

# Development Management Sub-Committee Report

**Wednesday 6 November 2024**

**Application for Planning Permission  
East Princes Street Gardens, Princes Street, Edinburgh**

**Proposal: Installation of Edinburgh's Christmas 2024 at East Princes Street Gardens and The Mound precinct including Christmas market stalls, fairground rides, associated site infrastructure, illuminations and ancillary facilities.**

**Item – Committee Decision  
Application Number – 24/04436/FUL  
Ward – B11 - City Centre**

## **Reasons for Referral to Committee**

The application has been referred to the Development Management Sub-Committee because the application is of the wider public interest.

### **Recommendation**

It is recommended that this application be **Granted** subject to the details below.

### **Summary**

With reference to the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997 the proposal would result in minor harm to the setting of neighbouring listed buildings for the temporary period of time in which the development would exist on site. Notwithstanding, it is considered that there are significant economic and cultural benefits to the city resulting from the Christmas Festival, which arise principally because of it being located within the city centre where high footfall land uses are encouraged. The Christmas Festival will be an interesting additional feature of the city centre, that people from Edinburgh and beyond will benefit from. It will contribute positively to the life of the city and the vibrancy of the city centre. Moreover, the site is exceptionally well placed for public transport due to the central city centre location.

On balance, the benefits outweigh the short-term adverse impact that the proposal will have on the setting of neighbouring listed buildings and provide reasoned justification for granting planning permission for the proposed development on the site. With reference to the abovementioned Act, the proposal does not result in significant harm to the character and appearance of the conservation area.

The proposal does not result in significant harm to the character and appearance of the designed landscape or the Outstanding Universal Value (OUV) of the Old and New Towns of Edinburgh World Heritage Site. The proposed development is for a temporary period and will not have a long-term impact on the site and will not result in

significant harm to residential amenity. The proposals comply with the National Planning Framework 4 and the Edinburgh Local Development Plan.

The proposal, subject to the conditions stated, is considered to be acceptable. There are no detrimental impacts on equalities or human rights. There are no material considerations which outweigh this conclusion.

## **SECTION A – Application Background**

### **Site Description**

The site forms part of East Princes Street Gardens (EPSG) comprising parts of the top tier of the gardens and extends to include the paved hardstanding of the Mound Plaza and the walkway which enters EPSG from Waverley Bridge/ Market Street. Waverley Bridge lies to the east of the site whilst the Royal Scottish Academy lies directly to the west. Princes Street provides a boundary to the northern section of the site. The application site is designated as open space within the Edinburgh Local Development Plan 2016 (LDP).

There are numerous Category A listed buildings within the application site:

- Professor John Wilson Statue (LB27881);
- Adam Black Monument (LB27842);
- Scott Monument (LB27829);
- Dr David Livingstone Statue (LB27864).

In addition to this the following Category A listed buildings surround the application site:

- Royal Scottish Academy (LB27744);
- National Gallery of Scotland (LB27679); and
- Waverley Station and Waverley Bridge (LB30270).

The application site has numerous significant designations, as follows:

- Old and New Towns World Heritage Site;
- The northern section of the site lies within the New Town Conservation Area and the southern section which encompasses the walkway lies within the Old Town Conservation Area;
- Historic Garden and Designed Landscape: New Town Gardens and Dean;
- Special Landscape Area: Princes Street Gardens; and
- Local Nature Conservation Site.

### **Description Of The Proposal**

The application is for the installation of Edinburgh's Christmas 2024 including Christmas market stalls, fairground rides, light installation, associated site infrastructure, stores and ancillary facilities. Temporary planning permission is sought for a three year temporary basis to cover Edinburgh's Christmas activation periods in 2024, 2025 and 2026, in line with the current contract with City of Edinburgh Council.

The proposed timescale for 2024 is as follows:

- Set up: 28 October - 15 November 2024;
- Operational: 15 November 2024 - 4 January 2025;
- Take down: 5 January - 17 January 2025.

The market and attractions would be in operation daily from 1000 to 2200.

Remediation works are to be undertaken by the Council with the costs of these works met by the applicant.

The proposals within East Princes Street Gardens include the following:

- Up to 85 Market stalls;
- Fairground rides including the Big Wheel;
- Light installation/ illuminated walking trail;
- Ancillary site office stores and facilities.

Access to the event is for pedestrians only. Deliveries will take place outside the hours of operation and will be taken via Waverley Bridge with no direct delivery access to the market itself.

