

Regulatory Committee

9.30am, Monday, 8 March 2021

Demand for Taxis: Six Monthly Update

Executive/routine Wards Council Commitments	Executive All
---	------------------

1. Recommendations

- 1.1 Regulatory Committee is asked to:
 - 1.1.1 Note the attached reports from Vector Transport Consultancy (Appendix 2);
 - 1.1.2 Note that on 16 March 2018 Committee agreed to maintain the limitation policy and to fix the number of available licences at 1,316;
 - 1.1.3 Agree to maintain the limit of 1,316 on the number of taxis licensed in the city; and
 - 1.1.4 Agree to use this research as the basis for determining demand in any future applications for a taxi licence until the next taxi stance survey is completed.

Demand for Taxis: Six Monthly Update

2. Executive Summary

- 2.1 This report provides an interim update on demand for taxis in the city. The report outlines the most recent analysis of demand, carried out by Vector Transport Consultancy in February and March 2020 and then in November 2020. Comparisons are provided in order to allow the Committee to consider the position both before and after COVID-19 restrictions were put in place.

3. Background

- 3.1 The Council has a policy of limiting the number of taxi licences issued within the city, utilising the powers available to it under Section 10 (3) of the Civic Government (Scotland) Act 1982. This power can only be used if the Council is satisfied that there is no 'significant unmet demand' for taxis. The Council is required to keep this position under regular review.
- 3.2 A full demand survey is carried out every three years. In order to ensure that there are not significant changes in demand Regulatory Committee had previously agreed to commission consultants to review taxi demand at more frequent intervals. These interim surveys are carried out every six to eight months and provide the Committee with data and analysis concerning 'any significant unmet demand' for taxis.
- 3.3 A full survey of demand was last conducted in 2017, with the results reported to the Committee on [21 August 2017](#).
- 3.4 On [16 March 2018](#) Committee agreed to maintain the limitation policy and to fix the number of available licences at 1,316. This was last reviewed as part of the interim survey of demand on [20 May 2019](#).
- 3.5 Interim survey results were last reported to the Committee in [October 2019](#).
- 3.6 The research findings are generally reported to the Committee at six monthly intervals. Research which took place in February and March 2020 and then in November 2020 forms the basis of this report. Appendix 1 provides summary analyses of the Vector Transport Consultancy reports. The full reports can be provided if required.

4. Main report

- 4.1 The Council acts as a Licensing Authority for the purpose of licensing taxis within the city. The Council has adopted a policy of limiting the number of taxi licences issued where there is no evidence of significant unmet demand. All applications for taxi licences are currently referred to the Licensing Sub-Committee for hearing and decision.
- 4.2 The restriction policy has not been successfully legally challenged since 2011.
- 4.3 The Council's policy was challenged in the form of appeals to the Sheriff against decisions of the Licensing Sub-Committee to refuse certain applications for taxi licences. However, importantly, the Sheriff's decisions made it clear that, in order to maintain a restriction, the Council must regularly inform itself on provision, and specifically on whether there is any unmet demand. A historic appeal against a previous decision was heard in Court 2018 and the Council successfully defended its position.
- 4.4 The Scottish Government has also issued guidance for licensing authorities which operate a taxi limitation policy. The guidance clearly indicates that the level of unmet demand must be kept under regular review.
- 4.5 The Vector Transport Consultancy research provides Committee with an up to date review of the level of demand for taxis in the city. If accepted by the Committee, this will form the basis on which individual licences would be considered. Research to update the position with respect to unmet demand will continue to be carried out approximately every six months.
- 4.6 The surveys include monitoring of periods which might usually reflect peak demand, e.g. after midnight and, in particular, late nights on Fridays and Saturdays. The reports show that overall there was no evidence of peak demand or significant unmet demand in either period.
- 4.7 The Council has no record of receiving any complaints about the availability of taxis within the city since the Committee last considered this issue. In addition, there have been no complaints about the number of taxis raised with the Council by the hospitality or business communities. Elected Members will be aware of feedback from the taxi trade that the rising number of Private Hire Cars (PHCs) may have further suppressed demand for taxis.
- 4.8 There remain 1,316 taxi licences in circulation and there are currently no pending applications for new taxi licences.
- 4.9 Any future applications for new taxi licences will continue to be referred to the committee for determination in the chronological order in which they were received, unless there are exceptional reasons to prioritise a particular application (such as the death of a licence holder).

