Recent news	Background
<p><b>Net Zero 2030 Strategy – progress update</b></p> <p>The draft Net Zero 2030 city strategy will be brought to the June 2021 Policy and Sustainability Committee meeting, where the Committee will be asked to agree the draft strategy for public consultation.</p> <p>The strategy will bring together city partners, made up of public and private organisations that collectively have the power, resources and solutions necessary for Edinburgh to achieve net zero by 2030.</p> <p>Engagement with city partners during the first part of 2021 has found a strong appetite for collaboration on the strategy content. The pre-strategy consultation period is therefore being extended to maximise the potential for collaboration and early engagement with city partners on the strategy as a whole and in order to identify joint high-level actions across key emissions areas.</p> <p>The planned publication date of October 2021 (coinciding with COP 26) will remain unchanged.</p>	<p><b>Contact</b></p> <p>Andrea Mackie, Senior Policy &amp; Insight Officer, Strategy and Communications.</p> <p><a href="mailto:andrea.mackie@edinburgh.gov.uk">andrea.mackie@edinburgh.gov.uk</a></p>
