant matters arising from the audit discussed with management;
- Any representations that have been requested from management; and
- Any other matter that is significant.

The findings of the external audit are contained in the ISA 260 report (attached as Appendix 1). Audit Scotland, will present the report and answer any questions arising.

The Pensions Audit Sub-Committee considered this same ISA 260 report at its meeting on 20 September 2013.

The External Auditor will issue a further annual report in late 2013. That report will summarise all significant matters arising from the audit, together with overall conclusions as to the management of key risks. This will be considered by the Pensions Audit Sub-Committee and Pensions Committee at meetings on 16 and 18 December 2013 respectively.

Lothian Pension Funds Annual Report 2013 Audited

Pensions Committee approved the Lothian Pension Funds Annual Report 2013 Unaudited at its meeting on 24 June 2013, with the Council noting this same report at its meeting on 27 June 2013.

With the completion of the work of the External Auditor, the Lothian Pension Funds Annual Report 2013 Audited has been prepared (Appendix 2 to this report). The Independent Auditor's Report can be found on page 102. There are no qualifications to this report.

There have been no numerical adjustments made to the financial statements as a result of the external audit. Some minor presentational changes from the Annual Report 2013 Unaudited have been incorporated.

Recommendations

Committee is requested to note:

- The External Auditor's report on the audit of the Annual Report for the year ended 31 March 2013 for the Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund
- The Lothian Pension Funds Annual Report 2013 Audited.

Measures of success

The prime objective of the Council, as administering authority of the Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund, is to ensure an unqualified audit opinion of the Lothian Pension Funds Annual Report 2013. This has been achieved.

Financial impact

There are no direct financial implications as a result of this report.

Equalities impact

There are no adverse equalities impacts arising from this report.

Sustainability impact

There are no adverse sustainability impacts arising from this report.

Consultation and engagement

The Consultative Panel for the Lothian Pension Funds, comprising employer and member representatives, is integral to the governance of the Funds.

This report is also being considered by the Pensions Audit Sub-Committee at its meeting on 20 September 2013 and its recommendation(s) will be reported orally.

Appendix A: Proposed Independent Auditor's Report	7
Annendix B: ISA 580 - Letter of Representation	q

Introduction

- 1. International Standard on Auditing (UK and Ireland) 260 (ISA 260) requires auditors to report specific matters arising from the audit of the financial statements to those charged with governance of a body in sufficient time to enable appropriate action.
- 2. This report sets out for consideration of the Pension Audit Sub-Committee and Pensions Committee the matters arising from the audit of the financial statements for 2012/13 that require to be reported under ISA 260. We are drawing to your attention those matters we think are worthy of note, so that you can consider them before the financial statements are approved and certified. An audit of the financial statements is not designed to identify all matters that may be relevant to those charged with governance. It is the auditor's responsibility to form and express an opinion on the financial statements prepared by management, however this does not relieve management of their responsibilities in this respect. This report has been prepared for the use of Lothian Pension Funds and no responsibility to any third party is accepted.

Status of the Audit

- Our work on the financial statements is now substantially complete. The issues arising from the audit were included in a matters arising schedule discussed with Pensions and Accounting Manager and the Financial Controller on 8 August 2013.
- 4. We received the unaudited financial statements on 7 June 2013, in advance of the agreed timetable. The working papers were of a high standard and the staff provided good support to the audit team and we completed our on-site fieldwork on 22 August 2013.

Matters to be reported to those charged with governance

Conduct and scope of the audit

- 5. Information on the integrity and objectivity of the appointed auditor and audit staff, and the nature and scope of the audit, were outlined in the Annual Audit Plan presented to the Pensions Committee on 13 March 2013 and follow the requirements of the Code of Audit Practice prepared by Audit Scotland in May 2011.
- 6. As part of the requirement to provide full and fair disclosure of matters relating to our independence we can confirm that we have not undertaken non-audit related services. The 2012/13 agreed fee for the audit was disclosed in the Annual Audit Plan and as we did not require to carry out any additional work outwith our planned audit activity this fee remains unchanged.

Fraud

7. In our Annual Audit Plan we highlighted the responsibility audited bodies have for establishing arrangements to prevent and detect fraud and other irregularities. In presenting this report to

the Pensions Committee we seek confirmation from those charged with governance of any instances thereof that have arisen that should be brought to our attention. A specific confirmation from management in relation to fraud has been included in the draft letter of representation.

Audit opinion & representations

- 8. Subject to the satisfactory conclusion of any outstanding matters and receipt of a revised set of financial statements for final review, we anticipate being able to issue an unqualified auditor's report on 5 September (the proposed report is attached at Appendix A). There are no anticipated modifications to the audit report.
- 9. We are required to report to those charged with governance all unadjusted misstatements which we have identified during the course of our audit, other than those of a trivial nature which we regard as errors less than £1,000.
- 10. A number of presentational adjustments were identified within the financial statements during the course of our audit. These were discussed with senior finance officers who agreed to amend the unaudited financial statements. No monetary adjustments were identified
- 11. We therefore have no unadjusted misstatements to bring to your attention.
- 12. As part of the completion of our audit we seek written assurances from the Pensions and Accounting Manager, in his role as Section 95 Officer, on aspects of the financial statements and judgements and estimates made. A draft letter of representation under ISA580 is attached at Appendix B. This should be signed and returned by the Pensions and Accounting Manager with the signed financial statements prior to the independent auditor's opinion being certified.

Accounting and internal control systems

13. No material weaknesses in the accounting and internal control systems were identified during the audit which could adversely affect the ability to record, process, summarise and report financial and other relevant data so as to result in a material misstatement in the financial statements.

Matters arising from the audit

14. Investment Management Expenses: Investment management expenses disclosed in the Pension Fund Account and supporting notes do not fully reflect the fees charged. Fees relating to private equity funds are accounted for within 'changes in market value of investments' and 'investment income'. However, the calculation of the fees is a complex area, particularly in regard to pooled investment funds, and it is not always possible to separately identify these fees. The CIPFA Code on Local Authority Accounting in the UK 2012/13 recommends that investment management expenses be shown as a separate item in the fund account and further analysed in a note. Consequently the current presentation does not fully

Lothian Pension Funds Page 5

comply with the Code. This matter does not relate solely to Lothian Pension Funds but also applies to other pension funds in Scotland.

Resolution: The Investment and Pensions Service Manager will aim to improve the transparency of management fees in accordance with CIPFA's stated requirements by consulting with CIPFA, other Local Authority Pension Funds, the Fund's investment managers and custodian.

- 15. Employee Contributions-Lothian Pension Fund: Officers compiled a reconciliation of the employee contributions received from the seven largest employers, comparing the expected amount per the pension administration system to the actual amounts received. The reconciliation indicated that contributions received were £117,993 more than anticipated with the largest overpayment being from Midlothian Council (£39,131). This equates to 0.34% of the contributions receivable by the fund for the seven employers. Officers have confirmed that these should represent valid contributions and the reconciliation differences arose very largely due to delays in the notification of the entry of new members to the scheme.
- 16. Change in Accounting Policy: The results for the year ended 31 March 2012 have been restated to reflect a change in the accounting policy on income generated by unquoted private equity and infrastructure investments. Previously all distributions arising from these investments were treated as capital and included in the fund accounts as a 'change in market value of investments'. The new policy splits distributions into capital and income elements with the latter being classed as 'investment income' in the fund account. The new policy reflects the Fund's increasing investment in infrastructure which produces a significant part of its distributions as income. The effect of the change was to increase the prior year 'investment income' received by £6,547,000 and to reduce the prior year 'change in market value of investments' by the same amount. This restatement had no impact on the net assets of the fund brought forward from 2011/12.

Outstanding matters

17. **ISA 580 - Letter of Representation**: The signed letter of representation is required prior to the auditor's certification of the financial statements.

Acknowledgements

18. We would like to express our thanks to the staff of Lothian Pension Funds for their help and assistance during the audit of this year's financial statements which has enabled us to provide an audit report within the agreed timetable.

Appendix A: Proposed Independent Auditor's Report

Independent auditor's report to the members of City of Edinburgh Council as administering body for Lothian Pension Funds and the Accounts Commission for Scotland

I certify that I have audited the financial statements of Lothian Pension Funds for the year ended 31 March 2013 under Part VII of the Local Government (Scotland) Act 1973. The financial statements comprise the fund accounts, the net assets statements and the related notes. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union, and as interpreted and adapted by the Code of Practice on Local Authority Accounting in the United Kingdom 2012/13 (the 2012/13 Code).

This report is made solely to the parties to whom it is addressed in accordance with Part VII of the Local Government (Scotland) Act 1973 and for no other purpose. In accordance with paragraph 125 of the Code of Audit Practice approved by the Accounts Commission for Scotland, I do not undertake to have responsibilities to members or officers, in their individual capacities, or to third parties.

Respective responsibilities of the Pensions and Accounting Manager and auditor

As explained more fully in the Statement of Responsibilities, the Pensions and Accounting Manager is responsible for the preparation of financial statements and for being satisfied that they give a true and fair view. My responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland) as required by the Code of Audit Practice approved by the Accounts Commission for Scotland. Those standards require me to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the funds' circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the Pensions and Accounting Manager; and the overall presentation of the financial statements. In addition, I read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If I become aware of any apparent material misstatements or inconsistencies I consider the implications for my report.

Lothian Pension Funds Page 7

Opinion on financial statements

In my opinion the financial statements:

- give a true and fair view in accordance with applicable law and the 2012/13 Code of the financial transactions of the funds during the year ended 31 March 2013, and of the amount and disposition at that date of their assets and liabilities;
- have been properly prepared in accordance with IFRSs as adopted by the European Union, as interpreted and adapted by the 2012/13 Code; and
- have been prepared in accordance with the requirements of the Local Government (Scotland) Act 1973 and the Local Government in Scotland Act 2003.

Opinion on other prescribed matters

In my opinion the information given in the sections titled Review of the Year, About the Funds and Investment and Financial Performance for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which I am required to report by exception

I am required to report to you if, in my opinion:

- adequate accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records; or
- I have not received all the information and explanations I require for my audit; or
- the Governance Compliance Statement does not comply with guidance from the Scottish Ministers.

I have nothing to report in respect of these matters.

David McConnell Assistant Director of Audit Audit Scotland 4th Floor, South Suite The Athenaeum Building 8 Nelson Mandela Place Glasgow, G2 1BT

September 2013

Appendix B: ISA 580 - Letter of Representation

David McConnell Assistant Director of Audit Audit Scotland 4th Floor, South Suite The Athenaeum Building 8 Nelson Mandela Place Glasgow, G2 1BT

Dear David

Lothian Pension Funds Annual Accounts 2012/13

This representation letter is provided in connection with your audit of the financial statements of the Lothian Pension Funds for the year ended 31 March 2013 for the purpose of expressing an opinion as to whether the financial statements give a true and fair view of the financial transactions of the funds during the year ended 31 March 2013, and of the amount and disposition at that date of their assets and liabilities.

I confirm to the best of my knowledge and belief, and having made appropriate enquiries of the relevant officers of the Funds, the following representations given to you in connection with your audit of the Lothian Pension Funds for the year ended 31 March 2013.

General

I acknowledge my responsibility and that of the Lothian Pension Funds for the financial statements. All the accounting records requested have been made available to you for the purposes of your audit. All material agreements and transactions undertaken by the funds have been properly reflected in the financial statements. All other records and information have been made available to you, including minutes of all management and other meetings.

The information given in the Annual Report to the financial statements, including Review of the Year, presents a balanced picture of the funds and is consistent with the financial statements.

I confirm that the effects of uncorrected misstatements are immaterial, individually and in aggregate, to the financial statements as a whole. I am not aware of any uncorrected misstatements other than those identified in the auditor's report to those charged with governance (ISA260).

Lothian Pension Funds Page 9

Legality of Financial Transactions

The financial transactions of the funds are in accordance with the relevant legislation and regulations governing its activities.

Financial Reporting Framework

The financial statements have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2012/13 and in accordance with the requirements of Local Government (Scotland) Act 1973 including all relevant presentation and disclosure requirements.

Disclosure has been made in the financial statements of all matters necessary for them to show a true and fair view of the transactions and state of affairs of the funds for the year ended 31 March 2013.

Accounting Policies & Estimates

All material accounting policies adopted are as shown in the Statement of Accounting Policies included in the financial statements. The continuing appropriateness of these policies has been reviewed since the introduction of IAS 8 and on a regular basis thereafter, and takes account of the requirements set out in the Code of Practice on Local Authority Accounting in the United Kingdom 2012/13.

The significant assumptions used in making accounting estimates are reasonable and properly reflected in the financial statements. There are no changes in estimation techniques which should be disclosed due to their having a material impact on the accounting disclosures.

Actuarial Assumptions

The pension assumptions made by the actuary in the IAS19 report on the funds have been reviewed and I can confirm that they are consistent with management's own view.

Fraud

I have considered the risk that the financial statements may be materially misstated as a result of fraud. I have disclosed to the auditor any allegations of fraud or suspected fraud affecting the financial statements. There have been no irregularities involving management or employees who have a significant role in internal control or that could have a material effect on the financial statements.

Corporate Governance

I acknowledge, as the officer with responsibility for the proper administration of the Fund's financial affairs under section 95 of the Local Government (Scotland) Act 1973, my responsibility for the corporate governance arrangements and internal controls. I have reviewed the governance compliance statement and the disclosures I have made comply with the guidance from the Scottish Ministers. There have been no changes in the corporate governance arrangements or issues identified, since the 31 March 2013 which require disclosure.

Related Party Transactions

All transactions with related parties have been disclosed in the financial statements. I have made available to you all the relevant information concerning such transactions, and I am not aware of any other matters that require disclosure in order to comply with the requirements of IAS24, as interpreted by the Code of Practice on Local Authority Accounting in the United Kingdom 2012/13.

Investment Assets and Current Assets

On realisation in the ordinary course of the fund's business the investment and current assets in the net asset statement are expected, in my opinion, to produce at least the amounts at which they are stated. In particular, adequate provision has, in my opinion, been made against all amounts owing which are known or may be expected to be irrecoverable.

Investment Liabilities and Current Liabilities

All liabilities have been provided for in the books of account as at 31 March 2013.

Contractual commitments

All outstanding call payments due to unquoted limited partnership funds have been fully included in the accounts for the period to 31 March 2013.

Employer / Employee Contributions

A high level analysis is carried out at the year end comparing the total monthly contributions in the pension system with the amounts recorded in the financial ledger. In addition, monthly checks are performed on contributions received from employers during the year with any unexpected differences followed-up and investigated.

Events Subsequent to the Net Asset Statement

There have been no material events since the date of the net asset statement which necessitate revision of the figures in the financial statements or notes thereto including contingent assets and liabilities.

Since the date of the net asset statement no events or transactions have occurred which, though properly excluded from the financial statements, are of such importance that they should be brought to your notice.

Yours sincerely

John Burns

Pensions and Accounting Manager (s.95 officer for pensions)

FOREWORD

Fund, Lothian Buses Pension Fund and the Scottish Homes Pension Fund.

Following the May 2012 local elections, I was delighted to be appointed as the Convener to the Committee with responsibility for the pension funds.

It has been a busy year and we have made significant changes to the way the Funds are governed. We now have a dedicated Pensions Committee and a Pensions Audit Sub-Committee and, for the first time, other pension fund stakeholders are represented on the Committee.

We welcomed Allison Cosgrove (representing UNISON and members) and Darren May from Scottish Water (representing fund employers) to the Committee in December 2012. Both Allison and Darren have been members of the Fund's Consultative Panel for a number of years and bring a different perspective to the Committee.

We also appointed an independent professional observer, Sarah Smart, who will help the Committee scrutinise advice. We made these changes to further strengthen the decision-making processes for the pension funds.

Change within public sector pensions has been a topic of much discussion lately and the Public Service Pensions Act 2013 has set out a framework for all public service pensions, including the Local Government Pension Scheme.

The Act specifies that changes to the Local Government Pension Scheme in Scotland must be implemented by April 2015.

However, whilst details of the changes to the Scheme in England and Wales have been released, the future for the Scheme in Scotland is still under discussion. I look forward to hearing the views of stakeholders once details are announced.

Budgetary constraints across the public sector continued to impact on the membership of Lothian Pension Fund.

Contribution income for Lothian Pension Fund reduced by 2% over the year as many employers reduce workforce numbers.

Severe funding constraints in the public sector have also highlighted the need to improve efficiency and reduce costs. New ways of working such as joint procurement initiatives with other public sector pension funds are being progressed. I am pleased to see officers of the Lothian Pension Fund working closely with those of Falkirk Pension Fund.

Customer service continues to be a priority and we retained the Customer Service Excellence award following an independent assessment. I was also delighted that Lothian Buses Pension Fund received the Local Government Chronicle Investment award for Fund of the Year in the 'Under £750m' category for the second successive year.

The next few years will be challenging for those involved in the Scheme. We have concerns that the changes to the scheme, coupled with pressure on take-home pay, might mean that more members opt-out of the Fund.

We will focus our efforts on communicating the changes to the Scheme when they become available and ensuring that members understand and appreciate the value of the Scheme, which forms a significant part of their remuneration.

MAUREEN CHILD
Pensions Committee Convener
(Resigned 21 August 2013)
The City of Edinburgh Council
24 September 2013

REVIEW OF THE YEAR

Investment and Funding

We start our review of the year by looking at the investment markets. These have delivered strong returns over the year. Equity and bond markets rallied, particularly in the first quarter of 2013. The three pension funds all delivered strong returns; 13.9%, 16.4% and 13.0% for Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund respectively.

However, a meaningful reduction in government bond yields has increased the value of liabilities by more than the increase in the value of assets. The Actuary has estimated that the funding levels of all three pension funds at 31 March 2013 are lower than those at the last actuarial valuation at 31 March 2011.

The investment strategies of the pension funds were reviewed over the year. The reviews concluded that there is scope to reduce their investment risk in the long-term but they should maintain exposure to investments which have an explicit, or implicit, link to inflation. The reviews also highlighted the importance of investment income over the next few years as the cashflow in the Funds is expected to reduce over time. The revised investment strategies are being implemented at a measured pace, as investment opportunities become available and as research on opportunities is undertaken. Some changes have been put in place during the 2012/13 financial year and work is ongoing. The investment and funding outlook for the pension funds remain exceptionally challenging as economies struggle to show meaningful growth and government bond yields remain stubbornly low.

Customer Service

We are committed to continually improving the service to our customers.

We communicated regularly with employers in the Fund via newsletters, events and meetings over the year. Our customers continued to rate our service highly, with 86% of customers surveyed agreeing that our service was excellent.

This year we provided benefit statements for active and deferred members on-line for the first time, whilst offering the option to receive paper copies. We made 97% of annual benefits forecasts available by 30 September 2012 and over 9,000 of our members are using the on-line system.

Ensuring timely and accurate data from employers is crucial for delivering a quality pensions service to members. To help us achieve this we have introduced a specialist online system that allows employers to upload data securely to our pension administration system. This advancement should help to ensure membership data is updated more frequently and the service to members is improved. It should also deliver efficiencies for both the Fund and employers.

A number of the employers in the Lothian Pension Fund faced organisational changes during the year. These included the merger of Telford, Stevenson and Jewel and Esk Colleges, the transfer of Oatridge College to the Scottish Agricultural College, plans to dissolve the Forth Estuary Transport Association, as well as a number of admitted bodies investigating options to exit the Fund. We have worked with employers during these changes to ensure commitments to the Fund are honoured.

The Pensions Act 2011 introduced a requirement for employers to automatically enrol employees into a qualifying pension scheme. We have updated our procedures accordingly and have provided support to employers as they made the necessary preparations.

REVIEW OF THE YEAR

The Local Government Pension Scheme regulations in Scotland have been changed as a result and employees with contracts of less than three months were allowed to join.

As a result, the number of members in the Lothian Pension Fund has increased over the year by 441. This is particularly notable given the fall in membership numbers over the previous year.

Risk management

The Fund is committed to a strong control environment to ensure that risks are identified, understood, managed and monitored appropriately. The risks faced by the Fund change over time and the ongoing management of risk is crucial.

In this regard, progress was made towards integrating the pensioner payroll system with the pension administration system. The change will reduce risk, increase efficiency and reduce reliance on manual reconciliations.

We also recruited a specialist investment lawyer to the internal team. As well as providing legal assistance for the pension funds, he will play a key role in enhancing risk management.

Local Government Pension Scheme Reform

The Public Service Pensions Act 2013 will bring significant changes and challenges for the Fund in terms of both scheme benefits and governance. There will be significant communication demands on the Fund and delivery risks in meeting service standard expectations, should a new scheme bring additional administrative complexity. Changes in the governance of public service pension schemes will also lead to greater scrutiny of the Fund's service.

By embedding the Fund's new governance arrangements and striving to continually improve our performance, the Fund will be in a strong position to meet these challenges.

ABOUT THE FUNDS

How the Funds are run

This section describes the way the Funds work and includes the membership of the Pension Committee and their training. The City of Edinburgh Council acts as administering authority for the Local Government Pension Scheme in the Lothian area.

Pension matters are delegated by the Council to a Committee whose members act as 'quasi trustees'.

Pensions and Trusts Committee/Pensions Committee

The Pensions and Trusts Committee held meetings in June and September 2012 before being replaced by the Pensions Committee. A new Committee was appointed following the Local Government Elections in May 2012. The new Pensions Committee formed in September 2012 held two meetings in December 2012 and March 2013 and

two stakeholder members were appointed from the membership of the Funds' Consultative Panel.

The following tables shows the membership and its changes throughout the period. Pensions Audit Sub-Committee was also formed as part of the governance review. Councillor Cameron Rose is the Convener of the Sub-Committee and the membership is denoted by an asterisk in the Pensions Committee column.

Pensions and Trusts Comm	Pensions Committee	
Membership from 1 April to Local Government elections	Membership following Local Government elections to September 2012	Membership from September 2012 to 31 March 2013
Councillor Tim Mackay (Convener)	Councillor Maureen Child (Convener)	Councillor Maureen Child (Convener - resigned 21 August 2013)
Councillor Maureen Child	Councillor Bill Cook	Councillor Bill Cook*
Councillor Nick Elliot-Cannon	Councillor Jim Orr	Councillor Jim Orr*
Councillor Maggie Chapman	Councillor Cameron Rose	Councillor Cameron Rose*
Councillor Cameron Rose	Councillor Alasdair Rankin	Councillor Alasdair Rankin (Convener - appointed 22 August 2013)
		Allison Cosgrove, Unison
		Darren May, Scottish Water

ABOUT THE FUNDS

Consultative Panel

The Funds have a Consultative Panel made up of employer and member representatives to act as a sounding board for the Pensions Committee. The Panel make up and membership was also reviewed over the year. The new Panel is now made up of six employer representatives and six member representatives. The membership is shown below.