5. Next Steps

- 5.1 Demand surveys will continue to be used to assist the Licensing Sub-Committee to determine future applications for new taxi licences.

6. Financial impact

- 6.1 The cost of the Vector Transport Consultancy research is met from the income received from taxi licence fees.

7. Stakeholder/Community Impact

- 7.1 This regular monitoring is necessary to allow the Committee the option to maintain its policy of limiting the number of taxis. Interim surveys are carried out on the Council's behalf by Vector Transport Consultancy approximately every six months.
- 7.2 There is a risk that unsuccessful individual applications for taxi licences may be appealed to the Sheriff. The research described in this report reduces the risk to the Council from any challenge to the current limitation policy.
- 7.3 No protected groups are affected.
- 7.4 Any increase in the taxi fleet by increasing the number of licences issued would have an impact on the environment within the City, potentially including levels of pollution.

9. Appendices

- 9.1 Appendix 1 - Summary of observations in February/March 2020 and November 2020
- 9.2 Appendix 2 - Vector report dated April 2020
- 9.3 Appendix 3 - Vector report dated January 2021

TAXI MONITORING REPORT ANALYSIS

This report has been prepared on behalf of the Executive Director of Place to assist members of the Licensing Sub-Committee in relation to applications for new taxi licences which may be considered at any meeting on or after 8 March 2021.

Stance observations indicate that there is no significant unmet demand for taxi services at this time.

Stance Observation Surveys

1. Vector Transport Consultancy provided the results of taxi rank surveys which were carried out at least twice at each location in February/March 2020, and again in November 2020. A selection of representative ranks was observed on different days and at different times. The 22 ranks selected for observation for both periods reflect locations both within and outwith the city centre.
2. There are currently 82 taxi stances located throughout the city with a combined capacity for 293 waiting taxis. The stances observed make up 37% of the overall stances within the city.
3. The February/March 2020 stance observations indicate that, at individual stances at the 22 'core' ranks, most passengers were able to obtain a taxi immediately. The average wait time per passenger who did have to wait was 1 minute 53 seconds.
4. The November 2020 stance observations indicate that, at individual stances at the 22 'core' ranks, most passengers were able to obtain a taxi immediately. The average wait time per passenger who did have to wait was 8 minutes 3 seconds.
5. At the additional eight ranks surveyed, levels of activity were generally low. Passenger volumes observed were low and no passenger waiting was observed.

Assessment of Demand for Taxi Services in Edinburgh – February/March 2020

6. The stance observations indicate that most passengers at ranks were able to obtain a taxi immediately. The overall average time that a passenger had to wait at the 'core' ranks observed was seven seconds.
7. Evidence of 'peak demand' in the form of waiting times longer than three minutes was recorded at certain stances. The Committee should note that the times given include instances where potential passengers 'gave up' waiting and left the queue.
 - Lothian Road (Friday 28 February 2020)
Between 03:00 and 05:00 the average passenger wait time was 5 minutes 20 seconds;

- Rutland Street (Saturday 7 March 2020)
Between 16.00 and 18.00 the average passenger wait time was 5 minutes 6 seconds
- Wester Hailes (Thursday 5 March 2020)
Between 16:00 and 18:00 the average passenger wait time was 13 minutes 10 seconds

Assessment of Demand for Taxi Services in Edinburgh – November 2020

8. The stance observations indicate that most passengers at ranks were able to obtain a taxi immediately. The overall average time that a passenger had to wait at the 'core' ranks observed was 5 minutes 45 seconds.
9. Evidence of waiting times longer than three minutes was recorded only once, at Edinburgh Airport between 12:00 and 14:00 on Saturday 5 December where the average passenger wait time was 8 minutes 3 seconds.
10. Therefore, taking into account the data provided by Vector Transport Consultancy, it has been concluded that there is no evidence of significant unmet demand for taxi services at this time.

