

Culture and Communities Committee

10.00am, Tuesday, 7 March 2023

Response to motion by Councillor Thornley – Playparks Investment

Executive/routine	Routine
Wards	All
Council Commitments	

1. Recommendations

- 1.1 It is recommended that the Culture and Communities Committee:
 - 1.1.1 Notes this update on investment in Play areas; and
 - 1.1.2 Approves the rationale for future play area investment.

Paul Lawrence

Executive Director of Place

Contact: Bob McAllister, Parks Technical Manager

E-mail: bob.mcallister@edinburgh.gov.uk

Response to motion by Councillor Thornley – Playparks Investment

2. Executive Summary

- 2.1 This report responds to an adjusted motion by Councillor Thornley, which was approved by the Council on 22 September 2022, and provides an update on the investment made by the Council in play areas, the rationale for investment, details of the sites that have been assessed as a priority for future investment and summarises the design considerations to ensure that play areas are a challenging but safe, inclusive, and sustainable environment for children to enjoy.
- 2.2 The report also outlines the discussions with Edinburgh and Lothian Greenspace Trust (ELGT) around play park investment to allow the service to focus greater attention on play park inspection and repair.

3. Background

- 3.1 With an increasing demand on open space for other purposes, the importance of providing good quality, accessible play parks are more important than ever. Children need the social and play opportunities purpose-built play areas can offer and the benefits they provide in physical and mental health, social cohesion, and overall wellbeing.
- 3.2 Excluding sport specific areas, the Council has 189 play areas with over 900 items of play equipment. The provision of play areas themselves is not a statutory duty however their routine inspection and maintenance is a mandatory requirement.
- 3.3 The British Standard BS EN 1176 informs the design and installation of play equipment, and BS EN 1177 supports the safety surfaces required to reduce the consequences of a child falling. All play areas are designed and built to comply with these standards.

Approved Motion

- 3.4 On [22 September 2022](#), the Council approved an adjusted motion by Councillor Thornley. The motion recognised the importance of playparks to local communities for exercise and socialisation and requested a report including, but not exclusive to:
 - The criteria against which play parks are judged when considering them for refurbishment, and how that affected prioritising locations for work, including

information on whether areas with high levels of deprivation are prioritised for new play parks currently and if not, how this might be done.

- Details of which play parks are currently considered most in need of refurbishment, and which play parks are being prioritised for repair over the next three years; and
- Which play parks are currently accessible including, but not exclusive to; wheelchair accessible surfaces, adjacent disabled parking access, and accessible play equipment.

4. Main Report

Play Funding

- 4.1 Play specific revenue funding ensures all Council owned play areas receive regular safety inspections, routine equipment maintenance, and repairs to damaged equipment and surfaces.
- 4.2 Capital funding from the Council, developer’s contributions and third-party grants are used to refurbish play areas and replace damaged or dangerous equipment over the capital de minimis of £10,000.
- 4.3 At the meeting of the Finance and Resources Committee on [8 February 2018](#) a capital funding programme for play was agreed at £200,000 per year for five years to 2022/23. ([Capital Investment Programme](#)).
- 4.4 In addition, as part of the Scottish Government’s commitment to play, all Local Authorities were awarded a five-year programme of capital funding to support children having access to quality play parks in their own community.
- 4.5 Edinburgh was awarded £414,000 in both 2021/22 and 2022/23.
- 4.6 The Scottish Government recently advised the Council of the investment sums over the next three years, and these are detailed in Table 1 below.

Table 1

Financial Year	Grant Allocation
2023/24	£811,000
2024/25	£1,216,000
2025/26	£2,027,000

- 4.7 The Scottish Government recognised that a multi-year grant settlement would allow Local Authorities to plan accordingly. Distribution was based on population 0-14 years (93%) and rurality (7%) and is paid via the monthly General Capital Grant.
- 4.8 The extra funding can only be used to continue a programme of play area renewal. The extent of renewal, and refurbishment varies across the whole play estate and is influenced by local plans, investment priorities and engagement and consultation with children and young people.

- 4.9 An eligible play park for investment is one which is:
- 4.9.1 Local authority owned, managed, or maintained;
 - 4.9.2 Designated for play; and
 - 4.9.3 Free to access and open to all.
- 4.10 Play parks in private ownership, those that require an entry fee or those only available to specific groups or with conditions for entry are out with scope. Play parks with equipment (swings, slides etc) aimed at children aged 0-14 are included as are other facilities used by the same age group (for example pump tracks or skate parks), but Multi Use Game Areas (MUGAs) or dedicated sports fields are out with the scope.