Lothian Pension Fund Consultative Panel membership			
	Employer	Representing	
Employer representative	S		
Alan Williamson	Edinburgh College	College/university	
Darren May	Scottish Water	Other employers	
Vacancy	Scottish Government	Scottish Homes	
Eric Adair	EDI	Other employers	
Guy Hughes	Lothian Buses	Lothian Buses	Joined 01/11/12
Norman Strachan	Lothian Buses	Lothian Buses	Resigned 31/10/12
Rebecca Wilson	Barony Housing Association	Admitted bodies	Resigned 31/10/12
Member representatives			
Charlie Boyd	The City of Edinburgh Council	Active Member	
Allison Cosgrove	East Lothian Council	Unison	
Eric MacLennan	The City of Edinburgh Council	Unison	
Owen Murdoch	Retired member	Unison	
John Rodgers	Lothian Buses	Unite	Joined 01/11/12
Archie Arnott	Lothian Buses	Unite	Resigned 31/10/12
Andrew Mitchell	Lothian Buses	Unite	Resigned 31/10/12
Colette Cromar	visitScotland	Active Member	Resigned 31/10/12

Pensions Committee and Consultative Panel training

The Committee and Panel members must attend training events as outlined in the Fund's Trustee training policy. The policy includes a framework, based on the CIPFA Knowledge and Skills Framework, to assess knowledge and identify training to ensure effective decision making. The Framework covers key areas including pension legislation, investment, accounting and auditing standards and actuarial practices.

The five Councillor Committee members were appointed in May 2012 following the Local Government election and the members undertook extensive induction and investment training covering key elements of pension legislation and investments. Members of the Committee and Panel have also attended external events including a Scotland-wide seminar held for new elected members on pensions committees.

The Committee members collectively attended 163.5 hours of in-house and external training over the year. Panel members undertook 43 training hours.

ABOUT THE FUNDS

Investment and Pensions Division

The Investment and Pensions Division sits within the City of Edinburgh Council and carries out the day-to-day running of the pension funds. Its functions include investment, pension administration, communications and accounting. The investment responsibilities include monitoring and selecting external investment managers and carrying out in-house investment management.

The senior officers are:

Alastair Maclean, Director of Corporate Governance Clare Scott, Investment and Pensions Service Manager Struan Fairbairn, Legal, Risk and Development Manager John Burns, Pensions and Accounting Manager Bruce Miller, Investment Manager Esmond Hamilton, Financial Controller

Investment Strategy Panel

The Pensions Committee sets the overall investment strategy with the implementation of that strategy, including investment monitoring, delegated to the Director of Corporate Governance who takes advice from the Investment Strategy Panel. The Investment Strategy Panel meets quarterly and comprises the Director of Corporate Governance, Investment and Pensions Service Manager, Pensions and Accounting Manager, Investment Manager and three independent advisers. The independent advisors are Gordon Bagot, Scott Jamieson and KPMG, represented by David O'Hara.

INVESTMENT AND FINANCIAL PERFORMANCE

Investments

This section shows key statistics of the financial year, considers the investment markets and the review of investment strategies of the three Funds and shareholder activity.

Investment markets

Investment values fluctuated significantly over the year to 31 March 2013. European equities, for example, suffered a loss of more than 15% in the early part of the year before ending up 13% in sterling terms for the year. Global equities rose even more, up 17% in sterling terms. Gilts and bonds also provided attractive low double digit positive returns. In comparison, the return of less than 5% from emerging market equities was a little disappointing while UK property returned a very low 2.5% over the year.

A crucial moment for financial markets, particularly European equities, stressed by the threat of the break-up of the euro, was a speech

In July 2012, Mario Draghi stated
"Within our mandate, the European
Central Bank is ready to do whatever it
takes to preserve the euro. And believe
me, it will be enough".

by Mario Draghi, Central Bank (ECB) President. Investors did believe him and financial markets have barely looked back in the expectation that central bank monetary policy would support asset prices. Regulatory developments, which encourage banks to own sovereign debt, have also been supportive of world bond markets.

It would be surprising if investment markets are as buoyant in 2013/14.

In the face of a weakening global economic environment, austerity policies appear to be out of favour, so it is quite possible that more expansionary policies will be introduced over the coming year.

There are pockets of potential strength around the world including Japan fighting deflation by doubling its monetary base and, in US where bank lending is once again growing. However, Europe's banking sector continues to contract. Despite the recent performance of the equity and bond markets, the low real interest rates evident around the world are likely to translate into low real returns over the next few years.

Investment strategies

We reviewed the investment strategies of all three Funds following the 2011 Actuarial Valuation. The reviews concluded there was scope to reduce the investment risk over the next few years and increase the focus on investment income to reduce returns volatility over the coming years.

In the testing environment described above, the following investment themes should help to reduce risk and protect the assets:

- equities are more attractively priced than "safe" government bonds over the long term. High quality, sustainable businesses with strong cash generation should be able to continue to prosper in the challenging environment envisaged.
- financial institutions may be forced to discard sound assets at attractive prices as they rebuild balance sheets in deleveraging economies. Such opportunities could allow the Funds to enhance investment returns.
- the Funds should reduce their reliance on benchmarks based on market capitalisation, which are sub-optimal, and ensure that the objectives and risk tolerances of individual portfolios within the Fund are as closely aligned with the overall objectives of the Fund as possible.
- Capital preservation and growth is more important than following an index.

INVESTMENT AND FINANCIAL PERFORMANCE

The Funds' Statement of Investment Principles describes the decision-making process and types of investment, as well as the balance between risk and expected return.

It also covers the realisation of investments, responsible investment and ownership along with the exercising of voting rights attached to investments. It can be viewed on our website www.lpf.org.uk/publications

Responsible investment

The Funds strive to be active shareholders to enhance the long-term value of our investments, including engagement on environmental, social and governance issues, in a manner which is consistent with fiduciary duties.

Councillor Cameron Rose, a member of the Pensions Committee, is Vice Chair of the Local Authority Pension Fund Forum (LAPFF) which promotes local authority investment pension fund interests and seeks to maximise their influence as shareholders.

We are a signatory to the United Nations Principles for Responsible Investment and publish how we meet the Financial Reporting Council UK Stewardship Code requirements which promotes public disclosure of stewardship activities. We undertake voting and engagement activities through Hermes Equity Ownership Service for the investments of Lothian Pension Fund. Baillie Gifford, UBS and State Street take direct responsibility for stewardship issues in the funds they manage on our behalf.

Over the year, we voted on over 10,700 resolutions at more than 900 company meetings and opposed over 1000 resolutions. We engaged with over 250 companies across the world on topics such as board structure, executive compensation and climate change. We also participate in class action lawsuits and are acting as co-lead plaintiff in a number of court actions.

Investment and financial performance

Financial performance

This section shows the expenditure of the Investment and Pensions Division and its funding strategy.

Funding Strategy Statement

The Funding Strategy Statement sets out how the Fund balances the potentially conflicting aims of affordability and stability of employers' pension contributions whilst taking a prudent long-term view of funding those liabilities. The Funding Strategy Statement was revised at the 2011 Actuarial Valuation and and can be viewed on our website www.lpf.org.uk/publications

Administrative Expenses

A summary of the Division's administrative expenditure for 2012/13, against the budget approved by Committee, is shown in the table below.

The budget focuses on controllable expenditures and therefore excludes all benefit payments and transfers of pensions from the Fund. Similarly, income is shown exclusive of contributions receivable and pension transfers to the Fund.

The key variances against budget are:-

- Employees £ 71k underspend. This is mainly due to unfilled posts across the division partly offset by temporary agency costs and early retirement costs;
- Third Party Payments (£ 100k overspend) and Supplies and Services (£ 132k underspend) – These are due to the take up of the accounting service from the Fund's custodian offset by savings from the termination of associated ICT contracts;
- Investment management fees £ 1,302k underspend. This is primarily due to changes in the fund management arrangements including the termination of active currency overlay contracts.
- Income £151k less this is due to stock lending commission being lower than expected.

Administrative expenses

	Approved budget	Actual outturn	Actual variance
	£000	£000	£000
Employees	1,914	1,843	(71)
Transport	27	22	(5)
Supplies and services	864	732	(132)
Investment Managers fees	10,284	8,982	(1,302)
Other third party payments	349	449	100
Depreciation	44	44	-
Direct expenditure	13,482	12,072	(1,410)
Support costs	702	656	(46)
Income	(884)	(733)	151
Total cost to the Funds	13,300	11,995	(1,305)

PERFORMANCE AND SERVICE PLAN

Our service plan and performance

Our vision and objectives are set out in our service plan. The plan provides details of key actions, key performance indicators and targets and how we aim to meet them.

The Fund has three objectives

- To provide excellent customer care
- To support and develop staff
- To continue to be a top performing fund

This section shows how we meet our key performance indicators to deliver our service plan objectives.

We aim to work together to put the customer first. This means making our services simple, right first time, effective and efficient.

Our key performance indicators are below with more detailed analysis thereafter.

To provide excellent customer care	Target	Actual
Overall satisfaction of employers, active members and pensioners with our overall services as measured by annual surveys.	85%	86%
Satisfaction of employers, active members and pensioners with our communications as measured by annual surveys.	85%	89%
Proportion of active members receiving a benefit statement by 30/9/12	, 95%	97%
Maintain Customer Service Excellence Standard	Retain	Retained
To support and develop staff		
Level of sickness absence	4%	3.87%
Staff satisfaction with present job	60%	53%
Annual training average per staff member	2 days	3.8 days
To continue to be a top performing fund		
% of critical pensions administration work completed within standards	90%	94%
Lothian Pension Fund - Three year annualised investment return compared with benchmark	relative return in range 1.0 to +2.0	0.0%
Pension admin cost per member	£24.10	£23.86
Employer contributions paid within 19 days of month end	97%	97.5%

In 2012/13 all key performance indicator targets were met with the exception of staff satisfaction with present job and investment performance.

Further information on investment can be found in the Investment and Financial Perfromance and Fund sections.

PERFORMANCE AND SERVICE PLAN

To provide excellent customer care

Customer Service Excellence

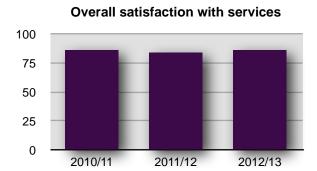

To ensure we provide excellent customer care, the Funds use the Customer Service Excellence (CSE) framework. This provides clear guidelines on how to ensure continuous improvement in our customer services and an external assessment that requires the Funds to demonstrate on an annual basis how we have improved and developed.

This year the Funds again successfully retained the CSE award. The external assessor endorsed our approach to consulting with all our customers and using feedback to improve. The assessment also recognised that we need to improve our partnership working with our employers to deliver services our members expect.

Surveys

We ask for our customers' views on our services in a variety of ways. We use the feedback to improve our services. We survey a sample of active and new members on an ongoing basis and carry out annual surveys of both retired members and employers.

We include an overall question on satisfaction in all our surveys and over the year, 86% agreed with the statement "overall I feel the service provided by the Funds is excellent".

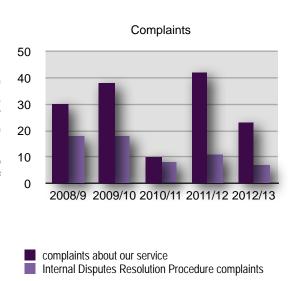

Complaints

We monitor the complaints we receive on a monthly basis. We respond promptly to any complaints, investigate them and learn from them to improve the service.

We categorise our complaints in two ways:

- Complaints about our service
- Complaints about the way we apply the regulations. Under the LGPS members can use a 2 stage dispute process to settle any disagreement or complaint that they may have about decisions made under the scheme rules. We have an independent appointed person to deal with these complaints in an unbiased way. If a member remains unhappy with the appointed person's decision they can ask the Scottish ministers to review the decision.

The graph shows the number of complaints in each category these represent a very low percentage of the over 28,000 procedures we carried out in 2012/13.

PERFORMANCE AND SERVICE PLAN

Support and develop staff

Our three key performance indicators for our staff are sickness absence, overall satisfaction with present job and annual training average per staff member. Two out of three of these indicators have been met.

One of the ways we gauge how our staff feel is by surveying them on a regular basis. This is also how we measure staff satisfaction. In 2012 overall satisfaction with present job increased by 8% to 53% but was below the target of 60%. The management team has used the feedback from the survey and focussed improvements in particular on two key issues, communication and staff development.

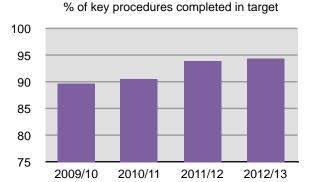

A staff forum gives staff the opportunity to feedback to senior managers, monthly briefings have been introduced via e-mail and face to face to keep staff informed of changes and a review of responsibilities within the division undertaken. Much work is still to be done but it is hoped that this indicator will continue to improve.

To continue to be a top performing Fund

Pensions Administration

Our dedicated in-house team provides pension administration services for the Funds. We monitor the time it takes to complete our procedures. Our key procedures include payment of retirement and dependent benefits, providing information for new members, transfers and retirement quotes.

Performance for these key procedures over the year 2012/13 showed 94.4% of the work completed was within our target, an improvement of 0.5% on the previous year.

Data quality

The administration of pensions relies on good data. Along with the new employer website introduced to assist with the transfer of data, we have adopted other initiatives to improve member information. These include participation in specialist longevity and data analyses through "Club Vita" a service provided by our Funds' Actuary.

Pension record keeping standards are also measured against the Pension Regulator's best practice guidance and appropriate assurance attained.

The Pensions Regulator data standards	Target	Actual
Common data		
New data (post June 2010)	100%	100%
Old data (pre June 2010)	95%	96%
Conditional and Numerical Data		
LPF-scheme specific measurement including date of joining; pensionable remuneration; date of leaving; reasons for leaving etc.		98%

PERFORMANCE AND SERVICE PLAN

The Pensions Administration Strategy

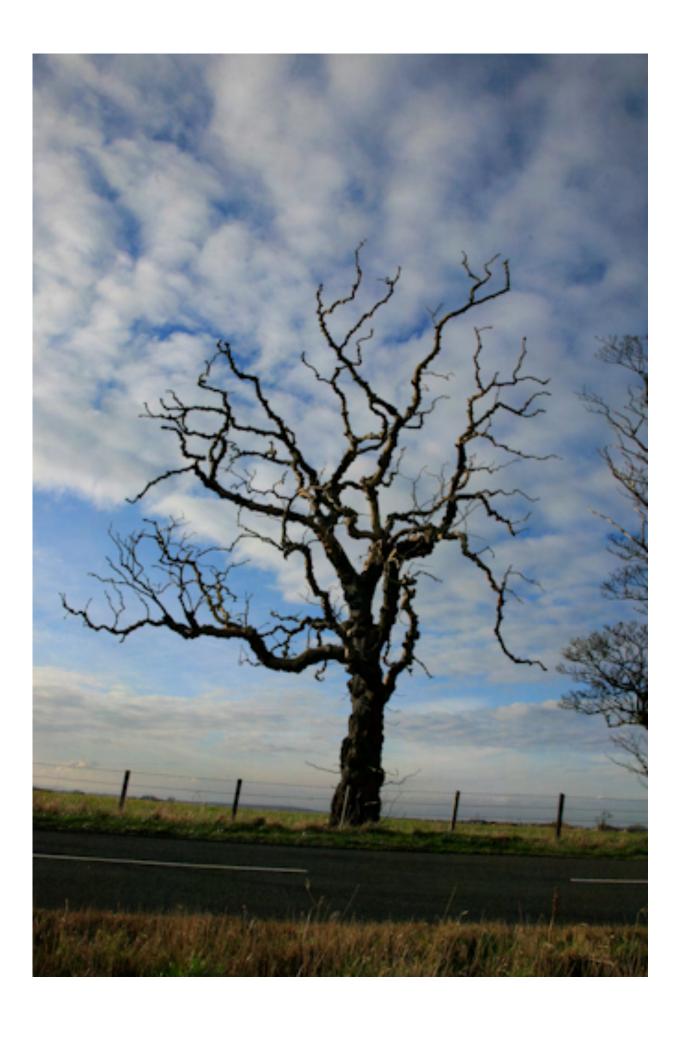

The Fund's Pensions Administration Strategy highlights the duties of, and sets performance standards for, both the Fund and all our participating employers.

It is vital that employers provide prompt information to the Fund so that we can provide timely and accurate services to our Scheme members. We monitor employer performance regularly, and provide updates to the employers each year, both individually and on a Fund-wide basis at employer events. During the 2012/13 year, we also met with our largest employers to discuss performance and worked with them to improve, providing training and holding follow-up meetings to assess improvements where appropriate.

Employer performance for 2012/13 is shown below, with 2011/12 shown for comparison purposes.

Employer performance		2011/12				2012/13	
Case type	Target (working days)	Number received	Number within target	% within target	Number received	Number within target	% within target
New member: paper forms	20	111	71	64	31	23	74
New member electronic	20	1779	1597	90	2693	2386	89

Death in service information	10	39	12	30	37	7	19

Statement of accounting policies and general notes

1 Basis of preparation

The Statement of Accounts summarises the transactions of the Funds for the 2012/13 financial year and their position at year-end as at 31 March 2013. The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2012/13 which is based upon International Financial Reporting Standards (IFRS), as amended for the UK public sector.

The accounts summarise the transactions of the Funds and report on the net assets available to pay pension benefits. The accounts do not take account of obligations to pay pensions and benefits which fall due after the end of the financial year. The actuarial present values of promised retirement benefits, valued on an International Accounting Standard (IAS) 19 basis, are disclosed in the Notes to the Accounts.

2 Summary of significant accounting policies

Fund account - revenue recognition

a) Contribution income

Normal contributions, both from the members and from employers, are accounted for on an accruals basis at the rate recommended by the Scheme Actuary in the payroll period to which they relate.

Employers' pensions strain contributions are accounted for in the period in which the liability arises. Any amount due in year but unpaid will be classed as a current financial asset. Amounts not due until future years are classed as long-term financial assets.

b) Transfers to and from other schemes

Transfer values represent the amounts received and paid during the year for members who have either joined or left the fund during the financial year and are calculated in accordance with the Local Government Pension Scheme Regulations.

Individual transfers in/out are accounted for when received/paid, which is normally when the member liability is accepted or discharged.

Transfers in from members wishing to use the proceeds of their additional voluntary contributions to purchase scheme benefits are accounted for on a receipts basis and are included in Transfers In.

Bulk (group) transfers are accounted for on an accruals basis in accordance with the terms of the transfer agreement.

c) Investment income

i) Interest income

Interest income is recognised in the fund account as it accrues, using the effective interest rate of the financial instrument as at the date of acquisition or origination. Income includes the amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of the instrument and its amount at maturity calculated on an effective interest rate basis.

ii) Dividend income

Dividend income is recognised on the date the shares are quoted ex-dividend. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset.

iii) Distributions from pooled funds

Distributions from pooled funds are recognised at the date of issue. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset

iv) Income from unquoted private equity and infrastructure investments

The results for the year ended 31 March 2012 have been restated to reflect a change in the accounting policy on income generated by unquoted private equity and infrastructure investments. The previous policy was to treat all distributions arising from these investments as capital with the results being reported as a change in market value of investments. The new policy splits distributions into capital and income elements with the latter being included under investment income in the Fund Account. The new policy reflects the Fund's increasing investment in infrastructure which produces a significant part of its return as income. See note 24 of the Notes to the Accounts of Lothian Pension Fund.

v) Property related income

Property-related income consists primarily of rental income. Rental income from operating leases on properties owned by the fund is recognised on a straight-line basis over the term of the lease. Any lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

Contingent rents based on the future amount of a factor that changes other than with the passage of time, such as turnover rents, are only recognised when contractually due.

vi) Movement in the net market value of investments

Changes in the net market value of investments (including investment properties) are recognised as income and comprise all realised and unrealised profits/losses during the year.

Fund account - expense items

d) Benefits payable

Pensions and lump sum benefits payable include all amounts known to be due as at the end of the financial year. Any amounts due but unpaid are disclosed in the net assets statement as current liabilities.

e) Taxation

The fund is a registered public service scheme under section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a fund expense as it arises.

f) Administrative expenses

All administrative expenses are accounted for on an accruals basis. The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council, this is based on the amount of central services consumed. In turn, the Division allocates its costs to the three Pension Funds.

Costs directly attributable to a specific Fund are charged to the relevant Fund. Investment management costs that are common to all three Funds are allocated in proportion to the value of the Funds as at the end of the year. Pension payroll costs are allocated in proportion to the number pensioners in each of the Funds at the end of the year. Other administration costs are allocated in proportion to the number of members in each of the Funds at the end of the year.

g) Investment management expenses

All investment management expenses are accounted for an accruals basis.

Fees of the external investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly, these are based on the market value of the investments under their management and therefore increase or reduce as the value of these investments change. For some investment managers, an element of their fee is performance related.

The cost of obtaining investment advice from external consultants is included in investment management charges.

The costs of the in-house fund management team are charged to the Funds. The basis of allocation is as described above.

For certain investments in accordance with industry practice and investment agreements, some management expenses are netted off investment returns at source by managers and are not separately disclosed.

Net assets statement

h) Financial assets

Financial assets are included in the net assets statement on a fair value basis as at the reporting date. A financial asset is recognised in the net assets statement on the date the fund becomes party to the contractual acquisition of the asset. From this date any gains or losses arising from changes in the fair value of asset are recognised by the fund.

The values of investments as shown in the net assets statement have been determined as follows:

i) Market quoted investments

The value of an investment for which there is a readily available market price is determined by the bid market price ruling on the final day of the accounting period.

ii) Fixed interest securities

Fixed interest securities are recorded at net market value based on their current yields.

iii) Unquoted investments

The fair value of investments for which market quotations are not readily available is determined as follows:

- valuations of delisted securities are based on the last sale price prior to delisting, or where subject to liquidation, the amount the council expects to receive on wind-up, less estimated realisation costs.
- securities subject to takeover offer the value of the consideration offered under the offer, less estimated realisation costs.
- directly held investments include investments in limited partnerships, shares in unlisted companies, trusts and bonds. Other unquoted securities typically include pooled investments in property, infrastructure, debt securities and private equity. The valuation of these pools or directly held securities is undertaken by the investment manager or responsible entity and advised as a unit or security price. The valuation standards followed in these valuations adhere to industry guidelines or to standards set by the constituent documents of the pool or the management agreement.
- investments in unquoted property and infrastructure pooled funds are valued at the net asset value or a single price advised by the fund manager.
- the values of the direct investments in unquoted private equity, infrastructure, timber and real estate are based on valuations provided by the general partners to the funds in which the Fund has invested. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of IFRS. The valuations are usually undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

iv) Pooled investment vehicles

Pooled investment vehicles are valued at closing bid price if both bid and offer prices are published; or if single priced, at the closing single price. In the case of pooled investment vehicles that are accumulation funds, change in market value also includes income which is reinvested in the fund, net of applicable withholding tax.

v) Freehold and leasehold properties

The properties were valued at open market value at 31 March 2012 by John Symes-Thompson FRICS and Genine Terry MRICS of independent external valuers CB Richard Ellis Ltd in accordance with the Royal Institute of Chartered Surveyors' - Professional Standards (2012) ("the Red Book"). The valuer's opinion of market value and existing use value was primarily derived using comparable recent market transactions on arm's-length terms.

i) Foreign currency transactions and balances

Dividends, interest and purchases and sales of investments in foreign currencies have been accounted for at the spot market rates at the date of transaction. End-of-year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, market values of overseas investments and purchases and sales outstanding at the end of the reporting period.

j) Derivatives

Derivative contract assets are fair valued at bid prices and liabilities are fair valued at offer prices. Changes in the fair value of derivative contracts are included in change in market value.

The value of futures contracts is determined using exchange prices at the reporting date. Amounts due from or owed to the broker are the amounts outstanding in respect of the initial margin and variation margin.

