Tables and Chairs Permits – minimum clear distance

2. Executive Summary

- 2.1 This report responds to an adjusted motion approved by Transport and Environment Committee on 20 June 2024 and considers the implications of the Edinburgh Street Design Guidance on the implementation of tables and chairs permits.

3. Background

- 3.1 The Council's Tables and Chairs Permit scheme seeks to balance the needs of pedestrians and businesses to create an enjoyable and safe streetscape environment.
- 3.2 The Tables and Chairs Permit scheme is monitored and enforced by the Council's Street Enforcement Team.
- 3.3 On 20 June 2024, Committee approved an adjusted motion by Councillor Bandel on tables and chairs permits – minimum clear distance. The motion is set out below:
- 3.3.1 To note that the Council afforded businesses that sold food and/or drink the opportunity to place tables and chairs outside in a public area by means of Section 59 of the Roads (Scotland) Act 1984 (permitted obstruction of a public road).
- 3.3.2 To note that Edinburgh Street Design Guidance factsheet P3 Footways (version 1.1, last updated 2018) set out minimum clear zones where tables and chairs permits were requested, that these set out a preferred clear zone in areas of high footfall of 3m, a preferred minimum of 2m and an absolute minimum of 1.5m.
- 3.3.3 To note that some recent applications for a tables and chairs permit had been approved with only 1.4 metres of the pavement clear.
- 3.3.4 To request officers to bring forward within two cycles a report on the implementation of tables and chairs permits, including, but not limited to, the following:
- 3.3.4.1 A list of Tables and Chairs Permits granted in the last 12 months, and in each case setting out the minimum clear zone approved, and

where this fell below the preferred or absolute minimums, the reason for this.

- 3.3.4.2 A map, or list of roads as appropriate, which were considered to have 'high pedestrian flows' for the purposes of factsheet P3, and which should therefore benefit from minimum clear zones of 3m.
- 3.3.4.3 Any recommended adjustments to factsheet P3 or to relevant procedure documents, to ensure that both policy and procedure were respecting the transport hierarchy, were providing adequate space for disabled people, those with limited mobility and those with buggies, and which were consistent.
- 3.3.4.4 Notes that the URL for 'the City of Edinburgh Council's Tables and Chairs Applying for a Permit: Consent Guidelines and Terms and Conditions, April 2016' contained in the Edinburgh Street Design Guidance factsheet P3 Footways was a dead link and to request that this be rectified.
- 3.3.5 To note that tables and chairs licence holders paid a license application fee which covered the costs of the process and that these were regulated; and to note further that this was in contrast to some retailers, particularly in the city centre, who obstructed pavements with product display stands and other street clutter, without paying for or applying for a licence to do so and which therefore had an unregulated nature.
- 3.3.6 To request therefore that the report also covers measures which could be pursued to reduce this nuisance.
- 3.3.7 To agree to refer the motion to the Regulatory Committee for information given its role in determining applications where there is a recommendation for refusal by the Director of Place requesting that gives due consideration to the terms of this motion.

4. Main report

Tables and Chairs Permits

- 4.1 The Council administers tables and chairs permit applications. These permits enable businesses to put tables and chairs on the pavement between 9am and 9pm, seven days a week.
- 4.2 Charges for permits vary depending on the areas to be occupied and also by location (a higher charge per square metre applies to permits in the World Heritage Site).
- 4.3 In assessing applications for tables and chairs permits, the Council has historically applied a minimum 1.4 metre clear distance for pedestrians. This complies with the Disability Discrimination Act which stipulates a minimum of 1.2 metres to be protected around any obstacles.

- 4.4 However, the Edinburgh Street Design Guidance suggests a standard of 1.5 metres minimum clear distance be applied.
- 4.5 From 1 July 2024, the Street and Environmental Enforcement team are applying 1.5 meters minimum clear distance to all new and renewal applications. However, it is not proposed to retrospectively review existing premises until a renewal is requested.

