

# Coalition Addendum

## Transport and Environment Committee

11 November 2021

### Item 7.1 Active Travel Measures- Travelling Safely

Adds

Recognises that a complete active travel network is necessary for safe journeys for those who choose to travel by bike in the city and that the reintroduction of alternative road features such as loading facilities can effectively reduce the safety aspects of an active travel network and impact on its continuity and potentially on levels of use.

Requests particular focus from officers to monitor the impact of these proposed changes to the active travel and public transport environment across the area that includes Braid Road and Comiston Road and to report back to the Transport & Environment Committee within one year.