Waste collection is to be managed by a certified sub-contractor, collected daily. Separate waste facilities are to be made available for members of the visiting public and stallholders.

This proposal forms part of a suite of four applications for a Christmas Festival across the city centre. The three remaining applications are located at West Princes Street Gardens, George Street and St Andrew Square.

### **Supporting Information**

The following documents were submitted in support of this application and can be viewed on the Planning and Building Standards Online Services:

- Planning and Design Statement;
- Tree Protection Plan.

## Section B - Assessment

### Determining Issues

Due to the proposals relating to a listed building(s) and being within a conservation area, this report will first consider the proposals in terms of Sections 59 and 64 of the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997 (the "1997 Heritage Act"):

a) Is there a strong presumption against granting planning permission due to the proposals:

- I. harming the listed building or its setting? or
- II. conflicting with the objective of preserving or enhancing the character or appearance of the conservation area?

b) If the strong presumption against granting planning permission is engaged, are there any significant public interest advantages of the development which can only be delivered at the scheme's proposed location that are sufficient to outweigh it?

This report will then consider the proposed development under Sections 24, 25 and 37 of the Town and Country Planning (Scotland) Act 1997 (the 1997 Act):

Having regard to the legal requirement of Section 24(3), in the event of any policy incompatibility between National Planning Framework 4 (NPF4) & Edinburgh Local Development Plan 2016 (LDP) the newer policy shall prevail.

Do the proposals comply with the development plan?

If the proposals do comply with the development plan, are there any compelling material considerations for not approving them?

If the proposals do not comply with the development plan, are there any compelling material considerations for approving them?

In the assessment of material considerations this report will consider:

- equalities and human rights;
- public representations; and
- any other identified material considerations.

## **Assessment**

To address these determining issues, it needs to be considered whether:

### **a) The proposals harm the listed building or its setting?**

The following HES guidance is relevant in the determination of this application:

- Managing Change in the Historic Environment: Setting

The Managing Change guidance states setting can be important to the way in which historic structures or places are understood, appreciated and experienced. It can often be integral to a historic asset's cultural significance.

Setting extends beyond the property boundary or 'curtilage' of an individual historic asset into a broader landscape context. Development proposals should seek to avoid or mitigate detrimental impacts on the setting of historic assets.

The proposed market facilities and fairground rides would be located within close proximity to many listed buildings including those that are category A listed. The scale, positioning, form and design of the temporary structures would have a detrimental impact on the setting of the A-listed Royal Scottish Academy, the A-listed Scott Monument, the A listed Livingston Monument, the A listed John Wilson Monument and the A-listed Adam Black Monument.

The proposal has presented a Monument Protection Plan within its application which sets out the protection measures to secure the relevant statues which includes Heras fencing and red picket fencing.

Previous iterations of the Christmas market have operated on the site for a number of years during the festive season and have become characteristic of the setting of those listed buildings during the festive season. The proposal is for a temporary period of a known duration and the impact on the setting of these neighbouring listed buildings would be short term.

Dividing the event into four separate locations in the city has diminished the concentrated scale of the current proposal. The impact on a single environment has been reduced from previous years and consequently the impact on the heritage assets is not as profound.

Given that there would be harm to the setting of listed buildings, consideration is required to be given to whether there are significant material considerations that justify the development in this location; and if so, does this outweigh any adverse impacts.

It is considered that there are significant economic and cultural benefits resulting from the Christmas Festival, which arise because of it being located within the city centre where high footfall land uses are encouraged. The Christmas Festival will be an interesting additional feature of the city centre, that people from Edinburgh and beyond will benefit from. It will contribute very positively to the life of the city and the vibrancy of the city centre. It is likely to draw people to the city centre and therefore there will be economic benefit to surrounding businesses.

On balance, these benefits, which are significant material considerations, outweigh the temporary adverse impact that the proposal will have on the setting of the listed buildings and provide reasoned justification for granting planning permission for the proposed development on the site.

### **Conclusion in relation to the listed building**

The proposal would have a minor temporary adverse impact on the setting of the listed buildings. As the proposal is temporary and the development is non-permanent, it is therefore acceptable with regard to section 59(1) of the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997.

### **b) The proposals harm the character or appearance of the conservation area?**

The scale of the proposed temporary development is similar to the 2023 Christmas markets, yet smaller than previous years that operated solely within East Princes Street Gardens. More recently the development has been divided between four locations which has seen the effect of development being ameliorated. The size and form of development within an individual site has been reduced through spreading the market across various locations.

