

Amendment by the Green Group

Governance Risk and Best Value Committee

21 September 2021

Item 6.1 – Work Programme

Committee:

- Requests a report within two cycles on how the re-opening of Community Centres was taken forward during the pandemic up to the current date, including feedback from CCs themselves and a timeline of activity.
- As a result of at P&S committee urgent decisions made around community centres not having been implemented as requested, and a Health and Social report not addressing the decision made by Council, GRBV would like to review the processes and protocols around how decisions are implemented, to ensure that communications and information is accurate and effective.
- Requests a report in two cycles covering:
 - how formal and informal committee and council actions are taken forward by officers following committee decisions and commitments made by directors and other officers in the course of committee business
 - the process followed by Committee Services to notify directorates of actions to be taken forward from Council and Committee decisions and how they are tracked.
 - the protocols for officers carrying out agreed actions
 - A review of the 2 specific cases above and lessons learned.
