Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund Annual Report 2016 (and Financial Statements) Unaudited

Item number	5.4
Report number	
Executive/routine	
Wards	All

Executive summary

The purpose of this report is to present the unaudited Annual Report for the year ended 31 March 2016 for the Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund.

A copy of the unaudited Pension Funds' Annual Report for the year to 31 March 2016 is attached as Appendix 1. The Accounts show that the Lothian Pension Fund valuation increased from £5,106m to £5,434m and Lothian Buses Pension Fund increased from £386m to £394m. Reflecting the mature profile of its liabilities, the Scottish Homes Pension Fund decreased from £155m to £150m.

Single Outcome Agreement

Lothian Pension Fund Annual Report (& Accounts) Unaudited

Recommendations

- 1.1 That Committee invites the Pension Board to raise any relevant matters or concerns which the Committee should consider.
- 1.2 Note the unaudited Annual Report for the year ended 31 March 2016 for the Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund.
- 1.3 Refer this report, for information, to the City of Edinburgh Council, in its role as administering authority of the Pension Funds.

Background

Statutory provisions and accounting guidance

- 2.1 The Scottish Government has issued statutory accounting guidance, which requires that Local Government Pension Scheme (LGPS) financial statements be published within an Annual Report. From 2010/11 onwards, the LGPS Annual Report should be published separately from the Authority's own financial statements and there should be a separate audit report.
- 2.2 On 11 May 2015, "Local Government Finance Circular No.6/2015" was issued to provide non-statutory guidance on the requirements of The Local Authority Accounts (Scotland) Regulations 2014. These introduced a new statutory requirement for the Financial Statements to include a Management Commentary and an Annual Governance Statement. Similar requirements are contained in The Local Government Pension Scheme (Administration) (Scotland) Regulations 2008.
- 2.3 In July 2014, CIPFA published guidance "Accounting for Local Government Pension Scheme Management Costs", which promoted greater transparency of investment management fees. These principles were adopted as best practice in the presentation of the unaudited Annual Report 2015.
- 2.4 Local authorities are required to account for pension funds in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom (the Code). The Code is based on approved accounting standards issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee, except where these are inconsistent with specific statutory requirements. The Code also draws on

approved accounting standards issued by the International Public Sector Accounting Standards Board and the UK Financial Reporting Council where these provide additional guidance. The Code now requires that preparers have regard to CIPFA guidance “Accounting for Local Government Pension Scheme Management Costs”.

- 2.5 In March 2016, CIPFA revised and updated this guidance. Whilst the underlying principle of transparency of investment cost remains unchanged, there has been a degree of relaxation to full cost disclosure. Specifically, for complex “Fund of Fund” structures, the new guidance states that “Investment costs incurred by a separate legal entity, or in respect of investment decisions over which the pension fund has no control, should not be included in the (Pension) Fund Account.....If pension funds wish to provide information about the total cost of Fund of Fund investments, this should be included as part of the Investments section in the Annual Report”.
- 2.6 The financial statements of Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund, however, do include full transparency of all investment management fees.
- 2.7 With the investment staffing vehicle, LPFE Limited, commencing trading on 1 May 2015, consolidated financial statements have been prepared for Lothian Pension Fund for the year ended 31 March 2016. These consolidated financial statements combine those of the Fund (the parent entity) and its controlled entity (LPFE Limited) as defined in International Accounting Standard (IAS) 27.
- 2.8 The Local Government (Scotland) Act 1973 stipulates that unaudited financial statements must be presented to the Council and the Controller of Audit within three months of the financial year end, that is 30 June. It is within the Pensions Committee’s remit to consider the unaudited Annual Report for the pension funds. As per Audit Scotland guidance, the Annual Report should be referred to Council on for the purpose of noting. The next Council meeting is on 30 June 2016.

Main report

Unaudited Lothian Pension Funds Annual Report

- 3.1 A copy of the unaudited Annual Report for the year to 31 March 2016 for the Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund is attached as Appendix 1.
- 3.2 In considering the unaudited Pension Funds’ Annual Report, Committee should note the following:
 - 3.2.1 Section 95 of the Local Government (Scotland) Act 1973 states that “every local authority shall make arrangements for the proper administration of their financial affairs and shall secure that the proper officer of the authority has responsibility for the administration of those affairs”. The Acting Executive Director of Resources serves as the

Section 95 Officer for all of the City of Edinburgh Council's accounting arrangements, including those of the Pension Funds, however, this Section 95 responsibility has been delegated to the Chief Finance Officer, Lothian Pension Fund.

- 3.2.2 The Accounts show that the Lothian Pension Fund valuation increased from £5,106m to £5,434m and the Lothian Buses Pension Fund increased from £386m to £394m. Reflecting the mature profile of its liabilities, the Scottish Homes Pension Fund decreased from £155m to £150m.
 - 3.2.3 The Annual Report includes an Annual Governance Statement which sets out details of how the Funds are governed and the internal controls that are in place to manage risk. This mirrors the requirement to have a similar statement within the Financial Statements of the Council. This also encompasses a Governance Compliance Statement, which is a requirement of the LGPS Regulations. Its purpose is to record the extent to which the constitutional governance arrangements comply with best practice guidance issued by the Scottish Public Pensions Agency.
 - 3.2.4 Related to the Annual Governance Statement is the Statement of Responsibilities for the Statement of Accounts. This sets out the respective responsibilities of the Administering Authority and those delegated to the Chief Finance Officer, Lothian Pension Fund.
 - 3.2.5 Each of the three funds has a separate Actuarial Statement provided by the Actuary which provides information on the triennial valuation as at 31 March 2014 and the contributions determined for the following three years.
- 3.3 Following the consideration of the unaudited Annual Report by Pensions Committee, the next steps will be:
- a. City of Edinburgh Council should note the unaudited accounts at its meeting on 30 June 2016.
 - b. In order to meet the statutory timetable, the Pensions Audit Sub-Committee of 27 September 2016 and thereafter the Pensions Committee, at its meeting on 28 September 2016, will consider the following reports:
 - i. International Standard on Auditing (ISA) 260 Audit Report, which covers all significant issues arising from the audit of the accounts;
 - ii. the Annual Report by the External Auditor which summarises all significant matters arising from the audit and overall conclusions about the management of key risks; and
 - iii. the Audited Annual Report 2016.
 - c. It is anticipated that City of Edinburgh Council should note the audited accounts at its meeting on 27 October 2016.

Measures of success

- 4.1 The prime objective of the Council, as administering authority of the Lothian Pension Fund, Lothian Buses Pensions Fund and Scottish Homes Pension Fund, is to ensure an unqualified audit opinion of the Annual Report 2016. This will be determined in due course.

Financial impact

- 5.1 There are no direct financial implications as a result of this report.

Risk, policy, compliance and governance impact

- 6.1 The Local Government (Scotland) Act 1973 stipulates that unaudited financial statements must be presented to the Pensions Committee and the Controller of Audit within three months of the financial year end, that is 30 June.

Equalities impact

- 7.1 There are no adverse equalities impacts arising from this report.

Sustainability impact

- 8.1 There are no adverse sustainability impacts arising from this report.

Consultation and engagement

- 9.1 The Pension Board, comprising employer and member representatives, is integral to the governance of the Funds.

Foreword

As Convener of the Pensions Committee with responsibility for the Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund, I am pleased to introduce the 2015/16 Annual Report and Financial Statements.

We are witnessing one of the most challenging periods in modern times within the pensions arena. The wide reaching and radical reforms - to the State Pension and all public service pensions schemes, alongside the introduction of auto enrolment and flexible access to pensions savings under the 'Freedom and Choice' initiative - will have an impact for generations to come.

We aim to ensure that those 70,000 people who are members of our scheme have confidence that we are managing it effectively and efficiently on their behalf.

Good governance should be at the heart of any pension fund and changes required by the Public Sector Pensions Act 2013 are shining a greater light on governance across all public sector schemes. We welcome this. The Scottish LGPS Scheme Advisory Board has been established to advise Scottish ministers on changes which may be require to the LGPS and I am privileged to be a member of that Board. Locally we established our Pension Board, its members being employer and member representatives, on 1 April 2015. The Board has played an active role in the Funds' governance.

Unusually within the public sector, the LGPS is a funded scheme. Over the last year, the Lothian Pension Fund's assets have increased by £328million, with investments returning 6.5% over the last year. It is pleasing to see that our low-cost, lower-risk investment strategy is providing protection in volatile investment markets. The Funds also paid £165million of pension benefits to our members, primarily into the local economy where most of our members live.

I would like to take this opportunity to record my thanks to colleagues on the Pensions Committee, Pension Board, our advisors, employers and the Lothian Pension Fund team.

Councillor Alasdair Rankin
Pensions Committee Convener
The City of Edinburgh Council

Report by the Convener of the Pensions Audit Sub-Committee

The role of the Pensions Audit Sub-Committee is to assess the control of the Funds to ensure effective and efficient operations and to make appropriate recommendations to the Pensions Committee. It consists of three members of the Pensions Committee and it draws on appropriate specialist knowledge, understanding and expertise to scrutinise the operation of the pension funds. Two members of the Pension Board, one member representative and one employer representative, and the independent professional observer also attend.

Over the 2015/16 year, the Sub-Committee met three times and considered the 2014/15 accounts including the external audit of these accounts. It also reviewed findings from internal audits, fraud prevention, recovery of income tax on investment income and the service from the

Funds' investment custodian.

I believe the Audit Sub-Committee plays a valuable role in the governance of the pension funds and adds value to members and employers.

Councillor Cameron Rose
Audit Sub Committee Convener
The City of Edinburgh Council

Report by the Chair of the Pension Board

As required by regulations, a Pension Board was established on 1 April 2015 to help ensure that the operation of the pension funds is in accordance with the applicable law and regulation.

The Board is made up of employer and member representatives and replaced the Consultative Panel which was similarly constructed. While the Board has additional regulatory powers and hence has needed to be operated more formally, I am pleased that the Board has worked with the pension funds in an equally transparent and collaborative manner. The Board is very grateful for work of all the Fund staff whose skills and dedication have again produced a positive position for the funds.

The Board attends all meetings of the Pensions Committee and Audit Sub-Committee and actively participates in the Funds' governance. Members of the Board have also undertaken training to understand their role, general pensions issues and the operations of the pension Funds.

As required by the constitution, the chair of the Pension Board rotates annually between employer and member representatives. Jim Anderson, a member from Scottish Water nominated by UNISON, was selected by the Board to take on the role from 1 April 2016 and I know the Board will continue to support the pension funds in a constructive manner in the future.

Eric Adair
Finance Director of EDI (an admitted body in Lothian Pension Fund) and Chair of the Pension Board

Report by the Independent Professional Observer

My role as an Independent Professional Observer for the pension funds is to assist the Pensions Committee and Pension Board in exercising their governance responsibilities as effectively and as efficiently as possible. My experience as a pension trustee and knowledge of institutional investment help me to undertake the role.

During the year the Pensions Committee and Pension Board worked collaboratively and with constructive challenge to ensure that the new governance arrangements bedded in well and added value to the efficient oversight of the pension funds. As well as overseeing the normal day to day management of the funds, the Committee and Board have considered a number of emerging issues in relation to funding and investment, including the monitoring of the financial strength of employers and consideration of climate change exposure within the investment portfolio.

The level of debate within and between the Pensions Committee and Pension Board continues to be of a very high quality, and members continue to demonstrate high levels of engagement in searching for continuous incremental improvements to the overall governance standards of funds.

Sarah Smart
Independent Professional Observer

Introduction

Funding and investments

Uncertainty over economic growth, particularly in emerging markets, brought volatility to investment markets over 2015/16. Lothian Pension Fund's innovative strategy, targeting stable, income generating global equities, has delivered strong returns in these uncertain markets, returning +6.5% over the year despite equities falling in most regions.

Infrastructure investment has received much publicity over the past year as the UK and Scottish governments look to encourage Local Government Pension Schemes to increase their investment in this area. Lothian Pension Fund has built up a large and diverse infrastructure portfolio over a number of years, developing its reputation, network and execution capabilities to secure access to investment opportunities within this market niche.

An experienced team manages the majority of investments internally, with strong oversight and support from the Investment Strategy Panel. Not only is an internal team better aligned with the Funds' interests, but employers and members benefit from lower costs. A new corporate structure was established to facilitate further development of the in-house investment team and generate efficiencies for stakeholders. A limited company wholly owned by the pension fund, provides staff resources to the pension fund and facilitates recruitment and retention of specialist staff. In addition, a regulated investment company, LPFI Limited, has applied to the Financial Conduct Authority for authorisation. The company will enable us to collaborate more effectively with other institutional investors on infrastructure and other alternative investments to benefit from economies of scale.

Scheme changes

Significant changes were made to the Local Government Pension Scheme on 1 April 2015. The Fund participated in an ambitious joint communications programme covering all Scottish Funds to inform members of these changes and the Fund's communications officer played a key role. The initiative produced a dedicated website, video and pension modeller. In addition, the Fund provided its own members with newsletters and e-newsletters and produced posters and a comprehensive toolkit for employers. Approximately 2,500 members attended over 50 roadshows. Communications reinforced the message that the scheme remains a valuable part of remuneration.

Customers

Efforts to speed up the transfer of membership data from employers to the Fund continued. As well as helping us to provide a better service to members, it improves accuracy which is required to administer the new career average pension scheme.

Employers in the Lothian Pension Fund continue to face organisational changes and there is increased pressure on employer contributions. The results of the 2014 actuarial valuation and employer covenant analysis highlighted the need for different funding and investment options for certain employers. Consideration of appeals from some employers demonstrated that we are committed to ensuring commitments to the Fund are honoured whilst adopting as flexible an approach as possible to funding.

We had over 80,000 visits to our website, www.lpf.org.uk, over the year and over 19,000 members are registered to use the My Pension Online service. We recently used the online facility during a large-scale voluntary early release programme allowing members to see their potential pension benefits before expressing an interest. This facility significantly reduced work for both the employer and Fund.

Awards

During the year, the Funds, once again demonstrated their commitment to customers by retaining the Customer Service Excellence award. In order to further develop our service, we have joined the Pension Administration Standards Association, the first local government pension fund to do so. We also won two awards at the Local Government Investment Awards 2015, Fund of the Year (over £5billion) for Lothian Pension Fund and Fund of the Year (under £750million) for Lothian Buses Pension Fund.

Challenges

The changes to the pension scheme, pension taxation allowances and new pension freedoms make the administration of the Local Government Pension Scheme more complex and more difficult for members to understand. We will continue to develop communications, including different communications channels, strive for efficiencies and use industry standards to improve our service.

Continuing budgetary constraints across the public sector are expected to lead to further reductions in employee numbers and an increasing number of admitted bodies seeking to exit Lothian Pension Fund. There is also a risk that members decide to opt-out of the Fund on grounds of affordability or lack of appreciation of the value of pension benefits. Together with the new pension freedom and pension auto-enrolment, these could impact on the Fund membership, its liabilities and cashflow.

Economic growth in most parts of the world appears to be stuttering and yields on government bonds continue to move to historic lows. Collaboration could offer efficiencies and improved governance, particularly with the Fund's internal investment team. The Fund will continue to take a proactive approach to collaboration, assisted by authorisation from the Financial Conduct Authority.

There has always been interest from members and specific campaign groups in investments and over recent years this has increased significantly. There is a need to continue to be open and transparent with each Fund investments and communicating its investment strategy. The Funds must act in the best interests of members and employers and this remains paramount in all decision making.

To ensure we meet these challenges we have four objectives for our service to:

- We put our customers first and aim to provide the very best service.
- Our people are at the very heart of our business and we work together to deliver our service.
- We strive to improve our services by thinking ahead and developing new solutions.
- We are committed to supporting a culture of honesty and transparency.

Hugh Dunn

The City of Edinburgh Council
27 June 2016

Clare Scott
Chief Executive
Lothian Pension Fund
27 June 2016

Governance

Pension Committee and Pension Board

The City of Edinburgh Council acts as administering authority for the Local Government Pension Scheme in the Lothian area. There are three Funds, Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund.

Pensions Committee and Pensions Audit Sub-Committee

The City of Edinburgh Council, in its role as administering authority, delegates pension matters to the Pensions Committee and Pensions Audit Sub-Committee whose members act as 'quasi trustees'. The Pensions Committee held five meetings during the year and the Pensions Audit Sub-Committee met three times. Membership of the Committees from 1 April 2015 to 31 March 2016 was as follows:

Membership

Pensions Committee

Councillor Alasdair Rankin (Convener)
Councillor Maureen Child
Councillor Jim Orr
Councillor Bill Cook
Councillor Cameron Rose
John Anzani (elected member representative, Midlothian Council)
Richard Lamont (employer representative, Visit Scotland)

Pensions Audit Sub-Committee

Councillor Cameron Rose (Convener)
Councillor Jim Orr
Councillor Bill Cook

The Pension Board

The Public Services Pensions Act 2013 and the Local Government Pension Scheme (Governance) (Scotland) Regulations 2014 came into force on 1 April 2015. This resulted in the Consultative Panel being disbanded on 31 March 2015 and being replaced by a new Pension Board on 1 April 2015.

The role of the Pension Board is to help ensure that the operation of the Funds is in accordance with the applicable law and regulation. The Board attends all Pensions Committee meetings and has appointed two representatives to attend Pensions Audit Sub-Committee meetings. The membership comprises of ten members, five representatives appointed from the employer bodies and five members appointed by trade unions representing the membership of the Funds.

The Pension Board membership for the period 1 April 2015 to 31 March 2016 was as follows:

Employer representatives

Eric Adair (Chair)	EDI Group
Darren May	Scottish Water
Linda McDonald	Handicabs
Simon Belfer*	Napier University
Rucelle Soutar	The Royal Edinburgh Military Tattoo

Member representatives

Graeme Turnbull	UCATT
John Rodgers	UNITE
Thomas Carr Pollock	GMB
Catrina Warren*	Unison
Jim Anderson	Unison

(*Pension Board member appointed to attend the Pensions Audit Sub-Committee meetings.)

Pensions Committee and Pension Board training

The Committee and Board members must attend no less than 21 hours of training per year as outlined in the Funds' training policy which is available on our website at www.lpf.org.uk. All new members of the Pensions Committee and Pension Board attended induction training. Other training covered key areas including pension legislation, investment, accounting, auditing standards and actuarial practices. All members of the Committee and Board achieved the required training hours during 2015/16. Committee members collectively attended 293 hours of training over the year. Pension Board members undertook 314 training hours.

Scheme Advisory Board

The Public Service Pensions Act 2013 requires a Scheme Advisory Board for the Local Government Pension Scheme in Scotland and this was established on 1 April 2015. Its main function is to advise Scottish ministers, when requested, on the desirability of changes to the Scheme. They can also provide advice to scheme managers and pension boards in relation to effective and efficient administration and management of the Scheme.

The membership of the Board comprises of seven member representatives and seven employer representatives and a Joint Secretary is appointed in support of each of the Member and Employer groups. Councillor Rankin has been appointed a member of the Scheme Advisory Board. Officers of Lothian Pension Fund have also been called upon to advise the Board and its Joint Secretaries.

Lothian Pension Fund staff

The Investment and Pensions Division of the Resources Directorate of the City of Edinburgh Council carries out the day-to-day running of all three pension Funds. The Division functions include investment, pension administration and payroll, communications and accounting. The investment responsibilities include carrying out in-house investment management and monitoring and selecting external investment managers.

In February 2015, two limited companies (LPFE Limited and LPFI Limited) were established to facilitate the development of the internal investment capabilities and improve governance as well as delivering efficiencies for the administration of the Funds. Both companies are wholly owned and controlled by the City of Edinburgh Council as the administering authority of the Funds.

LPFI Limited has been established to support the investment programme of the in-house investment team by providing operational and other efficiencies; carrying out business from a vehicle authorised by the Financial Conduct Authority (FCA). Authorisation from the FCA is pending and is expected in the summer of 2016.

The employment of the internal investment team was transferred to LPFE Limited in May 2015. Revised terms and conditions of employment have been put in place, closer to those of comparable employers.

Over the year, senior officers were:

Alastair Maclean, Director of Corporate Governance, The City of Edinburgh Council (to 31 December 2015)
Hugh Dunn, Acting Executive Director of Resources, The City of Edinburgh Council (from 1 January 2016)
Clare Scott, Chief Executive of Lothian Pension Fund
Bruce Miller, Chief Investment Officer of Lothian Pension Fund
Struan Fairbairn, Chief Risk Officer of Lothian Pension Fund
John Burns, Chief Finance Officer of Lothian Pension Fund
Esmond Hamilton, Financial Controller of Lothian Pension Fund.

Investment Strategy Panel

The Pensions Committee sets the overall investment strategy with the implementation of that strategy, including investment monitoring, delegated to the Executive Director of Resources who takes advice from the Investment Strategy Panel. The Investment Strategy Panel meets quarterly and comprises the Executive Director of Resources of the City of Edinburgh Council and the Chief Executive, Chief Financial Officer and Chief Investment Officer of Lothian Pension Fund along with three external advisers. The external advisers are Gordon Bagot, Scott Jamieson and KPMG, represented by David O'Hara.

Investment

Investment markets

UK economic growth moderated somewhat in 2015, slowing from 2.9% in 2014 to 2.4% in 2015. The recovery in the labour market continued with unemployment falling to a 10 year low of 5%. Despite this, wage growth has remained subdued, with average earnings staying around 2%. The big surprise of 2015 was inflation falling below zero as oil and other commodity prices continued their slump. Other global economies showed quite diverse growth rates. Growth in developed economies have broadly returned to levels prior to the 2007/08 global financial crisis, around 2%. Growth in emerging markets on the other hand, has reduced significantly over recent years. Brazil and Russia are in recession and growth in China has slowed markedly.

Divergence between Developed Market and Emerging Market Economic Growth

Asset markets gave relatively lacklustre but volatile returns during 2015/16. Equity market returns were mainly negative, with only the US giving a positive return to UK investors, of 3%. The UK, Eurozone and Japan all gave returns of between -4% and -7% to a UK investor. The worst performing equity markets were those of the emerging markets, with Brazil and China returning -9% and -16% respectively in Sterling terms. The UK index-linked government bond market produced a modest positive return of 2%. Property returns were strongly positive, giving a return of +11%.

One Year Asset Class Returns – Major Markets (rebased to 100)

The outlook for asset markets relies on developed markets continuing to grow and for emerging markets to recover. In the US, the Federal Reserve has felt confident enough in the growth outlook to raise rates by 0.25%, the first monetary tightening in 9 years. Only a very slow and gradual further increase in interest rates is expected, due to low US inflation and the weakness of the global economy. Both Eurozone and Japan have continued to ease monetary policy in the face of domestic economic weakness and falling inflation. Further easing in both areas is expected in 2016. Growth expectation in the UK is between the US and Eurozone. Brexit fears have weighed on the currency and investment intentions. UK monetary policy has been unchanged for over 7 years.

Higher US rates, lower European rates

The outcome of the Brexit referendum, the speed of interest rate rises in the US and the performance of emerging economies will have a major impact on global assets. Longer term, asset returns are likely to remain low as global growth, inflation and interest rates all remain subdued.

Investment strategies

Over 2015/16, both Lothian Pension Fund and Lothian Buses Pension Fund reduced their equity allocations and continued to make new commitments to alternative assets, including timber and infrastructure investments in Scotland, UK and overseas. Investments in index-linked government bonds were modestly increased.

Scottish Homes Pension Fund adjusted its asset allocation in response to changes in its funding level during the year, and between 31 March 2015 and 31 March 2016, it increased its equity allocation and decreased its bond allocation due to a small decrease in the funding level.

Strategies are implemented utilising our experienced internal team of investment professionals. The guiding principle is to use strong internal investment capabilities to their maximum potential and to retain external managers for specialist mandates.

Over the past 6-7 years, the internal team has expanded with very positive effects on costs and capabilities. This is reflected in two structural shifts. Firstly, the percentage of Lothian Pension Fund's listed equity assets managed internally has risen from 23% to more than 85% and the majority of publicly traded bond assets are also managed internally. Secondly, the Fund has altered the construction of the listed equity assets, increasing the global mandates from 32% to more than 85%. Despite these large changes in the Fund, equity returns have been ahead of benchmark by 1.5% per year over the last five years and this has been achieved with lower risk than the benchmark.

Lothian Pension Fund and Lothian Buses Pension Fund also invest in private markets, selecting specialist managers to access a wide range of opportunities that are not available in the public markets. Over the past 10 years, the investment team has built a portfolio of private market assets in equity, debt, real estate, timber and especially in infrastructure, which is the largest proportion of the private market assets held and are described in more detail below.

The review of investment strategies for all three Funds during 2012 resulted in five year plans (2012-17) to achieve a reduction in investment risk. The investment strategies were again reviewed during 2015, taking into account the results of the 2014 actuarial valuations.

For Lothian Pension Fund, the Pensions Committee agreed that there was no reason to change its long term strategic allocation of assets as agreed in the 2012-17 investment strategy. The Fund will continue to implement that strategy over 2016 and 2017.

For Lothian Buses Pension Fund, the review of strategy has greater implications. In March 2016, the Pensions Committee agreed a revised long term strategy allocation for the five year period 2016-21. This makes meaningful changes to asset allocation over that timeframe reflecting the requirement for greater funding stability as the Fund matures. In addition, as Lothian Buses Pension Fund is defined in regulations as a sub-fund of Lothian Pension Fund, the Pensions Committee agreed that the option for it to be merged into Lothian Pension Fund would be explored in consultation with stakeholders.

