

National Climate Resilience Summit: ambition statement

Scotland is already experiencing warming, with more extreme weather events and rising sea levels and these changes will continue due to the locked-in effects of global climate change. As a nation we must prepare for these changes in order to protect our places, communities, businesses and nature. This will include understanding climate risk and vulnerabilities, planning and implementing adaptation actions, unlocking finance and supporting transformational change at local, national and international levels. The Climate Change Committees recent independent Assessment of UK Climate Risk is clear it will be impossible to achieve a just transition to net zero or tackle inequalities more widely without also addressing climate risks, and that the time for us to build resilience is now.

As delegates to the National Climate Resilience Summit we support collective action to transform Scotland into a climate resilient nation. As part of this journey, we:

1. support enhanced understanding and action on climate risk and look forward to collaborating across sectors;
2. will further embed climate adaptation in our culture, corporate governance and organisational priorities as an immediate priority and throughout 2022 and beyond; and
3. express our support for an ambitious global deal at COP26 which addresses adaptation and resilience needs in a fair and just way.