Play Area Improvements

- 4.11 The Council is currently implementing improvements in a number of play areas across the city.
- 4.12 If applied across each of the Council's play areas, the funding available over the next three years would provide for an average investment of £22,033 per play area.
- 4.13 Appendix 1 provides a summary the play areas across the city, with details of the projects underway or in progress. The primary reason for the investment is highlighted in column one (e.g. Age – equipment at end of life, PAP – a play action priority, EF- equipment failure, S75 – funded from developer's contribution) and the outcome from the investment is shown in column six.
- 4.14 The play investment programme is structured to target play areas that are most in need of refurbishment. This is achieved by balancing the local demand for play, the current condition of equipment (determined by an annual independent evaluation), the assessed play value and a site's proximity to other play areas.
- 4.15 The cost of refurbishing a play area is dependent on several factors including the condition of existing equipment, whether there is a local requirement to maintain or to upgrade the play value and the durability/longevity of the equipment installed. The average cost to refurbish a play area is currently estimated at £100,000. Except for vandalism or new localised funding, the frequency of refurbishment or the replacement of equipment is entirely linked to a site's usage. For example, the high popularity of the East Meadows Magnet Play results in the regular replacement of worn-out equipment and safety surfaces.

Working with Edinburgh and Lothians Greenspace Trust (ELGT)

- 4.16 The Council has a Framework Agreement in place with ELGT to place contracts to deliver green space projects, with no guarantee of volume, with them from 3 March 2022 – 31 March 2026.
- 4.17 Discussions are currently ongoing with them on the potential to become the Council's play park investment partner. Any agreement reached with ELGT would see them undertaking consultation, design, procurement, and oversight of construction/refurbishment for a play park. The Council would identify the

investment projects over a 12-month period and have final sign off on individual play park design.

- 4.18 ELGT also have better opportunities to lever additional funding. Whilst, in their view, additional funding opportunities for play parks themselves is limited they would have the potential to lever additional funding to support play park investment, for example improving a path network to a play park to make it more inclusive and accessible.
- 4.19 This would allow the Council to have an increased focus on regular structural and safety inspections and ongoing repairs and maintenance. It is currently proposed to increase the team of inspectors, and to appoint a Lead inspector to ensure that these inspections are progressed timeously.

Rationale for Play Area Investment

- 4.20 The Council's Play Space Access Standard has been instrumental in supporting the right of all children to access quality opportunities for play and has helped to avoid the duplication of low value play.
- 4.21 The standard sets out that households should have access to at least one of the following:
 - 4.21.1 A play space of good play value within 800m walking distance; or
 - 4.21.2 A play space of very good play value within 1,200m walking distance; or
 - 4.21.3 A play space of excellent play value within 2,000m.
- 4.22 Play investment is focused on reducing play inequalities as measured by the number of households served by the Play Access Standard.
- 4.23 The [2016 Scottish Household Survey](#) showed that most children have access to play areas but availability differed according to levels of deprivation - especially within urban areas. Deprived neighbourhoods have less access to the natural environment and parents are less likely to think it was safe for children to travel alone to play areas. Previous research also found that the quality of play was poor when deprivation levels were high.
- 4.24 The Scottish Government is considering introducing regulations for Play Sufficiency Assessments. This is because the National Planning Framework 4 contains a new policy on play, which recognises providing quality opportunities for children of all ages to play will benefit their physical and cognitive development and uphold their right to engage in play and recreational activities. While regulations on Play Sufficiency Assessments are being developed, the Play Space Access Standard will continue to guide investment.
- 4.25 Priority will be given to the refurbishment of play areas and equipment located within neighbourhoods where deprivation levels are considered high and where the quality and quantity of play provision has fallen below target levels. Prior to this new approach, play park investment decisions have been solely based on asset condition and have not taken account of deprivation factors.

4.26 Appendix 2 shows the distribution of Council maintained play areas against the Scottish Index of Multiple Deprivation (SIMD). Play areas located within the lowest 10% are highlighted in red and have an average age of 11 years. The average age of the city's play areas is currently 17 years.

Play Design and Accessibility

4.27 To minimise exclusion from play, refurbished play areas (regardless of size) have inclusive qualities built into their design. Play areas are designed to support play across a range of abilities and life courses and help improve fine and gross motor skill for all users.

4.28 Design considerations include results from user group and community feedback, site accessibility, path widths, safety surface quality, sand containment, sensory equipment and planting, pet free areas and the zoning into age-appropriate areas.

4.29 Whenever possible, equipment is accessible using ramps, railing and ground level access. Colour, shape, and form are further components to support a play area appealing to a broad range of abilities.