Permit Records

- 4.6 A list of Tables and Chairs Permits issued in the last 12 months is provided in Appendix 2.
- 4.7 The Council's record of existing permits provides information regarding the size of area occupied by tables and chairs but does not record the size of the remaining pedestrian access area.
- 4.8 In considering an application for a Tables and Chairs Permit, officers will measure that there is a minimum 1.5m footway clear for the entire length of the area which the application covers. This measurement is taken to the nearest obstruction.
- 4.9 Based on the information recorded, it is not possible to estimate how many premises do not comply with a 1.5 metre clear distance requirement (or will be unable to do so when their permit is due for renewal).
- 4.10 However, officers believe that there are likely to be a number of streets where the 1.5 metre clear distance requirement will have implications for future permit applications (which will no longer be granted a permit for a tables and chairs area if they are unable to maintain the 1.5 metre clear distance).
- 4.11 This is likely to mean that there will be fewer permits issued, which will in turn reduce the income received by the Council.

Pedestrian Flows and Guidance

- 4.12 The Council does not hold a map of list of roads considered to have 'high pedestrian flows'.
- 4.13 On 1 February 2024, Committee considered a report on Our Future Streets. This focused on a place-based approach to the city's future streets, to create better conditions for walking/wheeling, cycling and public transport. The desired walking and wheeling network map and the principles for walking and wheeling are attached in Appendix 1.
- 4.14 The [Integrated Network Map](#) for our Future Streets is published on the Council website.
- 4.15 As part of the Edinburgh Street Design Guidance, a [map of street types](#) has been published. Officers have reviewed [Factsheet P3](#) in the Edinburgh Street Design Guidance and have concluded that there are no amendments recommended at this time. The request of Committee (as outlined in paragraph 3.3.4.3) has been shared with Planning colleagues for consideration when the Edinburgh Street Design Guidance factsheets are due to be reviewed/updated.

5. Next Steps

- 5.1 From 1 July 2024, all new and renewal applications for tables and chairs permits will be assessed to ensure a 1.5 metre minimum clear distance is maintained.
- 5.2 An update will be provided to Committee in September 2025 on the number of permits issued over the next 12 months.

6. Financial impact

- 6.1 In 2023/24, income of £780,000 was generated from tables and chairs permits.
- 6.2 A reduction in the number of permits issued is expected to lead to a reduction in the income received by the Council if permit charges remain static.

7. Equality and Poverty Impact

- 7.1 One of the purposes of the enhanced Edinburgh Street Design Guidance is to ensure that the city is an accessible and enjoyable space for all. Streets which are accessible are particularly beneficial to people with reduced mobility, wheelchair users and prams.
- 7.2 The Tables and Chairs Permit scheme aims to ensure that public spaces remain accessible whilst balancing the needs of businesses. Applying stricter guidance is likely to reduce the number of permits issued which will have implications for some businesses.

8. Climate and Nature Emergency Implications

- 8.1 As a public body, the Council has statutory duties relating to climate emissions and biodiversity. The Council

“must, in exercising its functions, act in the way best calculated to contribute to the delivery of emissions reduction targets”

(Climate Change (Emissions Reductions Targets) (Scotland) Act 2019), and

“in exercising any functions, to further the conservation of biodiversity so far as it is consistent with the proper exercise of those functions”

(Nature Conservation (Scotland) Act 2004)

- 8.2 The City of Edinburgh Council declared a Climate Emergency in 2019 and committed to work towards a target of net zero emissions by 2030 for both city and corporate emissions and embedded this as a core priority of the Council Business Plan 2023-27. The Council also declared a Nature Emergency in 2023.

Environmental Impacts

- 8.3 There are no impacts on climate change or climate change mitigation as a result of this report. There are unlikely to be significant positive or negative impacts on the natural environment as a result of this report.
- 8.4 An efficiently managed Tables and Chairs Permit scheme can contribute to a more vibrant and enjoyable local environment.