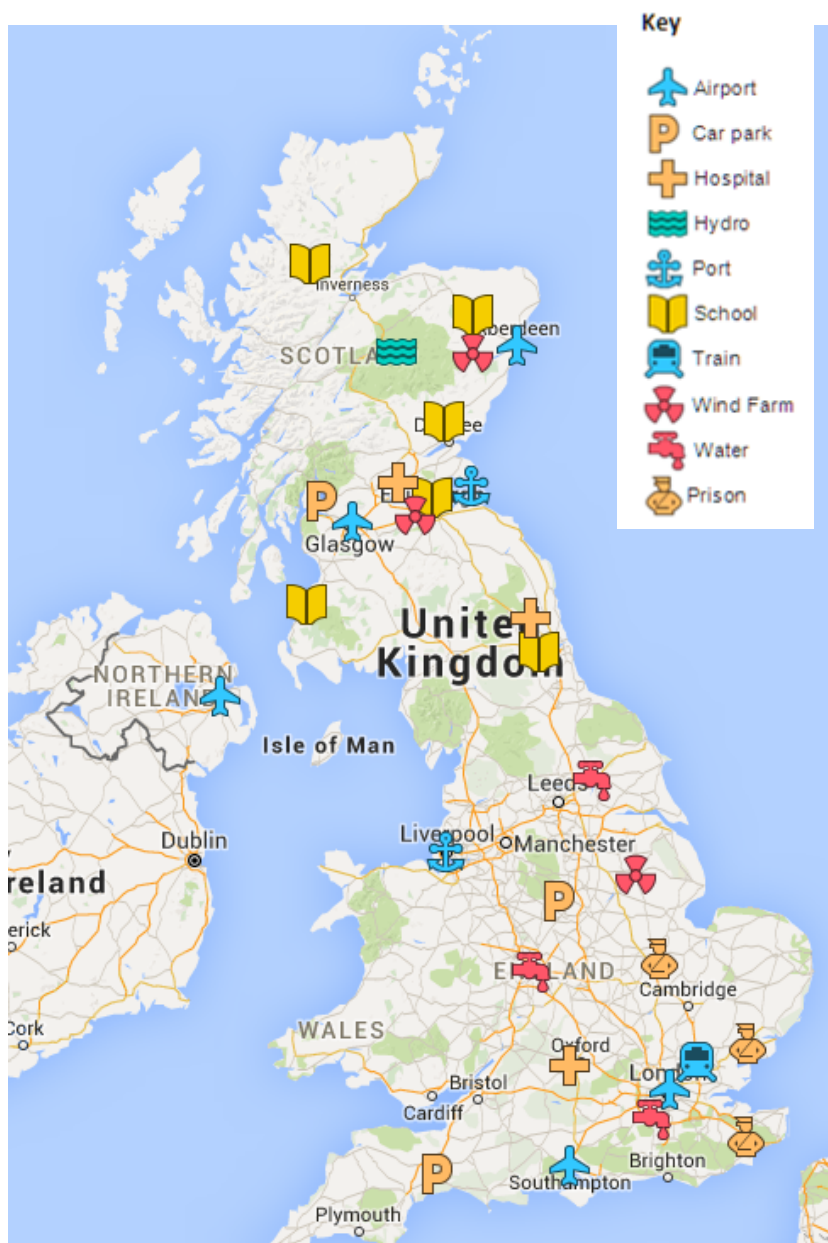

For Scottish Homes Pension Fund, the review concluded that a less prescriptive investment and funding strategy would allow a higher-yielding investment strategy and a more flexible approach to setting contributions. The current investment strategy adjusts asset allocation based on the evolution of the funding level. It is a bond-focused strategy, which generates an annual income yield of less than 2%, and so the Fund is required to sell assets on a regular basis to pay pensions. Proposals have been put forward to the Scottish Government to change and update its funding agreement and it has agreed to consider alternatives to the existing funding approach. Until options are explored further, Scottish Homes Pension Fund will continue to implement the existing investment strategy.

Infrastructure investment

Infrastructure investment has received much publicity over the past year as the UK and Scottish governments encourage Local Government Pension Schemes to increase their investment in this area. Infrastructure investments may offer the potential to generate attractive risk-adjusted returns based on cash flows that are often linked to inflation and can play a diversifying role in the Funds' strategies.

Lothian Pension Fund operates a dedicated multi-strategy real assets team to manage its infrastructure allocation. Over the last decade, it has developed its reputation, network and execution capabilities to secure access to investment opportunities within this market niche. Our experienced team appraises, models and invests in primary and secondary funds as well as co-investments to achieve its target allocation in a cost effective manner. An important element of the implementation strategy is to work with managers to ensure execution certainty and to understand transaction fees fully.

Infrastructure investments represented 8% of the value of the Lothian Pension Fund at 31 March 2016, one of the largest and most diversified allocations compared with other UK Local Government Pension Funds. Lothian Buses Pension Fund investments in infrastructure accounted for 6% at 31 March 2016. Of the £439million invested in infrastructure, 55% is invested in a diverse range of projects in the UK. The map below shows some of the infrastructure projects.

During 2015/16, Lothian Pension Fund completed one primary fund investment, acquired five secondary fund interests at material discounts to net asset value and invested in four co-investment and/or single asset investment vehicles. Approximately £182million has been invested over the year in UK, European and infrastructure assets, including UK hydro, wind, solar, gas distribution and the Thames Tideway Tunnel.

Over the last year, we have collaborated with Falkirk Council Pension Fund on five infrastructure investments. A staff secondment arrangement shares internal staff costs between the funds, supports Falkirk’s strategy to increase its allocation to UK infrastructure and gives them access to opportunities that would not have otherwise been available.

Financial Conduct Authority approval (once obtained) will enable us to more effectively collaborate in this sector, and for Lothian to benefit from scale in the market whilst further supporting other institutional pension funds in accessing infrastructure markets.

Responsible investment

We strive to be active shareholders in order to enhance the long-term value of our investments. We consider environmental, social and governance issues in the investment process in a manner which is consistent with the fiduciary duty to provide the highest standard of stewardship on behalf of the members and employers.

Robust arrangements are in place to ensure that the our shareholdings are monitored and appropriate voting and engagement activity is undertaken with the aim of bringing about positive long term change at companies through a focused and value oriented approach.

We are a signatory to the Principles for Responsible Investment and publish how we meet the Financial Reporting Council UK Stewardship Code requirements, which promote public disclosure of stewardship activities. We undertake voting and engagement activities through Hermes Equity Ownership Services for the majority of our investments. Baillie Gifford and State Street take direct responsibility for stewardship issues for the investments they manage on our behalf.

Over the year, we voted at shareholder meetings of more than 600 companies in which we were invested. We voted on over 9,000 resolutions and opposed over 600 of them. Hermes Equity Ownership Services engaged on our behalf with companies across the world on topics such as board structure, executive compensation, climate change and community relations. We supported the “Aiming for A” coalition which seeks transparency over climate change risks and opportunities in mining companies and we co-filed a shareholder resolution at Rio Tinto.

Global engagement activity

Company engagement by region (108)

Engagement objectives by theme (297)

Councillor Cameron Rose, a member of the Pensions Committee, is Vice Chair of the Local Authority Pension Fund Forum (LAPFF), which promotes the investment interests of local authority pension funds and seeks to maximise their influence as shareholders. In his LAPFF role, Councillor Rose meets with boards of companies and attends company Annual General Meetings to represent shareholders’ interests.

Financial performance

Administrative expenses

A summary of the Division's administrative expenditure for 2015/16, against the budget approved by Pensions Committee, is shown in the table below.

The budget focuses on controllable expenditures and therefore excludes all benefit payments and transfers of pensions from the Fund. Similarly, income does not include contributions receivable and pension transfers to the Fund. The total net cost outturn of £11,118k against budgeted of £11,894k represented an underspending of £776k (6.5%) for the pension fund. The key budget variances serving to generate this underspending were:-

- Other third party payments - £633k underspend. This saving arose primarily from investment broker research costs continuing to be paid via commission, rather than being invoiced directly. The budget also included provision for preliminary expenses incurred in exploring potential investments but not concluding in an asset purchase. In the event, no such outlays were written off and the budget of £200k was not utilised. Miscellaneous other costs amounted to £67k in excess of budget.
- Employees - £319k underspend. This arose from savings in unfilled posts and also the timing of recruitment.
- Supplies and services - £226k underspend. Savings were realised across a range of budgets within this cost classification. These included lower than anticipated outlays for investment legal fees, £60k; investment asset system costs, £45k; establishment of wholly-owned companies, LPFE Limited and LPFI Limited, including application to Financial Conduct Authority for the latter, £30k, printing and postage expenditures, £25k. Miscellaneous other savings totalled £66k.
- Investment management fees - £191k underspend. This saving arose from greater use of in-house investment management expertise, with three external fund mandates being terminated and assets transferred. This occurred late in the financial year and therefore realised savings were proportionately lower. Investment management fees are also linked to asset performance. Investment returns remained lower than the prudent assumption of an 8% return used to derive the budgeted fee expenditure. Savings of £450k, however, were offset by additional fee outlays in pursuit of infrastructure investments.
- Income - £586k lower receipts than budgeted. Securities lending commission fell significantly short of budget. This reflected the generally lower than anticipated volume of securities lending activity in investment markets, particularly in the United States, and also reflected changes to the underlying asset holdings. Specifically, 50% of stock lending commission received by the Division in the previous year had been derived from a single stock. The income from this stock proved less reliable in the first quarter of this year and was sold, on investment grounds, during the second quarter.

	Approved budget	Actual outturn	Actual variance
	£000	£000	£000
Employees	2,489	2,170	(319)
Property	188	194	6
Plant and Transport	37	32	(5)
Supplies and Services	1,095	869	(226)
Investment Managers Fees - Invoiced	8,100	7,909	(191)
Other Third Party Payments	1,286	653	(633)
Capital funding - Depreciation	80	83	3
Direct Expenditure	13,275	11,910	(1,365)
Support Costs	276	279	3
Income	(1,657)	(1,071)	586
Total net controllable cost to the Funds	11,894	11,118	(776)

	Actual outturn
	£000
Actual outturn on budgeted items above	11,118
Add back securities lending revenue included in income above	892
Investment property administration costs	497
Investment transaction costs	2,260
Investment management fees deducted from capital	23,126
Securities lending management fee	255
IAS19 LPFE retirement benefits	180
LPFE deferred tax on retirement benefits	(36)
LPFE corporation tax losses utilised by CEC group	(5)
Total cost to the Funds (inclusive of full investment management fees)	38,287
Per Fund Accounts	
Lothian Pension Fund	36,286
Lothian Buses Pension Fund	1,779
Scottish Homes Pension Fund	222
Total	38,287

Funding and cash-flow

Cashflow to and from a pension fund is very dependent upon the profile of its membership. Specifically, a maturing membership, where the proportion of active to deferred and pensioner members is reducing, will result in a relative reduction in contributions received, together with additional outlays on payments to pensioners.

For Lothian Pension Fund, a significant early retirement initiative from the largest employer, the City of Edinburgh Council, resulted in a marginal decrease in the total active membership (-0.6%) over the year. The impact on funding was that net additions from dealing with members, although remaining positive at £11.4million, fell by £7.9million (40.9%). The impact of higher lump sum and pension payments was offset by the policy of the Fund that any pension strain cost associated with early retirement is paid in full immediately on the member's retirement.

As a fund which is closed to new entrants, the income and expenditures of Lothian Buses Pension Fund reflect this relative maturity. As at 31 March 2016, outlays from dealing with members remained in excess of receipts by £1.3million. This represents a change of £0.5million on the position as at 31 March 2015, where net outlays totalled £1.8million. Primarily, this resulted from the phased increase in contributions from the employer, £0.4million, as agreed at the 2014 actuarial valuation.

Scottish Homes Pension Fund is a mature fund with no active members. As a result, pension outlays are met from investment income and asset sales, supplemented by funding from the Scottish Government. Net pension outlays were £7.0million, an increase of £0.2million (3.0%) on the previous year.

Membership statistics for the three Funds and funding statements from the Actuary are provided at the Fund accounts section.

Investment cost benchmarking

Investment strategy focuses on risk adjusted returns net of costs. Investment data is provided to CEM, an independent benchmarking expert for global pension funds. CEM calculates a benchmark for the Lothian Pension Fund based on fund size and asset mix, which are key drivers of investment costs.

Reflecting the Fund's commitment to internal management, including the ability to implement transitions, investment costs are below that of CEM's benchmark of global peers. The latest analysis shows Lothian Pension Fund's investment costs at 0.39% are significantly lower than CEM's benchmark cost of 0.50% an equivalent saving of approximately £5million a year.

Investment management cost transparency

Local authorities are required to account for pension funds in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom (the Code). The Code is based on approved accounting standards issued by the International Accounting Standards Board and interpretations of the International Financial Reporting Interpretations Committee, except where these are inconsistent with specific statutory requirements. The Code also draws on approved accounting standards issued by the International Public Sector Accounting Standards Board and the UK Financial Reporting Council where these provide additional guidance. The Code now requires that preparers have regard to CIPFA guidance "Accounting for Local Government Pension Scheme Management Costs"

CIPFA published guidance "Accounting for Local Government Pension Scheme Management Costs" in July 2014, which promoted greater transparency of investment management fees. These principles were adopted as best practice in the presentation of the Lothian Pension Fund audited Annual Report 2015. In March 2016, CIPFA revised its guidance including the following "Investment costs incurred by a separate legal entity, or in respect of investment decisions over which the pension fund has no control, should not be included in the Fund Account."

The revised guidance changes the disclosure of fees for fund of funds investment arrangements. A "fund of funds" is an investment holding a portfolio of other investment funds rather than investing directly in stocks/securities. Typically fees are due to the "fund of funds" manager as well as to the managers of the underlying funds they are invested in. Generally, under the revised guidance from CIPFA this second layer of fees would not be disclosed with just the fees from the "fund of funds" manager disclosed.

In the preparation of Lothian Pension Fund's 2014/15 Annual Report the Fund made efforts to be completely transparent on the totality of costs incurred for managing its investment assets. The Fund's disclosures included all layers of fees.

The Fund believes that full transparency of investment costs is crucial to providing a full understanding to the most significant cost of managing a pension fund. Accordingly, the Fund has maintained this principle in this years financial statements and continued to disclose all investment cost in the financial statement for the year and therefore is not compliant with the revised CIPFA guidance. However, the Fund feels that the principle of full investment management cost transparency should be maintained. The table below demonstrates the difference in reporting between CIPFA's recommendations and full transparency in investment costs for 2015/16.

	Investment Management expenses in compliance with CIPFA	Investment Management expenses per 2015/16 financial statements	Variance from full disclosure
	£000	£000	£000
Lothian Pension Fund	27,625	34,400	6,775
Lothian Buses Pension Fund	1,309	1,677	368
Scottish Homes Pension Fund	169	169	0
TOTAL	29,103	36,246	7,143

Risk management

The Funds are committed to a strong control environment to ensure that risks are identified, understood, managed and monitored appropriately. The risks faced by the Funds change over time and ongoing management of risk is crucial. The Funds also have a compliance policy and each manager is responsible for ensuring compliance within their area of responsibility.

As at 31 March 2016, the most significant risks (after taking account of risk reduction controls), as assessed using a score out of 10 by the Investment and Pensions Service Management Team, were as follows:

Description	Impact	Likelihood	Risk score
Adverse investment performance leading to pressure on employer contributions	5	4	20
Adverse movement against non-investment funding assumptions leading to pressure on employer contributions	5	6	30
Collapse/restructuring of an employer body leading to pressure on other employers	4	8	32
Recruitment and retention of key staff	5	7	35

Performance

The Fund has a strong commitment to customer service. We continually develop our services to ensure the best possible service for customers whilst recognising potential demands of the future. Our vision, objectives and key actions are shown in our service plan along with how we measure their success. Our progress is reported regularly to the Pensions Committee and Pension Board.

To ensure we meet this aim we have set the following objectives for our service:

In 2015/16, we have delivered the following achievements:

- Implemented LGPS2015 scheme changes, the most significant changes to the Scheme since it began
- Established a new Pension Board and embedded it into the Funds' governance
- Set up two new companies LPFE Limited and LPFI Limited and transferred investment staff to LPFE Limited
- Submitted an application to the Financial Conduct Authority for the registration of LPFI Limited
- Established a new data quality team and developed enhanced performance measures to monitor membership data
- Participated in discussions being undertaken by LGPS funds in England and Wales on investment pooling
- Commenced implementation of investment unitisation system
- Commenced work to undertake Guaranteed Minimum Pension (GMP) reconciliation with HMRC
- Continued to provide a shared service to Falkirk Pension Fund.

Performance against key objectives

We put our customers first and aim to provide the very best service.

	Target	Actual
Maintain Customer Service Excellence Standard	Retain	Retained
Overall satisfaction of employers, active members and pensioners with our services as measured by surveys	87%	86%
Proportion of active members receiving a benefit statement by 31 August 2015	96%	98%

Customer Service Excellence

To maintain our commitment to customer service, we use the Customer Service Excellence (CSE) framework which ensures we are continuously making improvements. We are assessed annually by an external assessor and at our assessment in February 2016, we retained the CSE award for another year. We also gained an additional Compliance Plus award bringing the number held to five for areas such as complaint handling and working with employers.

In 2016, the assessor said, “All told a very sound submission from what is clearly a very customer focussed organisation.”

Customer satisfaction

Our overall customer satisfaction over the year was 86%, just below the target of 87%. The chart on the left shows actual satisfaction against target since 2012/13.

The chart below shows customer satisfaction broken down by customer groups.

The year 2015/16 was the first time we have measured the satisfaction of those receiving services via email. As a result of feedback received, improvements have been implemented over the year to email service including quicker and more-focussed responses.

These have resulted in increased satisfaction over the course of the year, from 49% in the first quarter to 74% in the last quarter.

Customer satisfaction by group

Complaints

We monitor the complaints we receive on a monthly basis. We respond promptly to any complaints, investigate them and learn from them to improve the service. We categorise our complaints in two ways:

- Complaints about our service
- Complaints about our application of the regulations

The graph shows the number of complaints in each of the categories. These represent less than 0.2% percentage of the procedures (over 23,000) we carried out in 2015/16. The most common cause of complaint during 2015/16 was the delay in processing requests for transfers out of the Funds.

Following changes to the Scheme on 1 April 2015 there was a delay in updating the pension administration software used by all Scottish LGPS Funds. Increased public awareness of the new Freedom and Choice available from 6 April 2015 increased the number of requests for transfers and this compounded the problem. As soon as the software was updated in September, resource was immediately focussed on dealing with the requests.

Another theme identified was that members did not understand the complex scheme rules on trivial commutation (taking a small pension as a one-off cash lump sum where the payment extinguishes rights to benefits under the scheme). We used feedback to improve our retirement communications and now explain the triviality rules and the tax implications.

Annual benefit statements and data quality

We issued 98% of benefit statements by 31 August 2015. High quality data is essential to provide an excellent service to our members and for the provision of benefit statements and to meet The Pension Regulator’s target of all members receiving their benefit forecast by 31 August. During the year more than 85 employers submitted monthly contribution data, leading to cleaner membership data, quicker services to members and fewer queries at the end of the year.

Along with our employer web portal, introduced to assist with the transfer of data, we have adopted other initiatives to improve member information. These include participation in specialist longevity and data analyses through “Club Vita”, a service provided by the Funds’ Actuary. We also carry out quarterly checks with the General Register Office and participate in the National Fraud Initiative. In 2014, we carried out a matching exercise for deferred members where we have lost touch with them. The project is currently being followed up with contact being made where a possible match has been found.

Following the end of contracting-out of the Second State Pension (S2P) on 5 April 2016, pension schemes need to reconcile the GMP values they hold for members with those calculated by HMRC. Schemes will be obliged to pay whatever GMPs are attributed to them, even those that may be incorrectly calculated or have been transferred out. An initial assessment shows 54% matching HMRC records and reconciliation is underway for the remaining records.

Our people are at the very heart of our business and we work together to deliver our service.

	Target	Actual
All staff complete at least two days training	Yes	Yes
Level of sickness absence	4%	1.1%
Staff survey satisfaction	67%	73%

Key indicators for staff in 2015/16 were overall staff satisfaction, sickness absence levels and training hours completed. All targets were achieved.

Over the last financial year, staff participated in regular training. As well as attendance at external seminars and training for qualifications, we held in-house sessions covering topics such as investments, annual accounts and funding.

The sickness absence rate was very low again at 1.1%.

Overall job satisfaction is measured during the annual staff survey. Overall satisfaction has continued to increase from 65% to 73% in 2015/16. This year's survey also saw the highest response rate with 49 out of 54 staff responding to the survey.

We strive to improve our services by thinking ahead and developing new solutions.

	Target	Actual
Proportion of critical pensions administration work completed within standards	Greater than 90%	93%

Our in-house pension administration team provides a dedicated service for the three pension Funds. We monitor the time taken to complete our procedures. Key procedures include processing of retirement and dependent benefits, providing information for new members, transfers and retirement quotes.

The Scheme changes from April 2015 have seen administration becoming more complex for both the Fund and employers. We continue to review our processes to improve our performance so that the Fund is in a position to meet new challenges. Despite the challenging environment, 93% of key procedures in 2015/16 completed in target.

In order to ensure we receive the necessary data from employers to administer pensions, we reviewed and updated our Pensions Administration Strategy to take into account recent regulatory changes and to further enhance data quality and service standards.

The Pensions Administration Strategy sets out the roles and responsibilities of both the Fund and employers and specifies the level of services the parties will provide to each other.

The Pensions Committee agreed to pass on costs of poor performance from employers, and the revised Strategy now includes reference to charges in four key areas:

- Late payment of contributions
- Late submission of membership information at the end of the year
- Failure to provide the Fund with information required to provide members with pensions savings statements
- Failure to provide details of member contributions on a monthly basis.

These areas are particularly important to ensure compliance with legislation, including accurate data to administer the new career average pension scheme and the new requirement to provide members with a pension forecast by 31 August each year. Charges for late payment of contributions are as stated in the Scheme regulations whilst other charges have been set to reflect the additional time spent in resolving queries and pursuing late information.

The Fund monitors employer performance against the standards set out in the Pension Administration Strategy. Results are reported to employers by way of an annual performance report and more frequently for larger employers.

Overall employer performance for 2015/16 is shown below, with 2014/15 shown for comparison purposes.

Case type	Target (working days)	2014/15			2015/16		
		Number received	Number within target	% within target	Number received	Number within target	% within target
New members	20	4,741	3,631	77%	4,653	4,074	88%
Leavers	20	2,430	1,189	49%	2,377	1,207	51%
Retirements	20	931	373	40%	1,156	398	34%
Deaths in Service	10	29	7	24%	40	11	28%

In 2015/16, the proportion of new member, leaver and death in service cases where the information was received from employers within target timescales has improved from 2014/15. However, information continues to be received later than target for a significant proportion of these cases.

In contrast the provision of information for retirements within target timescales has worsened over the year. In part this was due to one of the largest employers carrying out a large-scale early retirement exercise. Of the retirements within 2015/16, 77% were due to members retiring early or on redundancy or efficiency grounds. 10% of the retirements were due to ill health.

We are committed to supporting a culture of honesty and transparency.

	Target	Actual
Audit of annual report	Unqualified opinion	Yes
Monthly pension payroll paid on time	Yes	Yes
Contributions received within 19 days of the end of the month to which they relate	99.0%	98.9%
Data quality - compliance with best practice as defined by The Pensions Regulator	Fully compliant	Yes

Our annual report and accounts are audited by Audit Scotland and has received an unqualified audit opinion since the Fund began providing its own annual report. The Funds also paid over £165million of pension benefits to our members, primarily into the local economy where most of our members live.

We also measure the payment of employer contributions which are to be paid by the 19th day of the month to which they relate. 98.9% of employer contributions were received in the timescale against the target was 99%. Of the £2.0m paid late, £1.4m represented three payments from two employers. The employers who paid late are listed in the Funding section.

Pension record keeping standards are also measured against The Pension Regulator's best practice guidance and appropriate assurance has been attained for the second year since introduction.

Common data	Target	Actual
New data (Post June 2010)	100%	100%
Old data (pre June 2010)	95%	96%
Conditional and numerical data		
Fund specific measurement including date of joining, pensionable remuneration, date of leaving and reasons for leaving etc.	98%	98%

Funding

Funding Strategy Statement

The Funding Strategy Statement sets out how we balance the potentially conflicting aims of affordability and stability of employers' pension contributions whilst taking a prudent long-term view of funding pension liabilities. The Funding Strategy Statement was revised at the 2014 Actuarial Valuation and further revised in November 2015. It can be viewed on our website at www.lpf.org.uk/publications. The Statement covers the funding strategies of each of the three Funds.

Employer appeals

The revised Funding Strategy Statement included a change for those employers with less than five active members and/or those who were within two valuation periods (6 years) of leaving Lothian Pension Fund. Such employers were invested in lower-risk investments, i.e. index-linked government bonds, with employer contribution rates set accordingly. This was in order to address the previous inconsistency between the actuarial and cessation valuations, raise awareness of pension deficits and reduce risk of employers being unable to pay deficits when the last member leaves.

Following representation from employers at Pensions Committee in March 2015, those affected were given leave to appeal their new contribution rates on affordability grounds. Of the 27 employers affected, 14 appeals were received.