The future value of forward currency contracts is based on market forward exchange rates at the year-end date and determined as the gain or loss that would arise if the outstanding contract were matched at the year-end with an equal and opposite contract.

k) Cash and cash equivalents

Cash comprises cash in hand and demand deposits.

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to minimal risk of changes in value.

I) Financial liabilities

The Funds recognise financial liabilities at fair value as at the reporting date. A financial liability is recognised in the net assets statement on the date the fund becomes party to the liability. From this date any gains or losses arising from changes in the fair value of the liability are recognised.

m) Actuarial present value of promised retirement benefits

The actuarial present value of promised retirement benefits of each of the Funds is assessed on a annual basis by the Scheme Actuary in accordance with the requirements of IAS 19 and relevant actuarial standards.

As permitted under IAS 26, the Funds have opted to disclose the actuarial present value of promised retirement benefits by way of a note to the net assets statements.

n) Additional voluntary contributions

The Lothian Pension Fund and Lothian Buses Pension Fund provide an additional voluntary contributions (AVC) scheme for their members, the assets of which are invested separately from those of the Funds. The Funds have appointed Standard life and Prudential as their AVC providers. AVCs are paid to the AVC providers by employers and are specifically for providing additional benefits for individual contributors. Each AVC contributor receives an annual statement showing the amount held in their account and the movements in the year.

In accordance with regulation 5(2)(b) of the Local Government Pension Scheme (Management and Investment of Funds) (Scotland) Regulations 1998, AVCs are not included in the pension fund financial statements. Details of contributions paid and the total value of funds invested are disclosed by way of note.

3 Critical judgements in applying accounting policies

Unquoted private equity and infrastructure investments

It is important to recognise the highly subjective nature of determining the fair value of private equity and infrastructure investments. They are inherently based on forward-looking estimates and judgements involving many factors. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of IFRS.

For the Lothian Pension Fund, the value of unquoted private equity and infrastructure investments at 31 March 2013 was £508.5m (2012 £440.1m).

For the Lothian Buses Pension Fund, the value of unquoted private equity and infrastructure investments at 31 March 2013 was £12.2m (2012 £7.5m).

Actuarial present value of promised retirement benefits

Each Fund is required to disclose the estimated actuarial present value of promised retirement benefits as at the end of the financial year. These estimates are prepared by the Fund's Actuary. These values are calculated in line with International Accounting Standard 19 (IAS19) assumptions and comply with the requirements of IAS26. However, the results are subject to significant variances based on changes to the underlying assumptions.

The figures are only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

4 Assumptions made about the future and other major sources of estimation uncertainty

The Statement of Accounts contain estimated figures that are based on assumptions made by the Council; private equity and infrastructure managers; other providers of valuation information; and the Scheme Actuary about the future or that are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

The items in the net assets statement at 31 March 2013 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

a) Actuarial present value of promised retirement benefits

Uncertainties

Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. The Fund Actuary advises on the assumptions to be applied and prepares the estimates.

Effect if actual results differ from assumptions - Lothian Pension Fund

The effects on the net pension liability of changes in individual assumptions can be illustrated as follows:

Approx % increase in liabilities %	Approx monetary amount
	£m
9	442
3	148
4	175
5	265
	increase in liabilities % 9 3 4

Effect if actual results differ from assumptions - Lothian Buses Pension Fund
The effects on the net pension liability of changes in individual assumptions can be illustrated as follows:

Approx % increase in liabilities %	Approx monetary amount
	£m
9	30
3	10
3	11
6	19
	increase in liabilities % 9 3 3

Effect if actual results differ from assumptions - Scottish Homes Pension Fund The effects on the net pension liability of changes in individual assumptions can be illustrated as follows:

Change in assumptions - year ended 31 March 2013	Approx % increase in liabilities %	Approx monetary amount
		£m
0.5% decrease in discount rate	6	9
1 year increase in member life expectancy	3	4
0.5% increase in pensions increase rate	6	9

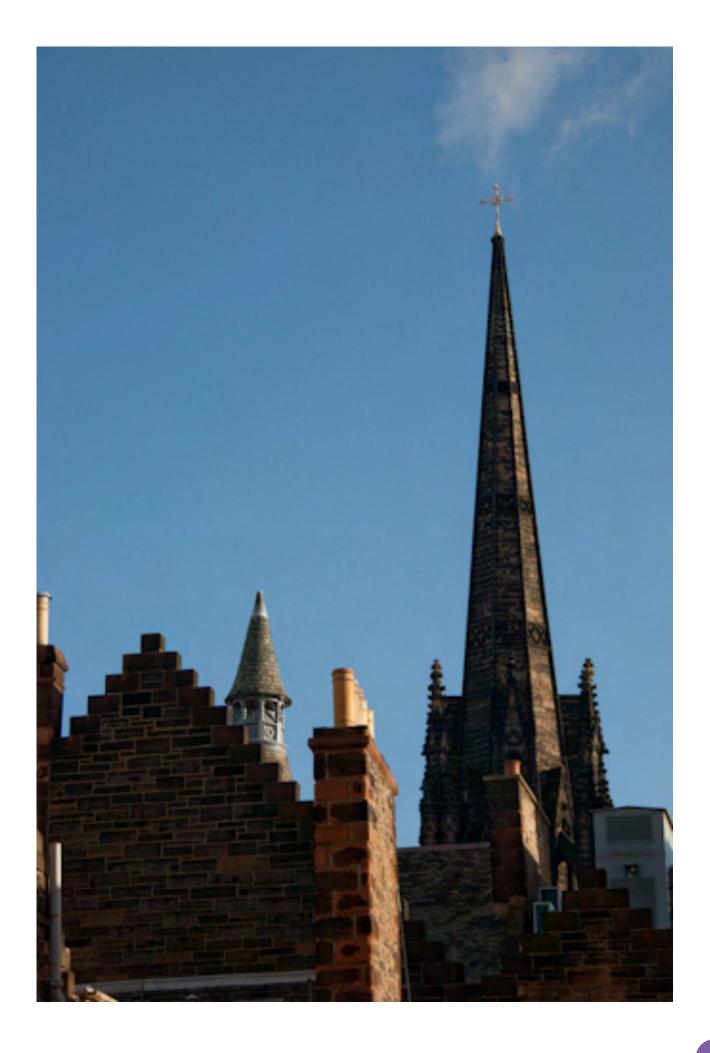

b) Unquoted private equity and infrastructure investments

Uncertainties

These investments are not publicly listed and as such there is a degree of estimation involved in the valuation.

Effect if actual results differ from assumptions

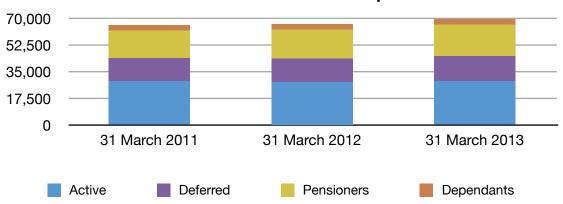

There is a risk that these investments may be under or overstated in the accounts at any point in time. The actual financial return of this type of investment is only known with certainty when they reach the end of their lifecycles and the final distributions are made to investors.

Fund membership

Funding

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with the Local Government Pension Scheme (Benefits, Membership and Contributions) (Scotland) Regulations 2008. These contributions depend on pay and for the year ended 31 March 2013 the contribution rates were as follows:

F. H:	5 .
Full time equivalent pensionable pay (2012/13)	Rate
Less than £19,971	5.5%
Between £19,971 and £25,948	Between 5.6% and 6.0%
Between £25,949 and £32,567	Between 6.1% and 6.5%
Between £32,568 and £45,915	Between 6.6% and 7.5%
Between £45,916 and £51,727	Between 7.6% and 8.0%
Between £51,728 and £69,262	Between 8.1% and 9.0%
Between £69,263 and £104,782	Between 9.1% and 10.0%
Between £104,783 and £240,383	Between 10.1% and 11.2%

Employers' contributions are set at the triennial actuarial valuation. The contribution rates for the year ended 31 March 2013 were based on the actuarial valuation as at 31 March 2011. This valuation resulted in a common contribution rate of (i.e. the average of the employers contributions) 18.0% of pensionable earnings, this includes 1.2% in respect of the past service deficit. In practice, each employer pays contributions at a specific rate that relates to its funding experience. For 2012/13, the rates for the major employers ranged from 16.9% to 17.2% for service currently being accrued plus a fixed amount towards the past service deficit.

More information on funding can be found in the Actuarial Statement for 2012/13 at the end of this section.

Investment strategy

Following the completion of the 2011 actuarial valuation, an in-depth review of Lothian Pension Fund's investment strategy has been undertaken.

The review concluded that there is scope to reduce the Fund's investment risk in the long-term. It was recommended that the focus of the investment strategy over the coming years should be on capital preservation, investment income and reducing the absolute volatility of the Fund.

The strategy for 2012-2017 is set out in the table and has private equity reclassified in Equities rather than Alternative investments. Investments in the Alternatives category include property, infrastructure, timber and corporate bonds. Asset allocations limits under normal financial conditions are also shown.

	Interim benchmark at 31 March 2013	Strategy for 2012-2017	Asset allocation limits minimum - maximum
	%	%	%
Equities excluding Private Equity	64		
Equities including Private Equity	-	65	50 - 75
Index-linked gilts	5	7	0 - 20
Alternatives including Private Equity	30	-	-
Alternatives excluding Private Equity	-	28	20 - 35
Cash	1	-	0 - 10
Total	100	100	n/a

The objective of the Fund has been redefined so that the target return over long-term economic cycles (typically 5 years or more) is the achievement of the same return as that generated by the strategic allocation, and over shorter periods, the Fund should perform better than the strategic allocation if markets fall significantly.

The Fund will gradually implement the new strategy over the next few years.

Investment performance

Annualised returns to 31 March 2013 (% per year)

	<u> </u>		
	1 year	3 years	10 years
Lothian Pension Fund	13.9	8.1	10.3
Benchmark	13.9	8.1	9.5
Retail Price Index	3.3	4.1	3.3
National Average Earnings	(0.6)	1.0	2.7

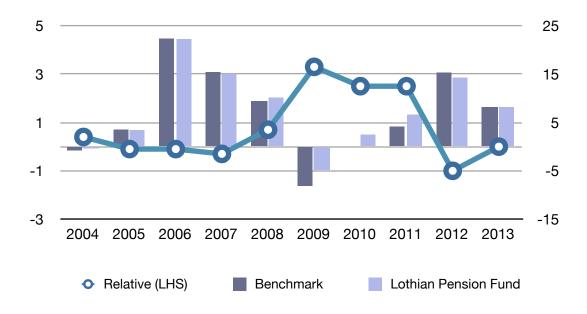

The absolute performance of Lothian Pension Fund over the 12-month period was +13.9% and three-year performance was +8.1% per annum. Over both time periods, the performance was in line with the benchmark returns.

Over 10 years, the Fund returned +10.3% per annum, ahead of its benchmark by 0.8% per year and also well ahead of measures of inflation, including the retail price index and national average earnings.

Despite strong investment returns in excess of expectations, the actual funding level has fallen from 96% at the time of the last actuarial valuation on 31 March 2011 to 87% at 31 March 2013, largely as a result of falling real gilt yields, which caused an increase in the value of liabilities.

Annualised 3 yearly returns ending 31 March (% per year)

Target is for the Fund to outperform the benchmark by 1% per year over 3 years

^{*}The results for the year ended 31 March 2012 have been restated to reflect a change in the accounting policy on income generated by unquoted private equity and infrastructure investments. This change has the effect of increasing the reported investment income by £6.5m and reducing the change in market value of investments by the same amount. See note 24 for details.

The unaudited accounts were issued on 24 June 2013 and the audited accounts were authorised for issue on 24 September 2013.

JOHN BURNS FCMA CGMA Pensions and Accounting Manager 24 September 2013

Note to the Net Assets Statement

The financial statements summarise the transactions of the Fund during the year and its net assets at the year end. They do not take account of the obligations to pay pensions and benefits which fall due after the end of the year. The actuarial position of the Fund, which does take account of such obligations, is discussed in the Actuarial Valuation section of this report and these financial statements should be read in conjunction with that information. In addition, as required by IAS26, the Actuarial Present Value of Promised Retirement Benefits is disclosed in the notes to these financial statements.

Notes to the Accounts

1 Events after balance sheet date

There have been no events since 31 March 2013, and up to the date when these accounts were authorised, that require any adjustments to these accounts.

2 Contributions from employers

The total contributions receivable analysed between the administering authority, other scheduled bodies and admitted bodies were as follows:-

By category	2011/12 £000	2012/13 £000
Percentage of pay	113,831	103,781
Fixed deficit contribution	17,620	24,711
Strain costs	7,881	8,929
Cessation contribution	5,152	400
	144,484	137,821
By employer type		
Administering Authority	54,549	56,359
Other Scheduled Bodies	67,626	65,143
Community Admission Bodies	22,030	16,090
Transferee Admission Bodies	279	229
	144,484	137,821

From 1 April 2012, following the actuarial valuation of 31 March 2011, all employers are required to make a fixed contribution towards the past service deficit that relates to their employees. In previous years only some of the larger employers were required to make a fixed contribution. The deficit recovery period varies depending on the individual circumstances of each employer ranging up to 20 years.

Where an employer makes certain decisions which result in additional benefits being paid out to a member, or benefits being paid early, this results in a "strain" on the Fund. The resulting pension strain costs are calculated and recharged in full to that employer.

Any employer that ceases to have at least one actively contributing member is required to pay a cessation contribution.

The Investments and Pensions Division of the Council is responsible for administering the three pension Funds. The Division receives an allocation of the overheads of the Council. In turn the Division allocates administration and investment costs to the three pension funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated on a defined basis.

In 2012 the overheads were allocated based on the value of the Funds as at the end of the year. In 2013 the allocation basis were modified to a more stable basis which better reflects the underlying cost drivers. Pension payroll costs were allocated based on the number of pensioners during the year and all other costs were allocated based on the number of members of each fund.

The change in market value of investments during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments during the year.

12a Reconciliation of movement in investments and derivatives (cont'd)

Transaction costs are included in the cost of purchases and sale proceeds. Transaction costs include costs charged directly to the Fund such as fees, commissions, stamp duty and other fees. Transaction costs incurred during the year amounted to £1,939k (2012 £1,034k). In addition to the transaction costs disclosed above, indirect costs may be incurred through the bid-offer spread on some pooled investment vehicles, the amount of any such costs is not separately provided to the Fund.

12b Analysis of investments (at market value) (cont'd)

Derivatives - futures (cont'd)

The economic exposure represents the notional value of securities purchased under the futures contract and therefore the value subject to market movements. All futures contracts are exchange traded. The Fund uses futures for the purposes of efficient portfolio management and/ or risk reduction. During the year, the Fund's bond manager transacted futures to manage interest rate exposure.

Net forward currency contracts at 31 March 2012		19,131

The above table summarises the contracts held by maturity date, all contracts are traded on an over the counter basis.

In order to maintain appropriate diversification of investments in the portfolio and take advantage of wider opportunities, the Lothian Pension Fund invests around half of the fund in overseas markets. A currency hedging programme, using forward foreign exchange contracts, has been put in place to reduce the extent to which the Fund is exposed to currency movements. In addition, the Fund's bond manager use forward foreign exchange contracts to add value to the Fund.

Over the last two years no single investment represented more than 5% of the net assets of the Fund.

12e Securities lending

During the year Lothian Pension Fund participated in two securities lending arrangements. The arrangement with the Northern Trust Company covers the main investments of the Fund. As at 31 March 2013, £112.3m (2012 £112.1m) of securities were released to third parties. Collateral valued at 107.2% (2012 107.1%) of the market value of the securities on loan was held at that date. The arrangement with Blackrock related to the Fund's holding of FTSE 250 iShares ceased during the year.

As at 31 March 2013, there were no restrictions on the realisability of the property or the remittance of income or sale proceeds. The Fund is not under any contractual obligations to purchase, construct or develop any of these properties. Nor does it have any responsibility for any repairs, maintenance or enhancements.

13 Financial Instruments

13a Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the fair value amounts of financial assets and liabilities by category and net assets statement heading. No financial assets were reclassified during the accounting period.

All financial instruments are marked to market (at fair value) in the Fund's accounting records hence there is no difference between the carrying value and fair value.

13c Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities and unit trusts.

Quoted investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investments in unquoted private equity, infrastructure, timber and European real estate are based on valuations provided by the general partners to the funds in which the Fund has invested. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of International Financial Reporting Standards (IFRS). The valuations are usually undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

13c Valuation of financial instruments carried at fair value (cont'd)

The following table provides an analysis of the financial assets and liabilities of the Fund grouped into Levels 1 to 3, based on the level at which the fair value is observable.

14 Nature and extent of risk arising from financial instruments

Risk and risk management

The Fund's primary aim is to ensure that all members and their dependants receive their benefits when they become payable. The investment strategy aims to maximise the returns from investments within reasonable risk parameters and hence minimise the long-term cost to employers. The Fund achieves this by investing in a diverse range of assets to reduce risk to an acceptable level. In addition, the Fund ensures that sufficient cash is available to meet all liabilities when they are due to be paid.

Responsibility for the Fund's overall investment strategy rests with the Pensions Committee. The Investment Strategy Panel and the internal investment team monitor investment risks on a regular basis. Investment risk management tools are used to identify and analyse risks faced by the Fund's investments.

Consideration of the Fund's investment risk is part of the overall risk management of the pensions operations. Risks are reviewed regularly to reflect changes in activity and market conditions.

14 Nature and extent of risk arising from financial instruments (cont'd)

Types of investment risk

There are various ways of considering investment risks for pension funds. For the purposes of this note, market risk is the potential for an investor to experience losses from falls in the prices of investments. All financial instruments, including cash deposits, present a risk of loss of capital and risks vary depending on different asset classes.

Market risk also changes over time as economic conditions and investor sentiment change. The Fund considers overall fluctuations in prices arising from a variety of sources: market risk, foreign exchange risk, interest rate risk, credit risk, etc. The different risks may, to some extent, offset each other.

The overall market risk of the Fund depends on the actual mix of assets and encompasses all the different elements of risk.

The Fund manages these risks in a number of ways:

- assessing and establishing acceptable levels of market risk when setting overall investment strategy. Importantly, risk is considered relative to the liabilities of the Fund
- diversification of investments in terms of type of asset, investment managers, geographical and industry sectors as well as individual securities
- taking stewardship responsibilities serious and pursuing constructive engagement with the companies in which we invest
- monitoring market risk and market conditions to ensure risk remains within tolerable levels
- using equity futures contracts from time to time to manage market risk. Exchange traded options are not used by the Fund.

Sensitivity analysis

Asset prices have a tendency to fluctuate. The degree of such fluctuation is known as "volatility" and it differs by asset class. The table below sets out the long-term volatility assumptions used in the Fund's asset-liability modelling undertaken by the Fund's investment adviser KPMG:

	Potential price
Asset type	movement (+ or -)
Equities - Developed Markets	20.0%
Equities - Emerging Markets	30.0%
Private Equity	30.0%
Timber and Gold	30.0%
Secured Loans	10.0%
Corporate Bonds	10.5%
Fixed Interest Gilts	9.0%
Index-Linked Gilts	7.0%
Infrastructure	8.0%
Property	13.0%
Cash and forward foreign exchange	1.6%

Volatility is the standard deviation of annual returns. In two years out of three, the asset's change in value (which could be a gain or a loss) is expected to be lower than the volatility figure, but in one year out of three, the change in value is expected to be higher than the volatility figure.

14 Nature and extent of risk arising from financial instruments (cont'd)

Asset classes do not always move in line with each other. The extent to which assets move together is known as their "correlation". A lower correlation means that there is less risk of assets losing value at the same time. The overall Fund benefits from "diversification " because it invests in different asset classes, which don't all move in line with each other. The following table shows the risks at the asset class level and the overall Fund level, with and without allowance for correlation.

The following tables shows how the prices of the Fund's investments would increase and decrease in line with the assumptions above.

	Value			Value	Value
	at 31 March	% of	Change	on	on
	2013	fund	+/-	increase	decrease
Asset type	£m	%	%	£m	£m
Equities - Developed Markets	2,451	60.4	20.0	2,941	1,961
Equities - Emerging Markets	219	5.4	30.0	285	153
Private Equity	248	6.1	30.0	322	174
Timber and Gold	72	1.8	30.0	94	50
Secured Loans	22	0.5	10.0	24	20
Corporate Bonds	176	4.3	10.5	194	158
Fixed Interest Gilts	10	0.2	9.0	11	9
Index-Linked Gilts	149	3.7	7.0	159	139
Infrastructure	228	5.6	8.0	246	210
Property	362	8.9	13.0	409	315
Cash and forward foreign exchange	125	3.1	1.6	127	123
Total [1]	4,062	100.0	18.5	4,812	3,312
Total [2]	4,062		15.6	4,696	3,428
Total [3]	4,062		14.7	4,659	3,465

^[1] No allowance for correlations between assets

The value on increase/decrease columns illustrates the monetary effect of the percentage change in the volatility column. The actual annual change in value is expected to be lower than this in two years out of three, but higher in one year out of three.

It can be seen that the risk to the overall Fund assets [2] is lower than the total of the risks to the individual assets.

However, because the purpose of a pension scheme is to make payments to scheme beneficiaries, the true risk of a pension scheme is not measured in absolute terms, but relative to its liabilities [3]. The risk is lower than the absolute asset risk, due to the impact of correlation with the discount rate used to value the liabilities.

This risk analysis incorporates volatility from market, interest rate, foreign exchange, credit, and all other sources of risk, and, importantly, makes allowance for how these risks may offset each other.

^[2] Including allowance for correlations between assets

^[3] Including allowance for correlation between assets and liabilities.

14 Nature and extent of risk arising from financial instruments (cont'd)

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit risk in their pricing and consequently the risk of loss is implicitly provided for in the value of the fund's assets and liabilities (as outlined in Market Risk above).

In essence, the Fund's entire investment portfolio is exposed to some sort of credit risk. However, through the selection of counterparties, brokers and financial institutions the Fund reduces the credit risk that may occur through the failure to settle a transaction in a timely manner.

Cash deposits, derivatives and securities lending are the major areas of credit exposure where credit risk is not reflected in market prices.

Cash deposits

At 31 March 2013, cash deposits represented £222.2m, 5.4% of total net assets. This was held with the following institutions:

	Moody's Credit Rating 31 March 2013	Balances at 31 March 2012 £000	Balances at 31 March 2013 £000
Held for investment purposes			
Northern Trust Global Investment Limited - liquidity funds	Aaa	36,153	75,949
Northern Trust Company - cash deposits	Aa3	1,858	17,758
Royal Bank of Scotland - various accounts	A2	4,318	-
The City of Edinburgh Council - treasury management	See below	62,824	93,901
Total investment cash		105,153	187,608
Held for other purposes The City of Edinburgh Council - treasury management	See below	26,350	34,616
Total cash		131,503	222,224

The majority of Sterling cash deposits of the Fund are managed along with those of the administering authority (the City of Edinburgh Council) and other related organisations which are pooled for investment purposes as a treasury cash fund. Management of the cash fund is on a low risk basis, with security of the investments the key consideration. The Council has in place counterparty criteria.