9. Risk, policy, compliance, governance and community impact

- 9.1 As noted in Section 4, the Council does not currently record the number of permits where the minimum clear distance is less than 1.5m. Officers will provide an update to Committee in September 2025 on the number of permits issued over the next 12 months.
- 9.2 It is also not possible to quantify the impact on income to the Council arising from the change in minimum clear distance being applied. An update on the income received in 2024/25 will be provided in September 2025.

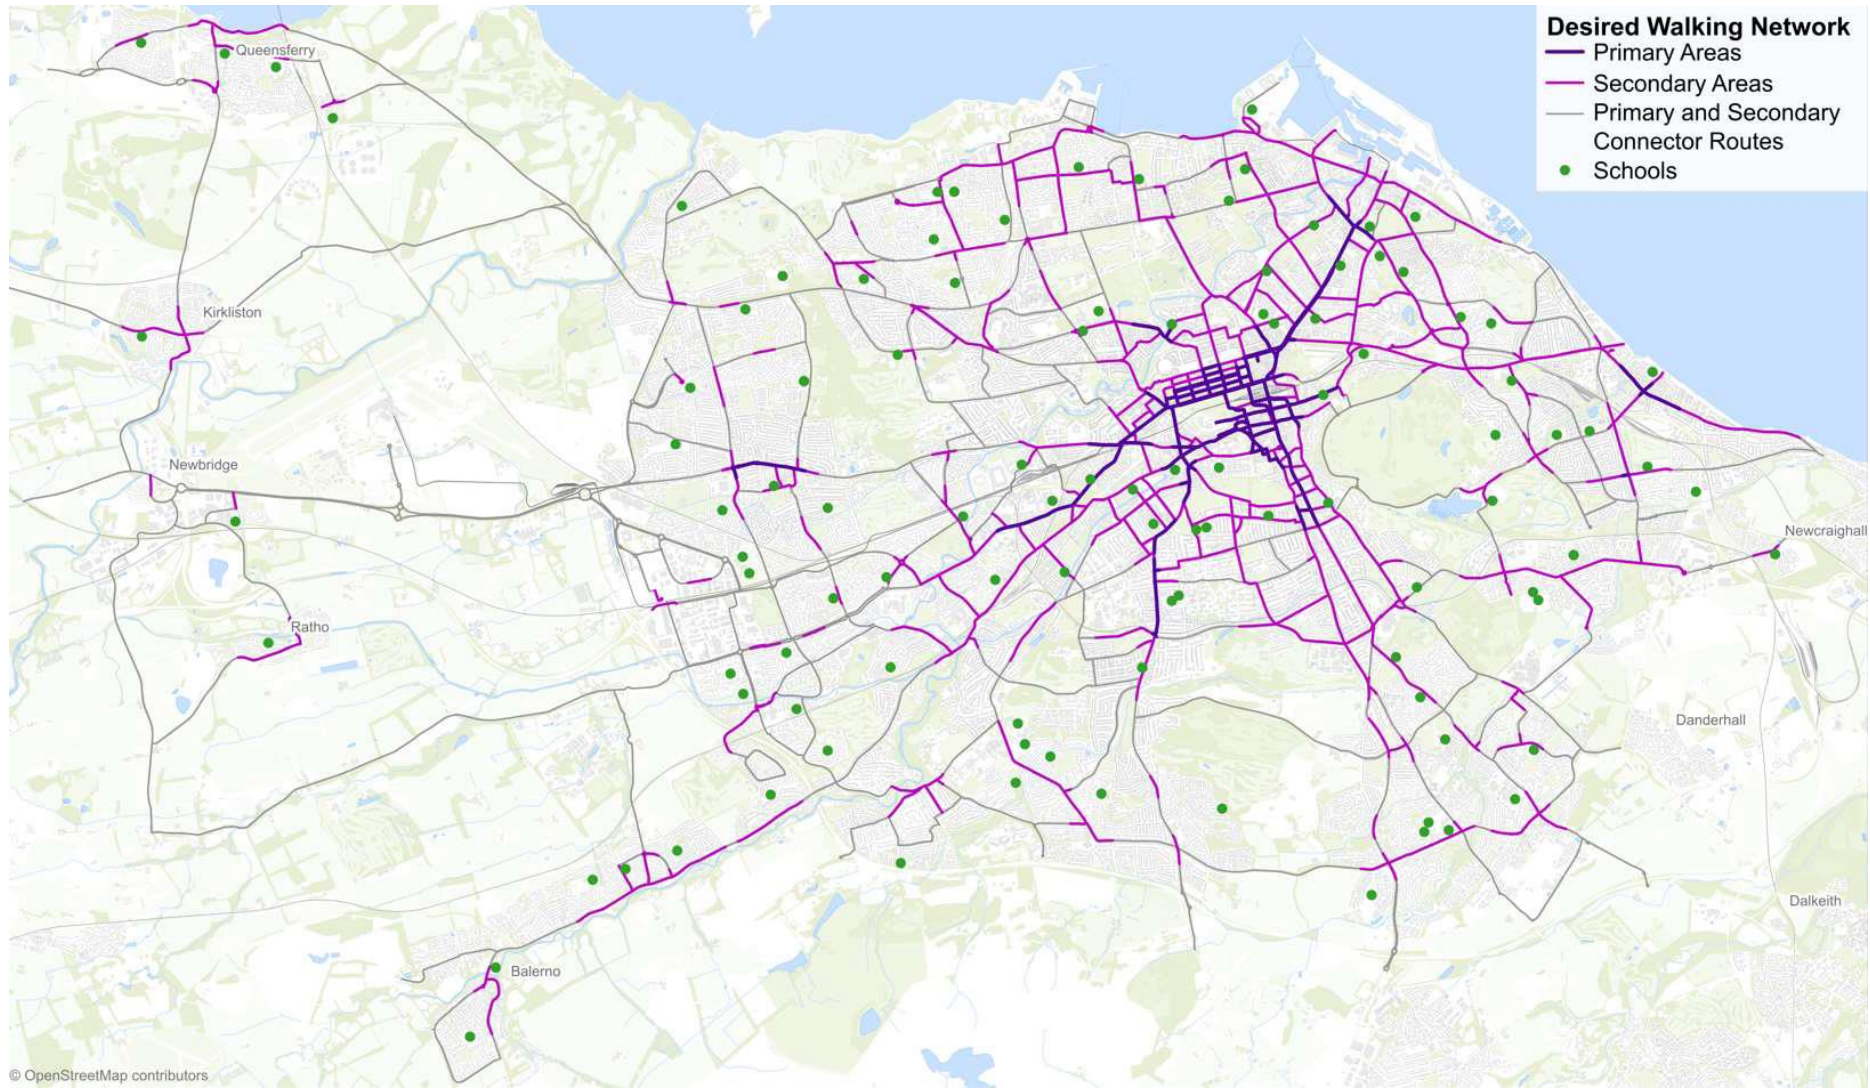

10. Background reading/external references

- 10.1 None.

11. Appendices

- Appendix 1 Our Future Streets Desired Walking and Wheeling Network and Principles of Walking and Wheeling
- Appendix 2 List of Tables and Chairs Permits issued in the last 12 months.

Appendix 1 – Our Future Streets Desired Walking and Wheeling Network

Principles for walking and wheeling

Primary and secondary	<p>Prioritise the delivery of footway widths meeting the relevant level of service target and providing for pedestrian crossing movements over private motorised vehicular flow</p> <p>Seek to avoid any loss of pedestrian space to provide segregated cycling or bus priority.</p>
All locations	<p>Provide route options that everyone can feel safe using at all times</p> <p>Ensure accessibility requirements are met</p> <p>Avoid causing increases in public transport journey times, considered along whole routes</p>