The appeals were considered by the Pensions Committee at a special meeting in November 2015 and decisions were agreed for each of the employers. A revised rates and adjustments certificate with revised contribution rates was prepared by the Actuary. The Funding Strategy Statement was amended to include reference to these determinations and to clarify other issues raised by employers during the appeals process.

Unitisation of assets

Lothian Pension Fund is seeking to enhance the transparency of the fund assets attributable to each employer and, to that end, has procured a system of investment unitisation (asset tracking). This enables investment assets for each employer to be tracked on a monthly basis, with the cash flow of an employer resulting in either a purchase or sale of units. The aim is to implement this change at the coming actuarial valuation, as at 31 March 2017, and data has been loaded to the system retrospectively in readiness. Another benefit of the system is that it also facilitates the future provision of more tailored strategies to employers.

Tailored employer investment strategies

Lothian Pension Fund is seeking to provide more tailored investment strategies to individual employers from the next actuarial valuation in 2017. A system has been purchased that will enable tracking investment assets for each employer on a monthly basis with the cash flow of an employer resulting in either a purchase or sale of units.

Any new investment strategy would supplement the present high-level asset classes of equities, index-linked gilts and alternatives for the majority of employers, together with the wholly index-linked gilts funding for those employers closest to exit.

Employer contributions – late payments

The Pensions Act 1995 requires employers to pay pension contributions by the 19th of the month following the deduction from an employee's pay. This requirement is highlighted in the Fund's Pensions Administration Strategy.

We monitor this requirement via our key performance indicators to ensure compliance with the Act. The target for 2015/16 year was 99.0% pension contributions paid in time. 98.9% of contributions by value were paid on time.

Of the 1,180 payments made to the Fund in 2015/16, in total 71 were paid later than the target of the 19th of the month. The number of late payments for each employer is provided overleaf.

Investment Strategy

Following completion of the 2014 Actuarial Valuation, the Investment Strategy Panel and Pensions Committee reviewed the Fund's investment strategy in light of developments in pension fund membership, expected cash flow, funding level, investment risk and returns.

Lothian Pension Fund manages two investment strategies, which provides employers with access to an appropriate level of risk dependent on their individual characteristics (covenant strength, funding position, liability profile and time horizon). Most employer liabilities are funded in Strategy 1, which invests in a diversified portfolio of assets that are expected to generate positive real returns over the long term, but which will be volatile over shorter periods. Employers accounting for less than 1% of the Fund's liabilities are funded on a 'gilts' basis in Strategy 2, which invests in a portfolio of index-linked gilts to minimise risk for these employers.

Following completion of the 2014 Actuarial Valuation, the Fund's Investment Strategy was reviewed. The Pensions Committee agreed in December 2015 that the Investment Strategy 2012-17 remained appropriate for the vast majority of employer liabilities. This strategy, Strategy 1, reduces the allocation to equities (including private equity) from 71.5% at the end of 2012 to 65% by the end of 2017 and increases the allocation to index-linked gilts and alternatives. (Alternatives include property, infrastructure, timber and fixed income assets, such as corporate bonds and other debt investments.) The strategy recognises a gradually changing risk profile for the Fund, but retains significant exposure to investments, such as index-linked gilts and equities, which have a history of protecting or enhancing purchasing power after the effects of inflation have been taken into account.

The long term strategy for 2012-17 is set out in the table below along with the current interim strategy allocation and the asset allocation limits under normal financial conditions.

Strategy 1	Strategic Allocation 31/03/2016 %	Long term Strategy 2012 - 2017 %	Permitted ranges %
Equities	67	65	50 - 75
Index Linked Assets	7	7	0 - 20
Alternatives	25	28	20 - 35
Cash	1	0	0 - 10
Total	100	100	n/a

Actual Asset Allocation (%) at 31 March 2016

The implementation of the Investment Strategy 2012-17 continued to proceed at a measured pace over 2015/16 as investment opportunities became available and as research on opportunities was completed. Progress towards the long term strategy allocation involves the interim strategy allocation and the actual asset allocation changing gradually over time. The pace of change can be accelerated or slowed depending on asset prices, the availability of alternative investments and research conclusions on new investment opportunities.

The most significant changes to the Fund over 2015/16 were the terminations of three external equity managers (one active global equity mandate and two active emerging market mandates) with the assets transitioned into internally managed, lower risk, global equity mandates. Approximately 88% of the Fund's equities are now managed internally with the majority of these in low cost, low turnover strategies, which are expected to enhance the Fund's risk-adjusted returns over the long term. The Fund continues to outsource investment management services for specialist mandates, which complement the portfolio strategies employed internally.

Investment performance

The objectives of the Fund are:

- over long-term economic cycles (typically 5 years or more) the achievement of the same return as that generated by the strategic allocation
- over shorter periods, the Fund should perform better than the strategic allocation if markets fall significantly.

The Fund has achieved returns in excess of the strategic allocation over the last year and over the longer term timeframes shown in the table. The benchmark return shown in the table is the strategic allocation and comprises equity, index-linked gilts and cash indices as well as an inflation-linked index for the alternatives allocation.

Returns relative to the benchmark over a one year period need to be placed in the context that there are no ideal benchmarks for many of the assets held in the Fund, especially the Alternatives. The Fund's benchmark for Alternatives is inflation plus 3.5% per annum, which makes sense over the long term as the Fund's liabilities are linked to inflation. However, over shorter periods, there is less information content in the relative returns of the Fund because the development of asset prices is much more volatile than that of UK retail or consumer prices. The Investment Strategy Panel assesses the underlying risks of the portfolios that make up the asset allocation to ensure that these are consistent with the long term objectives of the Fund.

The strong performance relative to the benchmark over 2015/16 was largely attributable to equities (especially the large internally managed global portfolios) and the alternative investments, driven primarily by double digit return from the property and infrastructure portfolios, which benefited from the purchase of infrastructure assets at attractive valuations.

Annualised returns to 31 March 2015 (% per year)	1 year	5 year	10 years

JOHN BURNS FCMA CGMA

Chief Finance Officer, Lothian Pension Fund

27 June 2016

Notes to the net asset statement

The financial statements summarise the transactions of the Fund during the year and its net assets at the year end. They do not take account of the obligations to pay pensions and benefits which fall due after the end of the year. The actuarial position of the Fund, which does take account of such obligations, is discussed in the Actuarial Valuation section of this report and these financial statements should be read in conjunction with that information. In addition, as required by International Accounting Standard (IAS)26, the Actuarial Present Value of Promised Retirement Benefits is disclosed in the notes to these financial statements.

Notes to the Accounts

1 Statement of Accounting Policies

The statement of accounting policies for all Funds' can be found on page 112.

2 Prior year adjustment

During the year, the Fund has changed its accounting policy in respect to securities lending revenue that has required the restatement of the 2014/15 results.

Previously securities lending revenue was recognised net of fees, as management charges were deducted at source. The new treatment recognises the gross income from securities lending and impacts both the investment income of the Fund and investment management expenses.

	2014/15 Restated £000	Adjustment £000
Investment income	122,876	472
Investment management expenses	(27,413)	(472)

3 Lothian Pension Fund Group

Basis of consolidation, presentation of financial statements and notes

Commencing with the year ended 31 March 2016, Consolidated Financial Statements have been prepared for Lothian Pension Fund. The Financial Statements of Lothian Buses Pension Fund and Scottish Homes Pension Fund continue to be prepared on a single entity basis.

The Consolidated Financial Statements for Lothian Pension Fund are prepared by combining the Financial Statements of the Fund (the parent entity) and its controlled entity (LPFE Limited) as defined in accounting standard IAS27 - Consolidated and Separate Financial Statements. Consistent accounting policies are employed in the preparation and presentation of the Consolidated Financial Statements. All inter-entity balances and transactions between entities, including any unrealised profits or losses, have been eliminated on consolidation.

Because LPFE limited activities are focussed of the provision of seconded staff, its consolidation has a limited impact on the figures included in the Fund Account and Net Assets Statement of Lothian Pension Fund. An additional column has been added in both the Fund Account and Net Assets Statement, with the figures prior to consolidation being identified as "Parent" and after consolidation as "Group". In the notes to the accounts, where there is a difference between the parent and group figures they are identified as either "Parent " or "Group".

As LPFE Limited commenced trading on 1 May 2015, the prior year comparative figures consist only of the results of Lothian Pension Fund.

Notes to the Accounts

3 Lothian Pension Fund Group (cont)

Notes relevant to LPFE Limited and the consolidation

The following notes provides more information in respect of LPFE Limited:

Note	Description
29	Related parties Describes the loan facility agreement that provides the working capital of the Company and the staff services agreement.
30a	Consolidated Lothian Pension Fund group - LPFE Limited - Corporation Tax utilised by CEC group Describes the tax loss of the Company utilised by another member of the City of Edinburgh Corporation Tax Group. The tax loss of the Company is transferred to another company in the Tax Group in exchange for a cash amount.
30b	Consolidated Lothian Pension Fund group - LPFE Limited - deferred tax Describes the deferred tax non-current asset of the Company. See 2 f) ii) in the Statement of Accounting Policies and General notes for more information.
30c	Consolidated Lothian Pension Fund group - LPFE Limited - share capital Describes the share capital of the Company.
31	Retirement benefits obligation - group Provides the information on the retirement benefits obligation of the Company as required under IAS19 - Employee Benefits. See 2 q) ii) in the Statement of Accounting Policies and General notes for more information.

4 Events after the Reporting Date

There have been no events since 31 March 2016, and up to the date when these accounts were authorised, that require any adjustments to these accounts.

5 Contributions from employers

The total contributions receivable for the administering authority, other scheduled bodies and admitted bodies were as follows:-

By category	2014/15 £000	2015/16 £000
Future service rate	111,692	133,035
Past service deficit	24,698	7,357
Strain costs	5,131	9,984
Cessation contributions	916	9,496
	142,437	159,872

By employer type		
Administering Authority	55,795	63,459
Other Scheduled Bodies	67,980	77,198
Community Admission Bodies	18,411	18,784
Transferee Admission Bodies	251	431
	142,437	159,872

Notes to the Accounts

5 Contributions from employers (cont)

Employer contributions, as calculated by the Fund Actuary, comprise two elements:

- An estimate of the cost of benefits accruing in the future, referred to as the "future service rate", which is expressed as a percentage of payroll and;
- an adjustment for the solvency of the Fund based on the benefits already accrued. If there is a surplus, there may be a contribution reduction; if there is a deficit there may be a contribution increase. For all employers, contributions to cover any Past Service Deficit are expressed as a fixed monetary sum, rather than as a percentage of payroll and are payable on a monthly basis that is one twelfth of the annual total.

Where an employer makes certain decisions which result in benefits being paid early, this results in a "strain" on the Fund. The resulting pension strain costs are calculated and recharged in full to that employer.

Any employer that ceases to have at least one actively contributing member is required to pay a cessation contribution.

6 Contributions from members

By employer type	2014/15 £000	2015/16 £000
Administering Authority	16,544	16,389
Other Scheduled Bodies	19,751	20,226
Community Admission Bodies	5,988	6,074
Transferee Admission Bodies	60	111
	42,343	42,800

7 Transfers in from other pension schemes

	2014/15 £000	2015/16 £000
Group transfers	703	-
Individual transfers	5,749	2,780

By employer type	2014/15 £000	2015/16 £000
Administering Authority	60,636	65,447
Other Scheduled Bodies	56,688	56,115
Community Admission Bodies	11,234	11,902
Transferee Admission Bodies	143	160
	128,701	133,624

Notes to the Accounts

8 Pensions payable (cont)

Local Government (Discretionary Payments and Injury Benefits) (Scotland) Regulations 1998 [Section 31] allows employers to pay additional pensions on a voluntary basis.

As is typical within the Local Government Pension Schemes (LGPS), arrangements exist whereby additional teachers pensions and employee pensions are paid with the payment of funded pensions. In order that such are not regarded as “unauthorised payments” by HMRC these pension payments are met by the administering authority through a general fund bank account and recharged to the body or service which granted the benefits.

As “unfunded payments” are discretionary benefits, they are not relevant to the sums disclosed in the Fund accounts. As such Lothian Pension Fund provides payment and billing services to certain employers on a no charge agency agreement basis.

9 Lump sum retirement benefits payable

By employer type	2014/15 £000	2015/16 £000
Administering Authority	12,330	27,160

Corporation tax losses utilised by CEC group - see note 30a	-	-	-
	1,780	1,743	1,766

The Investment and Pensions Division of the Council is responsible for administering the three pension Funds. The Division receives an allocation of the overheads of the Council. In turn the Division allocates administration and investment costs to the three pension funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated on a defined basis. Other costs are allocated on the basis of the number of members in each pension fund.

12b Investment management expenses

	LPF 2014/15 £000	LPF Parent 2015/16 £000	LPF Group 2015/16 £000
External management fees -			
invoiced	7,113	7,123	7,123
deducted from capital (direct investment)	9,519	15,603	15,603

Custody fees	375	304	304
Engagement and voting fees	71	76	76
Performance measurement fees	50	46	46
Consultancy fees	70	78	78
System costs	141	185	185
Legal fees	107	103	103
The City of Edinburgh Council - other support costs	161	124	124
Depreciation	-	7	7
Office costs	57	71	71
Sundry costs less sundry income	62	34	34
IAS19 retirement benefit adjustments - see note 31	-	-	153
Deferred tax on retirement benefit obligation - see note 30b	-	-	(30)
Corporation tax losses utilised by CEC group - see note 30a	-	-	(5)
	27,413	34,400	34,520

Notes to the Accounts

12b Investment management expenses (cont)

Investment costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated based on the value of the Funds as at the year end.

Any indirect costs incurred through the bid-offer spread on some pooled investment vehicles are reflected in the cost of investment acquisitions or in the proceeds of investment sales (see note 15 - Reconciliation of movements in investments and derivatives).

It should be noted that Lothian Pension Funds disclosure on investment management fees goes further than CIPFA's LGPS Management Cost revised guidance on cost transparency. Consistent with previous years, the Fund recognises fees deducted from investments not within its direct control (such as fund of fund fees) to give a full picture of its investment management costs. Further details can be found on page 16. This further disclosure highlights an extra £6.8m in costs (2015 £5.8m)

The external investment management fees (deducted from capital) above include £12m (£7.9m direct, £4.1m indirect) in respect of performance-related fees. (2014/15 £2.3m direct, £3.0m indirect).

12c Total management expenses

	LPF 2014/15 £000	LPF Parent 2015/16 £000	LPF Group Group 2015/16 £000
Administrative costs	1,550	1,570	1,582
Investment management expenses	25,951	32,814	32,900
Oversight and governance costs	1,692	1,759	1,804
	29,193	36,143	36,286

In accordance with CIPFA, the above analysis looks at the combined administration and investment management expenses in note 12a and b and splits out the costs to include a third heading covering oversight and governance expenditure.

13 Investment income

	2014/15 £000	2015/16 £000
Income from fixed interest securities	4,857	3,898
Dividends from equities	88,527	94,637
Unquoted private equity and infrastructure	7,924	13,581
Income from pooled investment vehicles	861	1,026
Gross rents from properties	18,754	20,914
Interest on cash deposits	1,130	1,237
Stock lending and sundries	2,933	1,142
	124,986	136,435
Irrecoverable withholding tax	(2,110)	(2,322)
	122,876	134,113

-	(13,183)
Net forward currency contracts at 31 March 2016	(13,183)

Prior year comparative

Open forward currency contracts at 31 March 2015

29,879	(79)
Net forward currency contracts at 31 March 2015	29,800

The above table summarises the contracts held by maturity date, all contracts are traded on an over-the-counter basis.

In order to maintain appropriate diversification of investments in the portfolio and take advantage of wider opportunities, the Lothian Pension Fund invests over half of the fund in overseas markets. A currency hedging programme, using forward foreign exchange contracts, has been put in place to reduce the extent to which the Fund is exposed to certain currency movements.

Over the last two years no single investment represented more than 5% of the net assets of the Fund.

19 Securities lending

During the year Lothian Pension Fund participated in a securities lending arrangement with the Northern Trust Company. As at 31 March 2016, £49.8m (2015 £92.1m) of securities were released to third parties. Collateral valued at 107.6% (2015 107.1%) of the market value of the securities on loan was held at that date.

Notes to the Accounts

20 Property holdings

	2014/15 £000	2015/16 £000
Opening balance	270,753	316,169
Additions	11,375	25,153
Disposals	(2,143)	(2,295)
Net change in market value	36,184	17,253
Closing balance	316,169	356,280

As at 31 March 2016, there were no restrictions on the realisability of the property or the remittance of income or sale proceeds. The Fund is not under any contractual obligations to purchase or construct any of these properties. However, at year end the Fund was due the final payment to the developer of Waterfront North Leisure Park, Walsall. This totalled £3.3m and was settled in April 2016. The Fund also has the responsibility of repairs and maintenance on any properties that are unlet.

The future minimum lease payments receivable by the Fund are as follows

	2014/15 £000	2015/16 £000
Within one year	19,140	22,018
Between one and five years	65,238	67,158
Later than five years	103,665	94,517
	188,043	183,693

21 Financial Instruments

21a Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the fair value amounts of financial assets and liabilities by category and net assets statement heading. No financial assets were reclassified during the accounting period.

All financial instruments are marked to market (at fair value) in the Fund's accounting records hence there is no difference between the carrying value and fair value.

21c Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities and unit trusts.

Quoted investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Notes to the Accounts

21c Valuation of financial instruments carried at fair value

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investments in unquoted private equity, infrastructure, timber and European real estate are based on valuations provided by the general partners to the funds in which the Fund has invested.

These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of International Financial Reporting Standards (IFRS). The valuations are typically undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

22 Nature and extent of risk arising from financial instruments

Risk and risk management

The Fund's primary aim is to ensure that all members and their dependants receive their benefits when they become payable. The investment strategy aims to maximise the returns from investments within reasonable risk parameters and hence minimise the long-term cost to employers. The Fund achieves this by investing in a diverse range of assets to reduce risk to an acceptable level. In addition, the Fund ensures that sufficient cash is available to meet all liabilities when they are due to be paid.

Responsibility for the Fund's overall investment strategy rests with the Pensions Committee. The Investment Strategy Panel and the internal investment team monitor investment risks on a regular basis. Investment risk management tools are used to identify and analyse risks faced by the Fund's investments.

Consideration of the Fund's investment risk is part of the overall risk management of the pensions operations. Risks are reviewed regularly to reflect changes in activity and market conditions.

Types of investment risk

There are various ways of considering investment risks for pension funds. For the purposes of this note, market risk is the potential for an investor to experience losses from falls in the prices of investments. All financial instruments, including cash deposits, present a risk of loss of capital and risks vary depending on different asset classes.

Market risk also changes over time as economic conditions and investor sentiment change. The Fund considers overall fluctuations in prices arising from a variety of sources: market risk, foreign exchange risk, interest rate risk, credit risk, etc. The different risks may, to some extent, offset each other.

The overall market risk of the Fund depends on the actual mix of assets and encompasses all the different elements of risk.

Notes to the Accounts

22 Nature and extent of risk arising from financial instruments (cont)

The Fund manages these risks in a number of ways:

- assessing and establishing acceptable levels of market risk when setting overall investment strategy. Importantly, risk is considered relative to the liabilities of the Fund
- diversification of investments in terms of type of asset, investment styles, investment managers, geographical and industry sectors as well as individual securities
- taking stewardship responsibilities seriously and pursuing constructive engagement with the companies in which we invest
- monitoring market risk and market conditions to ensure risk remains within tolerable levels
- using equity futures contracts from time to time to manage market risk. Exchange traded options are not used by the Fund.

Sensitivity analysis

Asset prices have a tendency to fluctuate. The degree of such fluctuation is known as “volatility” and it differs by asset class. The table sets out the long-term volatility assumptions used in the Fund’s asset-liability modelling undertaken by the Fund’s investment adviser KPMG:

Asset type	Potential price movement (+ or -)
Equities - Developed Markets	20.5%
Equities - Emerging Markets	30.0%
Private Equity	30.0%
Timber and Gold	18.0%
Secured Loans	14.0%
Fixed Interest Gilts	6.7%
Index-Linked Gilts	10.8%
Infrastructure	18.0%
Property	13.0%
Cash	1.1%

Volatility is the standard deviation of annual returns. Broadly speaking, in two years out of three, the asset’s change in value (which could be a gain or a loss) is expected to be lower than the volatility figure, but in one year out of three, the change in value is expected to be higher than the volatility figure.

Asset classes do not always move in line with each other. The extent to which assets move together is known as their “correlation”. A lower correlation means that there is less risk of assets losing value at the same time.

The overall Fund benefits from “diversification” because it invests in different asset classes, which don’t all move in line with each other. Consequently, the aggregate risk at the Fund level is less than the total risk from all the individual assets in which the Fund invests. The following table shows the risks at the asset class level and the overall Fund level, with and without allowance for correlation.

Notes to the Accounts

22 Nature and extent of risk arising from financial instruments (cont)

	Value at 31 March 2016 £m	% of fund %	Potential Change +/- %	Value on increase £m	Value on decrease £m
Equities - Developed Markets	3,161	58.6	20.5	3,809.0	2,513.0
Equities - Emerging Markets	238	4.4	30.0	309.4	166.6
Private Equity	226	4.2	30.0	293.8	158.2
Timber and Gold	142	2.6	18.0	167.6	116.4
Secured Loan	52	1.0	14.0	59.3	44.7
Fixed Interest Gilts	134	2.5	6.7	143.0	125.0
Index-Linked Gilts	402	7.4	10.8	445.4	358.6
Infrastructure	414	7.7	18.0	488.5	339.5
Property	472	8.7	13.0	533.4	410.6
Cash and forward foreign exchange	158	2.9	1.1	159.7	156.3
Total [1]	5,399	100.0	18.7	6,409.1	4,388.9
Total [2]			15.7	6,246.6	4,551.4
Total [3]			15.7	6,246.6	n/a

[1] No allowance for correlations between assets

[2] Including allowance for correlations between assets

[3] Including allowance for correlation between assets and liabilities.

The value on increase/decrease columns illustrate the monetary effect of the percentage change in the volatility column. The actual annual change in value is expected to be lower than this in two years out of three, but higher in one year out of three.

It can be seen that the risk to the overall Fund assets [2] is lower than the total of the risks to the individual assets.

However, because the purpose of a pension scheme is to make payments to scheme beneficiaries, the true risk of a pension scheme is not measured in absolute terms, but relative to its liabilities [3].

This risk analysis incorporates volatility from market, interest rate, foreign exchange, credit, and all other sources of risk, and, importantly, makes allowance for how these risks may offset each other.

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit risk in their pricing and consequently the risk of loss is implicitly provided for in the value of the Fund's assets and liabilities (as outlined in Market Risk above).

In essence, the Fund's entire investment portfolio is exposed to some sort of credit risk. However, through the selection of counterparties, brokers and financial institutions the Fund reduces the credit risk that may occur through the failure to settle a transaction in a timely manner.

Cash deposits, derivatives and securities lending are the major areas of credit exposure where credit risk is not reflected in market prices.

Notes to the Accounts

22 Nature and extent of risk arising from financial instruments (cont)

Cash deposits

At 31 March 2016, cash deposits represented £268.7m, 4.94% of total net assets. This was held with the following institutions:

	Moody's Credit Rating at 31 March 2016	Balances at 31 March 2015 £000	Balances at 31 March 2016 £000
Held for investment purposes			
Northern Trust Global Investment Limited - liquidity funds	Aaa-mf	100,507	78,223
Northern Trust Company - cash deposits	Aa2	76,374	66,450
The City of Edinburgh Council - treasury management	See below	223,616	82,736
Total investment cash		400,497	227,409
Held for other purposes			
The City of Edinburgh Council - treasury management	See below	36,350	41,327

Cash held by LPFE Limited			
Royal Bank of Scotland	A3	-	4
Total cash - group		436,847	268,736

The majority of Sterling cash deposits of the Fund are managed along with those of the administering authority (the City of Edinburgh Council) and other related organisations which are pooled for investment purposes as a treasury cash fund. Management of the cash fund is on a low risk basis, with security of the investments the key consideration.

	Moody's Credit Rating at 31 March 2016	Balances at 31 March 2015 £000	Balances at 31 March 2016 £000
Money market funds			
Deutsche Bank AG, London	Aaa-mf	38,167	117

Other Local Authorities [1]	Aa1	-	24,726
UK Government Treasury Bills	Aa1	6,717	56,263
		259,966	124,063

[1] Very few Local Authorities have their own credit rating but they are generally assumed to have a pseudo-sovereign credit rating (which in the UK at 31 March 2016 was 'Aa1').

Notes to the Accounts

22 Nature and extent of risk arising from financial instruments (cont)

The Council has in place institutional restrictions on investments and counterparty criteria. These include -

- (a) UK Government and other UK local Authorities with no limit, other public bodies up to £20 million per organisation.
- (b) Money market funds (MMFs) no more than £30 million or 15% with any one Fund.
- (c) Financial Institutions: Banks and Building Societies with multiple criteria based on a range of short and long term credit ratings, as well as any security, provided from maximum of £60 million / 20% of assets under management (AUM) for institutions with the highest criteria to £10 million / 5% of AUM for institutions with the lowest acceptable criteria.

No breaches of the Council's counterparty criteria occurred during the reporting period and the Fund does not expect any losses from non-performance by any of its counterparties in relation to deposits.

Securities lending

The Fund participates in a securities lending programme as described above. The Fund is potentially exposed to credit risk in the event of the borrower of securities defaults. This risk is mitigated by the contractual commitment that borrowers provide collateral in excess of 100% of the value of the securities borrowed. In addition, Northern Trust has signed an agreement requiring it to make good any losses arising from the lending programme.