The Fund's cash holding at the year end under its treasury management arrangements was held with the following institutions:

Nature and extent of risk arising from financial instru	uments (con <u>t</u> 'd)		
Credit risk (cont'd)	Moody's Credit Rating 31 March	Balances at 31 March 2012	Balances at 31 March 2013
Money market funds	2013	£000	£000
Deutsche Bank AG, London	Aaa	11,792	13,961
Goldman Sachs	Aaa	11,172	13,701
Bank call accounts	, idd	-	13,270
Bank of Scotland	A2	7,571	12,714
Royal Bank of Scotland	A2 A3	8,212	7,088

Rabobank	Aa2	-	4,910
Building society fixed term deposits			.,
Nationwide Building Society	A2	2,599	4,893
UK Pseudo-Sovereign risk instruments			
Other Local Authorities [1]	n/a	23,817	23,590
UK Government guaranteed FRNs	n/a	10,018	-
		89,174	128,517

[1] Very few Local Authorities have their own credit rating but they are generally assumed to have a pseudo-sovereign credit rating (which in the UK at 31 March 2013 would have been 'Aa1'). Of the £23.6m on deposit with local authorities, £12.8m is with a local authority which has a 'Aa2' credit rating from Moody's.

No breaches of the Council's counterparty criteria occurred during the reporting period and the Fund does not expect any losses from non-performance by any of its counterparties in relation to deposits.

Securities lending

The Fund participates in a securities lending programme as described above. The Fund is potentially exposed to credit risk in the event of the borrower of securities defaults. This risk is mitigated by the contractual commitment that borrowers provide collateral in excess of 100% of the value of the securities borrowed. In addition, Northern Trust has signed an agreement requiring it to make good any losses arising from the lending programme.

14 Nature and extent of risk arising from financial instruments (cont'd)

Derivatives

The Fund transacts foreign currency derivatives over-the-counter and hence is exposed to credit risk in the event of a counterparty defaulting on the net payment or receipt that remains outstanding. This risk is minimised by the use of counterparties that are recognised financial intermediaries with acceptable credit ratings and by netting agreements. At 31 March 2013, the Fund was due £3.3m from over-the-counter foreign currency derivatives. However, net of liabilities, the Fund owed counterparties £17.6m.

The Fund also transacts in futures which are traded on exchanges. The risk of default is minimal due the collateralisation of the contracts and the exchange having in place controls to cover defaulting counterparties. At 31 March 2013, the Fund was due £1,067k (£445k net of liabilities) from futures.

Liquidity risk

Liquidity risk reflects the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore ensures that there is adequate cash and liquid resources to meet its commitments. Cash flow projections are prepared on a regular basis to understand and manage the timing of the Fund's cash flows.

The majority (estimated to be over 75%) of the Fund's investments could be converted to cash within three months in a normal trading environment.

Refinancing risk

Refinancing risk is the risk that the Fund will be bound to replenish a significant proportion of its pension fund financial instruments at a time of unfavourable interest rates. The Fund is not bound by any obligation to replenish its investments and hence is not exposed to refinancing risk.

15 Actuarial statement

The Scheme Actuary has provide a statement describing the funding arrangements of the Fund, this can be found in at the end of this section.

16 Actuarial present value of promised retirement benefits

The actuarial value of promised retirement benefits at the accounting date, calculated in line with International Accounting Standard 19 (IAS19) assumptions, is estimated to be £4,946m (2012 £4,185m). This figure is used for statutory accounting purposes by Lothian Pension Fund and complies with the requirements of IAS26. The assumptions underlying the figure match those adopted for the Administering Authority's FRS17/IAS19 reports at each year end.

The figure is only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

	31 March	31 March
Financial assumptions	2012	2013
	% p.a.	% p.a.
Inflation / pensions increase rate	2.5	2.8
Salary increase rate	4.8	5.1
Discount rate	4.8	4.5

For the year ended 31 March 2013 and 31 March 2012, salary increases were estimated at 1% p.a. nominal for the three years to 31 March 2015 reverting to the long term rate thereafter.

16 Actuarial present value of promised retirement benefits (cont'd)

Longevity assumptions

The life expectancy assumption is based on Fund specific statistical analysis with improvements from 2008 in line with Medium Cohort and a 1% p.a. underpin. Based on these assumptions, the average future life expectancies, in years, at age 65 are summarised below:

	Males	Females
Current pensioners	20.4	22.8
Future pensioners (assumed to be currently 45)	22.6	25.4

This assumption is the same that adopted as at 31 March 2012.

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2009 service and 75% of the maximum tax-free cash for post-April 2009 service.

19 Additional Voluntary Contributions

Active members of the Lothian Pension Fund and the Lothian Buses Pension Fund have the option to pay additional voluntary contributions (AVCs). These AVCs are invested separately from the main funds, securing additional benefits on a money purchase basis for those members that have elected to contribute. The investment of the AVCs is managed by Standard Life and Prudential.

In accordance with regulation 4 (2) (b) of the Local Government Pension Scheme (Management and Investment of Funds) (Scotland) Regulations 2010, AVCs are not included in the pension fund financial statements.

20 Related party transactions

The City of Edinburgh Council

The Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund are administered by the City of Edinburgh Council. Consequently there is a strong relationship between the Council and the Pension Funds.

The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council, this is based on the amount of central services consumed. This includes the pension payroll service provided by the Council. In turn, the Division allocates its costs to the three Pension Funds. Costs directly attributable to a specific Fund are charged to the relevant Fund, costs that are common to all three Funds are allocated on a defined basis.

The Council is also the single largest employer of members of the Fund and contributed £56.4m to the Fund during the year (2012 £54.5m).

20 Related party transactions (cont'd)

Transactions between the Council and the Fund are managed via a holding account, each month the Fund is paid a cash sum leaving a working balance in the account to cover the month's pension payroll costs and other expected costs.

Year end balance on holding account

31 March	31 March
2012	2013
£000	£000
11,192	4,355

Part of the Fund's cash holdings are invested on the money markets by the treasury management operations of the Council, through a service level agreement. During the year to 31 March 2013, the fund had an average investment balance of £93.5m (2012 £95.3m), interest earned was £621.9k (2012 £737.8k).

Year end balance on treasury management account

Governance

As at 31 March 2013, all members of the Pensions Committee, with the exception of Councillor Bill Cook, were active members of the Lothian Pension Fund.

Each member of the Pensions Committee is required to declare any financial and non-financial interests they have in the items of business for consideration at each meeting, identifying the relevant agenda item and the nature of their interest.

Key management personnel

During the period from 1 April 2012 to the date of issuing of these accounts, several employees of the City of Edinburgh Council held key positions in the financial management of the Lothian Pension Fund. These employees and their financial relationship with the Fund (expressed as cash-equivalent transfer values or CETV) are set out below:

		Accrued CETV as at 31 March 2012	Accrued CETV as at 31 March 2013
Name	Position held	£000	£000
Alastair Maclean	Director of Corporate Governance	44	67
Clare Scott	Investment and Pensions Service Manager	67	89
Struan Fairbairn	Legal, Risk and Development Manager (Appointed March 2013)	-	1
John Burns	Pensions and Accounting Manager	318	349
Esmond Hamilton	Financial Controller	86	101
Bruce Miller	Investment Manager	65	90

21 Contingent liabilities and contractual commitments

The Fund has commitments relating to outstanding call payments due on unquoted limited partnership funds held in the private equity and infrastructure parts of the portfolio. The amounts 'called' by these funds are irregular in both size and timing, taking place over a period of years from the date of each original commitment. The outstanding commitments at the year end are as follows:

31 March 2012	31 March 2013
£000	£000
175 058	164 316

Outstanding investment commitments

The Fund has entered into an agreement with Heywood for the provision of an pension payroll system that is integrated with the existing pension administration system (Altair). Implementation of the system will be completed during 2013/14. At 31 March 2013 there was an outstanding contractual commitment of £162k.

As at 31 March 2013, the Fund had a contingent liability in respect of fees resulting from legal action against a former employer, the Scottish Council for Research in Education and the University Court of the University of Glasgow to obtain payment of a cessation valuation. The legal action was not successful and an accrual has been made in the accounts for the Fund's legal costs and those of the defendants that will need to be reimbursed by the Fund. As of the date of the approval of these accounts, the Fund may be liable to pay an uplift on the costs of the defendants. The amount of the liability is contingent on a decision of the Court but could be up to £45k.

22 Contingent assets

There were no contingent assets at the year end.

23 Impairment losses

During the year the Fund recognised a reduction in impairment losses in respect of specific benefit over payments for which reimbursement has been requested of £25.5k. This leaves an impairment of £17.5k at the year end.

24 Prior year adjustment

The results for the year ended 31 March 2012 have been restated to reflect a change in the accounting policy on income generated by unquoted private equity and infrastructure investments. The previous policy was to treat all distributions arising from these investments as capital with the results being reported as a change in market value of investments. The new policy splits distributions into capital and income elements with the latter being included under investment income in the Fund Account. The new policy reflects the Fund's increasing investment in infrastructure which produces a significant part of its return as income.

24 Prior year adjustment (cont'd)

The change has the effect of increasing the reported investment income by £6.5m and reducing the change in market value of investments by the same amount. The changes are reported in the Fund Account but the there is no change to the net increase in the Fund for the year ended 31 March 2012 of £104,961k. The adjustments can be summarised as follows:

of March 2012 of 2104,301K. The adjustments can be summarised as folk	JWJ.	
	2011/12 Statements as restated	Adjustments made
	£000	£000
Fund Account 2011/12		
Investment income	76,435	6,547
Change in market value of investments	17	(6,547)

Actuarial Statement for 2012/13

This statement has been prepared in accordance with Regulation 31A(1)(d) of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008, and Chapter 6 of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the UK 2012/13.

Description of Funding Policy

The funding policy is set out in the administering authority's Funding Strategy Statement (FSS), dated March 2012. In summary, the key funding principles are as follows:

- to ensure the long-term solvency of the overall Fund
- to minimise the degree of short-term change in employer contribution rates
- maximise the returns from investments within reasonable and considered risk parameters, and hence minimise the cost to the employer
- to ensure that sufficient cash is available to meet all liabilities as they fall due for payment
- to help employers manage their pension liabilities
- where practical and cost effective, to make allowance for the different characteristics of different employers and groups of employers.

The FSS sets out how the administering authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable.

Funding position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 32 of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008 was as at 31 March 2011. This valuation revealed that the Fund's assets, which at 31 March 2011 were valued at £3,477 million, were sufficient to meet 96% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2011 valuation was £142 million.

Individual employers' contributions for the period 1 April 2012 to 31 March 2015 were set in accordance with the Fund's funding policy as set out in its FSS.

Principal actuarial assumptions and method used to value the liabilities

Full details of the methods and assumptions used are described in my valuation report dated 15 February 2012.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2011 valuation were as follows:

	31 Marc	h 2011
Financial assumptions	% p.a.	% p.a.
	Nominal	Real
Discount rate	5.8%	2.9%
Pay increases *	5.1%	2.2%
Price inflation/Pension increases	2.8%	-

 $^{^{*}}$ plus an allowance for promotional pay increases. Short term pay growth was assumed to be 1% p.a. for 2011/12 and 2012/13, reverting to 5.1% p.a. thereafter.

The key demographic assumption was the allowance made for longevity. As a member of Club Vita, the baseline longevity assumptions adopted at this valuation were a bespoke set of VitaCurves that were specifically tailored to fit the membership profile of the Fund. Longevity improvements were in line with standard year of birth mortality tables; with medium cohort projections and a 1% p.a. underpin effective from 2008. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current pensioners	20.4 years	22.8 years
Future pensioners	22.6 years	25.4 years

Copies of the 2011 valuation report and Funding Strategy Statement are available on our website at www.lpf.org.uk/publications or on request from the Fund.

Experience over the period since April 2011

The administering authority monitors the funding position on a regular basis as part of its risk management programme with the next funding update to be produced at 31 March 2013. It showed that the funding level (excluding the effect of any membership movements) had fallen from 96% to 87% due, primarily, to falling bond yields. This has been partially offset by strong returns over 2012/13.

The next actuarial valuation will be carried out as at 31 March 2014. The Funding Strategy Statement will also be reviewed at that time.

Fund membership

Funding

Benefits are funded by contributions and investment earnings. Contributions are made by active members of the Fund in accordance with the Local Government Pension Scheme (Benefits, Membership and Contributions) (Scotland) Regulations 2008. These contributions are payable at a certain rate for a band of earnings, for the year ended 31 March 2013 the contribution rates were as follows:

Full time equivalent pensionable pay (2012/13)	Rate
Less than £19,971	5.5%
Between £19,971 and £25,948	Between 5.6% and 6.0%
Between £25,949 and £32,567	Between 6.1% and 6.5%
Between £32,568 and £45,915	Between 6.6% and 7.5%
Between £45,916 and £51,727	Between 7.6% and 8.0%
Between £51,728 and £69,262	Between 8.1% and 9.0%
Between £69,263 and £104,782	Between 9.1% and 10.0%
Between £104,783 and £240,383	Between 10.1% and 11.2%

Employers' contributions are set at the triennial actuarial valuation. The contribution rates for the year ended 31 March 2013 were based on the actuarial valuation at 31 March 2011. For the nine months to 31 December 2012 the rate was 19.6% of pensionable pay and 19.9% for the three months to 31 March 2013 for service currently being accrued.

More information on funding can be found in the Actuarial Statement for 2012/13 at the end of this section.

Investment strategy

Following the completion of the 2011 actuarial valuation, an in-depth review of Lothian Buses Pension Fund's investment strategy has been undertaken.

The review concluded that there is scope to reduce the Fund's investment risk in the long-term with a focus over the coming years on capital preservation, investment income and reducing the absolute volatility of the Fund.

The strategy for 2012-2017 is set out in the table shown and has private equity reclassified in Equities rather than Alternative investments. Investments in the Alternatives category include property, infrastructure, timber and corporate bonds. Asset allocations limits under normal financial conditions are also shown.

Investment strategy	Interim benchmark at 31 March 2013 %	Strategy for 2012 - 2017	Asset allocation limits minimum – maximum %
Equities	62.5	55.0	45 – 65
Index linked gilts	10.0	15.0	10 - 30
Corporate bonds	10.0	-	
Alternatives	17.5	30.0	10 – 35
Cash			0 - 10
TOTAL	100.0	100.0	

The objective of the Fund has been redefined so that the target return over long-term economic cycles (typically 5 years or more) is the achievement of the same return as that generated by the strategic allocation, and over shorter periods, the Fund should perform better than the strategic allocation if markets fall significantly.

The Fund will gradually implement the new strategy over the next few years.

Investment performance

Annualised returns to 31 March 2013 (% per year)

	1 Year	3 Years	10 Years
Lothian Buses Pension Fund	16.4	10.4	11.3
Benchmark	13.8	8.7	10.1
Retail Price Index	3.3	4.1	3.3
National Average Earnings	(0.6)	1.0	2.7

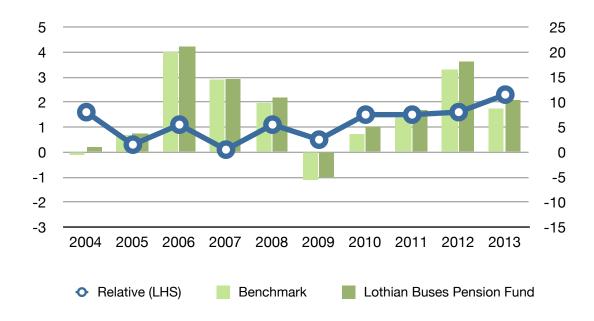

The absolute performance of Lothian Buses Pension Fund was over the 12 month period was +16.4% and three-year performance was +10.4% per annum. Over both time periods the performance was above the benchmark return.

Over 10 years, the Fund returned +11.3% per annum, ahead of its benchmark by 1.0% per year and also well ahead of measures of inflation, including the retail price index and national average earnings.

Despite strong investment returns, the actual funding level has fallen from 112.4% at the time of the last actuarial valuation on 31 March 2011 to 102.5% at 31 March 2013, largely as a result of falling real gilt yields, which caused an increase in the value of liabilities.

Annualised 3 yearly returns ending 31 March (% per year)

Target is for the Fund to outperform the benchmark by 1.5% per year over 3 years (target prior to October 2009 target was 1%)

JOHN BURNS FCMA CGMA Pensions and Accounting Manager 24 September 2013

Notes to the net asset statement

The financial statements summarise the transactions of the Fund during the year and its net assets at the year end. They do not take account of the obligations to pay pensions and benefits which fall due after the end of the year. The actuarial position of the Fund, which does take account of such obligations, is discussed in the Actuarial Valuation section of this report and these financial statements should be read in conjunction with that information. In addition, as required by IAS26, the Actuarial Present Value of Promised Retirement Benefits is disclosed in the notes to these financial statements.

Notes to the Accounts

1 Events after the balance sheet date

There have been no events since 31 March 2013, and up to the date when these accounts were authorised, that require any adjustments to these accounts.

2	Contributions from employer		
		2011/12	2012/13
	Lothian Buses Plc	£000	£000
	Normal (ongoing contributions)	7,300	7,147
	Deficit funding	556	-
		7,856	7,147
	Pension strain	272	-
	Total	8,128	7,147

The Lothian Buses Pension Fund is a single employer pension fund for employees of Lothian Buses Plc. The Lothian Buses Fund was set up in 1986 under the Local Government Superannuation (Funds) (Scotland) regulations 1986 (SSI 115/1986).

In 2011/12 the employer contributions included an element in respect of deficit funding. The part of the contribution attributable to deficit funding as shown above, was calculated based on a future service contribution rate of 21.1% (as stated in the actuarial valuation of 31 March 2008). The deficit recovery period was the estimated future working lifetime of current active members.

In 2012/13, no deficit funding was required (as stated in the actuarial valuation of 31 March 2011). The employer paid an agreed contribution rate of 19.9% on pensionable salaries, this rate is defined in actuarial valuation.

Where the employer makes certain decisions which result in additional benefits being paid out to a member, or benefits being paid early, this results in a "strain" on the Fund. The resulting pension strain costs are calculated and recharged in full to the employer.

The Investments and Pensions Division of the Council is responsible for administering the three pension Funds. The Division receives an allocation of the overheads of the Council. In turn the Division allocates administration and investment costs to the three pension funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated on a defined basis.

In 2012 the administration costs were allocated based on the value of the funds as at the end of the year. In 2013 the administration costs allocation basis were modified to a more stable basis which better reflects the underlying cost drivers. Pension payroll costs were allocated based on the number of pensioners during the year and all other costs were allocated based on the number of members of each Fund.

7a Reconciliation of movement in investments (cont'd)

Net financial assets

The change in market value of investments during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments during the year.

Transaction costs are included in the cost of purchases and sale proceeds. Transaction costs include costs charged directly to the Fund such as fees, commissions, stamp duty and other fees. Transaction costs incurred during the year amounted to £82k (2012 £81k). In addition to the transaction costs disclosed above, indirect costs may be incurred through the bid-offer spread on some pooled investment vehicles, the amount of any such costs is not separately provided to the Fund.

7f Securities lending

During the year Lothian Pension Fund participated in two securities lending arrangements. The arrangement with the Northern Trust Company covers the main investments of the Fund. As at 31 March 2013, £9.2m (2012 £12.5m) of securities were released to third parties. Collateral valued at 106.8% (2012 107.1%) of the market value of the securities on loan was held at that date. The arrangement with Blackrock related to the Fund's holding of FTSE 250 iShares ceased during the year.

8 Financial instruments

8a Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the fair value amounts of financial assets and liabilities by category and net assets statement heading. No financial assets were reclassified during the accounting period.

All financial instruments are marked to market (at fair value) in the Fund's accounting records hence there is no difference between the carrying value and fair value.

8c Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

8c Valuation of financial instruments carried at fair value (cont'd)

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities and unit trusts. Listed investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investments in unlisted private equity, infrastructure and timber are based on valuations provided by the general partners to the funds in which the Fund has invested. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of International Financial Reporting Standards (IFRS). The valuations are usually undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

The following table provides an analysis of the financial assets and liabilities of the Fund grouped into Levels 1 to 3, based on the level at which the fair value is observable.

		31 March	2013

9 Nature and extent of risk arising from financial instruments

Risk and risk management

The Fund's primary aim is to ensure that all members and their dependants receive their benefits when they become payable. The investment strategy aims to maximise the returns from investments within reasonable risk parameters and hence minimise the long-term cost to the employer. The Fund achieves this by investing in a diverse range of assets to reduce risk to an acceptable level. In addition, the fund ensures that sufficient cash is available to meet all liabilities when they are due to be paid.

Responsibility for the Fund's overall investment strategy rests with the Pensions Committee. The Investment Strategy Panel and the internal investment team monitor investment risks on a regular basis. Investment risk management tools are used to identify and analyse risks faced by the Fund's investments.

Consideration of the Fund's investment risk is part of the overall risk management of the pensions operations. Risks are reviewed regularly to reflect changes in activity and market conditions.

Types of investment risks

There are various ways of considering investment risks for pension funds. For the purposes of this note, market risk is the potential for an investor to experience losses from falls in the prices of investments. All financial instruments, including cash deposits, present a risk of loss of capital and risks vary depending on different asset classes.

Investment risk also changes over time as economic conditions and investor sentiment change. The Fund considers overall fluctuations in prices arising from a variety of sources: market risk, foreign exchange risk, interest rate risk, credit risk, etc. The different risks may, to some extent, offset each other.

The overall investment risk of the Fund depends on the actual mix of assets and encompasses all the different elements of risk.

The Fund manages these risks in a number of ways:

- assessing and establishing acceptable levels of market risk when setting overall investment strategy. Importantly, risk is considered relative to the liabilities of the Fund
- diversification of investments in terms of type of asset, geographical and industry sectors as well as individual securities
- taking stewardship responsibilities seriously and pursuing constructive engagement with the companies in which we invest
- monitoring market risk and market conditions to ensure risk remains within tolerable levels.

The Fund may use equity futures contracts from time to time to manage market risk. Exchange traded options are not used by the Fund.

Sensitivity analysis

Asset prices have a tendency to fluctuate. The degree of such fluctuation is known as "volatility" and it differs by asset class. The table below sets out the long-term volatility assumptions used in the Fund's asset-liability modelling undertaken by the Fund's investment adviser KPMG:

9 Nature and extent of risk arising from financial instruments (cont'd)

	Potential price
Asset type	movement (+ or -)
Equities - developed markets	20.0%
Private equity	30.0%
Timber	30.0%
Secured loans	10.0%
Corporate bonds	10.5%
Index-linked gilts	7.0%
Infrastructure	8.0%
Property	13.0%
Cash	1.6%

Sensitivity analysis

Volatility is the standard deviation of annual returns. In two years out of three, the asset's change in value (which could be a gain or a loss) is expected to be lower than the volatility figure, but in one year out of three, the change in value is expected to be higher than the volatility figure.

Asset classes do not always move in line with each other. The extent to which assets move together is known as their "correlation". A lower correlation means that there is less risk of assets losing value at the same time. The overall Fund benefits from "diversification " because it invests in different asset classes, which don't all move in line with each other. The following table shows the risks at the asset class level and the overall Fund level, with and without allowance for correlation.