Between the reduction in scale and form, and the temporary nature of the development, the cumulative impact on the character and appearance of the conservation area is not significant enough to refuse planning permission.

Overall, the development does not conflict with the objective of preserving or enhancing the character or appearance of the conservation area.

### **Conclusion in relation to the conservation area**

Overall, the proposal would have a minor temporary adverse impact on the character and appearance of the New Town Conservation Area. As this effect is minor and temporary it is therefore acceptable with regard to Section 64 of the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997.

### c) The proposals comply with the development plan?

National Planning Framework 4 (NPF4) was adopted by the Scottish Ministers on 13 February 2023 and forms part of the Council's Development Plan. NPF4 policies supports the planning and delivery of Sustainable Places, Liveable Places and Productive Places and are the key policies against which proposals for development are assessed. Several policies in the Edinburgh Local Development Plan (LDP) are superseded by equivalent and alternative policies within NPF4. The relevant policies to be considered are:

- NPF4 Sustainable Place policies 4 and 7
- LDP Delivering the LDP policies Del 2;
- LDP Design policies Des 1, Des 4 and Des 5;
- LDP Environment policies Env 12 and Env 18; and
- LDP Shopping and Leisure policies Ret 7.

The non-statutory 'Listed Buildings and Conservation Area' guidance is a material consideration that is relevant when considering NPF 4 Policy 7.

#### Listed Buildings

The impact on surrounding listed buildings and the conservation area has been assessed above and complies with NPF4 Policy 7.

#### Conservation Area

As discussed, the effect on the New Town Conservation Area would be detrimental, however this effect is mitigated through the temporary nature of the development. Therefore, the cumulative impact on the character and appearance of the conservation area is not significant enough to refuse planning permission.

Overall, the development does not conflict with the objective of preserving or enhancing the character or appearance of the conservation area, allowing it to comply with NPF4 Policy 7.

#### World Heritage Site

NPF4 states that "development proposals affecting a World Heritage Site or its setting will only be supported where their Outstanding Universal Value is protected and preserved".

Edinburgh World Heritage was consulted and noted that the proposals would constitute considerable harm to the OUV of the World Heritage Site. However, due to the temporary nature and fewer structures than previous years they have not objected to the proposals.

Due to the size, scale, positioning, form and the design and appearance, the proposal would temporarily impact on key views within the World Heritage Site. Notwithstanding, by splitting the event into four separate events across the city, the scale of the proposal is relatively small and consequently the impact on the heritage assets is not profound. Given this and the fact that the proposal is for a temporary period of a known duration,

the impact on the OUV of the World Heritage Site would be short term and not significantly detrimental.

In addition to the other three Christmas events currently proposed by the applicant, owing to its size, form and temporary nature the cumulative impact on the character and appearance of the OUV of the WHS is not significant.

Therefore, given the temporary nature of the proposal and the contribution to the City's cultural offering and economic recovery, it is considered to comply with NPF4 Policy 7.

### Historic Gardens and Designed Landscapes

The Princes Street Gardens are protected as Designed Landscape, Historic Gardens and Special Landscape Area within the Local Development Plan to preserve the fabric of the city's historic green spaces and landscaping. Owing to the proposal's size, scale, positioning, form and their design and appearance, the temporary structures would disrupt key views within the Designed Landscape, Historic Gardens and thus would harm the character and appearance of the Designed Landscape and Historic Gardens.

On balance, the aforementioned benefits are considered to outweigh the temporary adverse impact that the proposal will have on the Historic Gardens and Designed Landscapes, justifying the proposal be granted for planning permission at this site.

### Alternative Locations

As the proposal is for a Christmas Festival within Edinburgh, it is appropriate that it is located in the city centre. Given its proximity to bus routes, bus station, tram and train, there are few locations with better connectivity. For example, the Meadows or George Square do not have such connectivity. Other locations in the city centre, given the large number of listed buildings throughout the city centre, are likely to give rise to similar impacts on other listed buildings. Therefore, the benefits realised by the market can only realistically be delivered at its proposed location within East Princes Street Gardens.

### Trees and Soft Landscaping

The current site area comprises significantly less areas of grass within the Garden than Christmas markets prior to 2020. Consequently, less soft landscaping restoration/remediation will be necessary at the end of the decommissioning phase than was required previously and the duration of restoration/remediation should be less. The ground to be restored/remediated will be unsightly and inaccessible to the public only temporarily. However, the effects are reversible and not considered to be significantly detrimental to amenity. The Council as landowner through non-planning related consents, including terms and conditions of a grant of a lease to the operator, would ensure that at the end of the decommissioning stage the land is restored expeditiously to a required specification. This would include the reinstatement of soft landscaping and the repair/replacement of any damaged kerbs and footways being made good at no cost to the Council.