Derivatives

The Fund transacts foreign currency derivatives over-the-counter and hence is exposed to credit risk in the event of a counterparty defaulting on the net payment or receipt that remains outstanding. This risk is minimised by the use of counterparties that are recognised financial intermediaries with acceptable credit ratings and by netting agreements. At 31 March 2016, the Fund owed £13.2m on over-the-counter foreign currency derivatives.

Refinancing risk

Refinancing risk is the risk that the Fund will be bound to replenish a significant proportion of its pension fund financial instruments at a time of unfavourable interest rates. The Fund is not bound by any obligation to replenish its investments and hence is not exposed to refinancing risk.

Liquidity risk

Liquidity risk reflects the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore ensures that there is adequate cash and liquid resources to meet its commitments. Cash flow projections are prepared on a regular basis to understand and manage the timing of the Fund's cash flows.

The majority (estimated to be approximately 79%) of the Fund's investments could be converted to cash within three months in a normal trading environment.

23 Actuarial statement

The Scheme Actuary has provided a statement describing the funding arrangements of the Fund. This can be found at the end of this section.

24 Actuarial present value of promised retirement benefits

The actuarial value of promised retirement benefits at the accounting date, calculated in line with International Accounting Standard 19 (IAS19) assumptions, is estimated to be £6,266m (2015 £6,663m). This figure is used for statutory accounting purposes by Lothian Pension Fund and complies with the requirements of IAS26. The assumptions underlying the figure match those adopted for the Administering Authority's FRS17/IAS19 reports at each year end.

Notes to the Accounts

24 Actuarial present value of promised retirement benefits (cont)

The figure is only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

	31 March 2015 % p.a.	31 March 2016 % p.a.
Inflation / pensions increase rate	2.4	2.2
Salary increase rate*	4.3	4.2
Discount rate	3.2	3.5

Longevity assumptions

The life expectancy assumption is based on Fund specific statistical analysis with improvements in line with the CMI 2012 model, assuming that the current rate of improvements has reached a peak and will converge to a long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies, in years, at age 65 are summarised below:

	31 March 2015		31 March 2016	
	Males	Females	Males	Females
Current pensioners	22.1 years	23.7 years	22.1 years	23.7 years
Future pensioners (assumed to be currently 45)	24.2 years	26.3 years	24.2 years	26.3 years

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2009 service and 75% of the maximum tax-free cash for post-April 2009 service.

28 Additional Voluntary Contributions

Active members of the Lothian Pension Fund have the option to pay additional voluntary contributions (AVCs). These AVCs are invested separately from the main funds, securing additional benefits on a money purchase basis for those members that have elected to contribute. The investment of the AVCs is managed by Standard Life and Prudential.

In accordance with regulation 4 (2) (b) of the Local Government Pension Scheme (Management and Investment of Funds) (Scotland) Regulations 2010, AVCs are not included in the pension fund financial statements.

Total contributions during year for Lothian Pension fund	2014/15 £000	2015/16 £000
Standard Life	404	395
Prudential	1,369	1,593
	1,773	1,988

Total value at year end for Lothian Pension Fund	31 March 2015 £000	31 March 2016 £000
Standard Life	6,342	5,665
Prudential	3,158	3,863
	9,500	9,528

29 Related parties

The City of Edinburgh Council

The Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund are administered by the City of Edinburgh Council. Consequently there is a strong relationship between the Council and the Pension Funds.

The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council, based on the amount of central services consumed. In turn, the Division allocates its costs to the three Pension Funds. Costs directly attributable to a specific Fund are charged to the relevant Fund; costs that are common to all three Funds are allocated on a defined basis.

Notes to the Accounts

29 Related parties (cont)

The Council is also the single largest employer of members of the Fund and contributed £63.5m to the Fund during the year (2014/15 £55.8m).

Transactions between the Council and the Fund are managed via a holding account. Each month the Fund is paid a cash sum leaving a working balance in the account to cover the month's pension payroll costs and other expected costs.

	31 March 2015 £000	31 March 2016 £000
Year end balance of holding account	6,352	4,287
	6,352	4,287

Part of the Fund's cash holdings are invested on the money markets by the treasury management operations of the Council, through a service level agreement. During the year to 31 March 2016, the fund had an average investment balance of £219.0m (2014/15 £204.1m). Interest earned was £1,032.5k (2014/15 £950.3k).

Year end balance on treasury management account	31 March 2015 £000	31 March 2016 £000

Held for other purposes	36,350	41,327
	259,966	124,063

Office accommodation - 144 Morrison Street, Edinburgh

Investment and Pensions Division of the Council entered into an internal agreement with the Council for the provision of office accommodation at 144 Morrison Street in Edinburgh. The terms of the agreement are equivalent to those that would have been obtained had the accommodation been let on a commercial basis. In the accounts of the Fund the arrangement has been treated as a operational lease. The Investment and Pensions Division is committed to making the following future payments. City of Edinburgh Council sold the property on 31 March 2016, the lease with the new landlord is on the same terms as the internal agreement.

	31 March 2015 £000	31 March 2016 £000
Within one year	-	42
Between one and five years	272	345
After five years	1,379	992
	1,651	1,379
Recognised as an expense during the year	91	92

The above expense has been allocated across the three Funds, Lothian Pension Fund's share is £84.9k.

Governance

As at 31 March 2016, all members of the Pensions Committee, with the exception of Councillor Bill Cook and Richard Lamont, and all members of the Pensions Board, with the exception of Graham Turnbull, were active members of the Lothian Pension Fund or Lothian Buses Pension Fund.

Each member of the Pensions Committee and Pensions Board is required to declare any financial and non-financial interests they have in the items of business for consideration at each meeting, identifying the relevant agenda item and the nature of their interest.

Notes to the Accounts

29 Related parties (cont)

During the period from 1 April 2015 to the date of issuing of these accounts, a number of employees of the City of Edinburgh Council and its wholly owned subsidiary, LPFE Limited, held key positions in the financial management of the Lothian Pension Fund. With effect from 1 May 2015, all the employees listed below, with the exception of the Executive Director of Resources, were employed by LPFE Limited. These employees and their financial relationship with the Fund (expressed as cash-equivalent transfer values or CETV) are set out below:

Name	Position held	Accrued CETV as at 31 March 2015	Accrued CETV as at 31 March 2016
		£000	£000
Hugh Dunn*	Acting Executive Director of Resources	734	755
Clare Scott	Chief Executive, Lothian Pension Fund	147	175
Bruce Miller	Chief Investment Officer, Lothian Pension Fund	139	185
Struan Fairbairn	Chief Legal & Risk Officer, Lothian Pension Fund	19	30
John Burns	Chief Finance Officer, Lothian Pension Fund	426	474
Esmond Hamilton	Financial Controller	138	161

* Also disclosed in the financial statements of the City of Edinburgh Council.

There is no need to produce a remuneration report for 2015/16, as the Pension Fund did not directly employ any staff.

Staff are either employed by City of Edinburgh Council or LPFE Ltd, and their costs reimbursed by the Pension Fund. The Councillors, who are members of the Pensions Committee, are also remunerated by City of Edinburgh Council.

LPFE Limited - loan facility

LPFE Limited is wholly owned by the City of Edinburgh Council and has entered into a shareholder agreement with the Council to address governance matters. The company has a loan facility agreement with the City of Edinburgh Council for the purpose of the provision of short term working capital. The current agreement covers the period to 1 May 2020 and provides that interest is payable at 2% above the Royal Bank of Scotland base lending rate on the daily balance. In order to minimise the amount of interest payable, the company returns any cash not immediately required and this can result in short periods when the company has returned more cash than has been drawn. On such days the loan interest is negative, reducing the amount of interest payable.

Interest payable during the period was £968, of which £194 was due at the year end. At 31 March 2016, the balance on the loan facility was £6,157 due to LPFE Limited.

LPFE Limited - staffing services

Staffing services are provided to Lothian Pension Fund for the purposes of administering the Funds under an intra-group resourcing agreement. The agreement also provides for the running costs of the company to be covered as part of a service charge and anticipates the provision of staffing services to LPFI Limited (also wholly owned by the City of Edinburgh Council) on that entity beginning to trade. During the year to 31 March 2016, the Fund was invoiced £820k for the services of LPFE Limited staff, £92k of this remained payable at year end.

One ordinary share of £1 was issued to Lothian Pension Fund at par value on incorporation. Due to the low value this does not show on the Net Assets Statement.

Notes to the Accounts

31 Retirement benefits obligation - group

The retirement benefit obligation described in this note relates only to the employees of LPFE Limited. This is because obligation in respect of the staff employed by the City of Edinburgh Council is disclosed in the City of Edinburgh Council's Financial Statements.

On 1 May 2015 LPFE Limited commenced trading and its staff transferred their employment from the City of Edinburgh Council to the Company on that date. On 1 May the Company also entered into appropriate admission arrangements with the City of Edinburgh Council with respect to the transferring individuals continuing to be members of the Lothian Pension Fund and in relation to its obligations as an employer in that Fund.

The present value of the defined benefit obligation, and related current service cost and past service cost, were measured using the Projected Unit Credit Method.

Fund assets

The LPFE Limited's share of the fair value of the Fund's assets which are not intended to be realised in the short term and may be subject to significant change before they are realised, were comprised as follows:

Asset		Fair value at 31	% of total
		March 2016	31 March 2016
		£000	%

Notes to the Accounts

31 Retirement benefits obligation - group (cont)

The assumptions used by the actuary are the best estimates chosen from a range of possible actuarial assumptions which, due to the timescale covered, may not necessarily be borne out in practice. Best estimate has been interpreted to mean that the proposed assumptions are 'neutral' – there is an equal chance of actual experience being better or worse than the assumptions proposed.

The financial assumptions used for reporting in the financial statements are the responsibility of the employer. These assumptions are largely prescribed at any point and reflect market conditions at the reporting date. Changes in market conditions that result in changes in the net discount rate can have a significant effect on the value of the liabilities reported.

A reduction in the net discount rate will increase the assessed value of liabilities as a higher value is placed on benefits paid in the future. A rise in the net discount rate will have an opposite effect of a similar magnitude. There is also uncertainty around life expectancy of the UK population – the value of current and future pension benefits will depend on how long they are assumed to be in payment.

Life expectancy is based on Fund specific statistical analysis with improvements in line with the CMI 2012 model assuming current rates of improvements have peaked and will converge to a long term rate of 1.25% p.a.

	31 March 2016	
	Males	Females
Current pensioners	22.1 years	23.7 years
Future pensioners	24.2 years	26.3 years

Expected employer contributions to the defined benefit plan for the year ended 31 March 2017 are £132,000, based on a pensionable payroll cost of £646,000.

32 Contractual commitments

The Fund has commitments relating to outstanding call payments due on unquoted funds held in the private equity, timber, property and infrastructure parts of the portfolio. The amounts 'called' by these funds are irregular in both size and timing, taking place over a number of years from the date of each original commitment. The outstanding commitments at the year end are as follows:

	31 March 2015	31 March 2016
	£000	£000
Outstanding investment commitments	146,403	160,891
	146,403	160,891

As disclosed in note 29 on related party transactions the Investment and Pensions Division has a commitment to make future payments equivalent to rent in respect office accommodation at 144 Morrison Street. Details of the future payments are provided in that note.

33 Contingent assets and liabilities

At 31 March 2016 the Fund had entered into negotiations for two infrastructure co-investments in which it is exposed to the potential risk of investment abort costs. At 31 March 2016, Lothian Pension Fund's exposure is approximately £204.6k.

There were no material contingent assets at year end.

Notes to the Accounts

34 Impairment losses

During the year the Fund recognised an increase in impairment losses in respect of specific benefit over payments for which reimbursement has been requested of £14.5k. This increased the impairment to £46.4k at the year end.

Lothian Pension Fund

Actuarial Statement for 2015/16

This statement has been prepared in accordance with Regulation 55(1)(d) of the Local Government Pension Scheme (Scotland) Regulations 2014. It has been prepared at the request of the Administering Authority of the Fund for the purpose of complying with the aforementioned regulation.

Description of Funding Policy

The funding policy is set out in the Administering Authority's Funding Strategy Statement (FSS), dated March 2015. In summary, the key funding principles are as follows:

- To ensure solvency of the Fund;
- to ensure the solvency of each individual employers' share of the Fund based on their expected term of participation in the Fund;
- to minimise the degree of short-term change in employer contribution rates;
- maximise the returns from investments within reasonable and considered risk parameters, and hence minimise the cost to the employer;
- to ensure that sufficient cash is available to meet all liabilities as they fall due for payment;
- to help employers manage their pension liabilities; and
- where practical and cost effective, to make allowance for the different characteristics of different employers and groups of employers.

The FSS sets out how the Administering Authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable.

Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 32 of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008 was as at 31 March 2014. This valuation revealed that the Fund's assets, which at 31 March 2014 were valued at £4,379 million, were sufficient to meet 91% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2014 valuation was £417 million.

Individual employers' contributions for the period 1 April 2015 to 31 March 2018 were set in accordance with the Fund's funding policy as set out in its FSS.

Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the valuation report dated 31 March 2015.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

Lothian Pension Fund

Actuarial Statement for 2015/16

The key financial assumptions adopted for the 2014 valuation were as follows:

Financial assumptions	31 March 2014	
	% p.a. Nominal	% p.a. Real
Discount rate	5.0%	2.3%
Pay increases*	5.0%	2.3%
Price inflation/Pension increases	2.7%	-

*2% p.a. for 2014/15 and 2015/16, reverting to 5.0% thereafter.

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI_2012 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	22.1 years	23.7 years
Future Pensioners *	24.2 years	26.3 years

*Future pensioners are assumed to be at the 2014 valuation aged 45.

Copies of the 2014 valuation report and Funding Strategy Statement are available on request from The City of Edinburgh Council, the Administering Authority to the Fund.

Experience over the period since April 2014

Experience has been worse than expected since the last formal valuation (excluding the effect of any membership movements). Real bond yields have fallen dramatically placing a higher value on liabilities. The effect of this has been only partially offset by the effect of strong asset returns. Funding levels are therefore likely to have worsened and deficits increased over the period.

The next actuarial valuation will be carried out as at 31 March 2017. The Funding Strategy Statement will also be reviewed at that time.

Investment Strategy

Over the course of 2015/16, the implementation of the Investment Strategy 2012-17 continued to proceed at a measured pace as investment opportunities became available and as research on opportunities was completed. Progress towards the long term strategy allocation involved the interim strategy allocation and the actual asset allocation changing gradually over time. The most significant changes to the actual allocation of the Fund over 2015/16 were the reduction in equities from 63% to 60% and the increase in other real assets (primarily infrastructure) from 6% to over 9%.

Following completion of the 2014 actuarial valuation, the Investment Strategy Panel and the Pensions Committee undertook an in depth review of Lothian Buses Pension Fund's investment strategy. The review was supported by asset liability modelling carried out by the Fund's investment adviser. The Panel reviewed developments in pension fund membership, expected cash flow, funding level, investment risk and returns and the employer covenant, the ability and willingness of the employer to pay contributions.

The review highlighted the potential future funding level volatility on the employing company's balance sheet and contributions. It afforded the opportunity to clarify the funding approach for this increasingly mature pension fund (it is closed to new entrants) in the event of the funding level worsening and also at the point when the last active member leaves the Fund. After discussions with the majority shareholder and company, Lothian Buses has agreed to continue paying deficit contributions (if required) after the last active member has left the Fund. With this clarity, the Fund is able to continue to adopt a long-term investment approach.

The Pensions Committee approved a revised Investment Strategy 2016-21 for Lothian Buses Pension Fund in March 2016. The main changes from the previous Investment Strategy are a reduction in equities from 55% to 40%, an increase in index-linked assets from 15% to 20% and the creation of a distinct fixed income asset class with an effective allocation increase from 12% to 22%, to be implemented by the end of 2021.

A significant allocation to equities is retained as they have higher long term return expectations than bonds as equity risk, as measured by short term volatility, is expected to diminish over the long term. Implementation of the strategy will include further de-risking within equities, lengthening the duration of the Fund's bond allocation to provide greater downside protection in the event of further reductions in interest rates (a key driver of liability values) and also investment in suitable fixed income assets.

The long term strategy for 2016-21 is set out in the table below along with the current interim strategy allocations.

	Strategic Allocation 31/03/2016 %	Long term Strategy 2016 - 2021 %
Equities	58.5	40.0
Index Linked Assets	14.0	20.0
Other Real Assets	17.5	18.0
Fixed Income Assets	10.0	22.0
Cash	-	-
Total	100.0	100.0

The investment strategy is now set at the broad asset class level of equities, index-linked assets, other real assets and fixed income assets, the latter two of which had previously been categorised within Alternatives. These broad groupings are the key determinants of investment risk and return. Equities includes listed and unlisted equities; index-linked assets includes index-linked gilts/bonds and gold; other real assets includes property, infrastructure and timber; and fixed income assets includes listed and unlisted debt investments.

Investment performance

The objectives of the Fund are:

- over long-term economic cycles (typically 5 years or more) the achievement of the same return as that generated by the strategic allocation
- over shorter periods, the Fund should perform better than the strategic allocation if markets fall significantly.

The Fund has achieved returns in excess of the strategic allocation over the last year and over the longer timeframes shown in the table below. The benchmark return shown in the table is the strategic allocation and comprises equity, index-linked gilt and cash indices as well as an inflation-linked index for Alternatives investments.

Annualised returns to 31 March 2016 (% per year)	1 year	5 year	10 years
Lothian Buses Pension Fund	3.1	9.6	7.8
Benchmark	1.2	7.8	6.3
Actuarial Valuation Assumptions *	5.0	5.7	5.9
Retail Price Index (RPI)	1.6	2.3	3.0
Consumer Price Index (CPI)	0.5	1.7	2.4
National Average Earnings	1.9	1.6	2.2

*estimate

The strong performance relative to the benchmark over 2015/16 was largely attributable to the global equity portfolios, one internally managed and one externally managed by Baillie Gifford, which together rose in value by 1.4% while the benchmark fell. The Fund's Alternative investments were also a significant contributor, driven primarily by a double digit return from the infrastructure portfolio, which benefited from the purchase of infrastructure assets at attractive valuations.

Returns relative to the benchmark over a one year period need to be placed in the context that there are no ideal benchmarks for many of the assets held in the Fund, especially the Alternatives. The Fund's benchmark for Alternatives is inflation plus 3.5% per annum, which makes sense over the long term as the Fund's liabilities are linked to inflation. However, over shorter periods, there is less information content in the relative returns of the Fund because the development of asset prices is much more volatile than that of UK retail or consumer prices. The Investment Strategy Panel assesses the underlying risks of the portfolios that make up the asset allocation to ensure that these are consistent with the long term objectives of the Fund.

The chart below shows the rolling 5 year performance of the Fund against its strategic benchmark over the last 10 years. The upward sloping line shows that relative returns have been on an improving trend since 2007. It also shows that the Fund has consistently outperformed its benchmark over rolling 5 year periods.

Lothian Buses Pension Fund

Fund Account for year ended 31 March 2016

Restated*			
2014/15		Note	2015/16
£000			£000

JOHN BURNS FCMA CGMA

Chief Finance Officer, Lothian Pension Fund

27 June 2016

Notes to the net asset statement

The financial statements summarise the transactions of the Fund during the year and its net assets at the year end. They do not take account of the obligations to pay pensions and benefits which fall due after the end of the year. The actuarial position of the Fund, which does take account of such obligations, is discussed in the Actuarial Valuation section of this report and these financial statements should be read in conjunction with that information. In addition, as required by IAS26, the Actuarial Present Value of Promised Retirement Benefits is disclosed in the notes to these financial statements.

Notes to the Financial Statements

1 Statement of Accounting Policies

The statement of accounting policies for all three Funds' can be found on page 112.

2 Prior year adjustment

During the year, the Fund has changed its accounting policy in respect to securities lending revenue that has required the restatement of 2014/15 results.

Previously securities lending revenue was recognised net of fees, as management charges were deducted from source. The new treatment recognises the gross income from securities lending revenue that impacts both the investment income of the Fund and the investment management expenses.

	2014/15 Restated £000	Adjustment £000
Investment income	8,426	80
Investment management expenses	(1,400)	(80)

3 Events after the Reporting Date

There have been no events since 31 March 2016, and up to the date when these accounts were authorised, that require any adjustments to these accounts.

4 Contributions from employer

By category	2014/15 £000	2015/16 £000
Normal (ongoing contributions)	7,094	7,425
Deficit contribution	-	-
Strain costs and augmentation contribution	-	113
	7,094	7,538

The Lothian Buses Pension Fund is a single employer pension fund for employees of Lothian Buses Ltd. The Lothian Buses Fund was set up in 1986 under the Local Government Superannuation (Funds) (Scotland) regulations 1986 (SSI 115/1986).

From 2015/16 onwards, no deficit funding was required (as stated in the actuarial valuation of 31 March 2014). The employer contribution rate was 21.7% for the period from 1 April 2015 to 31 December 2015 then 22.9% of pensionable pay for service currently being accrued for the remainder of the financial year.

Where the employer makes certain decisions which result in additional benefits being paid out to a member, or benefits being paid early, this results in a "strain" on the Fund. The resulting pension strain costs are calculated and recharged in full to the employer.

Notes to the Financial Statements

Sundry costs less sundry income	3	2
	112	102

The Investment and Pensions Division of the Council is responsible for administering the three pension Funds. The Division receives an allocation of the overheads of the Council. In turn the Division allocates administration and investment costs to the three pension funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are allocated on a defined basis. Other costs were allocated based on the number of members of each Fund.

6b Investment management expenses	2014/15 £000	2015/16 £000
<u>External management fees -</u>		
invoiced	539	704

Sundry costs less sundry income	5	4
	1,400	1,677

Notes to the Financial Statements

6b Investment management expenses (cont)

Any costs incurred through the bid-offer spread on some pooled investment vehicles are reflected in the cost of investment acquisitions or in the proceeds of investment sales (see note 9 - Reconciliation of movements in investments and derivatives).

It should be noted that Lothian Buses Pension Funds disclosure on investment management fees goes further than CIPFA's LGPS Management Cost revised guidance on cost transparency. Consistent with previous years, the Fund recognises fees deducted from investments not within its direct control (such as fund of fund fees) to give a full picture of its investment management costs. Further details can be found on page 16. This further disclosure highlights an extra £368k in costs (2014/15 £208k)

The external investment management fees above include £0.1m in respect of performance-related fees (2014/15 £0.1m).

6c Total Management expenses

	2014/15 £000	2015/16 £000
Administrative costs	84	80
Investment management expenses*	1,339	1,621
Oversight and governance costs	89	78
	1,512	1,779

* includes £368k (2014/15 £208k) in costs above CIPFA guidance

In accordance with CIPFA, the above analysis looks at the combined administration and investment management expenses in note 6a and b and splits out the costs to include a third heading covering oversight and governance expenditure.

14 Securities lending

During the year Lothian Buses Pension Fund participated in a securities lending arrangement with the Northern Trust Company. As at 31 March 2016, £10.4m (2015 £10.5m) of securities were released to third parties. Collateral valued at 110.26% (2015 106.1%) of the market value of the securities on loan was held at that date.

15 Financial Instruments

15a Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the fair value amounts of financial assets and liabilities by category and net assets statement heading. No financial assets were reclassified during the accounting period.

All financial instruments are marked to market (at fair value) in the Fund's accounting records hence there is no difference between the carrying value and fair value.

Notes to the Financial Statements

15c Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities and unit trusts.

Quoted investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investments in unquoted private debt, infrastructure and timber are based on valuations provided by the general partners to the funds in which the Fund has invested.

These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of International Financial Reporting Standards (IFRS). The valuations are typically undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

16 Nature and extent of risk arising from financial instruments

Risk and risk management

The Fund's primary aim is to ensure that all members and their dependants receive their benefits when they become payable. The investment strategy aims to maximise the returns from investments within reasonable risk parameters and hence minimise the long-term cost to employers. The Fund achieves this by investing in a diverse range of assets to reduce risk to an acceptable level. In addition, the Fund ensures that sufficient cash is available to meet all liabilities when they are due to be paid.

Responsibility for the Fund's overall investment strategy rests with the Pensions Committee. The Investment Strategy Panel and the internal investment team monitor investment risks on a regular basis. Investment risk management tools are used to identify and analyse risks faced by the Fund's investments.

Consideration of the Fund's investment risk is part of the overall risk management of the pensions operations. Risks are reviewed regularly to reflect changes in activity and market conditions.

Notes to the Financial Statements

16 Nature and extent of risk arising from financial instruments (cont)

Types of investment risk

There are various ways of considering investment risks for pension funds. For the purposes of this note, market risk is the potential for an investor to experience losses from falls in the prices of investments. All financial instruments, including cash deposits, present a risk of loss of capital and risks vary depending on different asset classes.

Market risk also changes over time as economic conditions and investor sentiment change. The Fund considers overall fluctuations in prices arising from a variety of sources: market risk, foreign exchange risk, interest rate risk, credit risk, etc. The different risks may, to some extent, offset each other.

The overall market risk of the Fund depends on the actual mix of assets and encompasses all the different elements of risk.

The Fund manages these risks in a number of ways:

- assessing and establishing acceptable levels of market risk when setting overall investment strategy. Importantly, risk is considered relative to the liabilities of the Fund
- diversification of investments in terms of type of asset, investment styles, investment managers, geographical and industry sectors as well as individual securities
- taking stewardship responsibilities seriously and pursuing constructive engagement with the companies in which we invest
- monitoring market risk and market conditions to ensure risk remains within tolerable levels
- using equity futures contracts from time to time to manage market risk. Exchange traded options are not used by the Fund.