	Value at		Potential		Value
	31 March		Change	Value on	on
	2013	% of fund		increase	decrease
Asset type	£000	%	%	£000	£000
Equities - developed markets	207,400	67.2	20.0	248,880	165,920
Private equity	6,370	2.1	30.0	8,281	4,459
Timber	2,897	0.9	30.0	3,766	2,028
Secured loans	1,552	0.5	10.0	1,707	1,397
Corporate bonds	22,551	7.3	10.5	24,919	20,183
Index-linked gilts	23,133	7.5	7.0	24,752	21,514
Infrastructure	13,911	4.5	8.0	15,024	12,798
Property	22,931	7.4	13.0	25,912	19,950
Cash	8,020	2.6	1.6	8,148	7,892
Total [1]	308,765	100.0	17.0	361,389	256,141
Total [2]	308,765		14.8	354,462	263,068
Total [3]	308,765		13.6	350,757	266,773

^[1] No allowance for correlations between assets

The value on increase/decrease columns illustrates the £m effect of the percentage change in the volatility column. The actual annual change in value is expected to be lower than this in two years out of three, but higher in one year out of three.

It can be seen that the risk to the overall Fund assets is lower than the total of the risks to the individual assets[2].

^[2] Including allowance correlations for between assets

^[3] I Including allowance for correlation between assets and liabilities.

9 Nature and extent of risk arising from financial instruments (cont'd)

However, because the purpose of a pension scheme is to make payments to scheme beneficiaries, the true risk of a pension scheme is not measured in absolute terms, but relative to its liabilities[3]. The risk is lower than the absolute asset risk, due to the impact of correlation with the discount rate used to value the liabilities.

This risk analysis incorporates volatility from market, interest rate, foreign exchange, credit, and all other sources of risk, and, importantly, makes allowance for how these risks may offset each other.

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit risk in their pricing and consequently the risk of loss is implicitly provided for in the value of the Fund's assets and liabilities (as outlined in Market Risk above).

In essence, the Fund's entire investment portfolio is exposed to some sort of credit risk. However through the selection of counterparties, brokers and financial institutions the Fund reduces the credit risk that may occur through the failure to settle a transaction in a timely manner.

Cash deposits, derivatives and stock lending are the major areas of credit exposure where credit risk is not reflected in market prices.

Cash deposits

At 31 March 2013, cash deposits represented £13.7m, 4.4% of total net assets. This was held with the following institutions:

	Moody's Credit Rating at 31 March	Balances at 31 March 2012	Balances at 31 March 2013
	2013	£000	£000
Held for investment purposes			
Northern Trust Global Investment Limited - liquidity funds	Aaa	2,144	10,207
Northern Trust Company - cash deposits	Aa3	487	947
The City of Edinburgh Council - treasury management	See below	757	696
Total investment cash		3,388	11,850
Held for other purposes The City of Edinburgh Council - treasury management	See below	2,759	1,913
Total cash		6,147	13,763

The majority of Sterling cash deposits of the Fund are managed along with those of the administering authority (the City of Edinburgh Council) and other related organisations which are pooled for investment purposes as a treasury cash fund. Management of the cash fund is on a low risk basis, with security of the investments the key consideration while at the same time seeking innovative and secure cash management opportunities.

As at 31 March 2013 £6.5m of cash was held by Northern Trust in respect of transition activity. Post year end £6.3m of this was transferred to City of Edinburgh Council treasury management.

9 Nature and extent of risk arising from financial instruments (cont'd)

Cash deposits (cont'd)

As well as lending monies to other local authorities, the Council has purchased UK Government Treasury Bills as well as Bonds and Floating Rate Notes with an explicit UK Government Guarantee.

The Fund's cash holding at the year end under its treasury management arrangements was held with the following institutions:

	Moody's		
	Credit Rating at	Balances	Balances
	31 March	at 31 March	at 31 March
	2013	2012	2013
		£000	£000

Other Local Authorities [1]	n/a	938	477
UK Government guaranteed FRNs	n/a	394	-
	_		
		3,516	2,609

^[1] Very few Local Authorities have their own credit rating but they are generally assumed to have a pseudo-sovereign credit rating (which in the UK at 31 March 2013 would have been 'Aa1'). Of the £477k on deposit with local authorities at 31 March 2013, £249k is with a local authority which has a 'Aa2' credit rating from Moody's.

No breaches of the Council's counterparty criteria occurred during the reporting period and the Fund does not expect any losses from non-performance by any of its counterparties in relation to deposits.

Securities lending

The Fund participates in a security lending programme as described above. The Fund is potentially exposed to credit risk in the event of the borrower of stock defaults. This risk is mitigated by the contractual commitment that borrowers provide collateral in excess of 100% of the value of the securities borrowed. In addition, Northern Trust has signed an agreement requiring it to make good any losses arising from the lending programme.

9 Nature and extent of risk arising from financial instruments (cont'd)

Liquidity risk

Liquidity risk reflects the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore ensures that there is adequate cash and liquid resources to meet its commitments. Cashflow projections are prepared on a regular basis to understand and manage the timing of the Fund's cashflow. The majority (estimated to be over 80%) of the Fund's investments could be converted to cash within three months in a normal trading environment.

Refinancing risk

Refinancing risk is the risk that the Fund will be bound to replenish a significant proportion of its pension fund financial instruments at a time of unfavourable interest rates. The Fund is not bound by any obligation to replenish its investments and hence is not exposed to refinancing risk.

10 Actuarial statement

The Fund Actuary has provide a statement describing the funding arrangements of the Fund, this can be found in a separate section at the end of this section..

11 Actuarial present value of promised retirement benefits

The actuarial value of promised retirement benefits at the accounting date, calculated in line with International Accounting Standard 19 (IAS19) assumptions, is estimated to be £321m (2012 £269m). This figure is used for statutory accounting purposes by Lothian Buses Pension Fund and complies with the requirements of IAS26. The assumptions underlying the figure match those adopted for the Administering Authority's FRS17/IAS19 reports at each year end.

The figure is only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

	3 i Maicii	3 I Mai Cil
Financial assumptions	2012	2013
	% p.a.	% p.a.
Inflation / pensions increase rate	2.5	2.8
Salary increase rate	4.8	5.1
Discount rate	4.8	4.5

For the year ended 31 March 2013, salary increases were estimated at 1% p.a. nominal for the three years to 31 March 2015 reverting to the long term rate thereafter.

Longevity assumptions

The life expectancy assumption is based on the Fund's specific statistical analysis with improvements from 2008 in line with the Medium Cohort and a 1% p.a. underpin. Based on these assumptions, the average future life expectancies, in years, at age 65 are summarised below:

	Males	remaies
Current pensioners	18.4	21.6
Future pensioners (assumed to be currently 45)	21.7	24.8
This assumption is the same as at 31 March 2012.		

11 Actuarial present value of promised retirement benefits (cont'd)

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2009 service and 75% of the maximum tax-free cash for post-April 2009 service.

14 Additional Voluntary Contributions

Active members of the Lothian Pension Fund and the Lothian Buses Pension Fund have the option to pay additional voluntary contributions (AVCs). These AVCs are invested separately from the main funds, securing additional benefits on a money purchase basis for those members that have elected to contribute. The investment of the AVCs is managed by Standard Life and Prudential.

In accordance with regulation 4 (2) (b) of the Local Government Pension Scheme (Management and Investment of Funds) (Scotland) Regulations 2010, AVCs are not included in the pension fund financial statements.

15 Related party transactions

The City of Edinburgh Council

Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund are administered by the City of Edinburgh Council. Consequently there is a strong relationship between the Council and the pension funds.

The Investment and Pensions Division of the Council is responsible for administering the three pension funds. The Division receives an allocation of the overheads of the Council, this is based on the amount of central services consumed. This includes the pension payroll service provided by the Council. In turn, the Division allocates its costs to the three funds. Costs directly attributable to a specific fund are charged to the relevant fund, costs that are common to all three funds are allocated on a defined basis.

Transactions between the Council and the Funds are managed via a holding account, each month the Funds are paid a cash sum leaving a working balance in the account to cover the month's pension payroll costs and other expected costs.

Year end balance on holding account

31 March	31 March
2012	2013
£000	£000
629	459

Part of the Fund's cash holdings are invested on the money markets by the treasury management operations of the Council, through a service level agreement. During the year to 31 March 2013, the Fund had an average investment balance of £3.3m (2012 £4.6m), interest earned was £22.0k (2012 £35.6k).

16 Contingent liabilities and contractual commitments

The Fund has commitments relating to outstanding call payments due on private equity and infrastructure unquoted limited partnership funds. The amounts 'called' by these funds are irregular in both size and timing, taking place over a period of years from the date of each original commitment. The outstanding commitments at the year end are as follows:

31 March	31 March
2012	2013
£000	£000
2.627	3.041

17 Contingent assets

There were no contingent assets at the year end.

18 Impairment losses

No impairment losses have been identified during the year.

Actuarial Statement for 2012/13

This statement has been prepared in accordance with Regulation 31A(1)(d) of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008, and Chapter 6 of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the UK 2012/13.

Description of Funding Policy

The funding policy is set out in the administering authority's Funding Strategy Statement (FSS), dated March 2012. In summary, the key funding principles are as follows:

- to ensure the long-term solvency of the overall Fund
- to minimise the degree of short-term change in employer contribution rates
- maximise the returns from investments within reasonable and considered risk parameters, and hence minimise the cost to the employer
- to ensure that sufficient cash is available to meet all liabilities as they fall due for payment
- to help employers manage their pension liabilities.

The FSS sets out how the administering authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable.

Funding position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 32 of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008 was as at 31 March 2011. This valuation revealed that the Fund's assets, which at 31 March 2011 were valued at £257 million, were sufficient to meet 112% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting surplus at the 2011 valuation was £28 million.

Employer's contributions for the period 1 April 2012 to 31 March 2015 were set in accordance with the Fund's funding policy as set out in its FSS.

Principal actuarial assumptions and method used to value the liabilities

Full details of the methods and details used are described in my valuation report dated 16 December 2011.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2011 valuation were as follows:

	31 March 2011	
	% p.a.	% p.a.
Financial assumptions	Nominal	Real
Discount rate	5.8%	2.9%
Pay increases *	5.1%	2.2%
Price inflation/Pension increases	2.8%	-

^{*} plus an allowance for promotional pay increases. Short term pay growth was assumed to be 2.4% p.a. for 2011/12, 3.1% p.a. for 2012/13, reverting to 5.1% p.a. thereafter.

The key demographic assumption was the allowance made for longevity. As a member of Club Vita, the baseline longevity assumptions adopted at this valuation were a bespoke set of VitaCurves that were specifically tailored to fit the membership profile of the Fund. Longevity improvements were in line with standard year of birth mortality tables; with medium cohort projections and a 1% p.a. underpin effective from 2008. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current pensioners	18.4 years	21.6 years
Future pensioners	21.7 years	24.8 years

Copies of the 2011 valuation report and Funding Strategy Statement are available on www.lpf.org.uk/publications or on request from the Fund.

Experience over the period since April 2011

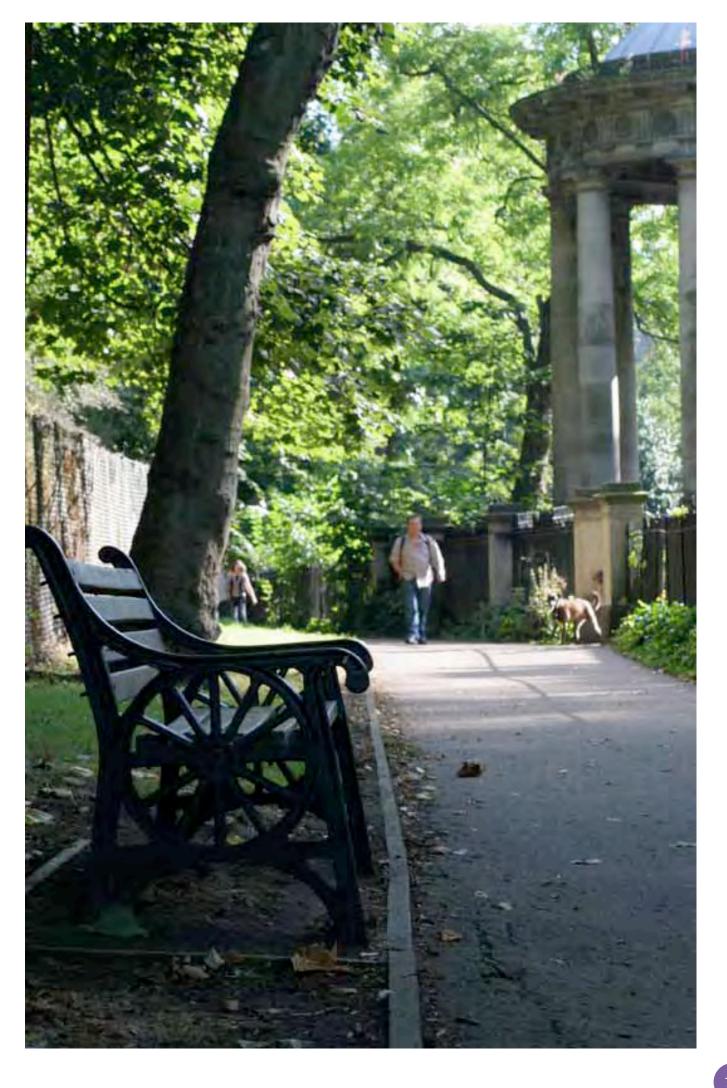

The administering authority monitors the funding position on a regular basis as part of its risk management programme. The most recent funding update was produced at 31 March 2013. It showed that the funding level (excluding the effect of any membership movements) had fallen from 112% to 103% due, primarily, to falling real bond yields. This has been partially offset by strong asset returns over 2012/13.

The next actuarial valuation will be carried out as at 31 March 2014. The Funding Strategy Statement will also be reviewed at that time.

Richard Warden

Fellow of the Institute and Faculty of Actuaries

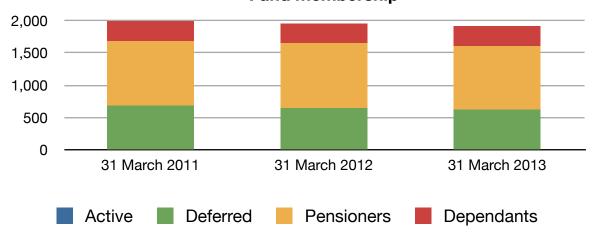

For and on behalf of Hymans Robertson LLP 20 Waterloo Street Glasgow 30 May 2013

Fund membership

Funding

As the Scottish Homes Pension Fund has no active members, benefits are funded by investment earnings and payments from the Scottish Government in line with the guarantee agreement.

Payments under the guarantee agreement are set at triennial actuarial valuations. The amount payable for the year ended 31 March 2013, of £771,000, was based on the actuarial valuation as at 31 March 2011.

More information on funding can be found in the Actuarial Statement for 2012/13 at the end of this section..

Investment strategy

Pensions Committee approved a new investment strategy in October 2012 to be implemented over the following 5 years.

The revised strategy reduces the allocation to equities and property and increases the allocation to bonds. It is designed to reduce investment risk as the Fund is closed to new members and the liabilities will mature over time.

The new strategy continues to recognise the latent inflation potential at the heart of current central bank monetary policy and maintains significant exposure to real investments, such as index-linked gilts and equities, which have a history of protecting purchasing power, after the effects of inflation have been taken into account.

The revised investment strategy is set at the broad asset class level of equities, bonds and property, which are the key determinants of investment risk and return. The revised strategy for the next 5 years is set out in the table below.

is cot out in the table bolow.	Previous strategic benchmark %	Strategy for 2012 - 2017 %	Asset allocation limits minimum - maximum %
Equities			
UK	8.8		
US	12.4		
Europe (ex UK)	8.0		
Pacific inc Japan	7.6		
Emerging markets	3.2		
Sub-total	40.0	30	20-35
Bonds			
UK Fixed Interest Gilts	10.0		
UK Index Linked Gilts	40.0		
Subtotal	50.0	65	60-75
Property	10.0	5	5-10
Cash	0.0	0	0-5
Total	100	100	100

The objective of the Fund has been redefined so that the target return over long-term economic cycles (typically 5 years or more) is the achievement of the same return as that generated by the strategic allocation, and over shorter periods, the Fund should perform better than the strategic allocation if markets fall significantly.

The Fund will gradually implement the new strategy over the next few years.

Investment performance

The absolute performance of Scottish Homes Pension Fund over the 12-month period was +13.0% and three-year performance was +11.2% per annum. Over both time periods, the performance was broadly in line with the benchmark return.

Since inception in July 2005, the Fund has returned +8.8% per annum, in line with its benchmark, which is well ahead of measures of inflation, including the retail price index and national average earnings.

Despite strong investment returns, the actual funding level has fallen marginally from 86% at the time of the last actuarial valuation on 31 March 2011 to 85% at 31 March 2013, largely as a result of falling real gilt yields, which caused an increase in the value of liabilities.

Annualised returns to 31 March 2013 (% per year)

			Since inception
	1 year	3 years	(July 2005)

Notes to the net asset statement

The financial statements summarise the transactions of the Fund during the year and its net assets at the year end. They do not take account of the obligations to pay pensions and benefits which fall due after the end of the year. The actuarial position of the Fund, which does take account of such obligations, is discussed in the Actuarial Valuation section of this report and these financial statements should be read in conjunction with that information. In addition, as required by IAS26, the Actuarial Present Value of Promised Retirement Benefits is disclosed in the notes to these financial statements.

Notes to the Accounts

1 Events after the balance sheet date

There have been no events since 31 March 2013, and up to the date when these accounts were authorised, that require any adjustments to these accounts.

		100	794

The Scottish Homes Pension Fund is a single employer pension fund for employees of Scottish Homes. The Scottish Homes Pension Fund was set up under (Scottish) Statutory Instrument 315/2005. when Scottish Homes became Communities Scotland - part of the Scottish Government.

Following the actuarial valuation at 31 March 2011 deficit funding of £671,000 per year is to be paid by the Scottish Government over the period April 2012 to March 2015. In addition, the Scottish Government has agreed to pay £100,000 every year towards the cost of ongoing administration.

Where the Scottish Government makes certain decisions which result in additional benefits being paid out to a member, or benefits being paid early, this results in a "strain" on the Fund. The resulting pension strain costs are calculated and recharged in full.

The Fund consists of only deferred and pensioner members, hence no employee contributions were paid during the year.

The Investments and Pensions Division of the Council is responsible for administering the three pension Funds. The Division receives an allocation of the overheads of the Council. In turn the Division allocates administration and investment costs to the three pension funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated on a defined basis.

In 2011/12 the administration costs were allocated based on the value of the Funds as at the end of the year. In 2012/13, the allocation basis were modified to a more stable basis which better reflects the underlying cost drivers. Pension payroll costs were allocated based on the number of pensioners during the year and all other costs were allocated based on the number of members of each fund.

7d Investments representing more than 5% of the net assets of the Fund or 5% of any investment class

The Fund currently invests all its money in a range of pooled funds. Investments representing more than 5% of the net assets of the Fund or 5% of any investment class are described above.

7e Securities lending

The Fund has not participated in any securities lending arrangements in the last two years.

8 Financial instruments

8a Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the fair value amounts of financial assets and liabilities by category and net assets statement heading. No financial assets were reclassified during the accounting period.

All financial instruments are marked to market (at fair value) in the Fund's accounting records hence there is no difference between the carrying value and fair value.

8c Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

8 Financial instruments

8c Valuation of financial instruments carried at fair value (cont'd)

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities and unit trusts. Listed investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investments in private equity are based on valuations provided by the general partners to the private equity funds in which the Fund has invested. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of International Financial Reporting Standards (IFRS). Valuations are usually undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

The following table provides an analysis of the financial assets and liabilities of the pension fund grouped into Levels 1 to 3, based on the level at which the fair value is observable.

9 Nature and extent of risk arising from financial instruments

Risk and risk management

The Fund's primary aim is to ensure that all members and their dependants receive their benefits when they become payable. The funding objective is outlined in the guarantee document, agreed by the Administering Authority, the Scottish Government and the Fund's Actuary.

Responsibility for the Fund's overall investment strategy rests with the Pensions Committee. The Investment Strategy Panel and the internal investment team monitor investment risks on a regular basis. Investment risk management tools are used to identify and analyse risks faced by the Fund's investments.

Consideration of the Fund's investment risk is part of the overall risk management of the pensions operations. Risks are reviewed regularly to reflect changes in activity and market conditions.

Types of investment risks

There are various ways of considering investment risks for pension funds. For the purposes of this note, investment risk is the potential for an investor to experience losses from falls in the prices of investments. All financial instruments, including cash deposits, present a risk of loss of capital and risks vary depending on different asset classes.

Investment risk also changes over time as economic conditions and investor sentiment change. The Fund considers overall fluctuations in prices arising from a variety of sources: market risk, foreign exchange risk, interest rate risk, credit risk, etc. The different risks may, to some extent, offset each other.

The overall market risk of the Fund depends on the actual mix of assets and encompasses all the different elements of risk.

The Fund manages these risks in a number of ways:

 assessing and establishing acceptable levels of market risk when setting overall investment strategy. Importantly, risk is considered relative to the liabilities of the Fund

9 Nature and extent of risk arising from financial instruments (cont'd)

- diversification of investments in terms of type of asset, geographical and industry sectors as well as individual securities
- taking stewardship responsibilities seriously and pursuing constructive engagement with the companies in which we invest
- monitoring market risk and market conditions to ensure risk remains within tolerable levels.

The Fund may use equity futures contracts from time to time to manage market risk. Exchange traded options are not used by the Fund.

Sensitivity analysis

Asset prices have a tendency to fluctuate. The degree of such fluctuation is known as "volatility" and it differs by asset class. The table below sets out the long-term volatility assumptions used in the Fund's asset-liability modelling:

Asset type	Potential price movement (+ or -)
Equities - Developed Markets	20.0%
Equities - Emerging Markets	30.0%
Fixed interest gilts	9.0%
Index-linked gilts	7.0%
Property	13.0%

Volatility is the standard deviation of annual returns. In two years out of three, the asset's change in value (which could be a gain or a loss) is expected to be lower than the volatility figure, but in one year out of three, the change in value is expected to be higher than the volatility figure.

Asset classes don't always move in line with each other. The extent to which assets move together is known as their "correlation". A lower correlation means that there is less risk of assets losing value at the same time. The overall Fund benefits from "diversification" because it invests in numerous different asset classes, which don't all move in line with each other. Consequently, the aggregate risk at the Fund level is less than the total risk from all the individual assets in which the Fund invests. The following table shows the risks at the asset class level and the overall Fund level.

	Value				
	at			Value	Value
	31 March	% of	Change	on	on
	2013	fund		increase	decrease
Asset type	£000	%	%	£000	£000
Equities - Developed Markets	53,254	38.6	20.0	63,905	42,603
Equities - Emerging Markets	4,362	3.2	30.0	5,671	3,053
Fixed Interest Gilts	12,540	9.1	9.0	13,669	11,411
Index-Linked Gilts	56,498	40.9	7.0	60,453	52,543
Property	11,352	8.2	13.0	12,828	9,876
Total [1]	138,006	100.0	13.4	156,526	119,486
Total [2]	138,006		10.5	152,497	123,515
Total [3]	138,006		9.0	150,427	125,585

^[1] No allowance for correlations between assets

^[2] Including allowance for correlations between assets

^[3] Including allowance for correlations between assets and liabilities

9 Nature and extent of risk arising from financial instruments (cont'd)

The value on increase/decrease columns illustrates the monetary effect of the percentage change in the volatility column. The actual annual change in value is expected to be lower than this in two years out of three, but higher in one year out of three.