Therefore, there is no requirement to secure restoration/remediation works through a planning condition for soft landscaping.

In regard to tree protection, a number of structures have been proposed within the site plan in close proximity to trees. A Tree Protection Plan has been submitted to ensure the trees are protected during construction, operation and decommissioning. A condition is attached to the planning permission, that stipulates the applicant must implement tree protection measures before development on site begins. With this condition it is considered that the proposal will comply with LDP Policy Env 12.

### Use

The site is located within the City Centre in the Local Development Plan. It is considered the proposal can be well integrated into the surrounding environment. The proposal is located within a central location which is considered easily accessible by various sustainable modes of transport and no parking will be provided.

The LDP supports a mix of uses appropriate to the location of the site, the accessibility and the character of the surrounding area. Development which lies within the City Centre will be supported which retains and enhances its character, attractiveness, vitality and accessibility, whilst contributing to its role as a strategic business and regional shopping centre and Edinburgh's role as a capital city.

There are no development plan policies or non-statutory guidelines that directly relate to proposals for outdoor markets/attractions.

The proposal would not prevent the continued existing use of the public garden or the remainder of Princes Street Gardens. The effect of the proposed development on the leisure value and enjoyment of the part of the Gardens comprising the site and the Mound Plaza as a civic space is not permanent and is reversible. The temporary change of use of the site would not result in the permanent loss of open space and does not conflict with the key principles of LDP Policy Env 18.

The principle of development is considered acceptable given the temporary nature of the proposal and is supported in this location. The proposal will help the city centre fulfil its role as a capital city. Given that the proposed Christmas Festival is temporary there is no conflict with the key principles of LDP Policy Del 2 or Ret 7.

### Amenity

Due to the nature of the proposal, there will be amplified music and a large number of people attending, including in the evening. The site is however within a city centre location and the proposal is for a temporary period. The Council's Environmental Protection Section previously advised that if any complaints about noise were received, they would address this directly with the event organiser.

The applicant has confirmed that a private waste collection service, will be in place for the development. Waste will be collected daily, at pre-arranged times as agreed with the Council. Waste will be streamed on site into waste, mixed recycling and glass.

It is considered that the proposal complies with LDP Policy Des 5.

## Transport

No roads are required to be closed to facilitate the proposed development. The proposal raises no road safety or pedestrian safety issues including in respect of the number and location of entrance and exit points and access for wheelchair users. Access to the remainder of the gardens including for pedestrians and wheelchair users will be maintained.

Due to proximity of the proposal to the tram network, the applicant must obtain authorisation to agree a safe system of work with Edinburgh Trams. An informative has been recommended to this effect.

The site is exceptionally well placed for public transport and is located next to a local centre where high footfall land uses are encouraged. Consequently, the proposal does not raise any significant parking issues or public transport issues.

## Archaeology

No groundworks are required to facilitate the proposal and therefore there is no potential for impacts on underground archaeology.

## **Conclusion in relation to the Development Plan**

Overall the proposals comply with the Local Development Plan and given the temporary nature of the proposal, is supported in this location. There are no material considerations that would outweigh this conclusion.

### **d) There are any other material considerations which must be addressed?**

The following material planning considerations have been identified:

#### Emerging policy context

On 5 April 2024 the Planning and Environmental Appeals Division published its report into the examination of the Proposed City Plan 2030 and supporting documents in terms of Section 19 of the Town and Country Planning (Scotland) Act 1997. On 27 June 2024 the Council accepted the recommendations and modifications required to the Proposed City Plan 2030.

On 10 September 2024 Scottish Ministers issued a Direction under section 20(5) of the Town and Country Planning Scotland Act 1997 that City of Edinburgh Council consider modifying the proposed City of Edinburgh Local Development Plan 2, City Plan 2030 as detailed within the annex to the direction. The required modifications are being reviewed and will be considered at a further meeting of the Planning Committee and then further Full Council.

At this time in the context of the consideration of this particular application limited weight can be given to the relevant policies of City Plan 2030 until the adoption of the plan.

## Equalities and human rights

Due regard has been given to section 149 of the Equalities Act 2010. No impacts have been identified.