Sensitivity analysis

Asset prices have a tendency to fluctuate. The degree of such fluctuation is known as “volatility” and it differs by asset class. The table sets out the long-term volatility assumptions used in the Fund’s asset-liability modelling undertaken by the Fund’s investment adviser KPMG:

Asset type	Potential price movement (+ or -)
Equities - Developed Markets	20.5%
Private Equity	30.0%
Timber and Gold	18.0%
Secured Loans	14.0%
Corporate Bonds	6.0%
Index-Linked Gilts	10.8%
Infrastructure	18.0%
Property	13.0%
Cash	1.1%

Volatility is the standard deviation of annual returns. Broadly speaking, in two years out of three, the asset’s change in value (which could be a gain or a loss) is expected to be lower than the volatility figure, but in one year out of three, the change in value is expected to be higher than the volatility figure.

Notes to the Financial Statements

16 Nature and extent of risk arising from financial instruments (cont)

Asset classes do not always move in line with each other. The extent to which assets move together is known as their “correlation”. A lower correlation means that there is less risk of assets losing value at the same time.

The overall Fund benefits from “diversification” because it invests in different asset classes, which don’t all move in line with each other. Consequently, the aggregate risk at the Fund level is less than the total risk from all the individual assets in which the Fund invests. The following table shows the risks at the asset class level and the overall Fund level, with and without allowance for correlation.

	Value at 31 March 2016 £000	% of fund %	Potential Change +/- %	Value on increase £000	Value on decrease £000
Equities - Developed Markets	229,399	58.7	20.5	276,426	182,372
Private Equity	4,659	1.2	30.0	6,057	3,261
Timber and Gold	8,023	2.1	18.0	9,467	6,579
Secured Loan	2,859	0.7	14.0	3,259	2,459
Corporate Bonds	27,221	7.0	6.0	28,854	25,588
Index-Linked Gilts	48,097	12.3	10.8	53,291	42,903
Infrastructure	24,667	6.3	18.0	29,107	20,227
Property	37,491	9.6	13.0	42,365	32,617
Cash and forward foreign exchange	8,372	2.1	1.1	8,464	8,280
Total [1]	390,788	100.0	17.0	457,290	324,286
Total [2]			14.1	446,083	335,493
Total [3]			14.2	446,344	n/a

[1] No allowance for correlations between assets

[2] Including allowance for correlations between assets

[3] Including allowance for correlation between assets and liabilities.

The value on increase/decrease columns illustrate the monetary effect of the percentage change in the volatility column. The actual annual change in value is expected to be lower than this in two years out of three, but higher in one year out of three.

It can be seen that the risk to the overall Fund assets [2] is lower than the total of the risks to the individual assets.

However, because the purpose of a pension scheme is to make payments to scheme beneficiaries, the true risk of a pension scheme is not measured in absolute terms, but relative to its liabilities [3].

This risk analysis incorporates volatility from market, interest rate, foreign exchange, credit, and all other sources of risk, and, importantly, makes allowance for how these risks may offset each other.

Notes to the Financial Statements

16 Nature and extent of risk arising from financial instruments (cont)

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit risk in their pricing and consequently the risk of loss is implicitly provided for in the value of the Fund's assets and liabilities (as outlined in Market Risk above).

In essence, the Fund's entire investment portfolio is exposed to some sort of credit risk. However, through the selection of counterparties, brokers and financial institutions the Fund reduces the credit risk that may occur through the failure to settle a transaction in a timely manner.

Cash deposits, derivatives and securities lending are the major areas of credit exposure where credit risk is not reflected in market prices.

Cash deposits

At 31 March 2016, cash deposits represented £14.2m, 3.6% of total net assets. This was held with the following institutions:

	Moody's Credit Rating at 31 March 2016	Balances at 31 March 2015 £000	Balances at 31 March 2016 £000
Held for investment purposes			
Northern Trust Global Investment Limited - liquidity funds	Aaa-mf	3,285	2,384
Northern Trust Company - cash deposits	Aa2	3,903	8,509
The City of Edinburgh Council - treasury management	See below	11,986	918
Total investment cash		19,174	11,811
Held for other purposes			
The City of Edinburgh Council - treasury management	See below	2,026	2,867
Total cash		21,200	14,678

The majority of Sterling cash deposits of the Fund are managed along with those of the administering authority (the City of Edinburgh Council) and other related organisations which are pooled for investment purposes as a treasury cash fund. Management of the cash fund is on a low risk basis, with security of the investments the key consideration.

The Council has in place institutional restrictions on investments and counterparty criteria. These include -

- UK Government and other UK local Authorities with no limit, other public bodies up to £20 million per organisation.
- Money market funds (MMFs) no more than £30 million or 15% with any one Fund.
- Financial Institutions: Banks and Building Societies with multiple criteria based on a range of short and long term credit ratings, as well as any security provided, from maximum of £60 million / 20% of assets under management (AUM) for institutions with the highest criteria to £10 million / 5% of AUM for institutions with the lowest acceptable criteria.

Notes to the Financial Statements

16 Nature and extent of risk arising from financial instruments (cont)

	Moody's Credit Rating at 31 March 2016	Balances at 31 March 2015 £000	Balances at 31 March 2016 £000
Money market funds			
Deutsche Bank AG, London	Aaa-mf	2,057	505

Nationwide Building Society	A1	362	-
UK Pseudo-Sovereign risk instruments			
Other Local Authorities [1]	Aa1	-	1,717
UK Government Treasury Bills	Aa1	362	754
		14,012	3,785

[1] Very few Local Authorities have their own credit rating but they are generally assumed to have a pseudo-sovereign credit rating (which in the UK at 31 March 2016 was 'Aa1').

No breaches of the Council's counterparty criteria occurred during the reporting period and the Fund does not expect any losses from non-performance by any of its counterparties in relation to deposits.

Securities lending

The Fund participates in a securities lending programme as described above. The Fund is potentially exposed to credit risk in the event of the borrower of securities defaults. This risk is mitigated by the contractual commitment that borrowers provide collateral in excess of 100% of the value of the securities borrowed. In addition, Northern Trust has signed an agreement requiring it to make good any losses arising from the lending programme.

Derivatives

The Fund transacts foreign currency derivatives over-the-counter and hence is exposed to credit risk in the event of a counterparty defaulting on the net payment or receipt that remains outstanding. This risk is minimised by the use of counterparties that are recognised financial intermediaries with acceptable credit ratings and by netting agreements. At 31 March 2016, the Fund was owed £32k on over-the-counter foreign currency derivatives.

Refinancing risk

Refinancing risk is the risk that the Fund will be bound to replenish a significant proportion of its pension fund financial instruments at a time of unfavourable interest rates. The Fund is not bound by any obligation to replenish its investments and hence is not exposed to refinancing risk.

Notes to the Financial Statements

16 Nature and extent of risk arising from financial instruments (cont)

Liquidity risk

Liquidity risk reflects the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore ensures that there is adequate cash and liquid resources to meet its commitments. Cash flow projections are prepared on a regular basis to understand and manage the timing of the Fund's cash flows.

The majority (estimated to be approximately 83%) of the Fund's investments could be converted to cash within three months in a normal trading environment.

17 Actuarial statement

The Scheme Actuary has provided a statement describing the funding arrangements of the Fund. This can be found at the end of this section.

18 Actuarial present value of promised retirement benefits

The actuarial value of promised retirement benefits at the accounting date, calculated in line with International Accounting Standard 19 (IAS19) assumptions, is estimated to be £374m (2015 £400m). This figure is used for statutory accounting purposes by Lothian Pension Fund and complies with the requirements of IAS26. The assumptions underlying the figure match those adopted for the Administering Authority's FRS17/IAS19 reports at each year end.

The figure is only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

Financial assumptions	31 March 2015	31 March 2016
	% p.a.	% p.a.
Inflation/pensions increase rate	2.4	2.2
Salary increase rate	4.3	4.2
Discount rate	3.2	3.5

Longevity assumptions

The life expectancy assumption is based on Fund specific statistical analysis with improvements in line with the CMI 2012 model, assuming that the current rate of improvements has reached a peak and will converge to a long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies, in years, at age 65 are summarised below:

	31 March 2015		31 March 2016	
	Males	Females	Males	Females
Current pensioners	20.4 years	22.6 years	20.4 years	22.9 years
Future pensioners (assumed to be currently 45)	23.5 years	25.9 years	23.5 years	25.9 years

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2009 service and 75% of the maximum tax-free cash for post-April 2009 service.

21 Additional Voluntary Contributions

Active members of the Lothian Buses Pension Fund have the option to pay additional voluntary contributions (AVCs). These AVCs are invested separately from the main funds, securing additional benefits on a money purchase basis for those members that have elected to contribute. The investment of the AVCs is managed by Standard Life and Prudential.

In accordance with regulation 4 (2) (b) of the Local Government Pension Scheme (Management and Investment of Funds) (Scotland) Regulations 2010, AVCs are not included in the pension fund financial statements.

Notes to the Financial Statements

Prudential	251	315
	418	485

22 Related party transactions

The City of Edinburgh Council

The Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund are administered by the City of Edinburgh Council. Consequently there is a strong relationship between the Council and the Pension Funds.

The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council, based on the amount of central services consumed. In turn, the Division allocates its costs to the three Pension Funds. Costs directly attributable to a specific Fund are charged to the relevant Fund; costs that are common to all three Funds are allocated on a defined basis.

Transactions between the Council and the Fund are managed via a holding account. Each month the Fund is paid a cash sum leaving a working balance in the account to cover the month's pension payroll costs and other expected costs.

	31 March 2015 £000	31 March 2016 £000
Year end balance of holding account	1,113	400
	1,113	400

Part of the Fund's cash holdings are invested on the money markets by the treasury management operations of the Council, through a service level agreement. During the year to 31 March 2016, the fund had an average investment balance of £9.5m (2015 £6.8m). Interest earned was £12.2k (2015 £31k).

Year end balance on treasury management account	31 March 2015 £000	31 March 2016 £000
Held for investment purposes	11,986	918
Held for other purposes	2,026	2,867
	14,012	3,785

Notes to the Financial Statements

22 Related party transactions (cont)

Office accommodation - 144 Morrison Street, Edinburgh

Investment and Pensions Division of the Council entered into an internal agreement with the Council for the provision of office accommodation at 144 Morrison Street in Edinburgh. The terms of the agreement are equivalent to those that would have been obtained had the accommodation been let on a commercial basis. In the accounts of the Fund the arrangement has been treated as a operational lease. The Investment and Pensions Division is committed to making the following future payments. City of Edinburgh Council sold the property on 31 March 2016, the lease with the new landlord is on the same terms as the internal agreement.

	31 March 2015 £000	31 March 2016 £000
Within one year	-	42
Between one and five years	272	345
After five years	1,379	992
	1,651	1,379
Recognised as an expense during the year	91	92

The above expense has been allocated across the three Funds, Lothian Buses Pension Fund's share is £2.7k.

Governance

As at 31 March 2016, all members of the Pensions Committee, with the exception of Councillor Bill Cook and Richard Lamont, and all members of the Pensions Board, with the exception of Graham Turnbull, were active members of the Lothian Pension Fund or Lothian Buses Pension Fund.

Each member of the Pensions Committee and Pension Board is required to declare any financial and non-financial interests they have in the items of business for consideration at each meeting, identifying the relevant agenda item and the nature of their interest.

During the period from 1 April 2015 to the date of issuing of these accounts, a number of employees of the City of Edinburgh Council and its wholly owned subsidiary, LPFE Limited, held key positions in the financial management of the Lothian Pension Fund. With effect from 1 May 2015, all the employees listed below, with the exception of the Executive Director of Resources, were employed by LPFE Limited. These employees and their financial relationship with the Fund (expressed as cash-equivalent transfer values or CETV) are set out below:

Name	Position held	Accrued CETV as at 31 March 2015 £000	Accrued CETV as at 31 March 2016 £000
Hugh Dunn*	Acting Executive Director of Resources	734	755
Clare Scott	Chief Executive Officer, Lothian Pension Fund	147	175
Bruce Miller	Chief Investment Officer, Lothian Pension Fund	139	185
Struan Fairbairn	Chief Legal & Risk Officer, Lothian Pension Fund	19	30
John Burns	Chief Finance Officer, Lothian Pension Fund	426	474
Esmond Hamilton	Financial Controller	138	161

* Also disclosed in the financial statements of the City of Edinburgh Council.

Notes to the Financial Statements

22 Related party transactions (cont)

Governance

There is no need to produce a remuneration report for 2015/16, as the Pension Fund did not directly employ any staff.

Staff are either employed by City of Edinburgh Council or LPFE Limited, and their costs reimbursed by the Pension Fund. The Councillors, who are members of the Pensions Committee are also remunerated by City of Edinburgh Council.

23 Contractual commitments

The Fund has commitments relating to outstanding call payments due on unquoted funds held in the private debt, timber and infrastructure parts of the portfolio. The amounts 'called' by these funds are irregular in both size and timing, taking place over a period of years from the date of each original commitment. The outstanding commitments at the year end are as follows:

	31 March 2015 £000	31 March 2016 £000
Outstanding investment commitments	5,387	6,722
	5,387	6,722

As disclosed in note 22 on related party transactions the Investment and Pensions Division has a commitment to make future payments equivalent to rent in respect office accommodation at 144 Morrison Street. Details of the future payments are provided in that note.

24 Contingent assets and liabilities

At 31 March 2016 the Fund had entered into negotiations for two infrastructure co-investments in which it is exposed to the potential risk of investment abort costs. Lothian Buses Pension Fund's exposure to this is approximately £15k.

There were no contingent assets at year end.

25 Impairment losses

No impairment losses have been identified during the year.

Lothian Buses Pension Fund

Actuarial Statement for 2015/16

This statement has been prepared in accordance with Regulation 55(1)(d) of the Local Government Pension Scheme (Scotland) Regulations 2014. It has been prepared at the request of the Administering Authority of the Fund for the purpose of complying with the aforementioned regulation.

Description of Funding Policy

The funding policy is set out in the Administering Authority's Funding Strategy Statement (FSS), dated March 2015. In summary, the key funding principles are as follows:

- To ensure solvency of the Fund;
- To minimise the degree of short-term change in employer contribution rates;
- Reduce risk of the investment strategy over time;
- To ensure that sufficient cash is available to meet all liabilities as they fall due for payment

The FSS sets out how the Administering Authority seeks to balance the conflicting aims of securing the solvency of the Fund and keeping employer contributions stable.

Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 32 of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008 was as at 31 March 2014. This valuation revealed that the Fund's assets, which at 31 March 2014 were valued at £337 million, were sufficient to meet 117% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting surplus at the 2014 valuation was £48 million.

On the more prudent gilts basis, the Fund's assets as at 31 March 2014 were sufficient to meet 88% of the liabilities accrued to that date. The resulting deficit at the 2014 valuation, on the gilts basis, was £45 million.

The employer contributions for the period 1 April 2015 to 31 March 2018 were set in accordance with the Fund's funding policy as set out in its Funding Strategy Statement.

Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the valuation report dated 31 March 2014.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date, and makes an allowance for expected future salary growth to retirement or expected earlier date of leaving pensionable membership.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund assets at their market value.

Lothian Buses Pension Fund

Actuarial Statement for 2015/16

The key financial assumptions adopted for the 2014 valuation were as follows:

Financial assumptions	31 March 2015	
	% p.a. Nominal	% p.a. Real
Discount rate	5.0%	2.3%
Pay increases*	5.0%	2.3%
Price inflation/Pension increases	2.7%	-

*2% p.a. for 2014/15 and 2015/16, reverting to 5.0% thereafter.

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI_2012 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	20.4 years	22.6 years
Future Pensioners *	23.5 years	25.9 years

*Future pensioners are assumed to be at the 2014 valuation aged 45.

Copies of the 2014 valuation report and Funding Strategy Statement are available on request from The City of Edinburgh Council, the Administering Authority to the Fund.

Experience over the period since April 2014

Experience has been worse than expected since the last formal valuation (excluding the effect of any membership movements). Real bond yields have fallen dramatically placing a higher value on liabilities. The effect of this has been only partially offset by the effect of strong asset returns. The funding level is therefore likely to have worsened over the period.

Dependants	308	298	293	291
Total	1,912	1,849	1,783	1,735

Investment strategy

The funding agreement with the Scottish Government and the investment strategy are designed to reduce investment risk as the Fund is closed to new members and the liabilities will mature over time. They allow for acceleration in the sale of equities and property and purchase of bonds if the actual funding level improves to the target funding level. The 2014 Actuarial Valuation showed that the actual funding level (88.8%) was below the target funding level (91.5%).

Following the results of the 2014 Actuarial Valuation, the Pensions Committee approved a revised investment strategy for Scottish Homes Pension Fund in December 2014, with a reducing equity allocation, and corresponding increases in the bond allocation dependent on funding level. The target funding levels from 2014 to 2026 are shown in the table below along with the corresponding target allocations.

Year [1]	Target Funding Level	Target Equity Allocation
	%	%
2014	91.5	30
2017	93.0	25
2020	94.5	20
2023	95.5	15
2026	96.5	10

[1] The Scottish Government guarantee agreement sets out the increasing target funding levels every 3 years until 2044.

Over 2015/16, the actual funding level fluctuated above and below the target funding level reflecting movements in market interest rates and fund asset prices. Action was taken to vary the equity allocation between 25% and 30% over the year, consistent with the funding approach. The strategic asset allocation at the end of the 2015 and 2016 financial years are shown below.

	Strategic Allocation 31 March 2015	Strategic Allocation 31 March 2016
	%	%
Equities	27.5	30.0
Bonds	67.5	65.0
Property	5.0	5.0
Cash	-	-
Total	100.0	100.0

The actual asset allocation at 31 March 2016 is shown in the pie chart below.

During 2015/16, there were three changes in strategy: a reduction in equities in April 2015 to 25%, an increase in equities in October 2015 to 27.5% and a further increase in equities to 30% in February 2016. These changes were made to take advantage of movements in financial markets.

Following a review of the investment strategy during 2015/16, proposals have been put forward to the Scottish Government to change and update its funding agreement. The Scottish Government has agreed to consider alternatives to the existing funding approach. The current bond-focused investment strategy provides income yield of less than 2%, and so the Fund is required to sell assets on a regular basis to pay pensions. The review concluded that a less prescriptive investment and funding strategy would allow a higher-yielding investment strategy and a more flexible approach to setting contributions. Further development of an alternative investment strategy will be taken forward in 2016.

Investment performance

The objectives of the Fund are:

- over long-term economic cycles (typically 5 years or more), the achievement of the same return as that generated by the strategic allocation;
- over shorter periods, the Fund should perform better than the strategic allocation if markets fall significantly.

The Fund's annualised performance over the year and longer-term periods is shown in the table below. The Fund has performed broadly in line with its benchmark over all time periods.

Annualised returns to 31 March 2016 (% per year)	1 year	5 years	10 years
Scottish Homes Pension Fund	1.7	9.6	7.8
Benchmark	1.9	9.6	7.8

* estimated

The absolute performance of Scottish Homes Pension Fund over the 12-month period was 1.7% and 5 year performance was 9.6% per annum. The Fund's large holdings of bonds made a small gain of 1.6% over 2015/16 while equities fell 2.1%. Property was the best performing asset class in the Fund over the year returning 11.4%. The Fund's equity and bond assets are currently managed passively, pending the review of strategy. The Fund's risk has been slightly lower than that of the benchmark over the last year and 5 years. Schroder (property portfolio) slightly underperformed its benchmarks over the year while the internally managed gilt portfolio performed in line with its benchmark. Since inception, in July 2005, the Fund has returned +8.5% per annum, well ahead of measures of inflation and of national average earnings.

Annualised 5 yearly returns ending 31 March (% per year)

JOHN BURNS FCMA CGMA

Chief Finance Officer, Lothian Pension Fund

27 June 2016

Note to the net asset statement

The financial statements summarise the transactions of the Fund during the year and its net assets at the year end. They do not take account of the obligations to pay pensions and benefits which fall due after the end of the year. The actuarial position of the Fund, which does take account of such obligations, is discussed in the Actuarial Valuation section of this report and these financial statements should be read in conjunction with that information. In addition, as required by IAS26, the Actuarial Present Value of Promised Retirement Benefits is disclosed in the notes to these financial statements.

Notes to the Financial Statements

1 Statement of Accounting Policies

The statement of accounting policies for all Funds can be found on page 112.

2 Events after the Reporting Date

There have been no events since 31 March 2016, and up to the date when these Financial Statements were authorised, that require any adjustments to these Financial Statements.

3 Contributions from employer

	2014/15 £000	2015/16 £000
Deficit funding	671	575
Administration expenses	100	100
	771	675

The Scottish Homes Pension Fund is a single employer pension fund for former employees of Scottish Homes. The Scottish Homes Pension Fund was set up under (Scottish) Statutory Instrument 315/2005, when Scottish Homes became Communities Scotland, an agency of the Scottish Government.

Following the actuarial valuation at 31 March 2014, deficit funding of £575,000 per year is being paid by the Scottish Government over the period April 2015 to March 2018. In addition, the Scottish Government agreed to pay £100,000 every year towards the cost of ongoing administration.

Where the Scottish Government makes certain decisions which result in additional benefits being paid out to a member, or benefits being paid early, this results in a "strain" on the Fund. The resulting pension strain costs are calculated and recharged in full.

The Fund consists of only deferred and pensioner members, hence no employee contributions were paid during the year.

4 Transfers out to other pension schemes

	2014/15 £000	2015/16 £000
Group transfers	-	-
Individual transfers	93	290
	93	290

5a Total Management expenses

	2014/15 £000	2015/16 £000
Administrative costs	40	38
Investment management expenses	159	149
Oversight and governance costs	54	35
	253	222

This analysis of costs for the Scottish Homes Pension Fund has been prepared in accordance with CIPFA guidance. The analysis looks at the combined administration and investment management expenses in note 9b and c and splits out the costs to include a third heading covering oversight and governance expenditure.

Notes to the Financial Statements

5b Administrative expenses

	2014/15 £000	2015/16 £000
Employee Costs	25	23
The City of Edinburgh Council - other support costs	3	3
System costs	7	7
Actuarial fees	25	12
External audit fees	1	1
Printing and postage	2	2
Depreciation	2	1
Office costs	2	2
Sundry costs less sundry income	2	2
	69	53

The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council. In turn the Division apportioned administration and investment costs to the three pension funds. Costs directly attributable to a specific fund are charged to the relevant Fund, costs that are common to all three funds are apportioned on a defined basis.

5c Investment management expenses

	2014/15 £000	2015/16 £000
External management fees - invoiced	59	52
External management fees - deducted from capital (direct)	60	52
External management fees - deducted from capital (indirect)	-	-
Transaction costs	-	1
Employee costs	25	25
Custody fees	18	17
Engagement and voting fees	2	2

Notes to the Financial Statements

10 Financial Instruments

10a Classification of financial instruments

Accounting policies describe how different asset classes of financial instruments are measured, and how income and expenses, including fair value gains and losses, are recognised. The following table analyses the fair value amounts of financial assets and liabilities by category and net assets statement heading. No financial assets were reclassified during the accounting period.

All financial instruments are marked to market (at fair value) in the Fund's accounting records hence there is no difference between the carrying value and fair value.

	31 March 2015			31 March 2016		
	Designated as fair value through fund account £000	Loans and receivables £000	Financial liabilities at amortised cost £000	Designated as fair value through fund account £000	Loans and receivables £000	Financial liabilities at amortised cost £000

Notes to the Financial Statements

10c Valuation of financial instruments carried at fair value

The valuation of financial instruments has been classified into three levels, according to the quality and reliability of information used to determine fair values.

Level 1

Financial instruments at Level 1 are those where the fair values are derived from unadjusted quoted prices in active markets for identical assets or liabilities. Products classified as level 1 comprise quoted equities and unit trusts.

Quoted investments are shown at bid prices. The bid value of the investment is based on the bid market quotation of the relevant stock exchange.

Level 2

Financial instruments at Level 2 are those where quoted market prices are not available; for example, where an instrument is traded in a market that is not considered to be active, or where valuation techniques are used to determine fair value and where these techniques use inputs that are based significantly on observable market data.

Level 3

Financial instruments at Level 3 are those where at least one input that could have a significant effect on the instrument's valuation is not based on observable market data. Such instruments would include unquoted equity investments, which are valued using various valuation techniques that require significant judgement in determining appropriate assumptions.

The values of the investments in unquoted private equity, infrastructure, timber and European real estate are based on valuations provided by the general partners to the funds in which the Fund has invested.

These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of International Financial Reporting Standards (IFRS). The valuations are typically undertaken annually at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

11 Nature and extent of risk arising from financial instruments

Risk and risk management

The Fund's primary aim is to ensure that all members and their dependants receive their benefits when they become payable. The investment strategy aims to maximise the returns from investments within reasonable risk parameters and hence minimise the long-term cost to employer. The Fund achieves this by investing in a diverse range of assets to reduce risk to an acceptable level. In addition, the Fund ensures that sufficient cash is available to meet all liabilities when they are due to be paid.

Responsibility for the Fund's overall investment strategy rests with the Pensions Committee. The Investment Strategy Panel and the internal investment team monitor investment risks on a regular basis. Investment risk management tools are used to identify and analyse risks faced by the Fund's investments.

