**Application for Advert Consent 20/03692/ADV
at Advertising Drum, Lauriston Place, Edinburgh.
Arts and culture advertising structure.**

Item number

Report number

Wards

B11 - City Centre

Summary

The proposal accords with Regulation 4 (1) of the Town & Country Planning (Control of Advertisements) (Scotland) Regulations 1984 (as amended), and the Council's guidance on Advertisements, Sponsorship and City Dressing and Guidance for Businesses.

Amenity and public safety will not be compromised by the installation of the advertising drum.

The proposal preserves the appearance and character of the Marchmont, Meadows and Bruntsfield Conservation Area and will have no impact upon the setting of nearby listed buildings.

There are no other material considerations which outweigh this conclusion.

Report

Application for Advert Consent 20/03692/ADV at Advertising Drum, Lauriston Place, Edinburgh. Arts and culture advertising structure.

Recommendations

1.1 It is recommended that this application be Granted subject to the details below.

Background

2.1 Site description

The site is a pedestrianised area of hardstanding in front of the five-storey Blood Donor Medical building on Lauriston Place.

There is currently a Just East Cycle Bike station located on the hardstanding, which runs alongside a raised grassed area with trees and planting. A metal barrier is positioned between the area of hardstanding and the public road.

The surrounding area is mixed use with a mix of commercial and purpose-built modern medical buildings, sitting alongside traditional terraces. To the north a row of Category B Listed four-storey classical terraced houses are situated behind a line of mature trees (Listed 12/12/1974 Ref: LB47891).

This application site is located within the Marchmont, Meadows And Bruntsfield Conservation Area.

2.2 Site History

There is no relevant planning history for this site.

Main report

3.1 Description of the Proposal

This application seeks advertisement consent for the installation of an Arts and Culture Advertising Drum on the area of widened pavement.

The proposed design is cylindrical, essentially an advertising column. The tubular body of the drum is created using a rolled galvanised steel panel, with galvanised steel sheeting wrapped around the concrete base at the foot of the drum. The drum's cylinder body will measure approximately 2.4 metres in height, with a poured concrete base reaching 200mm. The structure and base at its widest part will cover an area of approximately 1.3 metres.

The design incorporates a flat copper lid with green roof. This is designed to patinate to a verdigris effect over time and provide ecological benefits by being adorned by a living roof of Ivy.

The proposal is part of a wider initiative through the Arts and Culture sector within Edinburgh to meet current and future advertising needs on a financially accessible basis, whilst at the same time, helping to maintain a cleaner City. The scheme seeks to promote the reduction of fly-posting etc in the City by contracting Clean-Down services within a 30-metre radius of each Arts and Culture Advertising Drum which removes unauthorised advertising such as flyposting, poster/railing boards, cable ties, stickers and graffiti, tagging etc. As such, enhancing the amenity of the area, and improving the public realm, as per the Public Realm Strategy 2009.

A statement in support of the application has been submitted detailing the importance of the Advertising Drum. The statement can be viewed on the Planning and Building Standards Online Services.

3.2 Determining Issues

Do the proposals affect the amenity of the locality? In the determination of the suitability of the site for the display of advertisements, the Planning Authority shall have regard to the general characteristics of the locality including the presence of any feature of historical, architectural, cultural or similar interest. The authority may disregard any advertisements displayed in the locality.

Do the proposals affect public safety? The Planning Authority shall in particular consider whether any such display is likely to obscure, or hinder the ready interpretation of, any road traffic sign, railway signal, or aid to navigation by water or air.

3.3 Assessment

To address these determining issues, the Committee needs to consider whether:

- a) The impact of the proposal on amenity is acceptable;
- b) The proposal would compromise public safety and
- c) Any Public Comments have been addressed.

Regulation 4 (1) of the Town & Country Planning (Control of Advertisements) (Scotland) Regulations 1984 (as amended) states that advertisement control shall be exercisable only in the interests of amenity and public safety.

Advertisements must be compatible with the Council's Street Design Guidance section within the Edinburgh Design Guidance. The proposal should not increase street clutter, nor result in potential obstructions for those with visual impairments or other disabilities.