It can be seen that the risk to the overall Fund assets is lower than the total of the risks to the individual assets [2].

However, because the purpose of a pension scheme is to make payments to scheme beneficiaries, the true risk of a pension scheme is not measured in absolute terms, but relative to its liabilities [3]. The risk is lower than the absolute asset risk, due to the impact of correlation with the discount rate used to value the liabilities.

This risk analysis incorporates volatility from market, interest rate, foreign exchange, credit, and all other sources of risk, and, importantly, makes allowance for how these risks may offset each other.

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit risk in their pricing and consequently the risk of loss is implicitly provided for in the value of the funds assets and liabilities (as outlined in Market Risk above).

In essence, the Fund's entire investment portfolio is exposed to some sort of credit risk. However through the selection of counterparties, brokers and financial institutions the Fund reduces the credit risk that may occur through the failure to settle a transaction in a timely manner.

Cash deposits are a major area of credit exposure where credit risk is not reflected in market prices.

Cash deposits

At 31 March 2013 cash deposits represented £2.5m, 1.8% of total net assets. This was held as follows:

Held for other purposes			
The City of Edinburgh Council - treasury management	See below	1,200	2,514
Total cash		1,200	2,514

All the cash deposits of the Fund are managed along with those of the administering authority (The City of Edinburgh Council) and other related organisations which are pooled for investment purposes as a treasury cash fund. Management of the cash fund is on a low risk basis, with security of the investments the key consideration while at the same time seeking innovative and secure cash investment opportunities.

9 Nature and extent of risk arising from financial instruments (cont'd)

As well as lending monies to other local authorities, the Council has purchased UK Government Treasury Bills as well as Bonds and Floating Rate Notes with an explicit UK Government Guarantee.

The Fund's cash holding under its treasury management arrangements at 31 March 2013 was held with the following institutions:

	Moody's		
	credit	Balances	Balances
	rating at	at	at
	31 March	31 March	31 March
	2013	2012	2013
		£000	£000
Money market funds	4		
Deutsche Bank AG, London	Aaa	159	273
Goldman Sachs	Aaa	-	260

UK Government Guaranteed FRNs	n/a	134	
UK Government Guaranteed Bonds	n/a	-	
		1,200	2,514

[1] Very few Local Authorities have their own credit rating but they are generally assumed to have a pseudo-sovereign credit rating (which in the UK at 31 March 2013 would have been 'Aa1'). Of the £460k above, £240k is with a local authority which has a 'Aa2' credit rating from Moody's.

No breaches of the Council's counterparty criteria occurred during the reporting period and the Fund does not expect any losses from non-performance by any of its counterparties in relation to deposits.

9 Nature and extent of risk arising from financial instruments (cont'd)

Liquidity risk

Liquidity risk reflects the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore ensures that there is adequate cash and liquid resources to meet its commitments. Cashflow projections are prepared on a regular basis to understand and manage the timing of the Fund's cashflow.

The majority (estimated to be over 85%) of the Fund's investments could be converted to cash within three months in a normal trading environment.

Refinancing risk

Refinancing risk is the risk that the Fund will be bound to replenish a significant proportion of its pension fund financial instruments at a time of unfavourable interest rates. The Fund is not bound by any obligation to replenish its investments and hence is not exposed to refinancing risk.

10 Actuarial statement

The Fund Actuary has provided a statement describing the funding arrangements of the Fund, this can be found in a separate section at the end of this section..

11 Actuarial present value of promised retirement benefits

The actuarial value of promised retirement benefits at the accounting date, calculated in line with International Accounting Standard 19 (IAS19) assumptions, is estimated to be £136m (2012 £131m). This figure is used for statutory accounting purposes by Scottish Homes Pension Fund and complies with the requirements of IAS26. The assumptions underlying the figure match those adopted for the Administering Authority's FRS17/IAS19 reports at each year end.

The figure is only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

Financial assumptions	31 March	31 March
•	2012	2013
	% p.a.	% p.a.
Inflation / pensions increase rate	2.5	2.8
Discount rate	4.8	4.5

Longevity assumptions

The life expectancy assumption is based on standard SAPS mortality tables with improvements in line with Medium Cohort and a 1% p.a. underpin effective from 2008. Based on these assumptions, the average future life expectancies, in years, at age 65 are summarised below:

	Males	Females
Current pensioners	21.1	23.9
Future pensioners (assumed to be currently 45)	23.0	25.7

This assumption is the same as at 31 March 2012.

11 Actuarial present value of promised retirement benefits (cont'd)

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2009 service and 75% of the maximum tax-free cash for post-April 2009 service.

14 Additional Voluntary Contributions

As the Fund has no active members, there are no AVC arrangements provided.

15 Related party transactions

The City of Edinburgh Council

Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund are administered by the City of Edinburgh Council. Consequently there is a strong relationship between the Council and the pension funds.

The Investment and Pensions Division of the Council is responsible for administering the three pension funds. The Division receives an allocation of the overheads of the Council, this is based on the amount of central services consumed. This includes the pension payroll service provided by the Council. In turn, the Division allocates its costs to the three funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated on a defined basis.

Transactions between the Council and the Fund are managed via a holding account, each month the Fund is paid a cash sum leaving a working balance in the account to cover the month's pension payroll costs and other expected costs.

15 Related party transactions (cont'd)

31 March 31 March 2012 2013 £000 £000 268 (442)

Year end balance on holding account

Part of the Fund's cash holdings are invested on the money markets by the treasury management operations of the Council, through a service level agreement. During the year to 31 March 2013, the Fund had an average investment balance of £2.5m (2012 £1.6m), interest earned was £16.5k (2012 £12.7k).

16 Contingent liabilities and contractual commitments

There were no contingent liabilities or contractual commitments at the year end.

17 Contingent assets

There were no contingent assets at the year end.

18 Impairment losses

No impairment losses have been identified during the year.

Actuarial Statement for 2012/13

This statement has been prepared in accordance with Regulation 31A of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008, and Chapter 6 of the CIPFA/LASAAC Code of Practice on Local Authority Accounting in the UK 2012/13.

Description of funding policy

The Administering Authority's Funding Strategy Statement (FSS), dated March 2012, states that a bespoke funding strategy has been adopted for the Fund. Contributions payable by the Scottish Government (previously known as the Scottish Executive) as Guarantor are determined in line with a Scottish Executive Guarantee agreement dated June 2005. In broad terms, the funding strategy is to ensure that assets held by the Fund, together with any contributions payable by the Guarantor under the terms of the agreement, meet all of the Fund's liabilities until they are extinguished.

Funding position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 32 of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008 was as at 31 March 2011. This valuation revealed that the Fund's assets, which at 31 March 2011 were valued at £124 million, were sufficient to meet 86% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2011 valuation was £20 million.

The Guarantor's contributions for the period 1 April 2012 to 31 March 2015 were set in accordance with the Fund's funding policy as set out in its FSS.

Principal actuarial assumptions and method used to value the liabilities

Full details of the methods and assumptions used are described in my valuation report dated 16 December 2011.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

The key financial assumptions adopted for the 2011 valuation were as follows:

	% p.a. Nominal	% p.a. Real
Discount rate (pensioners)	3.9%	1.3%
Discount rate (deferreds)	4.3%	1.5%
GMP increases before SPA	5.1%	2.3%
Price inflation/pension increases (pensioners) Price inflation/pension increases	2.6%	-
(deferreds)	2.8%	-

The key demographic assumption was the allowance made for longevity. The baseline longevity assumptions adopted at this valuation were in line with standard SAPS mortality tables, and included improvements based on medium cohort projections and a 1% p.a. underpin effective from 2008. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	21.1 years	23.9 years
Future Pensioners	23.0 years	25.7 years

Copies of the 2011 valuation report and Funding Strategy Statement are available on request from the City of Edinburgh Council, administering authority to the Fund.

Experience over the period since April 2011

The administering authority monitors the funding position on a regular basis as part of its risk management programme. The most recent funding update was produced at 31 March 2013. It showed that the funding level (excluding the effect of any membership movements) had fallen from 86% to 85% due to falling real bond yields and partially offset by strong asset performance.

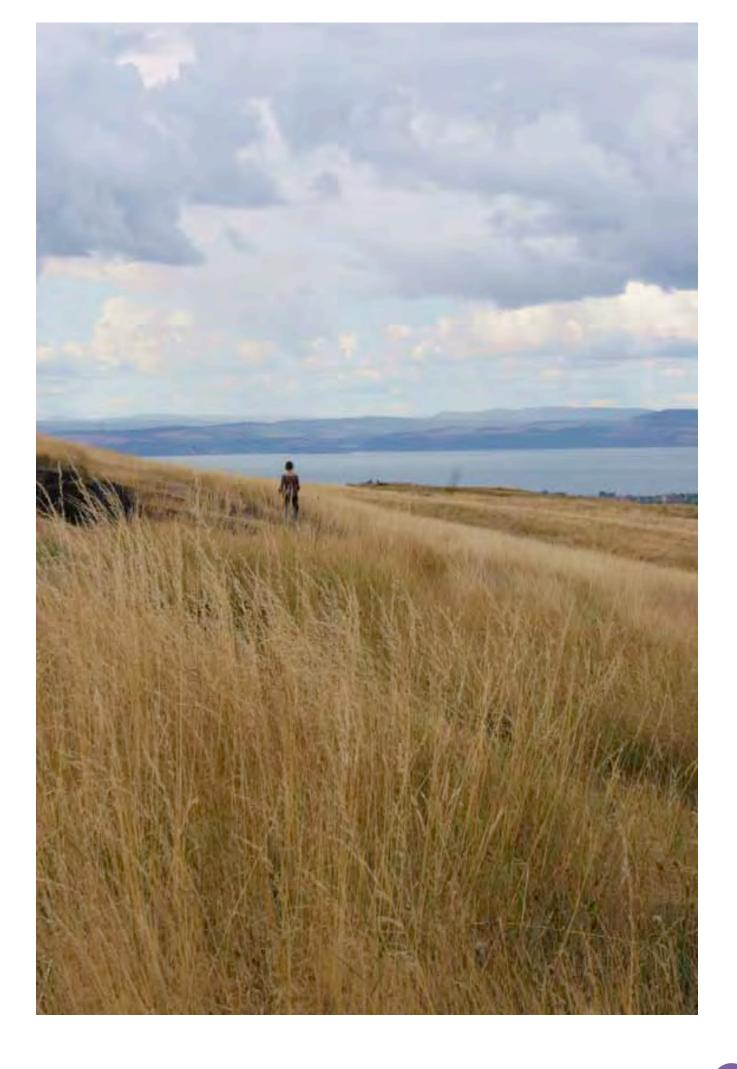

The next actuarial valuation will be carried out as at 31 March 2014. The Funding Strategy Statement will also be reviewed at that time.

STATEMENT OF RESPONSIBILITIES FOR THE STATEMENT OF ACCOUNTS

Statement of responsibilities for the Statement of Accounts

The Administering Authority's responsibilities require it to:

- make arrangements for the proper administration of the financial affairs of the pension funds in
 its charge and to secure that one of its officers has the responsibility for the administration of
 those affairs. The Head of Finance serves as the Section 95 Officer for all of the Council's
 accounting arrangements, including those of the Lothian Pension Funds. For the Lothian
 Pension Funds, however, this Section 95 responsibility has been delegated to the Pensions
 and Accounting Manager.
- manage its affairs to secure economic, efficient and effective use of its resources and safeguard its assets.

The Pensions and Accounting Manager is responsible for the preparation of the Pension Funds' statement of accounts which, in terms of the CIPFA / LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2012/13 (the Code of Practice), is required to present a true and fair view of the financial position of the Pension Funds at the accounting date and their income and expenditure for the year (ended 31 March 2013).

In preparing this statement of accounts, the Pensions and Accounting Manager has:

- selected suitable accounting policies and then applied them consistently
- made judgements and estimates that were reasonable and prudent
- complied with the Code of Practice.

The Pensions and Accounting Manager has also:

- kept proper accounting records which were up to date
- taken reasonable steps for the prevention and detection of fraud and other irregularities.

Statement of Accounts

The Statement of Accounts presents a true and fair view of the financial position of the Pension Funds as at 31 March 2013, and their income and expenditure for the year ended 31 March 2013.

JOHN BURNS, FCMA CGMA Pensions and Accounting Manager 24 September 2013

INDEPENDENT AUDITOR'S REPORT

Independent Auditor's report

Independent auditor's report to the members of City of Edinburgh Council as administering body for Lothian Pension Funds and the Accounts Commission for Scotland

I certify that I have audited the financial statements of Lothian Pension Funds for the year ended 31 March 2013 under Part VII of the Local Government (Scotland) Act 1973. The financial statements comprise the fund accounts, the net assets statements and the related notes. The financial reporting framework that has been applied in their preparation is applicable law and International Financial Reporting Standards (IFRSs) as adopted by the European Union, and as interpreted and adapted by the Code of Practice on Local Authority Accounting in the United Kingdom 2012/13 (the 2012/13 Code).

This report is made solely to the parties to whom it is addressed in accordance with Part VII of the Local Government (Scotland) Act 1973 and for no other purpose. In accordance with paragraph 125 of the Code of Audit Practice approved by the Accounts Commission for Scotland, I do not undertake to have responsibilities to members or officers, in their individual capacities, or to third parties.

Respective responsibilities of the Pensions and Accounting Manager and auditor

As explained more fully in the Statement of Responsibilities, the Pensions and Accounting Manager is responsible for the preparation of financial statements and for being satisfied that they give a true and fair view. My responsibility is to audit and express an opinion on the financial statements in accordance with applicable law and International Standards on Auditing (UK and Ireland) as required by the Code of Audit Practice approved by the Accounts Commission for Scotland. Those standards require me to comply with the Auditing Practices Board's Ethical Standards for Auditors.

Scope of the audit of the financial statements

An audit involves obtaining evidence about the amounts and disclosures in the financial statements sufficient to give reasonable assurance that the financial statements are free from material misstatement, whether caused by fraud or error. This includes an assessment of: whether the accounting policies are appropriate to the funds' circumstances and have been consistently applied and adequately disclosed; the reasonableness of significant accounting estimates made by the Pensions and Accounting Manager; and the overall presentation of the financial statements. In addition, I read all the financial and non-financial information in the annual report to identify material inconsistencies with the audited financial statements. If I become aware of any apparent material misstatements or inconsistencies I consider the implications for my report.

Opinion on financial statements

In my opinion the financial statements:

- give a true and fair view in accordance with applicable law and the 2012/13 Code of the financial transactions of the funds during the year ended 31 March 2013, and of the amount and disposition at that date of their assets and liabilities;
- have been properly prepared in accordance with IFRSs as adopted by the European Union, as interpreted and adapted by the 2012/13 Code; and
- have been prepared in accordance with the requirements of the Local Government (Scotland) Act 1973 and the Local Government in Scotland Act 2003.

INDEPENDENT AUDITOR'S REPORT

Opinion on other prescribed matters

In my opinion the information given in the sections titled Review of the Year, About the Funds, and Investment and Performance for the financial year for which the financial statements are prepared is consistent with the financial statements.

Matters on which I am required to report by exception

I am required to report to you if, in my opinion:

- adequate accounting records have not been kept; or
- the financial statements are not in agreement with the accounting records; or
- I have not received all the information and explanations I require for my audit; or
- the Governance Compliance Statement does not comply with guidance from the Scottish Ministers.

I have nothing to report in respect of these matters.

DAVID MCCONNELL Assistant Director of Audit Audit Scotland 4th Floor, South Suite The Athenaeum Building 8 Nelson Mandela Place Glasgow, G2 1BT

24 September 2013

ANNUAL GOVERNANCE STATEMENT

Annual Governance Statement

Scope of Responsibility

The City of Edinburgh Council is responsible for ensuring that its business is conducted in accordance with the law and appropriate standards, and that public money is safeguarded, properly accounted for, and used economically, efficiently, effectively and ethically. The Council also has a duty to make arrangements to secure continuous improvement in the way its functions are carried out.

In discharging these responsibilities, elected members and senior officers are responsible for implementing effective arrangements for governing the Council's affairs, and facilitating the effective exercise of its functions, including arrangements for the management of risk.

To this end, the Council has approved and adopted a Local Code of Corporate Governance that is consistent with the principles of the CIPFA / SOLACE framework "Delivering Good Governance in Local Government". This statement explains how the City of Edinburgh Council delivers good governance and reviews the effectiveness of those arrangements. It also includes a statement on internal financial control.

The Governance framework of the Council and Lothian Pension Funds

The governance framework, which was reviewed during 2012/13, comprises the systems, processes, cultures and values by which the Council and Lothian Pension Funds are directed and controlled. It also describes the way it engages with, accounts to and leads the various stakeholders.

The Council's Local Code of Corporate Governance is supported by evidence of compliance which is regularly reviewed and available for inspection. The Council has implemented arrangements for monitoring each element of the framework and providing evidence of compliance. The Head of Internal Audit has reviewed the arrangements and is satisfied that the Code continues to be adequate and effective. The framework meets the principles of effective governance.

Internal financial controls

The Funds place reliance upon the internal financial controls within the City of Edinburgh Council's financial systems and the monitoring in place to ensure the effectiveness of these controls. Within the overall control arrangements, the system of internal financial control is intended to ensure that assets are safeguarded, transactions are authorised and properly recorded, and material errors or irregularities are either prevented or would be detected within a timely period. The key elements of the Council's governance framework include financial regulations, financial monitoring, financial and administrative procedures (including segregation of duties, management supervision, and a system of delegation and accountability).

The system includes:

- budgeting systems;
- reviews of financial and performance reports against forecasts;
- consideration of external and internal audit reports by the Governance, Risk and Best Value Committee (for Council) and by the Pensions Committee and Pensions Audit Sub-Committee (for Lothian Pension Funds).

These arrangements also include:

- identifying the Council's objectives in the Single Outcome Agreement;
- identifying the objectives of the Funds in Funding Strategy Statement, Statement of Investment Principles and Service Plan;
- monitoring of the achievement of objectives by the Council, Pensions Committee and senior officers:
- a systematic approach to monitoring service performance by Committee, senior officers and stakeholders;

ANNUAL GOVERNANCE STATEMENT

- describing the role of the Council and its Committees, including the Pensions Committee, in Council Standing Orders, which also sets out the decision-making powers delegated to officers;
- Financial Regulations (or equivalent) that specify the controls over budgeting, income, expenditure and financial performance;
- the Council's Monitoring Officer and the Fund's Legal, Risk and Development Manager who ensure compliance with laws and regulations, with a detailed compliance framework covering key activities:
- a risk management policy, including a regularly reviewed risk register, serves to manage risk to the Funds appropriately;
- the Council's Audit Committee (the Governance, Risk and Best Value Committee) and its successor in respect of the Lothian Pension Funds, the Pensions Audit-Sub Committee, whose core functions comply with CIPFA standards
- comprehensive budget and expenditure monitoring systems
- targets against which financial and operational performance can be assessed
- clearly defined capital expenditure guidelines;
- formal project management disciplines;
- codes of conduct for elected members, Consultative Panel members and officers
- a structured programme to ensure that Committee members have the required standard of knowledge and understanding of Local Government Pension Scheme matters;
- operating within clearly established investment guidelines defined by the Local Government Pension Scheme Investment Regulations and the Funds' Statements of Investment Principles;
- compliance with the CIPFA Principles for Investment Decision Making in the Local Government Pension Scheme and the Myners Principles on investment;
- with the exception of managed funds, unlisted investments and property, all investments are held under custody by a global custodian. The Funds benefit from the custodian's extensive internal control framework;
- benchmarking of services in terms of quality and cost against other Local Government Pension Scheme funds.

A significant part of the governance framework is the system of internal control, which is based on an ongoing process to identify and prioritise risks to achieve the objectives of the Funds.

Following his appointment in September 2011, in view of concerns over the robustness of the Council's systems of internal control and risk management arrangements, the Director of Corporate Governance commissioned an independent review of their effectiveness. The results of this assessment were reported in May 2012, with a total of forty-three recommendations made. Twelve of these served to mitigate weaknesses exposing the Council, either individually or in combination, to risk of significant loss or error.

While good progress has been made in implementing the required improvements, a number remained outstanding as of 31 March 2013, including development of corporate debt and anti-fraud policies and procedures to reduce the volume of payments falling outside the control afforded by the three-way matching process. Further improvements are also required in the Council's ICT governance arrangements.

In addition to the specific measures put in place to strengthen elements of the financial control framework, following Council's approval of the adoption of a co-sourced operating model, the internal audit function is being realigned to widen its focus to include non-financial controls and mitigate the Council's risk exposure through developing additional capacity in this area. Although the new operating arrangements are now in place and working well, the necessary skills transfer will take place over the full three-year period of the partnership and thus remains in its initial stages.

While the system is designed to enable the Funds to manage risk effectively, it cannot eliminate all risks of failure to implement policies and achieve objectives. Therefore, it provides a reasonable, but not absolute, assurance of effectiveness.

ANNUAL GOVERNANCE STATEMENT

Review of effectiveness

The Internal Audit Section operates in accordance with CIPFA's Code of Practice for Internal Audit and complies with the ISO 9001/2008 quality standard. The Audit Section undertakes an annual work programme based on an agreed audit strategy and formal assessments of risk that are reviewed regularly during the year. During the year the Head of Internal Audit reported to the Head of Finance but had free access to the Chief Executive, all directors and elected members, and had the right to report to the Audit Committee and Pensions Committee in her own name.

The Head of Internal Audit has provided an assurance statement on the effectiveness of the system of internal control, which was informed by:

- the certified assurances from the Investment and Pensions Service Manager
- senior officers' management activities
- Internal Audit's review work
- Audit Scotland's review work leading to its Annual Audit Report
- risk management procedures.

Section 95 of the Local Government (Scotland) Act 1973 states that "every local authority shall make arrangements for the proper administration of their financial affairs and shall secure that the proper officer of the authority has responsibility for the administration of those affairs". The Head of Finance serves as the Section 95 Officer for all of the Council's accounting arrangements, including those of the Lothian Pension Funds. For the Pension Funds, however, this Section 95 responsibility has been delegated to the Pensions and Accounting Manager.

In compliance with standard accounting practice, the Pension and Accounting Manager has provided the Chief Executive with a statement of the effectiveness of the internal financial control system of the Funds for the year ended 31 March 2013. It is the Pension and Accounting Manager's opinion that reasonable assurance can be placed upon its effectiveness.

Certification

It is our opinion that, in light of the foregoing, reasonable assurance can be placed upon the adequacy and effectiveness of the systems of governance of the Funds.

Governance Compliance Statement

The Regulations that govern the management of Local Government Pension Scheme in Scotland require that a Governance Compliance Statement is published. This statement sets out the extent to which governance arrangements comply with best practice.

