

Amendment by Conservative Group

Planning Committee

Item 8.1 - Planning and Building Standards Improvement Plan

Committee

Adds to recommendation

1.1.1

subject to the annual indicators required by Scottish Government to be reported to Committee on a quarterly basis; and to approach Council's Strategy and Communications Team to request a review of the IMprovement Plan to consider whether the data being collected and actions proposed are sufficient to drive the required improvement. The outcome of this engagement to be reported to Committee in 2 cycles.

Planning Committee

Item 8.3 – Implementing the Programme for the Capital: Coalition Commitments six monthly progress update

To add recommendations 1.1.3 and 1.1.4:

- 1.1.3 Under Commitment 13 it is important to see full audit trail of monies in and monies out and is unacceptable to report that another Committee monitors spend - both Committees should have oversight of the resources accrued and their disbursal;
- 1.1.4 Notes with concern the receipt of the letter from the Deputy Chief Planning Officer appointing a Reporter to scrutinise the robustness of the Supplementary Guidance on Developer Contributions and Infrastructure Delivery; that this is a highly unusual situation; and the prohibition on adopting the Supplementary guidance before 22 February 2019 and calls for a Report setting out the implications on this for the delivery of the Local Plan.

City of Edinburgh Council

Planning Committee

12 December 2018

Item 11.1 - Green Motion – Cutting climate change emissions in the City Plan 2030

Committee

- 1) Notes the recent publication of the Intergovernmental Panel on Climate Change (IPCC) 'Special Report on Global Warming of 1.5C', which found that limiting global warming to 1.5C is still possible but requires rapid, far-reaching and unprecedented change in all aspects of society;
- 2) Notes that under section 44 of the Climate Change (Scotland) Act 2009, “a public body must, in exercising its functions, act in the way best calculated to contribute to the delivery of the targets [set out in the Act]”;
- 3) Notes that the Scottish Government recently introduced the Climate Change (Emissions Reduction Targets) (Scotland) Bill, which sets emissions reduction targets of 66% by 2030, 70% by 2040 and 90% by 2050, though some climate scientists and commentators call for more ambitious targets;
- 4) Therefore committee agrees that the forthcoming City Plan 2030 should set out policies and proposals for achieving significant reductions in climate change emissions in line with nationally and council-agreed targets; and the Main Issues Report (MIR) should consult on how those emissions reductions should be achieved.