Types of investment risk

There are various ways of considering investment risks for pension funds. For the purposes of this note, market risk is the potential for an investor to experience losses from falls in the prices of investments. All financial instruments, including cash deposits, present a risk of loss of capital and risks vary depending on different asset classes.

Market risk also changes over time as economic conditions and investor sentiment change. The Fund considers overall fluctuations in prices arising from a variety of sources: market risk, foreign exchange risk, interest rate risk, credit risk, etc. The different risks may, to some extent, offset each other. The overall market risk of the Fund depends on the actual mix of assets and encompasses all the different elements of risk.

The Fund manages these risks in a number of ways:

- assessing and establishing acceptable levels of market risk when setting overall investment strategy. Importantly, risk is considered relative to the liabilities of the Fund
- diversification of investments in terms of type of asset, investment styles, investment managers, geographical and industry sectors as well as individual securities
- taking stewardship responsibilities seriously and pursuing constructive engagement with the companies in which we invest
- monitoring market risk and market conditions to ensure risk remains within tolerable levels

Notes to the Financial Statements

11 Nature and extent of risk arising from financial instruments (cont)

Sensitivity analysis

Asset prices have a tendency to fluctuate. The degree of such fluctuation is known as “volatility” and it differs by asset class. The table sets out the long-term volatility assumptions used by the Fund’s investment adviser KPMG:

Asset type	Potential price movement (+ or -)
Equities - Developed Markets	20.5%
Equities - Emerging Markets	30.0%
Fixed Interest Gilts	6.7%
Index-Linked Gilts	10.8%
Property	13.0%

Volatility is the standard deviation of annual returns. Broadly speaking, in two years out of three, the asset’s change in value (which could be a gain or a loss) is expected to be lower than the volatility figure, but in one year out of three, the change in value is expected to be higher than the volatility figure.

Asset classes don’t always move in line with each other. The extent to which assets move together is known as their “correlation”. A lower correlation means that there is less risk of assets losing value at the same time. The overall Fund benefits from “diversification” because it invests in numerous different asset classes, which don’t all move in line with each other. Consequently, the aggregate risk at the Fund level is less than the total risk from all the individual assets in which the Fund invests.

The following table shows the risks at the asset class level and the overall Fund level.

	Value at 31 March 2016 £000	% of fund %	Potential Change +/- %	Value on increase £000	Value on decrease £000
Equities - Developed Markets	41,256	27.8	20.5	49,713	32,799
Equities - Emerging Markets	3,672	2.5	30.0	4,774	2,570
Fixed Interest Gilts	19,777	13.3	6.7	21,102	18,452
Index-Linked Gilts	76,105	51.2	10.8	84,324	67,886
Property	7,788	5.2	13.0	8,800	6,776
Total [1]	148,598	100.0	13.5	168,714	128,482
Total [2]			9.4	162,566	134,630
Total [3]			8.3	160,932	n/a

[1] No allowance for correlations between assets

[2] Including allowance for correlations between assets

[3] Including allowance for correlation between assets and liabilities.

The value on increase/decrease columns illustrate the monetary effect of the percentage change in the volatility column. The actual annual change in value is expected to be lower than this in two years out of three, but higher in one year out of three.

It can be seen that the risk to the overall Fund assets [2] is lower than the total of the risks to the individual assets [1].

Notes to the Financial Statements

11 Nature and extent of risk arising from financial instruments (cont)

However, because the purpose of a pension scheme is to make payments to scheme beneficiaries, the true risk of a pension scheme is not measured in absolute terms, but relative to its liabilities [3]. The risk is lower than the absolute asset risk, due to the impact of correlation with the discount rate used to value the liabilities.

This risk analysis incorporates volatility from market, interest rate, foreign exchange, credit, and all other sources of risk, and, importantly, makes allowance for how these risks may offset each other.

Credit risk

Credit risk represents the risk that the counterparty to a transaction or a financial instrument will fail to discharge an obligation and cause the Fund to incur a financial loss. The market values of investments generally reflect an assessment of credit risk in their pricing and consequently the risk of loss is implicitly provided for in the value of the Fund's assets and liabilities (as outlined in Market Risk above).

In essence, the Fund's entire investment portfolio is exposed to some sort of credit risk. However, through the selection of counterparties, brokers and financial institutions the Fund reduces the credit risk that may occur through the failure to settle a transaction in a timely manner.

Cash deposits are the major areas of credit exposure where credit risk is not reflected in market prices.

Cash deposits

At 31 March 2016, cash deposits represented £1.6m, 1% of total net assets. This was held with the following institutions:

	Moody's Credit Rating at 31 March 2016	Balances at 31 March 2015 £000	Balances at 31 March 2016 £000
Held for investment purposes			
Northern Trust Company - cash deposits	Aaa-mf	244	11
Held for other purposes			
The City of Edinburgh Council - treasury management	See below	2,433	1,610
Total cash		2,677	1,621

The majority of Sterling cash deposits of the Fund are managed along with those of the administering authority (the City of Edinburgh Council) and other related organisations which are pooled for investment purposes as a treasury cash fund. Management of the cash fund is on a low risk basis, with security of the investments the key consideration. The Council has in place counterparty criteria.

The Council has in place institutional restrictions on investments and counterparty criteria. These include -

- (a) UK Government and other UK local Authorities with no limit, other public bodies up to £20 million per organisation.
- (b) Money market funds (MMFs) no more than £30 million or 15% with any one Fund.
- (c) Financial Institutions: Banks and Building Societies with multiple criteria based on a range of short and long term credit ratings, as well as any security provided, from maximum of £60 million / 20% of assets under management (AUM) for institutions with the highest criteria to £10 million / 5% of AUM for institutions with the lowest acceptable criteria.

Notes to the Financial Statements

11 Nature and extent of risk arising from financial instruments (cont)

	Moody's Credit Rating at 31 March 2016	Balances at 31 March 2015 £000	Balances at 31 March 2016 £000
Money market funds			
Deutsche Bank AG, London	Aaa-mf	357	215
Goldman Sachs	Aaa-mf	357	2

UK Pseudo-Sovereign risk instruments			
Other Local Authorities [1]	Aa1	-	730
UK Government Treasury Bills	Aa1	63	321
		2,433	1,610

[1] Very few Local Authorities have their own credit rating but they are generally assumed to have a pseudo-sovereign credit rating (which in the UK at 31 March 2016 was 'Aa1').

No breaches of the Council's counterparty criteria occurred during the reporting period and the Fund does not expect any losses from non-performance by any of its counterparties in relation to deposits.

Refinancing risk

Refinancing risk is the risk that the Fund will be bound to replenish a significant proportion of its pension fund financial instruments at a time of unfavourable interest rates. The Fund is not bound by any obligation to replenish its investments and hence is not exposed to refinancing risk.

Liquidity risk

Liquidity risk reflects the risk that the Fund will not be able to meet its financial obligations as they fall due. The Fund therefore ensures that there is adequate cash and liquid resources to meet its commitments. Cash flow projections are prepared on a regular basis to understand and manage the timing of the Fund's cash flows.

All of the Fund's investments could be converted to cash within three months in a normal trading environment.

12 Actuarial statement

The Scheme Actuary has provided a statement describing the funding arrangements of the Fund. This can be found at the end of this section.

Notes to the Financial Statements

13 Actuarial present value of promised retirement benefits

The actuarial value of promised retirement benefits at the accounting date, calculated in line with International Accounting Standard 19 (IAS19) assumptions, is estimated to be £130m (2015 £141m). This figure is used for statutory accounting purposes by Scottish Homes Pension Fund and complies with the requirements of IAS26. The assumptions underlying the figure match those adopted for the Administering Authority's FRS17/IAS19 reports at each year end.

The figure is only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Fund.

	31 March 2015 % p.a.	31 March 2016 % p.a.
Inflation/pensions increase rate	2.1%	2.2%
Discount rate	3.1%	3.5%

Longevity assumptions

The life expectancy assumption is based on Fund specific statistical analysis with improvements in line with the CMI 2012 model, assuming that the current rate of improvements has reached a peak and will converge to a long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies, in years, at age 65 are summarised below:

	31 March 2015		31 March 2016	
	Males	Females	Males	Females
Current pensioners	24.5 years	25.4 years	24.5 years	25.4 years
Future pensioners (assumed to be currently 45)	26.8 years	28.6 years	26.8 years	28.6 years

Commutation assumption

An allowance is included for future retirements to elect to take 50% of the maximum additional tax-free cash up to HMRC limits for pre-April 2009 service and 75% of the maximum tax-free cash for post-April 2009 service.

16 Related party transactions

The City of Edinburgh Council

The Lothian Pension Fund, the Lothian Buses Pension Fund and the Scottish Homes Pension Fund are administered by the City of Edinburgh Council. Consequently there is a strong relationship between the Council and the Pension Funds.

The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council, based on the amount of central services consumed. In turn, the Division allocates its costs to the three Pension Funds. Costs directly attributable to a specific Fund are charged to the relevant Fund; costs that are common to all three Funds are allocated on a defined basis.

Transactions between the Council and the Fund are managed via a holding account. Each month the Fund pays a cash sum to the Council leaving a working balance in the account.

	31 March 2015 £000	31 March 2016 £000
Year end balance of holding account	219	95
	219	95

Part of the Fund's cash holdings are invested on the money markets by the treasury management operations of the Council, through a service level agreement. During the year to 31 March 2016, the fund had an average investment balance of £2.2m (2015 £2.5m). Interest earned was £10.5k (2015 £11.5k).

Year end balance on treasury management account	31 March 2015 £000	31 March 2016 £000
Held for investment purposes	-	-
Held for other purposes	2,433	1,610
	2,433	1,610

Notes to the Financial Statements

Office accommodation - 144 Morrison Street, Edinburgh

Investment and Pensions Division of the Council entered into an internal agreement with the Council for the provision of office accommodation at 144 Morrison Street in Edinburgh. The terms of the agreement are equivalent to those that would have been obtained had the accommodation been let on a commercial basis. In the accounts of the Fund the arrangement has been treated as a operational lease. The Investment and Pensions Division is committed to making the following future payments. City of Edinburgh Council sold the property on 31 March 2016, the lease with the new landlord is on the same terms as the internal agreement.

	31 March 2015 £000	31 March 2016 £000
Within one year	-	42
Between one and five years	272	345
After five years	1,379	992
	1,651	1,379
Recognised as an expense during the year	91	92

The above expense has been allocated across the three Funds, Scottish Homes Pension Fund's share is £2.2k.

Governance

As at 31 March 2016, all members of the Pensions Committee, with the exception of Councillor Bill Cook and Richard Lamont, and all members of the Pensions Board, with the exception of Graham Turnbull, were active members of the Lothian Pension Fund or Lothian Buses Pension Fund.

Each member of the Pensions Committee is required to declare any financial and non-financial interests they have in the items of business for consideration at each meeting, identifying the relevant agenda item and the nature of their interest.

During the period from 1 April 2015 to the date of issuing of these Financial Statements, a number of employees of the City of Edinburgh Council and its wholly owned subsidiary, LPFE Limited, held key positions in the financial management of the Lothian Pension Fund. With effect from 1 May 2015, all the employees listed below, with the exception of the Executive Director of Resources, were employed by LPFE Limited. These employees and their financial relationship with the Fund (expressed as cash-equivalent transfer values or CETV) are set out below:

Name	Position held	Accrued CETV as at 31 March 2015 £000	Accrued CETV as at 31 March 2016 £000
Hugh Dunn*	Acting Executive Director of Resources	734	755
Clare Scott	Chief Executive, Lothian Pension Fund	147	175
Bruce Miller	Chief Investment Officer, Lothian Pension Fund	139	185
Struan Fairbairn	Chief Legal & Risk Officer, Lothian Pension Fund	19	30
John Burns	Chief Finance Officer, Lothian Pension Fund	426	474
Esmond Hamilton	Financial Controller	138	161

* Also disclosed in the financial statements of the City of Edinburgh Council.

Notes to the Financial Statements

16 Related party transactions (cont)

There is no need to produce a remuneration report for 2015/16, as the Pension Fund did not directly employ any staff.

Staff are either employed by City of Edinburgh Council or LPFE Ltd, and their costs reimbursed by the Pension Fund. The Councillors, who are members of the Pensions Committee are also remunerated by City of Edinburgh Council.

17 Contingent assets/liabilities and contractual commitments

There were no contingent liabilities or contractual commitments at the year end.

18 Impairment losses

No impairment losses have been identified during the year.

Scottish Homes Pension Fund

Actuarial Statement for 2015/16

This statement has been prepared in accordance with Regulation 55(1)(d) of the Local Government Pension Scheme (Scotland) Regulations 2014. It has been prepared at the request of the Administering Authority of the Fund for the purpose of complying with the aforementioned regulation.

Description of Funding Policy

The administering authority's Funding Strategy Statement, dated November 2015, states that a bespoke funding strategy has been adopted for the Fund.

The strategy aims for the Fund to be 100% solvent by 2044 using a discount rate based on government bonds. It includes target funding levels at each actuarial valuation. Contributions from the Scottish Government are determined by reference to the target funding levels. The deficit recovery period is 8 years.

The Funding strategy is designed to reduce investment risk as the Fund is closed to new members and the liabilities will mature over the time, with a reducing allocation to equities over time reflecting the requirements of the Scottish Government to lock away any surpluses that may occur over time by accelerating the transfer into bonds.

Funding Position as at the last formal funding valuation

The most recent actuarial valuation carried out under Regulation 32 of the Local Government Pension Scheme (Scotland) (Administration) Regulations 2008 was as at 31 March 2014. This valuation revealed that the Fund's assets, which at 31 March 2014 were valued at £136 million, were sufficient to meet 89% of the liabilities (i.e. the present value of promised retirement benefits) accrued up to that date. The resulting deficit at the 2014 valuation was £17 million.

The Guarantor's contributions for the period 1 April 2015 to 31 March 2018 were set in accordance with the Fund's funding policy as set out in its Financial Strategy Statement.

Principal Actuarial Assumptions and Method used to value the liabilities

Full details of the methods and assumptions used are described in the valuation report dated 4 December 2014.

Method

The liabilities were assessed using an accrued benefits method which takes into account pensionable membership up to the valuation date.

Assumptions

A market-related approach was taken to valuing the liabilities, for consistency with the valuation of the Fund's assets at their market value.

Scottish Homes Pension Fund

Actuarial Statement for 2015/16

The key financial assumptions adopted for the 2014 valuation were as follows:

Assumption	Description
Price Inflation (CPI) (deferreds and pensioners)	Bank of England implied (RPI) curve less 0.8% p.a.
Discount rate (deferreds and pensioners)	Bank of England nominal yield curve

The key demographic assumption was the allowance made for longevity. The life expectancy assumptions are based on the Fund's VitaCurves with improvements in line with the CMI_2012 model, assuming the current rate of improvements has reached a peak and will converge to long term rate of 1.25% p.a.. Based on these assumptions, the average future life expectancies at age 65 are as follows:

	Males	Females
Current Pensioners	24.5 years	25.4 years
Future Pensioners *	26.8 years	28.6 years

*Future pensioners are assumed to be aged 45 at the 2014 valuation

Copies of the 2014 valuation report and Funding Strategy Statement are available on request from The City of Edinburgh Council, the Administering Authority to the Fund.

Experience over the period since April 2014

The administering authority monitors the funding position on a regular basis as part of its risk management programme. The funding level at 31 March 2016 is estimated to be 92%, an increase of 3% since the formal funding valuation at 31 March 2014.

The next actuarial valuation will be carried out as at 31 March 2017. The Funding Strategy Statement will also be reviewed at that time.

Statement of Accounting Policies and General Notes

1 Basis of preparation

The Financial Statements have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2015/16 which is based upon International Financial Reporting Standards (IFRS), as amended for the UK public sector.

The Financial Statements summarise the transactions of the Funds for the year ended 31 March 2016 and report on the net assets available to pay pension benefits as at 31 March 2016. The Financial Statements do not take account of obligations to pay pensions and benefits which fall due after the end of the financial year. The actuarial present values of promised retirement benefits, valued on an International Accounting Standard (IAS) 19 basis, are disclosed in the Notes to the Financial Statements.

2 Summary of significant accounting policies

General

a) Basis of consolidation

Commencing with the year ended 31 March 2016, Consolidated Financial Statements have been prepared for Lothian Pension Fund. The Financial Statements of Lothian Buses Pension Fund and Scottish Homes Pension Fund continue to be prepared on a single entity basis.

The Consolidated Financial Statements for Lothian Pension Fund are prepared by combining the Financial Statements of the Fund (the parent entity) and its controlled entity (LPFE Limited) as defined in accounting standard IAS27 - Consolidated and Separate Financial Statements. Consistent accounting policies are employed in the preparation and presentation of the Consolidated Financial Statements. All inter-entity balances and transactions between entities, including any unrealised profits or losses, have been eliminated on consolidation.

As LPFE Limited commenced trading on 1 May 2015, the prior year comparative figures consist only of the results of Lothian Pension Fund. Further details of the consolidation are provide in the Notes to the Financial Statements of Lothian Pension Fund.

LPFE Limited is wholly owned by the City of Edinburgh Council. As the purpose of the Company is to provide staff services in respect of investment and general management of the Pension Funds, it is considered appropriate to consolidate the Company's Financial Statements with those of Lothian Pension Fund.

Fund account - revenue recognition

b) Contribution income

Normal contributions, both from the members and from employers, are accounted for on an accruals basis at the rate certified by the Scheme Actuary in the payroll period to which they relate.

Similarly, employer deficit funding contributions are accounted for on the due date on which they are payable as certified by the scheme actuary.

Employers' pensions strain contributions are accounted for in the period in which the liability arises. Any amount due but unpaid will be classed as a current financial asset. Amounts not due until future years are classed as long-term financial assets.

c) Transfers to and from other schemes

Transfer values represent the amounts received and paid during the year for members who have either joined or left the fund during the financial year and are calculated in accordance with the Local Government Pension Scheme Regulations.

Individual transfers in/out are accounted for when received/paid, which is normally when the member liability is accepted or discharged.

Bulk (group) transfers are accounted for on an accruals basis in accordance with the terms of the transfer agreement.

Statement of Accounting Policies and General Notes

d) Investment income

i) Interest income

Interest income is recognised in the fund account as it accrues, using the effective interest rate of the financial instrument as at the date of acquisition or origination. Income includes the amortisation of any discount or premium, transaction costs or other differences between the initial carrying amount of the instrument and its amount at maturity calculated on an effective interest rate basis.

ii) Dividend income

Dividend income is recognised on the date the shares are quoted ex-dividend. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset.

iii) Distributions from pooled funds

Distributions from pooled funds are recognised at the date of issue. Any amount not received by the end of the reporting period is disclosed in the net assets statement as a current financial asset.

iv) Income from unquoted private equity and infrastructure investments

Income from the above sources is recognised when it is notified by the manager. Distributions are split into capital and income elements with the latter being included under investment income in the Fund Account.

v) Property related income

Property-related income consists primarily of rental income. Rental income from operating leases on properties owned by the fund is recognised on a straight-line basis over the term of the lease. Any lease incentives granted are recognised as an integral part of the total rental income, over the term of the lease.

Rental income is reported gross with the operational costs of the properties included in investment management expenses.

Contingent rents based on the future amount of a factor that changes other than with the passage of time, such as turnover rents, are only recognised when contractually due.

vi) Movement in the net market value of investments

Changes in the net market value of investments (including investment properties) are recognised as income and comprise all realised and unrealised profits/losses during the year.

Fund account - expense items

e) Benefits payable

Pensions and lump sum benefits payable include all amounts known to be due as at the end of the financial year. Any amounts due but unpaid are disclosed in the net assets statement as current liabilities.

f) Taxation

i) Pension Funds

The Local Government Pension Scheme is a registered public service scheme under section 1(1) of Schedule 36 of the Finance Act 2004 and as such is exempt from UK income tax on interest received and from capital gains tax on the proceeds of investments sold. Income from overseas investments suffers withholding tax in the country of origin, unless exemption is permitted. Irrecoverable tax is accounted for as a fund expense as it arises.

Statement of Accounting Policies and General Notes

ii) Controlled entity - LPFE Limited

The Company is a mutual trader and is therefore not liable to corporation tax on any surpluses generated from services provided in respect of the Pension Funds. The tax charge for the period is based on any profit for the period from non-mutual trade, adjusted for any non-assessable or disallowed items. It is calculated using tax rates that have been enacted or are substantively enacted by the period end date.

Deferred tax is accounted for using the balance sheet liability method in respect of temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Financial Statements. No deferred tax will be recognised from the initial recognition of an asset or liability, excluding a business combination, where there is no effect on accounting or taxable profit or loss.

Deferred tax is calculated at the tax rates that are expected to apply to the period when the asset is realised or liability is settled. Deferred tax is credited in the income statement except where it relates to items that may be credited directly to equity, in which case the deferred tax is adjusted directly against equity.

Deferred tax assets are recognised to the extent that it is probable that future profits will be available against which deductible temporary differences can be utilised.

The amount of benefit brought to account or which may be realised in the future is based on the assumption that no adverse change will occur in income taxation legislation and the anticipation that the economic entity will derive sufficient future assessable income to enable the benefit to be realised and comply with the conditions of deductibility imposed by the law.

g) Administrative expenses

All administrative expenses are accounted for on an accruals basis. The Investment and Pensions Division of the Council is responsible for administering the three Pension Funds. The Division receives an allocation of the overheads of the Council, this is based on the amount of central services consumed. In turn, the Division allocates its costs to the three Pension Funds.

Costs directly attributable to a specific Fund are charged to the relevant Fund. Investment management costs that are common to all three Funds are allocated in proportion to the value of the Funds as at the end of the year. Other administration costs are allocated in proportion to the number of members in each of the Funds at the end of the year.

h) Investment management expenses

All investment management expenses are accounted for on an accruals basis.

Fees of the external investment managers and custodian are agreed in the respective mandates governing their appointments. Broadly, these are based on the market value of the investments under their management and therefore increase or reduce as the value of these investments change. For some investment managers, an element of their fee is performance related. The amount of any performance related fees paid is disclosed in the note to the accounts on investment management expenses provided for each Fund.

The cost of administering the Local Government Pension Scheme in the UK has come under increasing scrutiny in recent years. As a result, the decision to recognise investment management costs that are deducted from the value of an investment and recognised this as a cost in the Fund Account rather than as a reduction in the change in market value of investments. Investment transaction costs that are added to an investment purchase price or deducted from the proceeds of a sale are also recognised as a cost in the Fund Account rather than as a reduction in the change in market value of investments.

Statement of Accounting Policies and General Notes

h) Investment management expenses (cont)

In March 2016, CIPFA revised and updated its guidance "Accounting for Local Government Pension Scheme Management Costs". Whilst the underlying principle of transparency of investment costs remains unchanged, there has been a degree of relaxation to full cost disclosure. Specifically, for complex "Fund of Funds" structures, the new guidance states that "Investment costs incurred by a separate legal entity, or in respect of investment decisions over which the pension fund has no control, should not be included in the (Pension) Fund Account.....If pension funds wish to provide information about the total cost of Fund of Fund investments, this should be included as part of the Investments section in the Annual Report". The impact of this is that investment management costs deducted from any underlying fund in a "Fund of Funds" investment would not be included in the costs disclosed in the Fund Account. As this would significantly under-report investment management costs the decision has been made not to adopt this element of the CIPFA guidance. However, this type of cost is separately identified as "external management fees - deducted from capital (indirect)" in the notes on investment management expenses.

Any indirect costs incurred through the bid-offer spread on some pooled investment vehicles are not treated as an expense. Such costs are accounted for as part of the acquisition costs or sale proceeds.

The cost of obtaining investment advice from external consultants is included in investment management charges.

The costs of the in-house fund management team are charged to the Funds. The basis of allocation is as described in section g) above.

During the year, the policy on accounting for securities lending revenue has been revised. Previously, this revenue was stated net of the agent's management fee. The new policy is to report the revenue gross and include the fee in investment management expenses. The results for 2014/15 have been restated but there is no change in the net return on investments for the year.

i) Operating lease

Lease payments under an operating lease are recognised as an expense on a straight-line basis over the term of the lease. In accordance with SIC 15, lease incentives are recognised as a reduction in the lease expense over the term of the lease on a straight-line basis.

Net assets statement

j) Financial assets

Financial assets are included in the net assets statement on a fair value basis as at the reporting date. A financial asset is recognised in the net assets statement on the date the fund becomes party to the contractual acquisition of the asset. From this date any gains or losses arising from changes in the fair value of asset are recognised by the fund.

The values of investments as shown in the net assets statement have been determined as follows:

i) Market quoted investments

The value of an investment for which there is a readily available market price is determined by the bid market price ruling on the final day of the accounting period.

ii) Fixed interest securities

Fixed interest securities are recorded at net market value based on their current yields.

