## Treasury Management: Annual Report 2018/19

## Executive/routine <br> Wards <br> Council Commitments

## 1. Recommendations

1.1 It is recommended that the Committee:

- $\quad$ Notes the Annual Report on Treasury Management for 2018/19; and,
- Refers the report to Council for approval and subsequent referral by Council to the Governance, Risk and Best Value Committee for their scrutiny.

## Report

## Treasury Management: Annual Report 2018/19

## 2. Executive Summary

2.1 The purpose of this report is to give an update on Treasury Management activity in 2018/19. In line with the intended strategy reported in March 2018, the Council continued to fund its borrowing requirement from the reduction of its investment balances. The only borrowing completed during the financial year was £140k in interest free loans from SALIX and just over £2.7m from PWLB to match the capital advances for the loans to the Edinburgh Living Mid-Market Rent LLP. To mitigate some of the interest rate risk to which the Council is exposed, the Council also transacted a forward starting loan during 2018/19. The £60m committed market borrowing is a forward starting loan with PBB which was agreed in August 2018 with the monies to be drawn down in October 2020.

## 3. Background

3.1 The Council has adopted the CIPFA Code of Practice on Treasury Management in the Public Sector, and under the code, an Annual Report on Treasury Management must be submitted to the Council after the end of each financial year. A separate mid-term report will also be produced during the financial year.

## 4. Main report

4.1 The key points in this report are that:

- For the fifth year in a row, the Council's capital repayments were greater than its new capital expenditure funded by borrowing, so the Council's underlying need to borrow for a capital purpose reduced by £27.1m during the year;
- Just under $£ 50 \mathrm{~m}$ PWLB matured during the year helping to reduce overall borrowing costs to the Council. There was $£ 2.7 \mathrm{~m}$ borrowed from the PWLB in January and £140k interest free loan from Salix at financial year end. Appendix 4 shows a list of the Councils debt;
- The Council continued its successful medium-term strategy of funding capital expenditure from a reduction in temporary investments and at the end of the financial year the Council’s external borrowing was £157m under its Capital Financing Requirement; and
- the average interest rate on the Cash Fund for the year was $0.71 \%$, continuing to outperform the benchmark, which was $0.51 \%$ for the year.

## Prudential Indicators

4.2 Treasury Management is undertaken with regard to the CIPFA Code of Practice for Treasury Management in the Public Services and CIPFA's Prudential Code.
Appendix 1 contains Prudential Indicators showing a breakdown of the actual outturn of 2018/19.

## Borrowing Overview

4.3 Appendix 2 shows details of the Council's borrowing for 2018/19 including an economic commentary for the year from the Council's treasury advisors, Arling close.
4.4 The Council continued to fund capital expenditure from temporary investments only borrowing $£ 140 \mathrm{k}$ of interest free funds and $£ 2.7 \mathrm{~m}$ from the PWLB for Edinburgh Living. The Council also agreed forward borrowing of £60m from PBB to help reduce interest rate risk on a large future borrowing requirement.

## Investment Out-turn

4.5 Appendix 3 shows the Investment Out-turn for 2018/19. Investment continues to be made via the Cash Fund arrangement.
4.6 The Council's money is invested via the Treasury Cash Fund. The Cash Fund encompasses a number of organisations, including Lothian Pension Fund. Interest is accrued on a monthly basis and performance is evaluated against a benchmark, which is 7-day LIBID.
4.7 The average interest rate on the fund for the year was $0.71 \%$. This continued to show significant outperformance against the benchmark which was $0.51 \%$ for the year. Appendix 3 shows details of investment performance alongside historical investment balances.

## Conclusions

4.8 The Strategy set in March 2018 regarding borrowing was fully implemented and achieved significant savings for the Council.
4.9 $£ 60 \mathrm{~m}$ forward borrowing was completed to manage the interest rate risk on a future project.
4.10 The investment return for 2018/19 continued to show out-performance against the Fund's benchmark, although low in absolute terms, while maintaining the security of the investments.