4.30 Appendix 3 provides a summary of the inclusion and accessibility characteristics of the city's play areas and shows those with inclusive equipment, other equipment, disabled parking, access paths and the types of surfaces in the play area:

- Play equipment: that has inclusive qualities helps support children of all abilities playing together on an equal footing in a child-centred environment. An assessment of equipment has indicated that currently 30% of the city's parks have inclusive equipment. Equipment may not necessarily be wheelchair friendly to be included but it does support a wide range of abilities playing together. As loose-filled safety surfaces cause access difficulties, any equipment assess as inclusive within these play areas has been removed.
- Disability parking: the urban nature of play areas restricts the provision of parking bays, with most sites only offering on street parking. Consideration will be giving to increasing the provision of disability parking within these settings.
- Path access: 93% of play and wheels areas are accessible by a path suitable for wheelchairs and buggies.
- Bark mulch: Previously bark mulch was considered a cost-effective and natural safety surface for use in play areas. Increases in cost, frequency of replacement and the access difficulties it causes has led it to being phased out. Currently 12% of sites have it as a safety surface which will be removed on refurbishment.

4.31 Where play area improvements are planned, these will include incorporating accessible equipment. However, as shown in Appendix 3, it is recognised that there are a number of play areas which are not included in the programme due to asset condition, but which do not currently have accessible equipment available. Therefore it is proposed to allocate £60,000 within the play area investment programme from 2023/24 onwards to introduce accessible play equipment in these play areas moving forward.

- 4.32 As also noted in Appendix 3, there are some play areas that do not have accessible path access. Officers will work to identify funding opportunities through the wider parks capital investment programme to address this wherever possible.
- 4.33 On the [26 April 2022](#), the Culture and Communities Committee noted the intention to improve skatepark facilities and to carry out community engagement to seek the views on the potential refurbishment/upgrade of the skatepark within Burdiehouse Valley Park. ELGT have been commissioned to undertake this engagement and are currently developing proposals for approval. Should there be support, the project will be included within the play refurbishment/renewal programme.

5. Next Steps

- 5.1 Appendix 4 highlights the play area investment planned for 2023/24 onwards and the principal reason for this investment. Column 5 of appendix 4 details the Outcome/Action planned for each of the areas. As a minimum, the investment should support maintaining each site's current play value. Where there is a local requirement for a higher play value (e.g., moving from good to very good standard) this is also indicated.
- 5.2 A further audit of the percentage of households that are now served by the Play Standard will be undertaken to prioritise areas, where there is a demand for play, but is not currently served by the standard.
- 5.3 It is expected that Play Sufficiency Assessments will replace the Play Standard when regulations and procedures are agreed with Scottish Government and guidance has been provided.
- 5.4 Existing Council resources, framework contracts and Scotland Excel contracts are used when available.
- 5.5 ELGT will continue to work in partnership with the Council to support the development, community engagement and delivery of play area projects and to source extra funding for play and the wider park estate.

6. Financial impact

- 6.1 Current and future play area investment will be met from the Council's investment in play areas, the new £4.9m Scottish Government funding and other grants secured. Further details of the Scottish Government funding is summarised above.
- 6.2 Projects can attract additional investment including planning-led developer contributions, contract community benefits, community fundraising and third-party grants all of which can significantly increase the project sums available.
- 6.3 It is anticipated that ELGT will support project delivery for at least 50% of the £4.9m investment sum. This will be in addition to the previously agreed partnership Framework Agreement of £3m over a four-year period (Finance and Resources

Committee [3 March 2022](#)). Support remains conditional on additional project and community benefits being realised with no guarantee of volume.

- 6.4 When funding permits, play area investment below the capital de minimis of £10,000 is funded through revenue budgets.

7. Stakeholder/Community Impact

- 7.1 Stakeholder/community involvement is an essential precursor to the replacement / refurbishment of play areas and this engagement, to shape the final designs, will continue for the full refurbishment projects listed within Appendix 4.
- 7.2 There are significant health and safety and service delivery failure implications by not addressing the maintenance and remediation of play area equipment and surfaces.
- 7.3 Failure of play area equipment has a negative impact on the play and recreation value of sites and the accessibility of the city's greenspace.
- 7.4 Prior to undertaking the refurbishment of a play area, a programme of local consultation and community engagement is routine completed and results strongly influence the final design. Consultees include local schools, community groups, friends' groups, community councils and after school clubs.

8. Background reading/external references

- 8.1 None.

9. Appendices

- 9.1 Appendix 1 – Play Area Investment
- 9.2 Appendix 2 – Play Areas and SIMD
- 9.3 Appendix 3 - Play Area Inclusion and Accessibility Assessment
- 9.4 Appendix 4 – Play Area Investment Planned