Edinburgh interim survey of taxi stances February - March 2020

Survey Report

1 BACKGROUND AND OBJECTIVES

1.1 Introduction

This survey has been conducted by Vector Transport Consultancy on behalf of the City of Edinburgh Council.

The survey was undertaken to collect usage statistics from taxi stances around Edinburgh. The survey maintains the approach taken by previous, similar surveys, when surveys were conducted at frequencies of approximately six months. Following on from the July 2019 survey, this survey adopts a similar scope, with 22 core survey sites supplemented by eight stances not regularly surveyed.

The 22 taxi stances to be regularly surveyed are:

- Castle Street
- Cluny Avenue
- Dundas Street
- Frederick Street
- Grassmarket
- Grosvenor Street
- Hanover Street
- High Street
- Holyrood Road
- Little France Crescent
- Lothian Road
- Morningside Road
- Morrison Street
- Nicolson Square
- Queensferry Street
- Rutland Street
- Waverley Bridge
- Wester Hailes
- Edinburgh Airport
- Casselbank Street
- Haymarket Terrace
- Market Street

The City of Edinburgh Council maintains a list of current taxi stances, which includes most active taxi stances. This list is available online at the following web address:

http://www.edinburgh.gov.uk/download/downloads/id/3566/licensed_taxi_stances_in_edinburgh.pdf

The list indicates 82 taxi stances, of which 22 are regularly surveyed. In order to provide some additional indication of the level of use experienced at the stances which are not regularly surveyed, eight of the stances which are not regularly surveyed during the interim rank surveys, are chosen for a one-off survey during each of the interim rank surveys.

For the interim surveys undertaken during March 2020, eight stances from the list were surveyed. The eight stances surveyed were:

- Arboretum Place
- North West Circus Place
- Raeburn Place
- Canongate
- Falcon Avenue
- Merchiston Place
- Sciennes Road
- Warrender Park Road

2 REGULAR INTERIM RANK SURVEYS

2.1 Summary of rank survey results

The results of the regular interim rank surveys are summarised in the following tables.

Table 1 - Summary of interim stance survey results part 1

Site no.	Street	Period	Edinburgh Council Rank No.	Day	Date	Survey Hours	Total no. taxis at rank	Average taxi wait time	Total passengers	Number of passengers who had to wait for a taxi to arrive.	Average passenger wait time for all passengers (mm:ss)	Average passenger wait time for passengers who had to wait for a taxi to arrive at the rank (mm:ss)

2.2 Weather conditions during the surveys

The following table presents the maximum and minimum temperatures experienced each day in Edinburgh, during the survey period.

Table 3 - Maximum and minimum temperatures

Date	Minimum temperature (°C)	Maximum temperature (°C)
28/02/20	2	5
29/02/20	2	9
01/03/20	2	6
02/03/20	2	7
03/03/20	3	10
04/03/20	-2	9
05/03/20	-2	8
06/03/20	-2	8
07/03/20	1	12
08/03/20	3	11
09/03/20	3	10
10/03/20	4	10
11/03/20	2	9
12/3/20	0	7
13/3/20	2	7
14/3/20	3	10

General weather conditions during each of the survey periods were as follows:

Table 4 - Weather conditions

Daytime	Daytime Weather	Night time weather
28/02/20	Sunny with drizzle	Fog
29/02/20	Sunny cloudy	Light rain
01/03/20	Sunny with rain showers	Light rain showers
02/03/20	Sunny cloudy	Passing clouds
03/03/20	Sunny cloudy	Clear
04/03/20	Sunny with passing clouds	Clear
05/03/20	Sunny cloudy	Passing clouds
06/03/20	Sunny with passing clouds	Rain showers
07/03/20	Sunny cloudy	Rain showers
08/03/20	Sunny cloudy	Passing clouds
09/03/20	Sunny with rain showers	Light rain showers
10/03/20	Light rain showers	Passing clouds
11/03/20	Sunny with rain showers	Light rain showers
12/3/20	Sunny with rain showers	Light rain showers
13/3/20	Sunny with rain showers	Light rain showers
14/3/20	Sunny cloudy	Dry, clouds

During the rank observation periods, there were occasionally heavy rain showers. There is no clear evidence that the observations of activity at the taxi ranks were affected by weather.