## 5. Next Steps

5.1 The Treasury team will continue to operate its Treasury Cash Fund with the aim of out-performing its benchmark of 7-day London Interbank Bid Rate (LIBID) and manage the Council's debt portfolio to minimise the cost to the Council while mitigating risk.
6. Financial impact
6.1 The Treasury Cash Fund has generated significant additional income for the Council.
7. Stakeholder/Community Impact
7.1 There are no adverse stakeholder/community impacts arising from this report.
8. Background reading/external references
8.1 None

Table 1 - Capital Expenditure 2018/19
The capital programme is re-phased annually once the unaudited out-turn of the previous year is known. The original estimates above reflect the budget position as reported in the Treasury Strategy in March 2018, with the revised figures representing the projected position reported to the Finance and Resources Committee in August 2018 following the re-phasing of the programme.
The following table shows how the £266.7m of capital expenditure incurred in 2018/19 was funded:

Table 2 - Source of Funding for Capital Expenditure 2018/19
The CEC Total column shows expenditure of $£ 266.7 \mathrm{~m}$ being partly funded by capital grants and capital receipts, leaving only $£ 53.9 \mathrm{~m}$ to be funded by borrowing. However, the Council repaid principal of $£ 80.9 \mathrm{~m}$ for previous capital advances, giving a net reduction in the need to borrow of £27.1m. In addition, previous capital advances of $£ 1.6 \mathrm{~m}$ were repaid on behalf of the former Police and Fire joint boards, giving a total reduction in the need to borrow of £28.7m.
(b) Indicator 2 - Ratio of Financing Costs to Net Revenue Stream

## Borrowing Overview

The Council's treasury advisor, Arlingclose, has provided the following economic review of the year:

After spiking at over $\$ 85 /$ barrel in October 2018, oil prices fell back sharply by the end of the year, declining to just over $\$ 50$ in late December before steadily climbing toward $\$ 70$ in April 2019. UK Consumer Price Inflation (CPI) for February 2019 was up 1.9\% year/year, just above the consensus forecast but broadly in line with the Bank of England's February Inflation Report. The most recent labour market data for the three months to January 2019 showed the unemployment rate fell to a new low $3.9 \%$ while the employment rate of $76.1 \%$ was the highest on record. The 3-month average annual growth rate for pay excluding bonuses was $3.4 \%$ as wages continue to rise steadily and provide some upward pressure on general inflation. Once adjusted for inflation, real wages were up 1.4\%.

After rising to $0.6 \%$ in the third calendar quarter from $0.4 \%$ in the second, fourth quarter economic growth slowed to $0.2 \%$ as weaker expansion in production, construction and services dragged on overall activity. Annual GDP growth at $1.4 \%$ continues to remain below trend. Following the Bank of England's decision to increase Bank Rate to 0.75\% in August, no changes to monetary policy have been made since.

The US Federal Reserve continued its tightening bias throughout 2018, pushing rates to the 2.25\%-2.50\% range in December. However, a recent softening in US data caused the Fed to signal a pause in hiking interest rates at the last Federal Open Market Committee (FOMC) meeting in March.

With the 29 ${ }^{\text {th }}$ March 2019, the original EU 'exit day' now been and gone, having failed to pass a number of meaningful votes in Parliament, including the rejection of Theresa May's deal for the third time, MPs voted by a majority of one (313 to 312) to force the prime minister to ask for an extension to the Brexit process beyond $12^{\text {th }}$ April in order to avoid a no-deal scenario. Recent talks between the Conservative and Labour parties to try to reach common ground on a deal which may pass a vote by MPs have yet to yield any positive results. The EU must grant any extension and its leaders have been clear that the terms of the deal are not up for further negotiation. The ongoing uncertainty continues to weigh on sterling and UK markets.

While the domestic focus has been on Brexit's potential impact on the UK economy, globally the first quarter of 2019 has been overshadowed by a gathering level of broader based economic uncertainty. The US continues to be set on a path of protectionist trade policies and tensions with China in particular, but with the potential for this to spill over into wider trade relationships, most notably with EU. The EU itself appeared to be show signs of a rapid slowdown in economic growth with the major engines of its economy, Germany and France, both suffering misfires from downturns in manufacturing alongside continued domestic/populist unrest in France. The International Monetary Fund downgraded its forecasts for global economic growth in 2019 and beyond as a consequence.

Figure 1 below shows PWLB borrowing rates since 2008. This clearly shows a decrease in borrowing rates mainly due to the uncertainty surrounding Brexit.