Statement of Accounting Policies and General Notes

iii) Unquoted investments

The fair value of investments for which market quotations are not readily available is determined as follows:

- valuations of delisted securities are based on the last sale price prior to delisting, or where subject to liquidation, the amount the council expects to receive on wind-up, less estimated realisation costs.
- securities subject to takeover offer – the value of the consideration offered under the offer, less estimated realisation costs.
- directly held investments include investments in limited partnerships, shares in unlisted companies, trusts and bonds. Other unquoted securities typically include pooled investments in property, infrastructure, debt securities and private equity. The valuation of these pools or directly held securities is undertaken by the investment manager or responsible entity and advised as a unit or security price. The valuation standards followed in these valuations adhere to industry guidelines or to standards set by the constituent documents of the pool or the management agreement.
- investments in unquoted property and infrastructure pooled funds are valued at the net asset value or a single price advised by the fund manager.
- the values of the direct investments in unquoted private equity, infrastructure, timber and real estate are based on valuations provided by the general partners to the funds in which the Fund has invested. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines, which follow the valuation principles of IFRS. The valuations are usually undertaken at the end of December. Cash flow adjustments are used to roll forward the valuations to 31 March as appropriate.

iv) Pooled investment vehicles

Pooled investment vehicles are valued at closing bid price if both bid and offer prices are published; or if single priced, at the closing single price. In the case of pooled investment vehicles that are accumulation funds, change in market value also includes income which is reinvested in the fund, net of applicable withholding tax.

v) Freehold and leasehold properties

The properties were valued at fair value at 31 March 2016 by John Symes-Thompson FRICS and Genine Terry MRICS of independent external valuers CB Richard Ellis Ltd. The valuations have been prepared in accordance with the RICS Valuation – Professional Standards global – January 2014 and the RICS Valuation Professional Standards UK January 2014 (revised April 2015), (“the Red Book”). The valuer’s opinion of fair value was primarily derived using comparable recent market transactions on arm’s-length terms.

k) Foreign currency transactions and balances

Dividends, interest and purchases and sales of investments in foreign currencies have been accounted for at the spot market rates at the date of the transaction. End-of-year spot market exchange rates are used to value cash balances held in foreign currency bank accounts, market values of overseas investments and purchases and sales outstanding at the end of the reporting period.

l) Derivatives

Derivative contract assets are fair valued at bid prices and liabilities are fair valued at offer prices. Changes in the fair value of derivative contracts are included in change in market value.

The value of futures contracts is determined using exchange prices at the reporting date. Amounts due from or owed to the broker are the amounts outstanding in respect of the initial margin and variation margin.

Statement of Accounting Policies and General Notes

l) Derivatives (cont)

The future value of forward currency contracts is based on market forward exchange rates at the year-end date and determined as the gain or loss that would arise if the outstanding contract were matched at the year-end with an equal and opposite contract.

m) Cash and cash equivalents

Cash comprises cash in hand and demand deposits. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and that are subject to minimal risk of changes in value.

n) Financial liabilities

The Funds recognise financial liabilities at fair value as at the reporting date. A financial liability is recognised in the net assets statement on the date the fund becomes party to the liability. From this date any gains or losses arising from changes in the fair value of the liability are recognised.

o) Actuarial present value of promised retirement benefits

The actuarial present value of promised retirement benefits of each of the Funds is assessed on an annual basis by the Scheme Actuary in accordance with the requirements of IAS 19 and relevant actuarial standards.

As permitted under IAS26, the Funds have opted to disclose the actuarial present value of promised retirement benefits by way of a note to the net assets statements.

p) Additional voluntary contributions

The Lothian Pension Fund and Lothian Buses Pension Fund provide an additional voluntary contributions (AVC) scheme for their members, the assets of which are invested separately from those of the Funds. The Funds have appointed Standard Life and Prudential as their AVC providers. AVCs are paid to the AVC providers by employers and are specifically for providing additional benefits for individual contributors. Each AVC contributor receives an annual statement showing the amount held in their account and the movements in the year.

In accordance with regulation 5(2)(b) of the Local Government Pension Scheme (Management and Investment of Funds) (Scotland) Regulations 1998, AVCs are not included in the pension fund financial statements. Details of contributions paid and the total value of funds invested are disclosed by way of note.

q) Employee benefits

i) Pension Funds

Staff working on the administration of the Pension Funds that are employed by the City of Edinburgh Council are eligible to join the Lothian Pension. As these people are employees of the Council, it's the Council that accounts for the benefits of the defined benefits scheme under IAS19. The Council recharges employment costs to the Pension Funds, including employer contributions to the Lothian Pension Fund.

ii) Controlled entity - LPFE Limited

The employees of LPFE Limited are eligible to participate in the Lothian Pension Fund and the Company contributes to the defined benefits scheme on behalf of its employees.

In the Consolidated Financial Statements the current service cost for the period is charged to the Fund Account. The assets of Lothian Pension Fund are held separately from those of the Company. The Company has fully adopted the accounting principles as required by IAS19 – Employee Benefits.

Statement of Accounting Policies and General Notes

ii) Controlled entity - LPFE Limited (cont)

The liability recognised in the Net Asset Statement in respect of the defined benefit pension plan is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets, together with adjustments for unrecognised past-service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in a currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligations.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to the Net Asset Statement in the period in which they arise.

Past-service costs are recognised immediately in the Net Asset Statement, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

3 Accounting Standards that have been issued but not yet adopted

The Code requires the disclosure of information relating to the impact of an accounting change that will be required by a new standard that has been issued but not yet adopted. This applies to the adoption of the following new or amended standards within the 2016/17 Code:

- Annual Improvements to IFRSs 2010 – 2012 Cycle
- Annual Improvements to IFRSs 2012 – 2014 Cycle
- The changes to the format of the Pension Fund Account and the Net Assets Statement.

The amendments are generally minor or principally providing clarification. Overall, these new or amended standards are not expected to have a significant impact on the financial statements.

4 Critical judgements in applying accounting policies Unquoted private equity and infrastructure investments

It is important to recognise the highly subjective nature of determining the fair value of private equity and infrastructure investments. They are inherently based on forward-looking estimates and judgements involving many factors. These valuations are prepared in accordance with the International Private Equity and Venture Capital Valuation Guidelines or similar guidelines provided by the British Venture Capital Association, which follow the valuation principles of IFRS.

For the Lothian Pension Fund, the value of unquoted private equity, infrastructure and timber investments at 31 March 2016 was £716.2m (2015 £564.2m).

For the Lothian Buses Pension Fund, the value of unquoted private equity, infrastructure and timber investments at 31 March 2016 was £26.0m (2015 £14.3m).

Statement of Accounting Policies and General Notes

Actuarial present value of promised retirement benefits

Each Fund is required to disclose the estimated actuarial present value of promised retirement benefits as at the end of the financial year. These estimates are prepared by the Fund's Actuary. These values are calculated in line with International Accounting Standard 19 (IAS19) assumptions and comply with the requirements of IAS26. However, the results are subject to significant variances based on changes to the underlying assumptions.

The figures are only prepared for the purposes of IAS26 and has no validity in other circumstances. In particular, it is not relevant for calculations undertaken for funding purposes and setting contributions payable to the Funds.

5 Assumptions made about the future and other major sources of estimation uncertainty

The Financial Statements contain estimated figures that are based on assumptions made by the Council; private equity and infrastructure managers; other providers of valuation information; and the Scheme Actuary about the future or that are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

The items in the net assets statement at 31 March 2016 for which there is a significant risk of material adjustment in the forthcoming financial year are as follows:

a) Actuarial present value of promised retirement benefits

Uncertainties

Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and expected returns on pension fund assets. The Fund Actuary advises on the assumptions to be applied and prepares the estimates.

Effect if actual results differ from assumptions - Lothian Pension Fund

The effects on the net pension liability of changes in individual assumptions can be illustrated as follows:

Change in assumptions - year ended 31 March 2016	Approx % increase in liabilities %	Approx monetary amount £m
0.5% decrease in discount rate	11	669
1 year increase in member life expectancy	3	188
0.5% increase in salary increase rate	4	241
0.5% increase in pensions increase rate	7	414

Effect if actual results differ from assumptions - Lothian Buses Pension Fund

Change in assumptions - year ended 31 March 2016	Approx % increase in liabilities %	Approx monetary amount £m
0.5% decrease in discount rate	11	40
1 year increase in member life expectancy	3	11
0.5% increase in salary increase rate	4	14
0.5% increase in pensions increase rate	7	25

Statement of Accounting Policies and General Notes

a) Actuarial present value of promised retirement benefits (cont)

Uncertainties

Effect if actual results differ from assumptions - Scottish Homes Pension Fund

The effects on the net pension liability of changes in individual assumptions can be illustrated as follows:

Change in assumptions - year ended 31 March 2016	Approx % increase in liabilities %	Approx monetary amount £m
0.5% decrease in discount rate	6	7
1 year increase in member life expectancy	3	4
0.5% increase in pensions increase rate	6	7

b) Valuation of unquoted private equity and infrastructure investments

Uncertainties

These investments are not publicly listed and therefore there is a degree of estimation involved in their valuation.

Effect if actual results differ from assumptions

There is a risk that these investments may be under or overstated in the accounts at any point in time. The actual financial return of this type of investment is only known with certainty when they reach the end of their lifecycles and the final distributions are made to investors.

c) Quantifying the cost of investment fees deducted from capital

Uncertainties

Section 2 h) describes the accounting policy for investment management expenses in relation to expenses deducted from the capital value of investments. Quantification of these costs involves asking the relevant managers for information and only some of this information can be independently verified. In cases where the charges relate to an investment as a whole, an estimate needs to be made of the costs applicable to the holding owned by the relevant Fund.

Effect if actual results differ from assumptions

There is a risk that the cost of investment fees deducted from capital may be under or overstated. However, as the costs are included in the fund account by adjusting the change in market value of investments, any inaccuracy in the cost estimate will not change the reported net change in the fund for the year.

Statement of responsibilities for the Statement of Accounts

The responsibilities of the Administering Authority

The Administering Authority's responsibilities require it to:

- make arrangements for the proper administration of the financial affairs of the pension funds in its charge and to secure that one of its officers has the responsibility for the administration of those affairs. The Acting Executive Director of Resources serves as the Section 95 Officer for all of the Council's accounting arrangements, including those of the Lothian Pension Funds. For the Lothian Pension Funds, however, this Section 95 responsibility has been delegated to the Chief Finance Officer, Lothian Pension Fund.
- manage its affairs to secure economic, efficient and effective use of its resources and safeguard its assets.
- Ensure the Annual Accounts are prepared in accordance with legislation (The Local Authority Accounts (Scotland) Regulations 2014), and so far as is compatible with that legislation, in accordance with proper accounting practices (section 12 of the Local Government in Scotland Act 2003).
- Approve the Annual Accounts for signature.

The Statement of Accounts presents a true and fair view of the financial position of the Pension Funds as at 31 March 2016, and their income and expenditure for the year ended 31 March 2016.

COUNCILLOR ALASDAIR RANKIN
Pensions Committee Convener
27 June 2016

Statement of responsibilities for the Statement of Accounts

The responsibilities of the Chief Finance Officer, Lothian Pension Fund

The Chief Finance Officer, Lothian Pension Fund, is responsible for the preparation of the Pension Funds' statement of accounts which, in terms of the CIPFA / LASAAC Code of Practice on Local Authority Accounting in the United Kingdom 2015/16 (the Code of Practice), is required to present a true and fair view of the financial position of the Pension Funds at the accounting date and their income and expenditure for the year (ended 31 March 2016).

In preparing this statement of accounts, the Chief Finance Officer, Lothian Pension Fund, has:

- selected suitable accounting policies and then applied them consistently
- made judgements and estimates that were reasonable and prudent
- complied with the Code of Practice.

The Chief Finance Officer, Lothian Pension Fund, has also:

- kept proper accounting records which were up to date
- taken reasonable steps for the prevention and detection of fraud and other irregularities.

The Statement of Accounts presents a true and fair view of the financial position of the Pension Funds as at 31 March 2016, and their income and expenditure for the year ended 31 March 2016.

JOHN BURNS, FCMA CGMA
Chief Finance Officer, Lothian Pension Fund
27 June 2016

Annual Governance Statement

Roles and responsibilities

The City of Edinburgh Council (the “Council”) has statutory responsibility for the administration of the Local Government Pension Scheme (LGPS) in the Lothian area of Scotland. This responsibility is for three separate Funds: Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund (the “Pension Funds”).

The main functions of the Administering Authority are administration of scheme benefits and the investment of the assets of the Funds. These functions are conducted in accordance with the Local Government Pension Scheme (Scotland) Regulations which are statutory instruments made under the Superannuation Act 1972.

The role of Administering Authority is carried out via:

- The Pensions Committee and the Pensions Audit Sub-Committee.
- The Pension Board
- The Investment and Pensions Division of the Resources Directorate of the Council
- The Investment Strategy Panel
- LPFE Limited and LPFI Limited (not yet trading at 31/3/16), wholly owned subsidiaries of the Council

Further details on the above arrangements can be found in the Governance section of the Management Commentary towards the front of this document.

Scope of Responsibility

As the Administering Authority of the Funds, the City of Edinburgh Council is responsible for ensuring that its business, including that of the Funds, is conducted in accordance with the law and appropriate standards, and that public money is safeguarded, properly accounted for, and used economically, efficiently and effectively. The Council also has a statutory duty under the Local Government in Scotland Act 2003, to make arrangements to secure best value, which is defined as continuous improvement in the way its functions are carried out.

In discharging these overall responsibilities, elected members and senior officers are responsible for implementing effective arrangements for governing the Council’s affairs, and facilitating the effective exercise of its functions, including arrangements for the management of risk. The Pensions Committee has delegated responsibility from Council for additional arrangements specific to the Pension Funds.

To this end, the Council has adopted a Local Code of Corporate Governance that is consistent with the principles of the Chartered Institute of Public Finance and Accountancy (CIPFA) and Society of Local Authority Chief Executives (SOLACE) framework ‘Delivering Good Governance in Local Government’. This statement explains how the City of Edinburgh Council delivers good governance and reviews the effectiveness of those arrangements.

This statement explains how the Council has complied with the Local Code of Corporate Governance and how it meets the CIPFA Code of Practice on Local Authority Accounting in the United Kingdom.

Annual Governance Statement

The Governance Framework

The Pension Funds operate within the wider governance framework of the Council to which is added arrangements specific to the Pension Funds themselves. The governance framework comprises the systems, processes, cultures and values by which the Pension Funds are directed and controlled. It also describes the way the Pension Funds engage with and account to stakeholders. It enables the Pension Funds to monitor the achievement of their objectives and consider whether those objectives have led to the delivery of appropriate, cost-effective services. The framework also applies to any subsidiary companies including LPFE Limited and LPFI Limited which are members of the Council's Group.

The Council's Local Code of Corporate Governance is supported by evidence of compliance which is regularly reviewed and considered by the Governance, Risk & Best Value Committee. The rest of the Group observes the principles of the code.

The Council has a self assessment assurance process to support the Annual Governance Statement given by the Council each year in their Audited Annual Accounts. As part of this process, each Council Company is required to self assess the controls framework within their Company. The Chief Executive Officer of the Pension Funds reviewed the underlying controls framework and confirmed that no significant control problems or other matters existed that should prevent the signing of the Council's Annual Governance Statement.

The Council's Governance and Democratic Services manager reviewed the Evidence of Assurance provided by the Pension Funds and was satisfied with the effectiveness of the controls described. The annual assurance questionnaire process provides the Council's Chief Executive with a level of assurance on the adequacy of the governance arrangements in place within each of the Arms Length Companies for which the Council is the majority shareholder. The Council's Corporate Governance Framework meets the principles of effective governance.

The Funds place reliance upon the internal financial controls within the Council's financial systems and the monitoring in place to ensure the effectiveness of these controls. The relevant key elements of the Council's corporate governance framework, with specific additional reference as appropriate to the arrangements for the Funds, are set out below:

Elements of the governance framework specific to the Pension Funds include:

- Identifying the objectives of the Funds in the Funding Strategy Statement, Statement of Investment Principles and Service Plan.
- With effect from April 2015 the Pensions Regulator is responsible for setting standards of governance and administration for Local Government and other Public Sector pension schemes. The Pension Funds have taken steps to fully integrate compliance with these standards within the overall governance framework operated by the Funds.
- A systematic approach to monitoring service performance by the Pensions Committee, Pensions Audit Sub-Committee, senior officers and stakeholders, including the Pension Board and Independent Professional Observer.
- A structured programme to ensure that Pensions Committee members have the required standard of knowledge and understanding of Local Government Pension Scheme matters.
- Operating within clearly established investment guidelines defined by the Local Government Pension Scheme Investment Regulations and the Funds' Statement of Investment Principles;
- Compliance with the CIPFA Principles for Investment Decision Making and Disclosure in the Local Government Pension Scheme.

Annual Governance Statement

- With the exception of managed funds, unlisted investments and property, all investments are held under custody by a global custodian. The Funds benefit from the custodian's extensive internal control framework.
- Benchmarking of services in terms of standards and cost against other pension funds.

Elements of the governance framework of the Council that are relevant to the Pension Funds include:

- The Council's key corporate vision and priorities are set out and published in the City of Edinburgh Council Business Plan 2016-2020.
- A performance management framework, incorporating internal and public performance reporting, which focuses on continuous improvement of our services, applying reliable improvement methods to ensure that services are consistently well designed based on the best evidence and are delivered on a right first time basis.
- The Council is embedding a culture of commercial excellence to ensure that our services always deliver Best Value. Focused work is underway to further improve standards in buying practices and processes across the Council
- The submission of reports, findings and recommendations from Audit Scotland, the external auditor, other inspectorates and internal audit, to the Corporate Leadership Team, Governance, Risk and Best Value Committee and Council, and to the Pensions Committee and Pensions Audit Sub-Committee for all matters affecting the Funds, where appropriate, supports effective scrutiny and service improvement activities.
- The roles and responsibilities of Elected Members and Officers are defined in Procedural Standing Orders, Committee Terms of Reference and Delegated Functions, Contract Standing Orders, Scheme of Delegation to Officers, the Member/officer protocol and Financial Regulations. These are subject to annual review.
- The Chief Executive has overall responsibility to Council, as head of paid service, for all aspects of operational management and overall responsibility for ensuring the continued development and improvement of systems and processes concerned with ensuring appropriate direction, accountability and control.
- The Acting Executive Director of Resources, as Section 95 Officer, has overall responsibility for ensuring appropriate advice is given to the Council and Group on all financial matters, keeping proper financial records of accounts and maintaining an effective system of internal financial control. For the Funds, the Section 95 officer responsibility has sub-delegated to the Chief Finance Officer, Lothian Pension Fund.
- The Chief Internal Auditor has overall responsibility to review, appraise and report to management and the Governance, Risk and Best Value Committee, and for Pension Fund matters to the Pensions Committee and Pensions Audit Sub-Committee, on the adequacy of the Council's internal control and corporate governance arrangements and on risks relating to approved policies, programmes and projects.
- The Council's Governance and Democratic Services Manager, reporting to the Head of Strategy and Insight, has responsibility for advising the Council on corporate governance arrangements.
- The Governance, Risk and Best Value Committee, and for Pension Fund matters, the Pensions Committee and Pensions Audit Sub-Committee, provides the Council with independent assurance of the adequacy of the governance and risk management frameworks and internal control environment. Also providing independent scrutiny of financial and non-financial performance, approving and monitoring the progress of the Internal Audit risk based plan, and monitoring performance of the internal audit service.

Annual Governance Statement

- The risk management policy and framework set out the responsibilities of elected members, Governance, Risk and Best Value Committee, and for Pension Fund matters, the Pensions Committee and Pensions Audit Sub-Committee, management and staff for the identification and management of risks to corporate and service related priorities.
- The Community Risk Register, Council Risk Register and Service area risk registers identify risks and proposed treatment or actions. These registers are regularly reviewed, updated and reported to the Corporate Leadership Group, which reviews Council-wide risk and reports to the Governance, Risk and Best Value Committee for scrutiny and challenge. For Pension Fund matters the Pensions Committee and Pensions Audit Sub-Committee are responsible for scrutiny and challenge.
- Resilience and business continuity plans are in place for all essential Council services. These set out arrangements for continuing to deliver essential services in the event of an emergency or other disruption.
- Senior management and Heads of Service have formal objectives, with performance reviewed by the appropriate chief officer. Officers have personal work objectives, and receive feedback on their performance through the Council-wide performance review and development process.
- An Elected Members remuneration and expenses scheme is in place and is consistent with the Scottish Government's 'Councillors Remuneration: allowances and expenses – Guidance'. Information on the amounts and composition of elected members salaries, allowances and expenses is published on the Council's website.
- The Council's Governance and Democratic Services Manager ensures that induction training on roles and responsibilities, and ongoing development opportunities, are provided for Elected Members. For the Pension Funds, a policy on Committee and Board member training has been adopted.
- Codes of Conduct that set out the standards of behaviour expected from Elected Members and officers are in place.
- The Employee Code of Conduct, Anti Bribery Policy and Policy on Fraud Prevention set out the responsibilities of officers and Elected Members in relation to fraud and corruption, and are reinforced by the Councillors' Code of Conduct, the Code of Ethical Standards and the Financial Regulations. An annual refresher exercise is undertaken for officers to confirm that they have read and understood the relevant policies.
- The Whistleblowing policy provides a process for disclosure in the public interest about the Council and its activities by officers, Elected Members and others.
- A Register of Members' Interests and Registers of Officers' interests are maintained and available for public inspection.

A significant element of the governance framework is the system of internal controls, which is based on an ongoing process to identify and prioritise risks to the achievement of the Council's objectives, including those relevant to the Pension Funds. Following the establishment of the wholly-owned subsidiary companies, LPFE Limited and LPFI Limited, the Council continues to have appropriate assurance processes and procedures in relation to the responsible officers involved in the administration of the Pension Funds.

Review of Effectiveness

The Local Code of Governance details the Council's arrangements for monitoring each element of the framework and providing evidence of compliance. The Council's Governance and Democratic Services Manager has reviewed the effectiveness of the Code and will report the result to the Governance, Risk and Best Value Committee.

Annual Governance Statement

The Internal Audit Section operates in accordance with CIPFA's Code of Practice for Internal Audit. The Section undertakes an annual work programme based on agreed audit strategy and formal assessments of risk that are reviewed regularly. During the year, the Chief Internal Auditor reported to the Head of Legal and Risk (Interim) but had free access to the Chief Executive, all Executive directors and Elected Members along with reporting directly to the Governance, Risk and Best Value Committee and Pensions Committee.

The Chief Internal Auditor has also provided an assurance statement to the Pensions Committee and Pensions Audit Sub-Committee on the effectiveness of the system of internal control. The opinion in the assurance statement states:

"Whilst Internal Audit have not identified any fundamental weaknesses in the framework of governance, risk management and control at the Fund, based on our work performed in the year (set out below), the management recommendations that remain outstanding at the date of this report, and the work performed during the year over governance, risk management and controls at the City of Edinburgh Council, Internal Audit considers that there are some weaknesses in the framework of governance, risk management and controls which could potentially put the achievement of organisational objectives at risk if not addressed and there are instances of non-compliance with controls that, if not addressed, may put the achievement of organisational objectives at risk. We consider that addressing the matters identified will further enhance the adequacy and effectiveness of governance, risk management and control."

During the year the Internal Audit Section conducted three specific reviews of the internal controls operating within the Pension Funds. The first, review looked at systems for making one-off payments to members (including retirement lump sums, death benefits and transfer payments). Two medium risk and three low risk findings were reported. At the date of preparation of this Statement all of these findings have been addressed with the exception of one of low risk. This relates to the level of checking of retirement quotations not being as rigorous as the checking applied to actual benefit payments. Procedures are being reviewed to address this risk.

The second review looked at the compliance of the Pension Funds with the LGPS Regulations. Two medium risk and two low risk findings were reported. At the date of preparation of this Statement all of these findings have been addressed with the exception of one of medium risk. This relates to the value of Scottish Homes Pension Fund investments held as a single insurance policy exceeding the threshold in the Regulations of 25%. This matter is currently being resolved with the external investment manager, so that the holdings are within the threshold. The third review considered the controls applied to externally managed investments. No risks were identified as a result of this review.

The assurance statement also refers to one finding from 2014/15, this relates to the performance of monthly contribution reconciliations and was originally due to be completed by 31 March 2015. Implementation has proved more difficult than was anticipated with some employer organisations and the completion date for this has been reset to 30 April 2016 with the agreement of the Pensions Committee. Under the revised Pension Administration Strategy, a fine will be levied on any employer failing to submit monthly contribution returns. Any such charge will be effective for the year 2016/17. The Chief Finance Officer of Lothian Pension Fund has assessed progress at 30 April 2016 and is happy that significant improvement has been achieved.

In compliance with standard accounting practice, the Acting Executive Director of Resources has provided the Chief Executive with a statement of the effectiveness of the Group's internal financial control system for the year ended 31st March 2016. It is the Acting Executive Director of Resources' opinion that "The system of control can provide reasonable, but not absolute, assurance that material control weaknesses or irregularities do not exist, and that there is no unacceptable risk of material error, loss, fraud or breach of legislation."

Annual Governance Statement

The Chief Finance Officer of Lothian Pension Fund has provided a statement of the effectiveness of the internal financial control system for the year ended 31st March 2016 for the Pension Funds. It is the Chief Finance Officer's opinion "that reasonable assurance can be placed upon the adequacy and effectiveness of the system of internal control for the Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund."

Certification

It is our opinion, in light of the foregoing, that reasonable assurance can be placed upon the adequacy and effectiveness of the systems of governance that operate within the Group in its administration of the Funds. We consider the governance and internal control environment operating during the financial year from 1 April 2015 to 31 March 2016 to provide reasonable and objective assurance that any significant risks impacting on the Group and its ability to achieve its objectives in properly administering the Funds have and will continue to be identified and actions have and will be taken to avoid or mitigate the impact of any such risks.

Where areas for improvement have been identified and action plans agreed, we will ensure that they are treated as priority and progress towards implementation is reviewed through the governance structures and processes established for the Group and summarised herein. We will continue to review and enhance, as necessary, our governance arrangements.

