

QUESTION NO 39

By Councillor Cowdy for answer by the Convener of the Transport and Environment Committee at a meeting of the Council on 27 October 2022

In response to increased instances of flooding across the city from extreme heavy rainfall events, and complaints from residents, the flood prevention team acknowledged the serious issue and said, in 2021:

- The Council and Scottish Water are collaborating through a drainage partnership, which also encompasses SEPA to address these issues together.
- The Council is working closely with Scottish Water to develop surface water management plans, which identify the most critical areas in this city for flooding.
- It is not feasible or practical to design road drainage or sewers to cope with extreme events until there is a better understanding of the extent of the problem across the city.

Question (1) When will the drainage partnership be reporting their findings to Council?

Answer (1)

Question (2) Have the most critical areas in this city for flooding been identified?

Answer (2)

Question (3) What steps are being taken to understand the extent of the problem across the city?

Answer (3)

Question (4) When will suggested reporting on a strategy for the Blue/Green Infrastructure in the City come before Committee or the Council?

Answer (4)