2.3 Commentary on Results

The highest passenger volume observed over any of the survey periods was 222 passengers observed at Market Street between 16:00 and 18:00 on Friday afternoon. The most significant passenger waiting occurred at Lothian Road during the early hours of Saturday morning (03:00 to 05:00), when 56 passengers had to wait for taxis to arrive at the taxi stance. These passengers had to wait for an average of 1 minutes and 45 seconds. When taking all the ranks into account, 137 passengers in total had to wait for taxis to arrive at the ranks. These 137 passengers waited an average of 1 minutes and 53 seconds.

In total, 2,636 passengers were observed. Most passengers arrived at the ranks to find taxis waiting to be hired. Hence, the majority of passengers did not have to wait for taxis.

2.4 Maximum taxi vehicle waiting times

The maximum time that a taxi was observed waiting at each rank, during each survey period, is presented in the following table.

Table 5 - Maximum taxi vehicle waiting times

Site no.	Street	Period	Edinburgh Council Rank No.	Day	Date	Survey Hours	Maximum wait time

2.5 Maximum passenger waiting times

The maximum time that a passenger was observed waiting at each rank, during each survey period, is presented in the following table.

Full details of passenger wait times are presented in Appendix E.

Table 6 - Maximum passenger waiting times

Site no.	Street	Period	Edinburgh Council Rank No.	Day	Date	Survey Hours	Maximum wait time
1	Castle Street	1	5	Thursday	05/03/2020	12:00-14:00	0:00:00

2.6 Conclusions

Stance observations indicate that most passengers at ranks were able to obtain a taxi immediately. When we aggregate all passenger waiting time and divide by the total number of passengers (including both those who didn't have to wait and those who did have to wait) the average wait time per passenger was 7 seconds.

3 ADDITIONAL RANK SURVEYS

3.1 Comments on the surveys

A selection of 8 of the ranks in Edinburgh, not included in the regular interim surveys, was made. Each of these locations was recorded on video camera from 7am Thursday 18th July 2019 – 7am Sunday 21st July 2019. For each of the three 24 hour periods, there was an analysis of how busy the hourly intervals were. These were categorised by activity levels as:

- **No** = no taxis in the hour,
- **Low** = fewer than 3 taxi hires per hour,
- **Active** = 3 or more taxi hires per hour.

This analysis is presented in Appendix C.

3.2 Summary of rank survey results

At active stances, several periods, in common with the periods analysed for the main interim rank surveys, were chosen for detailed analysis of Taxi arrival and departure times and passenger volume and waiting analysis. These detailed results are presented in the following table.

Table 7 - Summary of additional rank survey results

Street	Edinburgh Council Rank No.	Day	Date	Survey Hours	Total no. taxis at rank	Average taxi wait time	Total passengers	Number of passengers who had to wait for a taxi to arrive.	Average passenger wait time for all passengers (mm:ss)	Average passenger wait time for passengers who had to wait for a taxi to arrive at the rank (mm:ss)

3.4 Passenger waiting

There were no instances of passenger waiting observed at the additional ranks.

3.5 Weather conditions during the surveys

Temperatures and weather conditions are presented in Table 3 and Table 4.

3.6 Conclusions

Levels of activity at the additional ranks surveyed were generally low.

Sciennes Road, Thursday

Table 91 – Sciennes Road, Thursday

No activity was observed at this rank between 12:00 and 14:00.

Warrender Park Road, Thursday

Table 92 – Warrender Park Road, Thursday

No activity was observed at this rank between 12:00 and 14:00.

APPENDIX C – SUMMARY OF ACTIVITY LEVELS AT ADDITIONAL RANKS

An assessment was made regarding general levels of activity at each of the additional ranks surveyed. Each hour was classified according to the following levels:

No activity = No

Fewer than three taxis per hour stopping at the rank = Low

Three or more taxis per hour stopping at the rank = Active

Activity levels were assessed each day, from 7:00 am through to 7:00 am the following morning.

	APPENDIX B – ADDITIONAL RANK SURVEYS – DETAILED TABLES OF TAXI ARRIVALS AND DEPARTURES	58
	APPENDIX C – SUMMARY OF ACTIVITY LEVELS AT ADDITIONAL RANKS	63

1 BACKGROUND AND OBJECTIVES

1.1 Introduction

This survey has been conducted by Vector Transport Consultancy on behalf of the City of Edinburgh Council.