Governance Compliance Statement

The Regulations that govern the management of Local Government Pension Scheme in Scotland require that a Governance Compliance Statement is published. This statement sets out the extent to which governance arrangements comply with best practice.

The statement below discusses arrangements at 31 March 2016, prior to the introduction of new governance arrangements on 1 April 2016. Please also see the How the Fund works section for an overview of the changes implemented.

Principle		Full Compliance	Comments
Structure	The management of the administration of benefits and strategic management of fund assets clearly rests with the main committee established by the appointing Council.	Yes	The City of Edinburgh Council acts as administering authority and delegates all pension scheme matters to a committee of seven members (Pensions Committee) made up as follows: - Five City of Edinburgh elected members - Two external members - one drawn from the membership of the fund and one drawn from the employers that participate in the funds.
	That representatives of participating LGPS employers, admitted bodies and scheme members (including pensioner and deferred members) are members of either the main or secondary committee established to underpin the work of the main committee.	Yes	The Pensions Committee includes two external places for pension fund stakeholders i.e. one each from the employer and member representatives. Fund members and employers are also represented within Lothian Pension Funds' Pension Board. Membership includes five employer representatives and five member representatives. All members of the Pension Board are invited to attend the meeting of the Pensions Committee and receive the relevant papers prior to those meetings. Two members of the Pension Board attend the Pensions Audit Sub Committee.
	That where a secondary committee or board has been established, the structure ensures effective communication across both levels.	Yes	The Pensions Audit Sub-Committee, consisting of three members of the Pensions Committee, report to the Pensions Committee on their findings and recommendations. Two members of the Pension Board attend the Pensions Audit Sub-Committee in a non-voting capacity. The Pension Board attends the Pensions Committee meetings and takes part in training events. Implementation of investment strategy is delegated to the Executive Director of Resources, who takes advice from the Investment Strategy Panel. The Panel meets quarterly and reports to the Pensions Committee annually.

Governance Compliance Statement

Principle		Full Compliance	Comments
Structure (cont'd)		Yes	The Investment Strategy Panel consists of the Executive Director of Resources, Chief Executive of the Lothian Pension Fund, Chief Finance Officer, Chief Investment Officer and three experienced external industry advisers.
Representation	That all key stakeholders are afforded the opportunity to be represented within the main or secondary committee structure. These include employing authorities (including non-scheme employers, e.g. admitted bodies) and scheme members (including deferred and pensioner scheme members).	Yes	The Pension Board consists of a mix of representatives: <ul style="list-style-type: none"> - Five employer representatives from non-administering authority employers; - Five member representatives appointed by the Trade Unions in accordance with the approach required under Scottish statute.
	Where appropriate, independent professional observers, and expert advisors (on an ad-hoc basis).	Yes	An Independent Professional Observer was appointed in March 2013 to help Committee scrutinise advice. Three external investment advisers sit on the Investment Strategy Panel. A separate specialist Pensions Audit Sub-Committee consisting of three members (including at least two elected members from the City of Edinburgh Council) undertake the audit scrutiny of the pension funds.
	That where lay members sit on a main or secondary committee, they are treated equally in terms of access to papers and meetings, training and are given full opportunity to contribute to the decision making process, with or without voting rights.	Yes	The Pension Board attends the Pensions Committee meetings to help ensure that the operation of the pension funds is in accordance with the applicable law and regulation. The Pension Board takes part in all Committee training events. The Pensions Committee takes account of the views of the Pension Board when making decisions.

Governance Compliance Statement

Principle		Full Compliance	Comments
Selection and Role of Lay Members	That committee or board members are made fully aware of the status, role and function that they are required to perform on either a main or secondary committee.	Yes	A comprehensive training programme including induction is in place. Members of the Pensions Committee and Pension Board are expected to attend no less than three days of training (21 hours) per year. The non-elected members confirm that they have read, signed and will abide by a Code of Conduct (specifically tailored for the Committee and Board) prior to their appointment to the Pensions Committee and Pension Board. The elected members are required to read, sign and abide by the Councillors' Code of Conduct.
	That at the start of any meeting, committee members are invited to declare any financial or pecuniary interest related to specific matters on the agenda.	Yes	The declaration of members' interests is a standard item on the agenda for meetings of the Pensions Committee, Pensions Audit Sub-Committee and Pension Board. A Code of Conduct also applies to all members of the Pensions Committee and the Pension Board.
Voting	The policy of individual administering authorities on voting rights is clear and transparent, including the justification for not extending voting rights to each body or group represented on main LGPS committees.	Yes	Five of the seven places of the Pensions Committee are held by elected members of the City of Edinburgh Council, which is required to retain a 2/3 majority in line with the Local Government (Scotland) Act 1973. The Nomination and Appointments Policy of the Lothian Pension Fund, available on the Fund's website, clearly documents how employer and member representatives will be elected to the Pensions Committee and Pension Board.
Training / Facility Time / Expenses	a) That in relation to the way in which statutory and related decisions are taken by the administering authority, there is a clear policy on training, facility time and reimbursement of expenses in respect of members involved in the decision making process.	Yes	A Training and Attendance Policy is in place covering training requirements and reimbursement of expenses. The policy is available on the Fund's website www.lpf.org.uk
	b) That where such a policy exists, it applies equally to all members of committees, sub-committees, advisory panels or any other form of secondary forum.	Yes	The Training and Attendance Policy applies to both the Pensions Committee and the Pension Board. Advisers have their own professional development obligations.

Governance Compliance Statement

Principle		Full Compliance	Comments
Training / Facility Time / Expenses (cont)	c) That the administering authority considers the adoption of annual training plans for committee and board members and maintains a log of all such training.	Yes	Each Pensions Committee and Pension Board member is expected to attend no less than three days training per year (21 hours) per year. Attendance at meetings and training is monitored and reported.
Meetings frequency	a) That an administering authority's main committee or committees meet at least quarterly.	Yes	The Pensions Committee meets at least four times a year.
	b) That an administering authority's secondary committee or panel meet at least twice a year and is synchronised with the dates when the main committees sits.	Yes	The Pension Board attends all the Pensions Committee meetings and separately meets in advance of each such meetings. Further meetings are held if necessary. The Pensions Audit Sub-Committee is held before the Pensions Committee at least three times a year with further meetings held if necessary. The Investment Strategy Panel meets quarterly or more frequently as required.
	c) That an administering authority who does not include lay members in their formal governance arrangements must provide a forum outside of those arrangements by which the interests of key stakeholders can be represented.	Not applicable	
Access	That subject to any rules in the council's constitution, all members of main and secondary committees or boards have equal access to committee papers, documents and advice that falls to be considered at meetings of the main committee.	Yes	Committee papers and minutes are publicly available on the Council's website and all Committee and Pension Board members have equal access, receiving electronic copies and/or paper copies suitable to their own circumstances.

Governance Compliance Statement

Principle		Full Compliance	Comments
Scope	That administering authorities have taken steps to bring wider scheme issues within the scope of their governance arrangements.	Yes	<p>The Pensions Committee deals with all matters relating to both the administration and investment of the Funds.</p> <p>A separate specialist Pensions Audit Sub-Committee consisting of three members (including at least two elected members from the City of Edinburgh Council) undertake the audit scrutiny of the pension funds.</p> <p>The Convener of the Pensions Committee is also a member of the National Scheme Advisory Board which considers matters on a national level.</p>
Publicity	That administering authorities have published details of their governance arrangements in such a way that stakeholders with an interest in the way in which the scheme is governed, can express an interest in wanting to be part of those arrangements.	Yes	<p>Pensions Committee</p> <p>The City of Edinburgh Council is responsible for the appointment of non elected members to the Pensions Committee.</p> <p>Where required to fill a vacancy, employer bodies that participate in the funds are invited to nominate a suitable representative to be considered for the Pensions Committee. Where required to fill a vacancy, the members of the funds will be invited to nominate themselves to be considered for selection for the Pensions Committee.</p> <p>Pension Board</p> <p>Where required to fill a vacancy or vacancies, employer bodies are invited to nominate suitable representative(s). Similarly trade union representatives are asked to invite nominations, elect and put forward suitable individuals for appointment as Employee Member(s) to the Pension Board.</p> <p>Governance documents, policies and details of Pension Board membership are on the Fund's website. The Fund also communicates regularly with employers and scheme members.</p>

Report

Internal Audit Annual Report for the Year Ended 31 March 2016

Recommendations

- 1.1 It is recommended that the Committee note the internal audit opinion for the year ended 31 March 2016.

Background

- 2.1 The Public Sector Internal Audit Standards (PSIAS) requires that the Chief Internal Auditor delivers an annual opinion to the Pensions Committee that can be used to inform the organisation's Annual Governance Statement. The purpose of this report is to present Internal Audit's opinion on the overall adequacy and effectiveness of the Lothian Pension Fund's framework of governance, risk management and controls, as relevant to our internal audit work performed for the financial year 1 April 2015 to 31 March 2016.
- 2.2 Whilst this report is a key element of the framework designed to inform the Annual Governance Statement, there are also a number of other important sources to which the Pension Committee should look to gain assurance. This report does not supplant the Pensions Committee's responsibility for forming their own view on governance, risk management and control.

Main report

Opinion

- 3.1 Whilst Internal Audit have not identified any fundamental weaknesses in the framework of governance, risk management and control at the Fund, based on our work performed in the year (set out below), the management recommendations that remain outstanding at the date of this report, and the work performed during the year over governance, risk management and controls at the City of Edinburgh Council, Internal Audit considers that there are some weaknesses in the framework of governance, risk management and controls which could potentially put the achievement of organisational objectives at risk if not addressed and there are instances of non-compliance with controls that, if not addressed, may put the achievement of organisational objectives at risk. We consider that addressing the matters identified will further enhance the adequacy and effectiveness of governance, risk management and control.

- 3.2 This opinion is subject to the inherent limitations of internal audit (covering both the controls environment and the assurance over controls) as set out in Appendix 1.

Basis of opinion

- 3.3 Our opinion is based solely on our assessment of whether the governance, risk management and controls in place support the achievement of the Fund's objectives.
- 3.4 We have conducted three specific Pension Fund Reviews during the year;

Review	Findings		
	High	Medium	Low
Immediate Payments	-	2	3
Pension Compliance	-	2	2
Externally managed investments	-	-	-
Total 15/16	-	4	5
<i>Total 14/15 (2 reports)</i>	-	3	-

For all completed internal audit reviews, finalised action plans have been agreed with management for the recommendations made. Completion of these recommendations will assist with improvement to the Fund's governance, risk management and internal control framework.

- 3.7 The total number of Internal Audit recommendations that remain unresolved is set out below:

Review	Findings		
	High	Medium	Low
Immediate Payments	-	-	1*
Pension Compliance	-	1**	-
Pensions Administration (2014/15 audit)	-	1***	-
Total	-	2	1
<i>Total 14/15</i>	-	1	1

* This finding has not yet reached its agreed implementation date and is not overdue.

** This finding relates to the Scottish Homes Fund, which at the time of audit held 59% of the total fund value in a single insurance contract with State Street. This is a breach of the Local Government Pension Scheme investment limits. A revised legal agreement, restructuring the investment to ensure compliance has been received from State Street. This is now being reviewed by the Chief Legal and Risk Officer prior to signature. This action was originally due for completion by 31 March 2016.

*** This finding relates to the performance of monthly contribution reconciliations and was originally due to be completed by 31 March 2015.

Implementation has proved more difficult than was anticipated with some employer organisations and the completion date for this has been reset to 30 April 2016 with the agreement of the Pensions Committee. Under the revised Pension Administration Strategy, a fine will be levied on any employer failing to submit monthly contribution returns. Any such charge will be effective for the year 2016/17, the first payment (and monthly contribution return) for April 2016 being due by 19 May 2016.

- 3.8 We have considered the effect of any changes in the Fund’s systems & objectives as well as the level of resources available to Internal Audit. Given the Fund’s dependence on the City of Edinburgh Council for a number of support services, we have also considered the results of the work that we performed on the governance, risk management and internal control framework in place at the City of Edinburgh Council. Our opinion and findings are set out in the report to the City of Edinburgh Council, Governance, Risk & Best Value Committee on 23 June 2016, entitled ‘*Internal Audit Annual Report and Opinion for the Year Ended 31 March 2016*’.

Conformance with Public Sector Internal Audit Standards

- 3.8 The Public Sector Internal Audit Standards (PSIAS) require us to report annually on conformance. Adoption of the PSIAS is mandatory for UK public sector organisations and they provide a coherent and consistent internal audit framework for the whole of the public sector.
- 3.9 The Chartered Institute of Public Finance & Accountancy (CIPFA) has prepared a Local Government Application Note and a Checklist for Assessing Conformance with the PSIAS in order to allow internal audit teams to evaluate the effectiveness of Internal Audit’s performance. The Checklist, which contains 334 best practice questions, was completed in Q4 2015 as part of the Internal Audit team’s quality programme.
- 3.10 The review identified one substantive areas of non-compliance with the PSIAS that is relevant to Internal Audit’s activities in connection with the Fund.

<i>Area of Non-compliance</i>	<i>Explanation</i>
The Internal Audit team had not evaluated the Risk function and Risk Management processes within the Council.	The structure that the Council traditionally delivered Risk & Internal Audit Services resulted in the Internal Audit function not being sufficiently independent to evaluate the Risk function. During 2015/16, the Internal Audit function has moved towards greater autonomy as part of the transformation process and we now consider that we have reached a position where we are sufficiently independent to conduct a review of the Risk function.

	<p>As a result our internal audit plan for 2016/17 includes for the first time, a review of the activities & operation of the Risk function and the outcome of this will be reported to the Governance, Risk and Best Value Committee in the normal manner.</p>
--	---

Quality Assurance and Improvement Programme

- 3.11 The PSIAS require an ongoing quality assurance and improvement programme (QAIP) that covers all aspects of the internal audit activity, and that the results of this programme are included in the Internal Audit annual report. The QAIP must include both annual internal assessments and external assessments at least every 5 years.
- 3.12 Internal Assessments must include ongoing monitoring of the performance of the internal audit activity and periodic self-assessments. Ongoing monitoring is an integral part of the day-to-day supervision, review and measurement of the internal audit activity, and is incorporated in the routine policies and practices used to manage the internal audit activity. All work is reviewed by qualified staff prior to being issued to ensure it is of sufficient quality and complies with the methodology set out in the Internal Audit Manual.
- 3.13 The requirement for the periodic self-assessment is met by;
- An annual self review of compliance with the PSIAS via reviewing our conformance with the CIPFA Local Government Application Note and Checklist;
 - Analysis of Internal Audit KPI trends;
 - Analysis of feedback received from clients on completed reviews to identify any trends emerging; and
 - The completion of quality review checklists on a sample of reviews to ensure that they comply with the Audit Manual. These reviews will be undertaken by a team member independent of the reviews.
- 3.14 External assessments must be performed every 5 years with the current long-stop date being 31 March 2018. It is currently envisaged that we will take part in the External Quality Assessment (EQA) process of peer reviews that has being facilitated by the Scottish Local Authorities Chief Internal Auditors Group.
- 3.15 Our initial external assessment under this process is provisionally timetabled for the final quarter of 2016/17. The scope of this assessment will be agreed with the Convenor of the Governance, Risk & Best Value Committee and the external assessor prior to work commencing.

- 3.16 For detailed analysis of Internal Audit's KPI trends and the results of the internal quality reviews, please refer to our report to the City of Edinburgh Council Governance, Risk & Best Value Committee on 23 June 2016, entitled '*Internal Audit Annual Report and Opinion for the Year Ended 31 March 2016*'.

Measures of success

- 4.1 Effective governance, risk management and internal control within the Lothian Pension Fund.

Financial impact

- 5.1 No direct financial impact.

Risk, policy, compliance and governance impact

- 6.1 No direct impact.

Equalities impact

- 7.1 No direct impact.

Sustainability impact

- 8.1 No direct impact.

Consultation and engagement

- 9.1 None.

Appendix 1 – Limitations and responsibilities of internal audit and management responsibilities

Limitations and responsibilities of internal audit

The opinion is based solely on the internal audit work performed for the financial year 1 April 2015 to 31 March 2016. The work addressed the Terms of Reference agreed for each individual internal audit assignment as set out in the individual assignment reports. However, where other matters have come to the attention of Internal Audit which is considered relevant, they have been taken into account when forming the opinion.

There might be additional weaknesses in the system of internal control that were not identified because they did not form part of the programme of work, were excluded from the scope of individual internal audit assignments or were not brought to Internal Audit's attention. As a consequence Management and the Committee should be aware that the opinion may have differed if the programme of work or scope for individual reviews was extended or other relevant matters were brought to Internal Audit's attention.

Internal control systems, no matter how well designed and operated, are affected by inherent limitations. These include the possibility of poor judgment in decision-making, human error, control processes being deliberately circumvented by employees and others, management overriding controls and the occurrence of unforeseeable circumstances.

Future periods

The assessment of controls relating to the Fund is for the year ended 31 March 2016. Historic evaluation of effectiveness may not be relevant to future periods due to the risk that:

- the design of controls may become inadequate because of changes in operating environment, law, regulation or other; or
- the degree of compliance with policies and procedures may deteriorate.

Responsibilities of Management and Internal Audit

It is Management's responsibility to develop and maintain sound systems of risk management, internal control and governance and for the prevention and detection of irregularities and fraud. Internal audit work should not be seen as a substitute for Management's responsibilities for the design and operation of these systems.

Internal Audit endeavour to plan its work so that it has a reasonable expectation of detecting significant control weaknesses and, if detected, it carries out additional work directed towards identification of consequent fraud or other irregularities. However, internal audit procedures alone, even when carried out with due professional care, do

not guarantee that fraud will be detected, and examinations by internal auditors should not be relied upon to disclose all fraud, defalcations or other irregularities which may exist.

Statement on the system of internal financial control

1. This statement is given in respect of the internal financial controls operated by The City of Edinburgh Council. As the Council's designated section 95 officer as defined under the provisions of the Local Government (Scotland) Act 1973, I acknowledge my responsibility for ensuring that an effective system of internal financial control is put in place and its effectiveness regularly reviewed.
2. The system of control can provide reasonable, but not absolute, assurance that material control weaknesses or irregularities do not exist, and that there is no unacceptable risk of material error, loss, fraud or breach of legislation. Consequently, the Council continually seeks to improve the effectiveness of its systems of internal control so that irregularities are either prevented or detected within an acceptable period of time. Tracking of agreed audit actions forms a standing item on the Resources Senior Management Team agenda, with progress also regularly reported to the Governance, Risk and Best Value Committee. The effectiveness of the Council's internal financial control framework as a whole is subject to annual review by Audit Scotland, with the principal findings of the most recent annual assessment reported to the Governance, Risk and Best Value Committee in August 2015.
3. The system of internal financial control is based on a framework of regular management information, financial rules and regulations, administrative procedures (including segregation of duties), management supervision and a scheme of delegation and accountability. The system is maintained and developed by Council management and includes:
 - comprehensive budgeting systems;
 - preparation and regular review of periodic reports that measure actual financial performance against forecasts. For 2015/16, the effectiveness and regularity of this review was enhanced through more systematic monitoring and scrutiny of the delivery of approved savings and management of risks and budget pressures by the Corporate Leadership Team (CLT) and elected members. This rigour has again been applied to 2016/17's savings, both prior to and following Council approval, highlighting a need for mitigating actions in some areas;
 - agreement of targets against which financial and operational performance can be assessed;
 - clearly-defined capital expenditure guidelines communicated to services and set out in the Finance Rules. These Rules, alongside the Financial Regulations, were fully updated during the year;
 - an approved long-term financial strategy and plan, updates in respect of which are regularly discussed at the CLT and reported to the Finance and Resources Committee;
 - formal project management disciplines as supported and promoted by the Corporate Programmes Office (and now the wider Transformation Programme), including senior Finance representation on all major project boards and assurance review panels; and
 - formal governance arrangements operated within both subsidiary and associated companies.

4. The Internal Audit section operates in accordance with the Chartered Institute of Public Finance and Accountancy's United Kingdom Public Sector Internal Audit Standards. The Section undertakes an annual programme based on an agreed audit strategy. The plan is based on formal assessments of risk and audit needs which are reviewed regularly to reflect evolving risks and changes within the Council. During 2015/16, the section reported to the Head of Legal, Risk and Compliance until January 2016 and thereafter to the Acting Head of Legal and Risk. However, it also has free access to the Chief Executive, Executive Directors, Heads of Service (including the Head of Finance) and elected members of the Council when required. The Chief Risk Officer has provided an assurance statement that includes his opinion on the adequacy and effectiveness of the system of internal financial control.

5. My review of the effectiveness of the internal financial control system is informed by:
 - assurance certificates on internal control received from all Executive Directors of Council service areas;
 - governance arrangements in place for subsidiary and associated companies and an ongoing assessment of the effectiveness of these arrangements;
 - the work of managers within the Council;
 - the work of internal audit; and
 - external audit reports, in particular the independent annual report on the Council's financial statements and internal control framework.

6. The Council's financial management arrangements conform with the governance requirements of the CIPFA Statement on the Role of the Chief Financial Officer (2010) as set out in the Application Note to Delivering Good Governance in Local Government Framework, an opinion confirmed by Audit Scotland as part of the 2014/15 financial statements audit. Having reviewed the framework, it is therefore my opinion that reasonable assurance can be placed upon the adequacy and effectiveness of the Group's systems of internal control.

7. I have overseen the improvements put in place in response to recommendations made by internal and external audit work during the year. This said, the extent of change underpinning the Council's Transformation Programme reinforces the importance of robust, documented and well-understood procedures and a key priority in 2016/17 will be to ensure that required financial savings are not achieved to the detriment of the internal control framework. I have therefore already worked closely, for example, with internal audit in developing improved financial reporting procedures, including greater transparency of the delivery of savings and management of risks and pressures. In the case of Health and Social Care, appropriate due diligence arrangements have also been put in place with regard to the Council's financial offer to the Integrated Joint Board.

8. I have furthermore overseen work consolidating the Council's long-term financial planning arrangements, recognising the need to keep these matters under regular review. While a balanced overall position against the Council's budget was again delivered in 2015/16, significant pressures were nonetheless apparent, particularly in Health and Social Care. These pressures were addressed through identification of corresponding savings across other service and corporate areas. Formal incorporation within the budget framework of additional investment in both Health and Social Care and Corporate Property gives the potential for these to be addressed on a sustainable basis. Crucial to this sustainability, however, is the delivery of an unprecedented level of savings in 2016/17 and these will be subject to on-going monthly monitoring and discussion at CLT and regular scrutiny by elected members, particularly via the planned series of Budget Challenge meetings.

Hugh Dunn

Acting Executive Director of Resources

23 May 2016

**Annual Report 2016
of
Lothian Pension Fund,
Lothian Buses Pension Fund
and
Scottish Homes Pension Fund**

**“Statement on the system of internal financial control
for the year ended 31 March 2016”**

Section 95 of the Local Government (Scotland) Act 1973 states that “every local authority shall make arrangements for the proper administration of their financial affairs and shall secure that the proper officer of the authority has responsibility for the administration of those affairs”. The Acting Executive Director of Resources serves as the Section 95 Officer for all of the Council’s accounting arrangements, including those of the Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund. For the Pension Funds, however, this Section 95 responsibility has been delegated to the Chief Finance Officer, Lothian Pension Fund.

In compliance with standard accounting practice, the Chief Finance Officer, Lothian Pension Fund, is required to provide the Chief Executive with a statement of the effectiveness of the internal financial control system of the Funds for the year ended 31 March 2016.

The Funds place reliance upon the internal financial controls within the City of Edinburgh Council's financial systems and the monitoring in place to ensure the effectiveness of these controls. Accordingly, the “Statement on the system of internal financial control” by Hugh Dunn, Acting Executive Director of Resources, City of Edinburgh Council, dated 23 May 2016, refers.

Within this overall control framework, specific arrangements for the Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund are detailed in the Annual Governance Statement. These include:

- identifying the objectives of the Funds in Funding Strategy Statement, Statement of Investment Principles and Service Plan;
- monitoring of the achievement of objectives by the Pensions Committee, Pensions Audit Sub-Committee and senior officers;
- the Chief Legal and Risk Officer, Lothian Pension Fund, reports on any non-compliance with laws and regulations, with a detailed compliance framework covering key activities;
- a risk management policy, including a regularly reviewed risk register, serves to manage risk to the Funds appropriately;
- codes of conduct for elected members, members of the Pensions Board and officers;
- a structured programme to ensure that both Committee and Pension Board members have the required standard of knowledge and understanding of Local Government Pension Scheme matters;
- operating within clearly established investment guidelines defined by the Local Government Pension Scheme Investment Regulations and the Funds' Statements of Investment Principles;
- compliance with the CIPFA Principles for Investment Decision Making in the Local Government Pension Scheme;

- with the exception of managed funds, unlisted investments and property, all investments are held under custody by a global custodian. The Funds benefit from the custodian's extensive internal control framework;
- benchmarking of services in terms of quality and cost against other Local Government Pension Scheme funds.

The Chief Internal Auditor has provided an "Internal Audit Annual Report and Opinion for the year ended 31 March 2016", in accordance with the requirement set out in the Public Sector Internal Audit Standards.

In light of the above, it is my opinion that reasonable assurance can be placed upon the adequacy and effectiveness of the system of internal financial control for the Lothian Pension Fund, Lothian Buses Pension Fund and Scottish Homes Pension Fund.

**John Burns, FCMA, CGMA
Chief Finance Officer,
Lothian Pension Fund**