The strategy for 2018/19 approved in March 2018 was to continue to fund capital expenditure by reducing cash deposits with the only borrowing completed a small amount interest free and from the PWLB to mitigate interest rate risk when lending to Edinburgh Living. However, as detailed in Table 5, the total underlying need to borrow fell by $£ 27 \mathrm{~m}$ during the year. Table 6 below summarises the outstanding debt portfolio during the year.

| Under-borrowed | 138.988 | Under-borrowed |  | 157.441 |

Table 6 - Outstanding Debt Portfolio 2018/19
$£ 49.656 \mathrm{~m}$ of PWLB debt matured during the year. However, the only replacement borrowing taken out during the year was £2.734m from the PWLB and £140k in interest free loans from SALIX. Therefore, the Council's borrowing fell by just over $£ 47 \mathrm{~m}$ over the year. This does not include the agreed forward borrowing of $£ 60 \mathrm{~m}$ due to be drawn down in October 2020.

2018/19 was the fifth year in a row that the repayment of previous capital advances were greater than new capital advances funding by borrowing, reducing the Council's underlying need to borrow. This, and the under-borrowing strategy to not replace maturing debt, has
meant that over the last five years the Council’s external debt has fallen by £236m. Figure 2 below shows the Council's total borrowing and cost of the borrowing.

The total interest cost in servicing the Council's debt in 2018/19 was $£ 63 \mathrm{~m}$, over $£ 15 \mathrm{~m}$ lower than it was 5 years ago.

For a number of reasons, in recent years it has become less attractive for banks to continue to hold local authority LOBO loans. In 2016 Barclays unilaterally waived the optionality in their loans, turning them into long term fixed rate loans. During 2018/19 one holder of loan authority LOBO loans put their entire portfolio up for sale. The Council bid to buy back the $£ 5 \mathrm{~m}$ loan we had from them with the intention of re-financing it with the PWLB showing a modest long term saving. However, even at that level the Council's bid was unsuccessful and the loan is now held by a pension fund.

We are also aware that a number of Councils have repaid or restructured their LOBO loans with RBS. We have been in dialogue with RBS on the options which might be available to the Council in relation to the Inverse LOBO loans for a number of months. The terms which have been offered to the Council are potentially better than in the original contract but are still onerous given current market conditions. A number of potential outcomes have been put forward with different financial and accounting implications. The discussions are on-going to evaluate which, if any, of these outcomes represent the best long-term value to the Council.

We will continue to evaluate options for restructuring the Council's market loans as and when opportunities arise.

## Investment Out-turn 2018/19

The Council's money is invested via the Treasury Cash Fund. The Cash Fund encompasses a number of organisations, including Lothian Pension Fund. Interest is accrued on a monthly basis and performance is evaluated against a benchmark, which is 7-day LIBID.

The Bank of England's Monetary Policy Committee (MPC) increased Bank Rate by 0.25\% in August 2018 to $0.75 \%$ with no changes being made since. The MPC had been expected to raise rates in May but held due to weak economic data. The Bank was confident that the dip was temporary and moved to increase rates in August. The move was questioned due to Brexit uncertainty however the Banks governor, Mark Carney, said that monetary policy could be adjusted if necessary.

Figure 3 below shows the investment performance since April 2011.

Figure 3 - Treasury Cash Fund Investment Performance

The average interest rate on the Cash Fund for the year was $0.71 \%$, which continued to outperform the benchmark, which was $0.51 \%$ for the year. The fund generated income of just over $£ 1.5 \mathrm{~m}$ for the financial year to CEC.

The emphasis remained on security during the financial year with the return of the principal sum being the main concern. With the Strategy being around the security of the investments, Cash Fund money invested with banking institutions was held on instant access call and a 31 day notice account with a highly credit rated institution and a large percentage of the fund was held with other Local Authorities on short term fixed deposits
and notice accounts. Figure 4 below shows the distribution of the Cash Fund investments since April 2007.

Figure 4 - Cash Fund Investments since inception

As can be seen in Figure 5 below the weighted average life (WAL) at the end of the financial year was 32 days. The WAL at the time of the increase in UK Bank Rate in August was under 10 days which meant the fund could react quickly to take advantage of the increase in interest rates.