Principle		Full Compliance	Comments
Structure	The management of the administration of benefits and strategic management of fund assets clearly rests with the main committee established by the appointing Council.	Yes	The City of Edinburgh Council acts as administering authority and delegates all pension scheme matters to a committee of 7 members (Pensions Committee) made up as follows: - 5 City of Edinburgh elected members - 2 external members taken from the Lothian Pension Fund Consultative Panel (1 employer representative and 1 member representative).
	That representatives of participating LGPS employers, admitted bodies and scheme members (including pensioner and deferred members) are members of either the main or secondary committee established to underpin the work of the main committee.	Yes	The Pensions Committee includes two external places for pension fund stakeholders i.e. 1 employer representative and 1 member representative that are taken from the Lothian Pension Fund's Consultative Panel. Fund members and employers are also represented by a Lothian Pension Funds' Consultative Panel. Membership includes 6 employer representatives and 6 member representatives.
	That where a secondary committee or panel has been established, the structure ensures effective communication across both levels.	Yes	The Lothian Pension Funds' Consultative Panel attends the Pensions Committee meetings in an advisory, nonvoting capacity and takes part in training events. Two members of the Panel are also full voting members of the Pensions Committee. Implementation of investment strategy is delegated to the Director of Corporate Governance, who takes advice from the Investment Strategy Panel. The Panel meets quarterly and reports to the Pensions Committee annually.
	That where a secondary committee or panel has been established, at least one seat of the main committee is allocated for a member from the secondary committee or panel.	Yes	Membership of the Lothian Pension Funds' Consultative Panel consists of the Convener of the Pensions Committee, the 2 external members of the Pensions Committee and 10 other representatives. The Investment Strategy Panel consists of Director of Corporate Governance, Investment and Pensions Service Manager, Pensions and Accounting Manager, Investment Manager and three independent advisers.

Principle		Full Compliance	Comments
Represent ation	a) That all key stakeholders are afforded the opportunity to be represented within the main or secondary committee structure. These include: • Employing authorities (including non-scheme employers, e.g. admitted bodies); • Scheme members (including deferred and pensioner scheme members)	Yes	The Lothian Pension Funds' Consultative Panel consists of a mix of representatives: - 6 employer representatives from non-administering authority employers (of which 2 places are reserved for Lothian Buses plc and Scottish Government) - 6 member representatives including 1 pensioner representative, 3 members (active or deferred) appointed by the Trade Union Consultative Committee and 2 members (active or deferred) appointed through an alternative route.
	Where appropriate, independent professional observers, and Expert advisors (on an ad-hoc basis).	Yes	An Independent Professional Observer was appointed in March 2013 to help Committee scrutinise advice. Three independent investment advisers sit on the Investment Strategy Panel. A separate specialist Pension's Audit Sub-Committee consisting of 3 members (including at least 2 elected members from the City of Edinburgh Council) undertake the audit scrutiny of the pension funds.
	b) That where lay members sit on a main or secondary committee, they are treated equally in terms of access to papers and meetings, training and are given full opportunity to contribute to the decision making process, with or without voting rights	Yes	The Lothian Pension Funds' Consultative Panel attends the Pensions Committee meetings in an advisory capacity and take part in all Committee training events. The Pensions Committee takes account of the views of the Lothian Pension Fund's Consultative Panel when making decisions.
Selection and Role of Lay Members	a) That committee or panel members are made fully aware of the status, role and function that they are required to perform on either a main or secondary committee.	Yes	A comprehensive training programme including induction is in place. Pensions Committee is expected to attend 3 days training each year and Lothian Pension Funds Consultative Panel members one day's training each year. A code of conduct is conditional to the appointment to members of the Lothian Pension Funds' Consultative Panel.
	b) That at the start of any meeting, committee members are invited to declare any financial or pecuniary interest related to specific matters on the agenda.	Yes	The declaration of members' interests is a standard item on the agenda of the Pensions Committee. A Code of Conduct also applies to all members of the Pension Committee and to the Lothian Pension Funds' Consultative Panel.

Principle		Full Compliance	Comments
Voting	The policy of individual administering authorities on voting rights is clear and transparent, including the justification for not extending voting rights to each body or group represented on main LGPS committees.	Yes	5 of the 7 places in the Pensions Committee are held by elected members of the City of Edinburgh Council, which is required to retain a 2/3 majority in line with the Local Government (Scotland) Act 1973. The constitution of the Lothian Pension Funds' Consultative Panel clearly documents how 1 employer and 1 member representative will be elected to the Pensions Committee.
Training / Facility Time / Expenses	a) That in relation to the way in which statutory and related decisions are taken by the administering authority, there is a clear policy on training, facility time and reimbursement of expenses in respect of members involved in the decision making process.	Yes	A training policy has been adopted. The Lothian Pension Fund budget includes an allowance for training. The CIPFA framework is used to identify gaps in knowledge and understanding. Training organised for Committee is also provided to the Panel. Sometimes separate sessions are held depending on the material. Attendance at meetings and training is monitored and reported.
Training / Facility Time / Expenses	b) That where such a policy exists, it applies equally to all members of committees, subcommittees, advisory panels or any other form of secondary forum.	Yes	The training policy ensures all members are treated equally. Members of the Lothian Pension Funds Consultative Panel are encouraged to attend in-house training events. Advisers have their own professional continued professional development.
	c) That the administering authority considers the adoption of annual training plans for committee members and maintains a log of all such training.	Yes	Each Pensions Committee member receives at least three days of training each year. Attendance at meetings and training is monitored and reported.
Meetings frequency	a) That an administering authority's main committee or committees meet at least quarterly.	Yes	The Pensions Committee meets at least four times a year.
	b) That an administering authority's secondary committee or panel meet at least twice a year and is synchronised with the dates when the main committees sits.	Yes	The Lothian Pension Funds Consultative Panel attends all the Pensions Committee meetings. Further meetings are held if necessary. The Investment Strategy Panel meets quarterly or more frequently, as required.

Principle		Full Compliance	Comments
Meetings frequency	c) That an administering authority who does not include lay members in their formal governance arrangements must provide a forum outside of those arrangements by which the interests of key stakeholders can be represented.	Not applicable	
Access	That subject to any rules in the council's constitution, all members of main and secondary committees or panels have equal access to committee papers, documents and advice that falls to be considered at meetings of the main committee.	Yes	Committee papers and minutes are publicly available on the Council's website and all Committee and Consultative Panel members have equal access.
Scope	That administering authorities have taken steps to bring wider scheme issues within the scope of their governance arrangements.	Yes	The Pensions Committee deals with all matters relating to both the administration and investment of the Funds. A separate specialist Pension Audit Sub-Committee consisting of 3 members (including at least 2 elected members from the City of Edinburgh Council) undertake the audit scrutiny of the pension funds.
Publicity	That administering authorities have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed, can express an interest in wanting to be part of those arrangements.	Yes	The City of Edinburgh Council is responsible for the appointment of members to the Pensions Committee. However on an annual basis: - the employer representative to be nominated for the Pensions Committee is selected by the employer representatives of the Consultative Panel - the member representative to be nominated to the Pensions Committee is selected by the member representatives of the Consultative Panel. Membership of the Consultative Panel is rotated every 3 years. Lothian Pension Fund publishes governance documents and communicates regularly with employers and scheme members. Two members of the Consultative Panel are recruited by self nomination.

RISK MANAGEMENT STATEMENT

Risk Management Statement

The Fund is committed to a strong control environment to ensure that risks are identified, understood, managed and monitored appropriately. The risks faced by the Fund change over time and ongoing management of risk is crucial.

The most significant risks at 31 March 2012 were as follows:

Description	Impact	Likelihood	Risk score before controls	Risk score at 31 March 2012
Under funding leading to pressure on employer contributions.	8	7	56	5
Recruitment and retention of appropriate key staff	8	7	56	20
Risk of incorrect pension payments	7	8	56	49
The collapse of an Employer body member, leading to pressure on other employers	6	7	42	6
Fraud/theft of Council/Pension Fund assets	7	6	42	16
Employers make HR decisions without considering the impact on the pension fund	6	7	42	12

As at 31 March 2013, the most significant risks, as assessed by the Investment and Pensions Service Management Team, were as follows:

Description	Impact	Likelihood	Risk score before controls	Risk score at 31 March 2012 Score
Under funding leading to pressure on employer contributions.	8	7	56	20
Recruitment and retention of appropriate key staff	8	7	56	24
Risk of incorrect pension payments	7	8	56	49
The collapse of an employer body member, leading to pressure on other employers	5	9	45	32
Fraud/theft of Council/Pension Fund assets	7	6	42	16

Impact and likelihood are each scored out of 10, so the current risk scores after control actions represents moderate risks in terms of the Council's overall risk matrix.

The Funds also have a compliance policy and each manager is responsible for ensuring compliance within their area of responsibility. Risk management has been further strengthened in the year by the appointment of a Legal, Risk and Compliance Manager.

Executive summary

Investment Income Review - Cross Border Withholding Tax

Summary

This report provides information on a benchmarking study prepared by KPMG into the effectiveness of the procedures in place to manage the tax exposure on the investment income of Lothian Pension Fund and Lothian Buses Pension Fund (not relevant to Scottish Homes Pension Fund as taxation matters are the responsibility of the pooled fund manager).

This is the first ever study that we have commissioned. It shows that the current arrangements are generally working well. However, it highlighted a delay in recovering tax on Swiss dividends; this has allowed us to take corrective action. In addition, there is a suggestion to improve the recovery of tax on Spanish dividends which we are implementing.

Recommendations

- 1. Pensions Audit Sub Committee should note the contents of this report and the action taken in response to the findings of the withholding tax benchmarking report.
- 2. Pensions Audit Sub Committee should approve the proposal to repeat the benchmarking of the investment income tax services provided by the custodian on a regular basis, with the findings reported to the Pensions Audit Sub Committee.

Measures of success

Success can be measured by the Pension Funds:

- Minimising exposure to tax on investment income.
- Obtaining prompt recovery of reclaimable income tax deducted at source.

Financial impact

The recoverable tax accrued during 2012/13 on Lothian Pension Fund was £814k; claims paid were £403k, leaving a balance to be recovered of £1,843k at 31 March 2013. For Lothian Buses Pension Fund, recoverable tax accrued during 2012/13 was £112k; claims paid were £5k, with the balance of £286k at 31 March 2013

The report contains a suggestion to potentially recover an additional £98k in tax on Spanish dividends. Steps have also been taken to accelerate the recovery of £385k in tax on Swiss dividends.

Provision has been made in the 2013/14 budget for the cost of a benchmarking report. A similar provision will be made in the 2014/15 budget if the Pensions Audit Sub Committee approves the recommendation to repeat the exercise in future years.

Equalities impact

None

Sustainability impact

None

Consultation and engagement

The Consultative Panel for the Lothian Pension Funds, comprising employer and member representatives, is integral to the governance of the Funds.

Investment Income Review - Cross Border Withholding Tax

1. Background

The Taxation Environment

- 1.1 Lothian Pension Fund (LPF) and Lothian Buses Pension Fund (LBPF) invest directly in stock markets across the globe. These investments generate income that is potentially liable to income tax in the country of tax domicile. During the 2012/13 financial year the Pension Funds earned income from companies in 46 different countries.
- 1.2 UK pension funds are usually able to benefit from beneficial tax rates. These rates are normally determined by separate tax treaties established between the UK Government and most foreign countries. Tax on dividends varies between 0% and 35%. In contrast, income on fixed interest stocks is usually free from tax.
- 1.3 In virtually all countries income is subject to taxation at source, so the owner of the investments receives the income net of the appropriate amount of tax. Taxation deducted in this way is called withholding tax or WHT for short.
- 1.4 In some countries the preferential rate for UK pension funds is subject to providing the tax authorities of the country concerned with an application and supporting paperwork. The exact requirements vary from country to country and in some cases can be quite onerous. Failure to have preferential rate approval in place means that income will be subject to a higher rate of tax than is necessary.
- 1.5 The preferential rate may be applied at source, meaning that there is no tax to reclaim from the foreign tax authority. Alternatively, the rules of the country may require tax to be deducted at the full rate with a subsequent claim having to be made to the tax authority to get repayment of the difference between the full rate and the preferential rate.
- 1.6 The requirements to make a valid repayment claim and the time it takes for the claim to be paid vary considerably from country to country.
- 1.7 With the exception of India, realised investment gains are generally not subject to UK or overseas capital gains tax.

The Role of the Custodian

- 1.8 The custodian appointed for the three pension funds is Northern Trust (NT). The Scottish Homes Pension Fund is invested in pooled funds, so there is no requirement to recover income tax as this is organised by the pooled fund manager.
- 1.9 In addition to the vital roles of holding title to investments on behalf of the investor, the global investment custodian is responsible for the management of the procedures and processes that relate to the taxation of investment income.

The Scale of Activity

1.10 The table below shows the movement in the reclaimable tax balances during the 2012/13 financial year for both Lothian Pension Fund and Lothian Buses Pension Fund. Also included in the table is the amount of tax suffered by each fund that is not recoverable.

	Lothian Pension		Lothian Buses
	Fund £		Pension Fund £
Brought Forward 1 April 2012	1,431,621.30		179,179.25
Recoverable tax accrued during year	814,393.53		112,175.17
Claims paid during year	(403,450.78)		(5,119.09)
Carried Forward 31 March 2013	1,842,564.05		286,235.33
Irrecoverable Tax Deducted 2012/13	1,965,527.37		70,543.81

1.11 The year end recoverable tax balances at 31 March 2013 are broken-down by country in the table below.

Country	Lothian Pension Fund			Lothian Buses F	Pension Fund
	Reclaim Amount £	Number of Dividends		Reclaim Amount £	Number of Dividends
Austria	8,588.53	14			
Belgium	76,929.38	6			
Denmark	8,587.24	8			
France	57.19	1			
Germany	79,234.52	86			
Ireland	1,440.28	1			
Japan	40,872.39	13		600.74	1
Jersey, Channel Islands	212.64	1			
Netherlands	17,331.36	5			
Norway	87,019.34	17		8,942.53	3
Poland	11,152.77	1			
South Africa	13,952.69	9		2,278.21	2
Spain	36,244.42	58			
Switzerland	1,419,422.68	48		265,639.60	9
United Kingdom	41,518.62	4		8,774.25	1
Grand Total	1,842,564.05	272		286,236.33	16

1.12 For Lothian Pension Fund, Switzerland accounts for 77% for the total amount receivable and for Lothian Buses Pension Fund the percentage for Switzerland is 93%. Apart for claim delays, the reason why the Swiss total claim value is so large is that 35% tax is deducted on all dividends and the 0% rate relief is obtained by claiming the tax paid back. There are few other countries where the tax deducted at source is so high. Swiss tax is discussed further in the Main Report below.

2. Main report

Benchmarking Study

- 2.1 Given the complexity and scale of the taxation of investment income, it is important that Northern Trust (NT) provides an efficient service. Failure to ensure that the correct tax rates are being applied would result in a direct loss of income. Poor management of the tax reclaim process could mean that recoverable tax is never recovered or unnecessarily delayed.
- 2.2 In order to assess the effectiveness of NT's work, KPMG has been commissioned to prepare a benchmarking report. KPMG's remit was:
 - Review the most recent withholding tax table produced by NT and verified the withholding tax rates that have been applied to income received from a number of source countries;
 - Identify areas where there is opportunity for greater relief from withholding tax than that currently being applied;
 - Quantify the amount of withholding tax that could potentially be reclaimed for the chosen study period (September 2011 to September 2012);
 - Review the withholding tax reclaims that have already been processed by NT and assess their timeliness.
- 2.3 This is the first time that we have commissioned a study of the effectiveness of the investment income tax service provided by our custodian. The intention is to repeat the benchmarking on an annual basis so that progress can be monitored over time.

Summary of the Findings

- 2.4 The study concluded that generally NT has been applying the appropriate withholding tax rates for a UK pension fund. However, they have identified a small number of issues:
 - A 0% tax rate has been available in Spain since 1 January 2011.
 However, NT has been applying an effective rate of 15%. This is because there are significant practical issues with the process of obtaining the 0% rate, which have been acknowledged by KPMG.. As NT is currently unable to obtain the 0% rate, KPMG has been asked to

- make claims on behalf of LPF. Currently the potential benefit is around £98k.
- A 10% rate is available in Taiwan; NT is currently able to achieve 20%. To achieve the 10% rate requires the appointment of a tax accountant in Taiwan. Prior to the benchmarking study, LPF has appointed the local office of KPMG to proceed with appropriate claims in Taiwan. Currently the potential benefit is around £54k.
- Small potential recoveries were identified for Indonesia (£18k) and the Philippines (£10k). In both cases the lowest rate of withholding tax can only be achieved by appointing a local tax accountant. KPMG have confirmed that based on the current reclaim levels it would not be economic to make either claim.
- 2.5 The reclaim process consists of the custodian preparing an application in the required format for the country concerned. Once the application has been lodged with the tax authorities of the country, it will take the authority an amount to time to process the claim and pay the refund to. This processing time varies from country to country some take a matter of months and others will take a number of years. KPMG have identified four countries where the reclaim times achieved appear to be longer that expected:
 - The study found that in Switzerland claims were taking more that two
 years compared to an expectation of one year. This has now been
 pursued successfully, with the claim now received for the 2011
 calendar year (value around £385k). The custodian has also tightened
 its procedures to expedite the despatch of Swiss tax vouchers to
 HMRC for certification (a procedure that is necessary before the claim
 is filed in Switzerland.
 - For Belgium, KPMG has identified £74k that has taken more than 5 years to be repaid, compared to an expectation of one year. However, KPMG was not aware that the claims relate to the previous custodian (Citibank). When a custodian is changed, the old custodian remains responsible for claims made during its tenure of office until such times as the amounts are cleared. We are working with Citibank to determine if there is a realistic prospect of the claims being paid.
 - KPMG has asserted that LPF is eligible to claim the reduced rate for pension funds in Austria. This has been challenged by the custodian and LPF is in discussions to resolve matters. The value of outstanding Austrian claims at 31 March 2013 is £8k.
 - The delays identified for Ireland are historic; four dividends received in 2011 were subject to a tax claim. Three have now been paid since the study. No additional claims have been added as a withholding tax rate of 0% is now being applied at source. The value for outstanding Irish claims at 31 March 2013 is £1k.

2.6 The appendix to this report summarises all the findings of the benchmarking report, any additional comments received from KPMG and the custodian and progress made so far in progressing the findings.

3. Recommendations

- 3.1 Pensions Audit Sub Committee should note the contents of this report and the action taken in response to the findings of the withholding tax benchmarking report.
- 3.2 Pensions Audit Sub Committee should approve the proposal to repeat the benchmarking of the investment income tax services provided by the custodian on a regular basis, with the findings reported to the Pensions Audit Sub Committee.

Single Outcome Agreement	
Appendix	Summary of the findings of the withholding tax benchmarking report

Appendix - Summary of the findings of the withholding tax benchmarking report

Country	Findings	Conclusions as at Date of Report to Pensions Audit Sub-Committee
Australia	"Franked" dividends are exempt from withholding tax (WHT) in Australia. Under Australian domestic legislation, LPF should also be entitled to a 0% rate of WHT on "unfranked" dividends received from Australia if they have obtained a ruling from the Australian Tax Authorities showing that they are comparable to an Australian superannuation fund. It is unclear whether this clearance has been obtained as 9 dividends have been subjected to WHT at rates from 7.5% to 15%. LPF could be entitled to refunds of these amounts if the necessary clearance has been obtained. The total tax leakage across these dividends is AU\$9,963 (£5,800).	We are awaiting confirmation from NT that the preferential rate has been approved by the Australian Tax Authorities. The additional tax deducted will be reclaimed.
Austria	Some of the Austrian reclaims have been made within the expected timescale of 9-12 months however reclaims totalling £4,910.51 have been received after more than a year.	Awaiting comments from NT.
Belgium	Reclaims in Belgium generally appear to be taking in excess of 5 years to recover. This is far in excess of the 2 year market standard. The amounts reclaimed exceeding 5 years per the report provided by NT total £73,748.47.	As at 30 June 2011, the amount outstanding that relates to the previous custodian amounts to £42k. We are in contact with the custodian to confirm the status of the claims.
Indonesia	Dividends received from Indonesia have suffered the standard domestic rate of 20%. A reduced rate of 15% is available under the Indonesia/UK Treaty. There is a potential tax leakage of approximately £18,150. We recommend that you discuss this with your custodian.	Both NT and KPMG confirm that it is not economic to reclaim such small amounts of tax.
Ireland	Reclaims in Ireland are taking longer than the 8 months expected, they appear to be taking between 12 months and 24 months.	The problem is historic; four dividends received in 2011 were subject to a tax claim. Three have now been paid and no additional claims have been added as a WHT rate of 0% is now being applied at source.
Israel	The standard domestic rate of WHT in Israel is 25%. NT appears to be applying the rate under the Israel/UK Treaty of 15%. In our opinion, this reduced rate should not be available to a UK resident pension fund as the Treaty contains a "subject to tax" clause which LPF is unlikely to satisfy. We recommend that you discuss this with NT to understand the basis on which they are making the claim.	Only five dividends from Israel have been received in the period 1 April 2012 to 31 July 2013. Issue has been discussed with NT and we have decided to take no further action.

Country	Findings	Conclusions as at Date of Report to Pensions Audit Sub-Committee
Korea	Several Korean dividends are suffering WHT at the standard domestic rate of 22%. LPF is entitled to a reduced rate of 15% under the Korean/UK Treaty. In August 2012, new documentation requirements were put in place by the Korean Tax Authorities. You should ensure that the custodian now has the required documentation and hence is obtaining relief at source going forward and that they will be applying for a refund of the over withheld tax. The potential tax leakage in this case is approximately £875.	Updated documents have now been provided to NT. Situation will be monitored until the reduced rate has been obtained.
Norway	The withholding tax rate applicable to LPF in Norway is 15% under the Norway / UK tax treaty. Under Norwegian domestic law EEA resident companies are entitled to an exemption, in practice the Norwegian Authorities have also been accepting reclaims from pension funds under this exemption. It is unlikely that the Norwegian Tax Authorities will seek to recover this potentially under paid tax.	NT is making claims to recover the 15% tax from the Norwegian tax authorities.
Philippines	The standard rate of WHT of 30% has been applied to dividends received from the Philippines. A reduced rate of 25% should be available to LPF under the Philippines/UK Treaty. The tax leakage identified is approximately £9,720. We recommend that you raise this with your custodian.	Both NT and KPMG confirm that it is not economic to reclaim such small amounts of tax.
Poland	A dividend received from Poland has suffered WHT at a rate of 10%. This is the reduced rate under the Poland/UK Treaty. It is possible for UK pension funds to obtain a 0% rate in Poland if they can prove that they are comparable with a Polish pension fund. The potential tax leakage is £2,292. This is potentially an expensive process and therefore may not be commercially viable but we recommend that you discuss obtaining this additional relief with your custodian.	Given LPF does not currently invest in any Polish companies it does not seem cost effective to take this further.
Spain	Some Spanish dividends have suffered WHT at a rate of 0% in line with the Spanish domestic exemption available to UK pension funds. However, a number have been taxed at a rate of 15% in line with the Spain/UK Treaty. The potential tax leakage is approximately £97,900. We would recommend that you speak to your custodian about obtaining additional relief for these dividends.	The withholding tax rate being applied by NT is 21%, they are then making tax reclaims which reduces the tax suffered to 15%. KPMG are saying that a 0% rate should be available from 1 January 2011. Given the difficulties referred to by KPMG, they have been asked to make claims to recover the 15% until this is offered by NT.
Switzerland	Whilst the majority of reclaims in Switzerland have been received within 12 months, the industry standard, a significant minority totalling £472,845.58 has taken up to two years to	Last Swiss reclaim receipt January 2012. NT have been asked why no receipt in 2013 to date. NT have advised that the claim for the 2011 calendar year (value around £385k) has been held-up in

Country	Findings	Conclusions as at Date of Report to Pensions
		Audit Sub-Committee
	recover. This may be accounted for by the nature	the NT office in London for over 10 months. NT
	of the Swiss reclaim system which only allows for	has now promised to forward the claim to
	a limited number of claims to be made each year.	Switzerland without further delay.
Taiwan	Dividends received from Taiwan are suffering WHT at a rate of 20%. Under the Taiwan/UK Treaty a reduced rate of 10% should be available to LPF. The potential tax leakage is approximately £54,000. We understand that KPMG are already assisting with obtaining relief in this market.	KPMG is already making claims on behalf of LPF.