Consideration has been given to human rights. No impacts have been identified through the assessment and no comments have been received in relation to human rights.

## Public representations

A total of four representations were received and these are summarised below:

### *material considerations*

- reduction in pavement width due to hoarding which is unsafe - roads and access issues are addressed in section B c);
- concerns over construction and delivery access - the Roads Authority were consulted and have raised no issues with this.
- Against the use of greenspace for this proposal due to the increase of crowds and use of space for commercial gain - the principle of use is addressed in section B c);
- Against the proposal for a 3 year period - this is considered acceptable due to the similarity in the proposal each year.

## **Conclusion in relation to identified material considerations**

The proposal fully addresses the material considerations as set out above.

## **Overall conclusion**

The proposal is acceptable in terms of the Planning (Listed Buildings and Conservation Areas) (Scotland) Act 1997 and complies with the development plan.

The development will have a minor temporary effect on the immediate listed buildings and conservation area. The Christmas markets, rides and associated kiosks will bring an interesting additional feature to the city centre, that people from Edinburgh and beyond will benefit from. It will contribute positively to the life of the city and the vibrancy of the city centre. Moreover, the site is exceptionally well placed for public transport.

On balance, these benefits are a considerable material consideration and outweigh the short-term adverse impact that the proposal will have on the setting of listed buildings, historic green spaces and they provide reasoned justification for granting planning permission for the proposed development on the site. With reference to the abovementioned Act the proposal does not result in significant harm to the character and appearance of the conservation area.

The proposal does not result in significant harm to the Outstanding Universal Value of the Old and New Towns of Edinburgh World Heritage Site. The proposed development is for a temporary period and will not have a long-term impact on the site and will not result in significant harm to residential amenity. The proposals comply with the

Edinburgh Local Development Plan and NPF4. The proposal, subject to the conditions stated, is considered to be acceptable.

The proposed temporary nature of the development is considered acceptable in this location. There are no material considerations which outweigh this conclusion.

## **Section C - Conditions/Reasons/Informatives**

The recommendation is subject to the following;

### **Conditions**

1. The development hereby approved shall be permitted during the time period of 28 October 2024 - 17 January 2025 (81 days) and all structures shall be removed from the site by 17 January 2025. An 81 day period within a similar timeframe to facilitate the Edinburgh Christmas Festival infrastructure is also approved for 2025 and 2026. The dates shall be submitted to the Planning Authority prior to the use being taken up in 2025 and 2026.
2. The temporary market and other attractions hereby approved shall only be operational between the hours of 10am and 10pm daily.
3. The temporary buildings, attractions, installations and associated temporary structures and plant hereby approved shall be removed from the site in their entirety by no later than 17 January 2025.
4. Prior to the commencement of the development the proposed tree protection measures shall be implemented prior to the installation of any structures within the vicinity of trees. Confirmation of agreement shall be submitted to the Council as Planning Authority.
5. Access shall be made available to the Officers of the Council's Parks and Greenspace Team or a representative authorised by them, to carry out site survey/ monitoring checks of the tree protection measures.
6. Prior to the development commencing the operator shall submit a detailed lighting plan to the Planning Authority for approval.

### **Reasons**

1. In recognition of the temporary nature of the proposal.
2. In the interests of safeguarding the amenity of neighbouring noise sensitive properties.
3. In recognition of the temporary nature of the proposal.
4. In the interests of safeguarding trees which make a significant contribution to the character and amenity of the area and comply with LDP Policy Env 12.

5. In the interests of safeguarding trees which make a significant contribution to the character and amenity of the area and comply with LDP policy Env 12.

## **Informatives**

It should be noted that:

1. No development shall take place on the site until a 'Notice of Initiation of Development' has been submitted to the Council stating the intended date on which the development is to commence. Failure to do so constitutes a breach of planning control, under Section 123(1) of the Town and Country Planning (Scotland) Act 1997.
2. As soon as practicable upon the completion of the development of the site, as authorised in the associated grant of permission, a 'Notice of Completion of Development' must be given, in writing to the Council.
3. The applicant should be aware of the potential impact of the proposed development on the Edinburgh Tram and the Building Fixing Agreement. Further discussions with the Tram Team will be required.

The proposed site is on or adjacent to the operational / proposed Edinburgh Tram. To ensure that work on or near the tramway is carried out safely, it is necessary to obtain authorisation to agree a safe system of work. It is a legal obligation to comply with the Authority to Work (AtW) process whilst working on or near the tramway.