The survey was undertaken to collect usage statistics from taxi stances around Edinburgh. The survey maintains the approach taken by previous, similar surveys, when surveys were conducted at frequencies of approximately six months. This survey covers 22 core survey sites supplemented by eight stances not regularly surveyed. The same 22 core survey sights were covered for each periodic survey. A different set of eight additional stances are selected for each periodic survey.

The 22 taxi stances to be regularly surveyed are:

- Castle Street
- Cluny Avenue
- Dundas Street
- Frederick Street
- Grassmarket
- Grosvenor Street
- Hanover Street
- High Street
- Holyrood Road
- Little France Crescent
- Lothian Road
- Morningside Road
- Morrison Street
- Nicolson Square
- Queensferry Street
- Rutland Street
- Waverley Bridge
- Wester Hailes
- Edinburgh Airport
- Casselbank Street
- Haymarket Terrace
- Market Street

The City of Edinburgh Council maintains a list of current taxi stances, which includes most active taxi stances. This list is available online at the following web address:

http://www.edinburgh.gov.uk/download/downloads/id/3566/licensed_taxi_stances_in_edinburgh.pdf

The list indicates 82 taxi stances, of which 22 are regularly surveyed. In order to provide some additional indication of the level of use experienced at the stances which are not regularly surveyed, eight of the stances which are not regularly surveyed during the interim rank surveys, are chosen for a one-off survey during each of the interim rank surveys.

For the interim surveys undertaken during November and December 2020, eight stances from the list were surveyed. The eight stances surveyed were:

- Chambers Street
- Cultins Road
- Drumbrae Drive (Bus Terminus)
- Drumbrae South (Service Road)
- East Fountainbridge
- Lauriston Place (Tollcross)
- George Street (Assembly Rooms)
- Teviot Place

2 REGULAR INTERIM RANK SURVEYS

2.1 Summary of rank survey results

The results of the regular interim rank surveys are summarised in the following tables.

Table 1 - Summary of interim stance survey results part 1

Site no.	Street	Period	Edinburgh Council Rank No.	Day	Date	Survey Hours	Total no. taxis at rank	Average taxi wait time	Total passengers	Number of passengers who had to wait for a taxi to arrive.	Average passenger wait time for all passengers (mm:ss)	Average passenger wait time for passengers who had to wait for a taxi to arrive at the rank (mm:ss)

2.2 Weather conditions during the surveys

The following table presents the maximum and minimum temperatures experienced each day in Edinburgh, during the survey period.

Table 3 - Maximum and minimum temperatures

Date	Minimum temperature (°C)	Maximum temperature (°C)
20/11/2020	1	12
21/11/2020	6	12
22/11/2020	4	8
23/11/2020	4	12
24/11/2020	6	13
25/11/2020	3	9
26/11/2020	2	7
27/11/2020	1	8
28/11/2020	-3	8
29/11/2020	-3	8
30/11/2020	2	11
01/12/2020	0	10
02/12/2020	2	9
03/12/2020	-1	4
04/12/2020	-1	7
05/12/2020	1	7

General weather conditions during each of the survey periods were as follows:

Table 4 - Weather conditions

Daytime	Daytime Weather	Night time weather
20/11/2020	Cloudy / Damp	Cloudy / Dry
21/11/2020	Mixed Sunny / Cloudy with occasional showers.	Cloudy / Dry
22/11/2020	Overcast / Dry	Cloudy / Dry
23/11/2020	Overcast / Wet Spells	Cloudy / Wet
24/11/2020	Overcast / Wet Spells	Cloudy / Wet
25/11/2020	Overcast / Wet Spells	Overcast / Wet Spells
26/11/2020	Sunny cloudy / Dry	Cloudy / Dry
27/11/2020	Overcast / Dry	Cloudy / Dry
28/11/2020	Overcast / Dry	Cloudy / Dry
29/11/2020	Sunny cloudy / Dry	Cloudy / Dry
30/11/2020	Sunny with rain showers	Clear / Dry
01/12/2020	Overcast / Dry	Overcast / Dry
02/12/2020	Overcast / Wet Spells	Overcast / Wet Spells / Sleet
03/12/2020	Overcast / Wet Spells	Cloudy / Dry
04/12/2020	Cloudy / Showers	Cloudy / Showers
05/12/2020	Cloudy / Showers	Cloudy / Wet

During the rank observation periods, there were occasionally heavy rain showers. There is no clear evidence that the observations of activity at the taxi ranks were affected by weather.