Irrecoverable Overpayments of Pensions

1. Summary

- 1.1 Pension regulations determine the calculation and payment of pension benefits to scheme members. During the course of administration overpayments of pension may occur upon the death of a pensioner, where people go back to work when receiving a pension (this only affects people who retired on the grounds of efficiency and received compensatory added years when they retired) or where a mistake occurs.
- 1.2 The pension funds attempt to recover overpayments over £250 however, on occasions, it is not in the best interest to seek recovery of an overpaid pension. Depending on the circumstances of the particular case, in line with delegated functions certain officers in the Investment & Pensions division may write off the whole or part of an overpayment up to £3,000. The most likely circumstances would be if recovery would cause undue hardship to the member's family, if there are insufficient funds to repay the overpayment or it is uneconomical to pursue. Any overpayments over £3,000 are referred to the Director of Corporate Governance.
- 1.3 The value of pension overpayment write offs between 1 April 2013 and 31 August 2013 is shown below. The total value is £5,491.50.

	Date of Death	Amount Written Off	Reason for write off
Member A	25/02/2012	£602.41	The member died February 2012 and we were not informed. The bank returned the member's May 2012 pension payment. The bank did not respond to our letters however we identified the death through matching our records to the General Registrars Office, Disclosure of Death Information (January 2013). The solicitor then advised that the Estate had been wound up and that no funds were available to repay the overpayment.

	Date of Death	Amount Written Off	Reason for write off
Member B	17/05/2012	£2,586.22	On the death of a part-time active member, Lothian Pension Fund made a mistake by using full-time final pay instead of actual part-time final pay to calculate death in service lump sum. Incorrect pay information from the scheme employer compounded the problem (the member had a pension protection certificate). As it took the scheme employer nearly a year to send correct pay information a decision was made to write off the overpayment for sensitivity reasons.
Member C	13/11/2010	£2,302.87	The death was identified through National Fraud Initiative 2010/11. Repeated attempts to contact the next of kin were unsuccessful.

1.4 Any overpayment of pension is charged to the respective pension Fund.

Recommendations

Pensions Audit-Sub Committee is requested to note the total value of pension overpayment written off between 1 April 2013 and 31 August 2013 is £5,491.50.

Executive summary

Prevention of Fraudulent Pension Payments

Summary

The purpose of this report is to allow the Pensions Audit Sub-Committee to understand and scrutinise the work undertaken by Lothian Pension Fund to prevent fraud. The report provides details of our participation in fraud prevention initiatives as an integral part of the control environment and the overall management of risk.

Recommendations

The Pensions Audit Sub Committee is requested to note the work undertaken by Lothian Pension Fund to prevent pension payment fraud.

Measures of success

Lothian Pension Fund is committed to deter and ultimately prevent fraud. Suitable controls are in place and subjected to regular scrutiny. Should any fraud be detected, however, immediate action is taken to prevent future losses.

Financial impact

The Lothian Pension Fund budget includes expenditure for fraud prevention. Direct costs are detailed in paragraph 2.3. Staff resource is met within the existing budget for pension administration employee costs.

Equalities impact

There are no adverse equalities impacts arising from this report.

Sustainability impact

There are no adverse sustainability impacts arising from this report.

Consultation and engagement

The Consultative Panel for the Lothian Pension Funds comprising employer and member representatives, is integral to the governance of the Funds.

Background reading / external references

None

Prevention of Fraudulent Pension Payments

1. Background

- 1.1 Administration of the pension funds includes the prevention and detection of fraud. Pension Fraud can include:
 - pensions continuing to be paid out after the death of a member;
 - a member failing to disclose relevant information;
 - a transfer of a scheme member's pension being made to an arrangement that will allow them access to their funds before the age of 55;
 - fraudulent payments instigated by those involved in its administration.

2. Main report

- 2.1 The pensions administration team deliver services to members using a browser-based pension software system. The software stores and controls all aspects of the membership database, document management and benefit calculations. Access is restricted to authorised individuals by user identification and password protection. In addition, the Fund's compliance policy includes the restriction that members of staff should not be involved in the computation or checking benefits payable to a member who is a connected person.
- 2.2 The operation of internal controls also gives comfort that the risk of fraud is mitigated or minimised. Procedural controls include:
 - obtaining the originals of relevant certificates;
 - where a beneficiary of a death grant is a child and the payment is being made to a parent/guardian on his/her behalf, evidence that the parent/legal guardian is capable and has the appropriate capacity to act in the best interests of the child;
 - authorisation of payments in line with the Scheme of Delegation.

- 2.3 We mainly rely on relatives to inform us of the death of a pensioner member. If a payslip or bank credit is returned undelivered, the pension is suspended pending investigation. To further mitigate the risk of not being informed of a member's death, the following procedures and checks are in place:
 - The National Fraud Initiative (NFI) The NFI is a well established data matching exercise led by Audit Scotland, which is carried out every two years. It is designed to help organisations identify causes of fraud and detect and correct any consequential overpayments from the public purse. The matching exercises undertaken include a comparison of public sector records to death records and other pension related outcomes, for example, when retirees have returned to work but not reported circumstances that require their pension to be reduced. Costs are met through the annual audit fee.

Investigations from NFI 2010/11 identified 38 cases where Lothian Pension Fund had not been informed of the death of a pensioner. 19 of the cases identified were written off (total value £3,470.19) because they were uneconomical to pursue.

We are currently matching data for NFI 2012/13. Audit Scotland will publish the outcomes in May 2014.

- Matching our records to the General Registrars Office for Scotland, Disclosure of Death Information - Since December 2012 Lothian Pension Fund has worked with General Registrars for Scotland who offer a quarterly mortality screening service. The June 2013 exercise highlighted potentially 30 members in receipt of pension whose death had been registered. These cases amount to £94K per annum. The fee charged by General Registrars Office for Scotland for providing this service amounts to around £480 each quarter. Undertaking this exercise regularly should highlight cases more promptly and as a result, the number of cases identified through NFI should reduce.
- To further reduce risk, the Fund intends to access the "Tell us Once (TUO)" project. TUO is a national application of registering a birth and death funded by the UK Government. It facilitates a single point of contact for customers to register a birth and death and notifies the relevant service areas (local and national) of each birth and death registration as soon as they have been reported. Presently, pension services are not yet available through TUO but are anticipated in a future release.

2.4 Pensions Liberation - The Pension Regulator, HM Revenue & Customs, the Financial Conduct Authority and the Serious Fraud Office have all recently combined to warn pension funds and the public of the dangers associated with those seeking to encourage members to liberate their pensions, commonly with enticements of receiving an early cash-lump sum and/or tapping into 'enhanced' investment performance. The Fund is required to exercise discretion as to whether to approve transfers. While the Pension Regulator has issued guidance in terms of identifying potential cases of liberation fraud, it places the onus on the pension funds themselves to have sufficient procedures in place to identify any suspicious practices and properly exercise their discretion as to whether or not to approve a transfer. We have therefore put in place a procedure which involves additional levels of diligence/enquiry of the member itself and the proposed transferee scheme. This is to ensure that any decisions to approve these types of transfer can be as informed as possible, are clearly documented and also to assert that we are sending a clear external message that these transfers are not being approved as a matter of course. Since January 2013, we have received 247 transfer requests, from which 26 cases were identified as potential liberation fraud. To date out of these 26 potential cases, the transfer payment for 10 cases has been refused. Each potential case has been referred to one of the regulatory bodies (The Pensions Regulator, HMRC or Financial Conduct Authority) and/or to Action Fraud, the UK's national fraud and internet crime reporting centre.

3. Recommendations

3.1 The Pension Audit Sub Committee is requested to note the work undertaken by Lothian Pension Fund to tackle and prevent fraud.

Executive summary

Pensions Administration Data Quality

Summary

The purpose of this report is to inform Committee of the ongoing work to enhance the quality of pension administration membership record data.

Importance of good scheme administration

"Getting the administration correct is central to any pension arrangement – member benefits are placed at risk where records or data have not been properly maintained. Inaccurate and missing data can have serious cost implications for schemes, and ultimately members, so it is important that errors are corrected as quickly as possible." - The Pensions Regulator, February 2011.

Aside from more obvious additional costs in areas such as error correction, compensation claims from members, poor record-keeping could potentially necessitate more conservative actuarial assumptions as well as causing reputational damage. Lothian Pension Fund, therefore, places a high importance on the quality of its pension administration data. The information demands of accurate record-keeping are also expected to increase with the introduction of a scheme based on career average revalued earnings (CARE) in 2015.

The Pensions Regulator "Guidance on Record-keeping" This guidance, introduced in 2010, set out proposals that represent good practice in helping to assess risks associated with member record-keeping. It described an approach for measuring the presence of member data items important to the administration of a pension scheme. Lothian Pension Fund has voluntarily targeted attainment of these standards as a minimum and publishes its performance in its Annual Report. As at 31 March 2013, the Fund met or exceeded the respective targets for common, conditional and numerical data defined by the Pensions Regulator.

Data quality workstreams

The Lothian Pension Funds' Annual Report 2013 included commentary on work to enhance pension administration data quality. "In addition to the new employer portal, we have adopted other initiatives to improve data quality. These include participation in the joint procurement with other Scottish administering authorities for mortality screening and tracing services, specialist longevity and data analyses through "Club Vita" and the National Fraud Initiative. Pension record keeping standards are also measured against the Pension Regulator's best practice guidance and appropriate assurance attained."

More detail and a progress update on the various workstreams is provided below:

Employer On-line Portal - PensionsWEB

As reported separately in the report "Pensions Administration Strategy Review", the Fund has invested in a new secure method of employer data transfer. This on-line portal has integrated query and validation functions and should facilitate further enhancement to the continual process of updating member records. This has been evidenced by significant improvement in employer performance in the first quarter of this financial year. Further work is ongoing to ensure full usage of the system by employers and to refine the employer portal to fully incorporate monthly reconciliation of pension contribution postings to individual records. This monthly reconciliation presents a real opportunity to reduce the historic reliance on year-end validation and therefore alleviate workload pressures for both employers and the Fund.

Pensions Administration Strategy Review

Similarly, the employer obligations embodied in the Pensions Administration Strategy, supplemented by regular liaison with employers, should lead to pensions record-keeping being accorded a higher priority that perhaps has been the case in the past.

Mortality Screening and Address Tracing

Matching our records to the General Registrars Office for Scotland, Disclosure of Death Information (Scottish GRO) and also the National Fraud Initiative (NFI) are covered separately in the report "Fraud Prevention Pension Payments".

On behalf of all the Scottish administering authorities, Strathclyde Pension Fund has led the procurement of a framework agreement for mortality screening and address tracing services. The latter service is particularly useful in finding deferred members, which is an industry-wide problem. A staff member from Lothian Pension Fund provided advisory support to the Glasgow City Council team in the tendering process. Award letters have now been issued to the successful bidders and Glasgow City Council expects to release the "call off" guidance to the other local authorities very shortly.

" Club Vita" Data Cleansing

Both Lothian Pension Fund and Lothian Buses Pension Fund participate in "Club Vita", which is a specialist company proving longevity monitoring and experience analyses. As part of a suite of annual reports, both Funds receive comprehensive data cleansing information from the results of various quality assurance checks. These cover the following:

- the current and historic membership profile, with specific focus on the oldest members
- historic records and whether incorrect payments may have been made

- the pattern of birth and retirement dates
- whether any information supplied on members affluence, that is pension in payment and salary at retirement / exit, looks suspicious
- how clean longevity data is in comparison with other funds in "Club Vita".

"Club Vita" also undertakes direct cleansing of post code data, in instances where the Funds' address records may have missing or incomplete post codes. The Fund follows up all records which have been queried.

As at the last annual report in December 2012, the data of both Funds compared very favourably with the "VitaBank" of other funds. Lothian Pension Fund was stated to have data "amongst the best for reliable salary / exit for pensioners".

Other Data Cleansing

Year-end information required to produce Annual Benefit Statements is validated, queried with the respective employer and records amended where necessary. Pending implementation of the integrated pensioner payroll, ongoing monthly reconciliation of payments between the pension administration and payroll records is being undertaken to provide assurance as to the accuracy of payments on an individual basis. Work is also continuing to ensure that, where applicable, Guaranteed Minimum Pension (GMP) records are updated. Additionally, the Fund's member self service web-link enables secure on-line amendment to the individual's address record and also encourages contact with the Fund should the member wish to query salary or service details.

Future Developments

Pensions Administration Standards Association

The Pensions Administration Standards Association (PASA) is a new independent body which sets standards for pensions administration and provides help and guidance to enable companies to achieve them. Lothian Pension Fund has investigated potential accreditation with PASA but at present the cost appears prohibitive. This, however, will be kept under review.

Recommendations

Pensions Audit Sub-Committee is requested to note the report

Measures of success

Data quality performance standards are measured against best practice guidance and included in the Lothian Pension Funds' Annual Report.

Financial impact

There are no direct financial implications as a result of this report.

Equalities impact

There are no adverse equalities impacts arising from this report.

Sustainability impact

There are no adverse sustainability impacts arising from this report.

Consultation and engagement

The Pensions Committee and Consultative Panel for the Lothian Pension Funds, comprising employer and member representatives, are integral to the governance of the Funds.

Executive summary

Risk Management

Summary

Following the June meeting of the Audit Sub-Committee, we have developed our approach to risk management in order to:

- (i) maintain a detailed operational risk register which sets out all the risks identified and assessed by the officers on an ongoing basis, the degree of risk associated in each case and our action to mitigate these risks (the "Operational Risk Register"); and
- (ii) produce a summary report of the risk register for the Committee and the Audit Sub-Committee which clearly highlights the material risks facing the pension funds and identifies any new risks/concerns and the progress being made over time by the officers in mitigating the relevant risks (the "Committee Risk Summary").

In addition the Operational Risk Register has been issued to the conveners of the Pensions Committee and the Pensions Audit-Sub-Committee.

Any points raised by the Audit Sub-Committee in relation to the Committee Risk Summary will be drawn to the Committees attention on 24 September 2013.

The Committee Risk Summary as at 30 August 2013 is set out in the appendix to this report.

Recommendations

We recommend noting the Committee Risk Summary and would invite any further comment or questions from the Audit Sub-Committee on both (i) the details highlighted therein, and/or (ii) on the form of the summary itself.

Measures of success

Improved visibility/analysis of the risks facing the fund and our progress in mitigating these risks. Regular, focused and relevant risk updates to the Committee and Audit Sub-Committee should increase general awareness and also allow productive analysis/feedback by the Committee/Audit Sub-Committee members on these fundamental issues.

Ultimately, risk management should lead to less third party exposure, improved financial position/productivity and have a positive impact on the reputation of the pension funds.

Financial impact

There are no direct financial implications as a result of this report.

Equalities impact

None.

Sustainability impact

None.

Consultation and engagement

The Consultative Panel for the Lothian Pension Funds, comprising employer and member representatives, is integral to the governance of the Funds.

Background reading / external references

None.

QUARTERLY RISK OVERVIEW

30 August 2013

UPDATE ON MOST SIGNIFICANT RISKS

Risk	Update	
Investment performance leading to pressure on employer contribution	Added as an explicit risk, having previously been included in a broader 'Under funding leading to Pressure on Employer Contribution' category.	
	The implementation of the new investment strategy, to (among other things) reduce the volitility of the Fund's investments, has started and is ongoing.	
Adverse movement against non-investment funding assumptions leading to	Again, this is a new risk having previously been included in a broader 'Under funding leading to Pressure on Employer Contribution' category.	
pressure on employer contributions	The Public Service Pensions Bill has now been enacted, with the 2013 Act compelling revision to the LGPS benefit structure and new employer cost cap. Initial meetings have been held with the Funds' Actuary to schedule analysis on employer contributions and funding assumptions ahead of the 2014 actuarial valuation, with a view to future contribution stability.	
	The funding objectives within the Lothian Pension Fund are also under review.	
Collapse/restructuring of an employer body leading to pressure on other employers	Engagement with employers and guarantors scheduled for late 2013 as part of the preparation for the 2014 actuarial valuation. This will result in work-streams to implement payment plans and other arrangements (e.g. updating legal terms for admission arrangements etc) to mitigate the impact on other employers in the Fund.	
	Detailed employer survey to be issued in September 2013 to ensure our information is up to date and enable us to continue to asses employer covenant. Reporting to Committee on the conclusions is scheduled for December 2013.	
Recruitment and retention of	Posts created in pension administration to provide development opportunities and defend against further staff losses. The results of the staff survey carried out in June 2013 demonstrate a	

key staff

significant improvement in staff satisfaction.

Ongoing development of the investment team's remit with specialist internal legal support. External consultants to be appointed to review the key risks associated with the operation of our in-house investment team.

We also need to address a key person risk recently identified in relation to our Communications Officer.

Risk of incorrect pension payments

The project to integrate the pensions payroll into the pensions administration IT system is on target to complete by the end of 2013. Full reconcilliation of payments has reduced the risk.

The new controls and processes will be subject to an internal audit in the coming months.

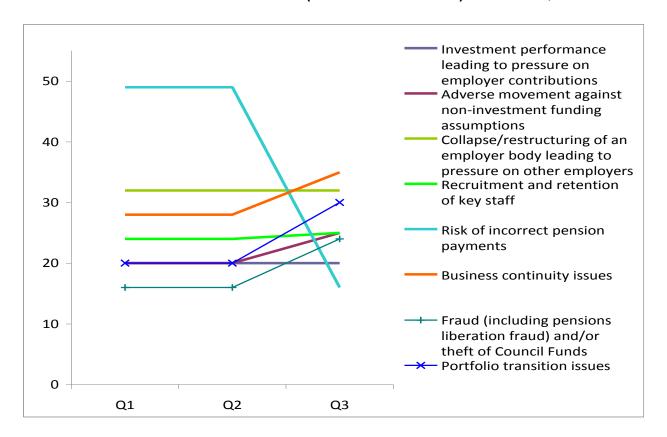

Business continuity issues (accommodation, staff etc.)

This risk has increased simply due to the pending office move. A detailed contingency planning exercise is being finalised and implemented (in relation to the 'Fit-Out', IT and Systems, legal terms, contractual/operational/other notifications and communications etc.) to ensure that the risk of any disruption to service provision is minimised.

Portfolio Transition Issues

This has been included as a new risk, although it has always been the subject of close control and monitoring. The risk status has increased for this risk only because of a pending in-house Portfolio Transition due to take place in the last quarter of 2013. We have controls in place to minimise the impact of this Portfolio Transisiton on the service provision of the fund and would anticipate that the risk status will decrease following the successful completion of this transition.

SIGNIFICANT RISKS: PROGRESSION OF CURRENT RISK (ACCOUNTING FOR CONTROLS) IN LAST THREE QUARTERS

OTHER KEY POINTS

	Comments
New significant risks	'Investment returns' and 'Adverse movement against non- investment funding assumptions' added as explicit risks, previously included in the wider 'Under funding leading to Pressure on Employer Contribution' risk (as above). Business continuity risk has increased, due to the pending office
	move (as above).
Other new risks ¹	Pension liberation fraud (re recent increase in fraudulent transfers); Portfolio transition issues (re pending transition in Q4); Market abuse; Wrongful disclosure of confidential information; Material breach of contract/regulations; Breach of FOI law/process (re alignment of our contractual provisions with managers with our statutory obligations); Incorrect or inconsistent communication with members; Acting in accordance with proper authority/delegations (re acting in accordance with the revised scheme of delegations/standing orders); Inappropriate use of pension fund monies; Material breach of EU procurement

arrangements.

law; Non-compliance with the new LGPS Scheme/Public Pensions

Service Act 2013 and Liability arising from shared services

¹ Please note that, unless otherwise stated, these new risks arise from an extension/update of our operational risk register, and have always been the subject of consideration, as distinct from risks added because they have only recently been encountered.

New controls Updated Transfer Out Procedure to mitigate risk of Pension

Liberation Fraud

Eliminated risks None

Notable initiatives / actions Risk analysis of the internal investment function by external

consultants.

Contingency planning for the office move.

Employer survey/engagement and contribution stability mechanism as part of the preparations for the 2014 actuarial

valuation.

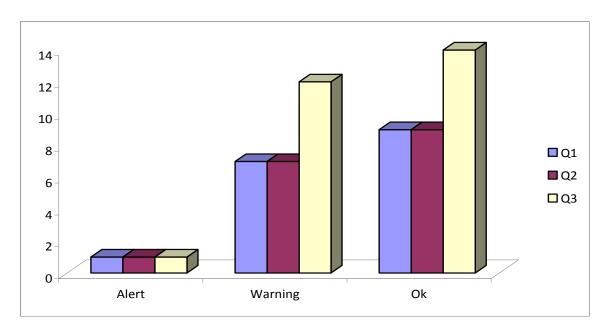

Engaging with existing alternative fund managers and the Information Commissioner in relation to our approach to regular FOI requests to disclose 'fund level' information to industry

journalists/consultants.

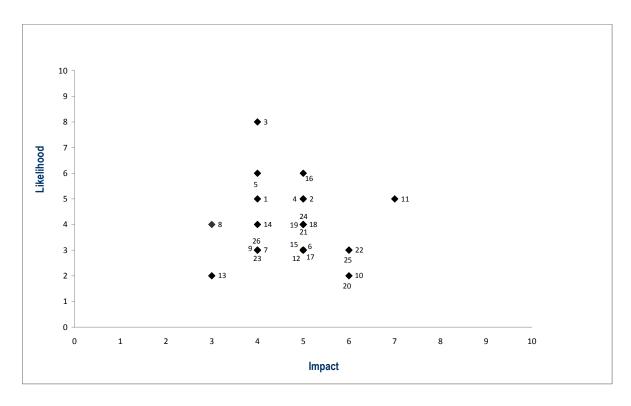

Material Litigation None

All Risks: Status Overview

Please note that this chart reflect the increased number of risks included in the operational risk register in Q3 and the Q1 and Q2 statistics are also currently identical, not then being subject to the current quarterly process.

All Risks: Impact and Likelihood Overview

Key: Risks by Number

1	Investment Performance pressure on	14	Pul Communication of the Commu
2	employer contributions Adverse Movement - pressure on employer	15	Risk of incorrect pension payments
	contributions		Market abuse by investment team
3	Collapse of an employer	16	Portfolio transition issues
4	Retention of key staff	17	Disclosure of confidential information
5	Fraud or theft of Council/Pension Fund	18	
	assets		Material breach of contract
6	Staff negligence	19	Regulatory breach
7	Failure of IT systems	20	FOI process in accordance with law
8	Employers HR decisions without	21	
	consideration of fund		Incorrect communication with members
9	Elected members take decisions against	22	
	sound advice		Acting in accordance with proper authority/delegations
10	Failure to complete annual accounts	23	Inappropriate use of pension fund monies
11	Business continuity issues	24	Procurement/framework breach
12	Members' confidential data is breached	25	Non-compliance with the new LGPS
13	Loss due to stock lending default	26	Claim or liability arising from shared services