Section 2.2 of the Council's Outdoor Advertising and Sponsorship Guidance also refers to various additional documents which support the enhancement of the public realm throughout the city which should be considered. This guidance constitutes a material factor in the assessment of applications for advertisement consent. Section 9 of the Guidance, 'Small Format Outdoor Advertising Displays/ Advertising on Street Furniture' is also applicable.

Furthermore, the Council's non-statutory 'Guidance for Businesses' seeks to ensure that the display of advertisements preserve the character and appearance of the conservation area, being compatible with the Conservation Area Character Appraisal, along with protecting the setting of any nearby listed buildings.

a) Amenity

The Marchmont, Meadows and Bruntsfield Conservation Area Character Appraisal emphasises the well- proportioned Victorian tenemental perimeter blocks with Baronial detailing and the substantial area of the open parkland formed by the Meadows and Bruntsfield Links.

In this instance, the advertisement drum will be installed centrally within the pedestrianized area. It will not result in street clutter. It will sit against the backdrop of the raised grassed area, planting and existing street furniture. Its design is acceptable in scale and form and utilises appropriate materials that will not detract from the character and appearance of the conservation area. The green roof provides an organic, colourful and environmentally friendly element to the streetscape.

The applicant has confirmed a gardening/management company will be retained to maintain the roof top of the structure.

The proposal is in keeping with the character appraisal.

Given the distance, the proposal will no discernible impact upon the setting of listed terrace opposite.

Overall, the proposal will have no adverse impact on the amenity of the area and will preserve the character and appearance of the conservation area and setting of the listed buildings.

b) Public Safety

The drum will be located centrally on the pavement, set back from the edge adjoining the public road and is located away from the existing pedestrian crossings.

Its size and positioning ensure it will not impede pedestrian movements, and there is adequate space for pedestrian and wheelchair/pushchair users to pass.

The structure will not distract drivers passing or impede driver's line of sight.

The Roads Authority was consulted on the proposal and has raised no concerns with regards to road or pedestrian safety.

c) Public Comments

Five letters were submitted in support of the proposal.

Material Considerations

- carefully designed;
- in keeping with the character of area;
- adds colours and enhances character and appearance of area and
- good positioning and location.

non-material considerations

- tidy and better to maintain than alternatives;
- necessary to help recover and rebuild post Covid-s19 and help local arts;
- cost effective and
- reduces fly tipping.

Conclusion

The proposal accords with Regulation 4 (1) of the Town & Country Planning (Control of Advertisements) (Scotland) Regulations 1984 (as amended), and the Council's guidance on Advertisements, Sponsorship and City Dressing and Guidance for Businesses.

Amenity and public safety will not be compromised by the installation of the advertising drum.

The proposal preserves the appearance and character of the Marchmont, Meadows and Bruntsfield Conservation Area and will have no impact upon the setting of nearby listed buildings.

There are no other material considerations which outweigh this conclusion.

It is recommended that this application be Granted subject to the details below.

3.4 Conditions/reasons

Conditions:-

1. Consent is granted for a period of five years from the date of consent.

Reasons: -

1. In order to accord with the statutory requirements of the Town and Country Planning (Scotland) Acts.

Financial impact

4.1 The financial impact has been assessed as follows:

The drums project is led by the Council's Culture Service and provides a significant income stream for the Service. The drums also provide a low cost street advertising medium for the Council's Cultural Grants clients and the city's cultural venues. The financial benefits are not a material consideration in the planning assessment of the proposals.

Risk, Policy, compliance and governance impact

5.1 Provided planning applications are determined in accordance with statutory legislation, the level of risk is low.

Equalities impact

6.1 The equalities impact has been assessed as follows:

The application has been assessed and has no impact in terms of equalities or human rights.

Sustainability impact

7.1 The sustainability impact has been assessed as follows:

This application is not subject to the sustainability requirements of the Edinburgh Design Guidance.

Consultation and engagement

8.1 Pre-Application Process

Pre-application discussions took place on this application.

8.2 Publicity summary of representations and Community Council comments

Five letters were submitted in support of the proposal.