2.3 Commentary on Results

The highest passenger volume observed over any of the survey periods was 38 passengers observed at Edinburgh Airport between 16:00 and 18:00 on Friday afternoon. Very little passenger waiting was observed, Three passengers were observed waiting at the Lothian Road rank on two separate occasions. Four passengers were observed waiting at the Edinburgh Airport rank. These passengers boarded a single taxi. The longest passenger wait was at the Edinburgh Airport rank, at just over eight minutes.

In total, 404 passengers were observed. Almost all passengers arrived at the ranks to find taxis waiting to be hired. Hence, few passengers had to wait for taxis.

2.4 Maximum taxi vehicle waiting times

The maximum time that a taxi was observed waiting at each rank, during each survey period, is presented in Table 6.

2.5 Passenger waiting times

The time that a passenger was observed waiting at each rank, during each survey period, is presented in the following table.

Table 5 - Passenger waiting times

Rank location	Date	passengers started to queue (HH:MM:SS)	passengers stopped queuing (HH:MM:SS)	Number of passengers	Did passengers leave in a taxi Y/N	Wait time	Wait time (decimal minutes)	Aggregate wait times (Passenger minutes)
Lothian Road	25/11/2020	17:44:59	17:47:29	1	Y	00:02:30	2.50	2.50

2.6 Conclusions

Stance observations indicate that almost all passengers at ranks were able to obtain a taxi immediately. Some taxis waited for extensive periods at the ranks.

3 ADDITIONAL RANK SURVEYS

3.1 Comments on the surveys

A selection of 8 of the ranks in Edinburgh, not included in the regular interim surveys, was made. Each of these locations was recorded on video camera from 7am Thursday to 7am the following Sunday. For most of the ranks, this three day period was from Thursday 19th November 2020 to Sunday 22nd November 2020. However, the rank at East Fountainbridge was occupied by roadworks for this period and was surveyed a week later, from Thursday 26th November 2020 to Sunday 29th November, once the roadworks had been removed. For each of the three 24 hour periods, there was an analysis of how busy the hourly intervals were. These were categorised by activity levels as:

- **No** = no taxis in the hour,
- **Low** = fewer than 3 taxi hires per hour,
- **Active** = 3 or more taxi hires per hour.

This analysis is presented in Appendix C.

3.2 Summary of rank survey results

At active stances, several periods, in common with the periods analysed for the main interim rank surveys, were chosen for detailed analysis of Taxi arrival and departure times and passenger volume and waiting analysis. These detailed results are presented in the following table.

Table 7 - Summary of additional rank survey results

Street	Edinburgh Council Rank No.	Day	Date	Survey Hours	Total no. taxis at rank	Average taxi wait time	Total passengers	Number of passengers who had to wait for a taxi to arrive.	Average passenger wait time for all passengers (mm:ss)	Average passenger wait time for passengers who had to wait for a taxi to arrive at the rank (mm:ss)

Teviot Place	Saturday	21/11/2020	16:00-18:00	0:14:18

3.4 Passenger waiting

There were no instances of passenger waiting observed at the additional ranks.

3.5 Weather conditions during the surveys

Temperatures and weather conditions are presented in Table 3 and Table 4.

3.6 Conclusions

Levels of activity at the additional ranks surveyed were generally low.

APPENDIX C – SUMMARY OF ACTIVITY LEVELS AT ADDITIONAL RANKS

An assessment was made regarding general levels of activity at each of the additional ranks surveyed. Each hour was classified according to the following levels:

No activity = No

Fewer than three taxis per hour stopping at the rank = Low

Three or more taxis per hour stopping at the rank = Active

Activity levels were assessed each day, from 7:00 am through to 7:00 am the following morning.
